(2) Programs to develop training opportunities for:

(i) Persons in sparsely populated rural areas; and

(ii) Individuals migrating from farms to urban areas.

(3) Programs of effective vocational education for persons of limited English-speaking ability;

(4) Establishment of cooperative arrangements between public education and manpower agencies, designed to correlate vocational education opportunities with current and projected needs of the labor market; and

(5) Programs designed to broaden occupational aspirations and opportunities for youth, especially for youth who have academic, socioeconomic, or other handicaps. These programs include:

(i) Programs and project to familiarize elementary and secondary students with the broad range of occupations for which special skills are required and the requisites for careers in those occupations; and

(ii) Programs and projects to facilitate the participation of employers and labor organizations in postsecondary vocational education.

(6) Dissemination of the results of these contracts made under the authority of paragraphs (a) through (e), including employment of persons to act as disseminators, on a local level, of these results.

(Sec. 132(a); 20 U.S.C. 2352.)

(b) Every contract made by a research coordinating unit for the purpose of funding exemplary and innovative projects shall:

(1) Give priority to programs and projects designed to reduce sex bias and sex stereotyping in vocational education;

(2) To the extent consistent with the number of students enrolled in private nonprofit schools in the area to be served, whose educational needs are of the type which the program is designed to meet, make provision (in accordance with the requirements set forth in § 104.533) for the participation of these students in the programs; and also

(3) Provide that the Federal funds made available for exemplary and innovative programs to accommodate students in nonprofit private schools will

not be commingled with State or local funds.

(Sec. 132(b); 20 U.S.C. 2352.)

§ 104.707 Disposition of exemplary and innovative programs.

The State shall indicate in the annual program plan and accountability report covering the final year of financial support by the State for any exemplary and innovative program:

(a) The proposed disposition of the program when Federal support ends; and

(b) The means by which successful or promising programs will be continued and expanded within the State.

(Sec. 132(c); 20 U.S.C. 2352.)

§ 104.708 Use of funds for curriculum development programs.

The research coordinating unit may use funds available under section 130 of the Act directly or by contract for:

(a) Development and dissemination of vocational education curriculum materials for new and changing occupational fields;

(b) Development and dissemination of vocational education curriculum materials for:

(1) Handicapped persons;

(2) Disadvantaged persons (other than handicapped persons);

(3) Persons of limited English-speaking ability;

(c) Development and dissemination of curriculum and guidance and testing materials designed to overcome sex bias and sex stereotyping in vocational educational programs;

(d) Support services designed to enable teachers to meet the needs of individuals enrolled in vocational education programs traditionally limited to members of the opposite sex; and

(e) Development and dissemination of other curriculum materials designed to improve the State's vocational education programs.

(Sec. 133(a); 20 U.S.C. 2353.)

VOCATIONAL GUIDANCE AND COUNSELING

§ 104.761 Purpose.

The purpose of vocational guidance and counseling assistance is to improve the State's vocational education programs by providing support for vocational development guidance and counseling programs, services, and activities.

(Secs. 130(b)(4), 134(a); 20 U.S.C. 2350, 2354.)

§ 104.762 Conformity with five-year State plan.

(a) A State shall use not less than 20 percent of the Federal funds available under section 130 of the Act to support vocational development guidance and counseling programs, services, and activities.

(b) The expenditure of funds for this purpose shall be in accordance with the approved five-year State plan and annual program plan.

(Sec. 134; 20 U.S.C. 2354; Sen. Rept. 94-882, p. 80.)

§ 104.763 Kinds of programs, services, and activities.

Funds made available to a State under the vocational guidance and counseling program (section 134 of the Act) shall be used to support one or more of the following activities:

Guidance and counseling.

(a) Initiation, implementation, and improvement of high quality vocational guidance and counseling programs and activities;

(b) Vocational counseling for children, youth, and adults, leading to a greater understanding of educational and vocational options;

(c) Provision of educational and job placement programs and follow-up services for students in vocational education and for individuals preparing for professional occupations or occupations requiring a baccalaureate or higher degree. Follow-up services provided to baccalaureate or higher degree students shall be only for students enrolled on or after October 1, 1977;

(d) Vocational guidance and counseling training designed to acquaint guidance counselors with (1) the changing work patterns of women, (2) ways of effectively overcoming occupational sex stereotyping, and (3) ways of assisting girls and women in selecting careers solely on their occupational needs and interests, and to develop improved career counseling materials which are free;

(e) Vocational and educational counseling for youth offenders and adults in correctional institutions;

(f) Vocational guidance and counseling for persons of limited English-speaking ability;

(g) Establishment of vocational resource centers to meet the special needs of out-of-school individuals, including individuals seeking second careers, individuals entering the job market late in life, handicapped individuals, individuals from economically depressed communities or areas, and early retirees; and

(h) Leadership for vocational guidance and exploration programs at the local level.

(Implements Sec. 134(a); 20 U.S.C. 2354; Sen. Rept. No. 95-142.)

§ 104.764 Special emphasis.

Recipients of funds allocated by the State for programs, services, and activities listed in § 104.763 (a) or (b) shall use those funds, insofar as is practicable:

(a) To bring individuals with experience in business and industry, the professions, and other occupational pursuits into schools as counselors or advisors for students;

(b) To bring students into the work establishments of business and industry, the professions, and other occupations to acquaint students with the nature of work accomplished therein; and

(Sec. 134(b); 20 U.S.C. 2354.)

(c) To enable guidance counselors to obtain experience in business and industry, the professions, and other occupational pursuits which will better enable those counselors to carry out their guidance and counseling duties.

(Sec. 134(b); 20 U.S.C. 2354; Conf. Rept. No. 94-1701, p. 225.)

VOCATIONAL EDUCATION PERSONNEL TRAINING

§ 104.771 Purpose.

The purpose of vocational education personnel training is to improve the State's vocational education programs and the services which support those programs by improving the qualifications of persons serving or preparing to serve in vocational education programs.

(Sec. 135(a); 20 U.S.C. 2355.)

§ 104.772 Conformity with five-year State plan.

(a) The State may use funds available under section 130 of the Act to support vocational education personnel training programs.

(Sec. 135(a); 20 U.S.C. 2355.)

(b) In order to be eligible for support under section 130 of the Act, specific programs and projects of training must be in accord with the general plan for vocational education personnel training as set forth in the approved five-year State plan and annual program plan for vocational education.

(Sec. 130(b); 20 U.S.C. 2350.)

§ 104.773 Eligible participants.

Training may be provided to persons serving or preparing to serve in vocational education programs, including teachers, administrators, supervisors, and vocational guidance and counseling personnel.

(Sec. 135(a); 20 U.S.C. 2355.)

§ 104.774 Types of training.

Funds available to the State under section 130 of the Act may be used to support programs and projects designed to improve the qualifications of persons who are eligible under § 104.773, including (but not limited to) the following:

(a) Training or retraining for teachers, and supervisors and trainers of teachers, in vocational education in new and emerging occupations;

(b) In-service training for vocational education teachers and other staff members, to improve the quality of instruction, supervision, and administration of vocational education programs, and to overcome sex bias and sex stereotyping in vocational education programs;

(c) Provisions for exchange of vocational education teachers and other personnel with skilled workers or supervisors in business, industry, and agriculture (including mutual arrangements for preserving employment and retirement status and other employment benefits during the period of exchange), and the development and operation of coopera-

tive programs involving periods of teaching in schools providing vocational education and of experience in commercial, industrial, or other public or private employment related to the subject matter taught in such schools;

(d) Training to prepare journeymen in the skilled trades or occupations for teaching positions;

(e) Training, including in-service training, for teachers and supervisors and trainers of teachers in vocational education to improve the quality of instruction, supervision and administration of vocational education for persons who are disadvantaged, or handicapped, or who are of limited English-speaking ability, and to train or retrain counseling and guidance personnel to meet the special needs of these persons;

(f) Provision of short-term or regular-session institutes designed to improve the qualifications of persons entering or reentering the field of vocational education in new and emerging occupational areas in which there is a need for such personnel.

(Sec. 135(a); 20 U.S.C. 2355.)

§ 104.775 Grants or contracts.

The State board may make grants or contracts, in accordance with its five-year State plan and annual program plan, in support of both training and retraining programs and projects to provide:

(a) Both pre-service and in-service education; and

(b) Both regular-session (academic year) institutes and short-term institutes.

(Sec. 135(a)(6), (b); 20 U.S.C. 2355.)

§ 104.776 Stipends to trainees.

Within the limits set in paragraphs (c) through (f) of this section, the State board may, at its discretion, authorize payment of:

(a) Stipends to participating trainees in programs or projects supported under section 135 of the Act; and

(b) Allowances for other expenses for such trainees and their dependents.

(Sec. 135(b); 20 U.S.C. 2355.)

(c) *Part-time and short-term training.* For part-time training and for short-term training (for periods not in excess of the equivalent of ten working days), the upper limits of stipends per participant are:

(1) Per hour of actual training, a sum not in excess of the average amount earned per hour of teaching by full-time classroom teachers in the State;

(2) Per full day of training, a sum not in excess of six times the rate per hour set in paragraph (c)(1) of this section; and

(3) Per five-day week of training, a sum not in excess of five times the rate per day set in paragraph (c)(2) of this section.

(d) *Full-time academic year or summer session.* The upper limits for stipends per participant for full-time training are:

(1) Per academic year of approximately nine months, a sum not in excess of \$4500; and

(2) Per summer session of at least six weeks, a sum not in excess of \$900.

(e) *Other periods of full-time training.* For full-time training for periods of more than the equivalent of ten full days and less than six weeks, the stipend is limited to a sum calculated at a rate proportionate to \$500 per calendar month.

(f) *Other allowances.* In addition to the sum allowable under authority of paragraphs (c), (d), and (e) of this section, the State may make payments only as follows:

(1) For the cost of participant travel to and from training sites, a participant is allowed the same per-mile rate for automobile travel as an employee of the State educational agency;

(2) For support of dependents of participants, a sum not in excess of:

(i) \$675 per dependent for each academic year of full-time training; and

(ii) \$170 per dependent for full-time training during a summer session of at least six weeks.

(Implements Sec. 135(b); 20 U.S.C. 2355.)

GRANTS TO OVERCOME SEX BIAS AND SEX STEREOTYPING

§ 104.791 Purpose.

The purpose of grants under § 104.792 is to support activities which show promise of overcoming sex bias and sex stereotyping in vocational education.

(Secs. 130(b)(6), 136; 20 U.S.C. 2350, 2356.)

§ 104.792 Conformity with five-year State plan.

(a) A State may use funds available under section 130 of the Act to support grants to overcome sex bias and sex stereotyping in vocational education programs.

(Sec. 136; 20 U.S.C. 2356.)

(b) The expenditure of funds for this purpose shall be in accordance with the approved five-year State plan and annual program plan. The plans shall describe the types of projects to be funded.

(Sec. 130(b); 20 U.S.C. 2350.)

§ 104.793 Types of projects.

Funds may be used for projects such as:

(a) Research projects on ways to overcome sex bias and sex stereotyping in vocational educational programs;

(b) Development of curriculum materials free of sex stereotyping;

(c) Development of criteria for use in determining whether curriculum materials are free from sex stereotyping.

(d) Examination of current curriculum materials to assure that they are free of sex stereotyping; and

(e) Training to acquaint guidance counselors, administrators, and teachers with ways of effectively overcoming sex bias and sex stereotyping, especially in assisting persons in selecting careers according to their interests and occupational needs rather than according to stereotypes.

(Implements Sec. 136; 20 U.S.C. 2356.)

Subpart 4—Special Programs for the Disadvantaged

§ 104.801 Grants to States for special programs for the disadvantaged.

A State shall use the funds allocated to it from the separate authorization (section 102(b) of the Act) for special programs for the disadvantaged as defined in § 104.804 and Appendix A of these regulations.

(Sec. 140; 20 U.S.C. 2370.)

§ 104.802 Use of funds.

(a) A State shall use the funds available under § 104.801, in accordance with the approved five-year State plan and annual program plan, for special programs of vocational education for disadvantaged persons in areas of high concentration of youth unemployment or school dropouts.

(b) A State shall use the funds under § 104.801 to pay up to 100 percent of the cost of special programs for disadvantaged persons.

(c) Funds available under § 104.801 may be used in addition to funds made available to the State for basic grants (section 120 of the Act): *Provided*, That the funds are used to conduct special programs of vocational education for the disadvantaged to enable them to succeed in vocational education programs.

(Sec. 140; 20 U.S.C. 2370.)

§ 104.803 Students in nonprofit private schools.

A State may grant funds to eligible recipients only if:

(a) Provision (in accordance with the requirements set forth in § 104.533) has been made for the participation of students enrolled in nonprofit private schools in the area to be served whose educational needs are of the type which the program or projects involved is to meet, to the extent consistent with the number of such students; and

(b) Effective policies and procedures have been adopted which assure that Federal funds made available under this subpart to accommodate students in nonprofit private schools will not be commingled with State or local funds.

(Sec. 140(b)(2); 20 U.S.C. 2370.)

§ 104.804 Criteria of need and eligibility.

(a) The term "disadvantaged" means persons (other than handicapped persons) who:

(1) Have academic or economic disadvantages; and

(2) Require special services, assistance, or programs in order to enable them to succeed in vocational education programs.

(Sec. 195(16); 20 U.S.C. 2461.)

(b) "Academic disadvantage," for the purposes of this definition of "disadvantaged," means that a person:

(1) Lacks reading and writing skills;

(2) Lacks mathematical skills; or

(3) Performs below grade level.

(c) "Economic disadvantage," for the purposes of this definition of "disadvantaged," means:

(1) Family income is at or below national poverty level;

(2) Participant or parent(s) or guardian of the participant is unemployed;

(3) Participant or parent of participant is recipient of public assistance; or

(4) Participant is institutionalized or under State guardianship.

(Implements Sec. 140; 20 U.S.C. 2370.)

(d) Eligibility for participation in the special programs supported under § 104.801 is limited to persons who (because of academic or economic disadvantage):

(1) Do not have, at the time of entrance into a vocational education program, the prerequisites for success in the program; or who

(2) Are enrolled in a vocational education program but require supportive services or special programs to enable them to meet the requirements for the program that are established by the State or the local educational agency.

(Implements Sec. 140; 20 U.S.C. 2370.)

Subpart 5—Consumer and Homemaking Education

§ 104.901 Grants to States for consumer and homemaking education.

A State shall use the funds allotted to it from the separate authorization (section 102(c) of the Act) for programs of consumer and homemaking education.

(Sec. 150(a); 20 U.S.C. 2380.)

§ 104.902 Use of funds.

A State shall use the funds available under section 150 of the Act, in accordance with its approved five-year State plan and annual program plan, solely for:

(a) Programs in consumer and homemaking; and

(b) Ancillary services in relation to programs under paragraph (a) of this section.

(Sec. 150(b); 20 U.S.C. 2380.)

§ 104.903 Programs in consumer and homemaking education.

(a) Programs in consumer and homemaking education may be conducted at all educational levels (elementary, secondary, postsecondary or adult).

(b) Programs in consumer and homemaking education consist of instructional programs, services, and activities for the occupation of homemaking.

(c) Programs for the occupation of homemaking include (but are not limited to):

(1) Consumer education;

(2) Food and nutrition;

(3) Family living and parenthood education;

(4) Child development and guidance;

(5) Housing and home management (including resource management); and

(6) Clothing and textiles.

(Sec. 150(b); 20 U.S.C. 2380.)

§ 104.904 Purpose of programs in consumer and homemaking education.

A State shall set forth in the five-year State plan and annual program plan the programs in consumer and homemaking education which it intends to support. Funds available under section 150 of the Act shall only be provided to support programs in consumer and homemaking education which:

(a) Encourage participation of both males and females to prepare for combining the roles of homemakers and wage earners;

(b) Encourage elimination of sex stereotyping by promoting the development of curriculum materials which deal with:

(1) Increased numbers of women working outside the home;

(2) Increased numbers of men assuming homemaking responsibilities;

(3) Changing career patterns of men and women; and

(4) Appropriate Federal and State laws relating to equal opportunity in education and employment;

(c) Give greater consideration to economic, social, and cultural conditions and needs, especially in economically depressed areas and, where appropriate, to bilingual instruction;

(d) Encourage eligible recipients to operate outreach programs in communities for youth and adults, giving consideration to their special needs, such as (but not limited to):

(1) The aged;

(2) Young children;

(3) School-age parents;

(4) Single parents;

(5) Handicapped persons;

(6) Educationally disadvantaged persons;

(7) Programs connected with health care delivery systems, such as providing parenthood education, nutrition education and consumer education; and

(8) Programs providing services for courts and correctional institutions, such as providing child development and guidance programs for short term court offenders;

(e) Prepare males and females who have entered or are preparing to enter into the work of the home; and

(f) Emphasize the following areas in order to meet current societal needs:

(1) Consumer education;

(2) Management of resources;

(3) Promotion of nutritional knowledge and food use; and

(4) Promotion of parenthood education.

(Sec. 150(b); 20 U.S.C. 2380.)

§ 104.905 Ancillary services.

A State may use funds available under section 150 of the Act to provide ancillary services, activities, and other means of assuring quality in all consumer and homemaking education programs. These ancillary services may include (but are not limited to): (a) Teacher training; (b) teacher supervision; (c) curriculum development; (d) research; (e) program evaluation; (f) special demonstration

and experimental programs; (g) development of instructional materials; (h) exemplary projects; (i) provision of equipment; (j) State administration and leadership; and (k) guidance and counseling.

(Implements sec. 150(b)(2); 20 U.S.C. 2380.)

§ 104.906 Federal share.

(a) A State shall use funds appropriated under section 102(c) of the Act for section 150 of the Act to pay up to 50 percent of the cost of (1) programs in consumer and homemaking education under §§ 104.903 and 104.904 and (2) ancillary services and activities under § 104.905.

(b) A State shall use at least one-third of the funds available as stated in paragraph (a) to pay up to 90 percent of the cost of programs in economically depressed areas or areas with high rates of unemployment for program designed to: (1) Assist consumers; (2) help improve home environments; and (3) help improve the quality of family life.

(Sec. 150(c), (d); 20 U.S.C. 2380.)

PART 105—COMMISSIONER'S DISCRETIONARY PROGRAMS OF VOCATIONAL EDUCATION

GENERAL

Sec.
105.1 Scope.
105.2 Purpose.
105.3 Definitions.
105.4 Applicability of General Education Provisions Regulations.
105.5 Applicability of technical review criteria.

Subpart 1—Program Improvement

105.101 Purpose.
105.102 National center for research in vocational education.
105.103 Armed services curriculum materials.
105.104 Authorized activities.
105.105 Eligible applicants.
105.106 No cost sharing.
105.107 Duration of project support.
105.108 Improved teaching techniques or curriculum materials.
105.109 Exemplary and innovative projects.
105.110 Technical review criteria.
105.111 Additional application review factors.

Subpart 2—Indian Tribes

Sec.
105.201 Purpose.
105.202 Applicability of the Indian Self-Determination Act of 1975.
105.203 Definitions.
105.204 Assistance contracts.
105.205 Eligible applicants.
105.206 Applications for assistance contracts.
105.207 Review for duplication of effort.
105.208 No cost sharing.
105.209 Duration of awards.
105.210 Final reports.
105.211 Technical review criteria.
105.212 Additional factors for declining to contract.
105.213 Hearing by the Commissioner after declining to enter into a contract.
105.214 Remaining funds.

Subpart 3—Training and Development Programs for Vocational Education Personnel

LEADERSHIP DEVELOPMENT AWARD PROGRAM
105.301 Purpose.
105.302 Leadership development awards.

Sec.
105.303 Equitable geographical distribution.
105.304 Eligibility of individuals.
105.305 Application procedures.
105.306 Stipends to individuals.
105.307 Conditions for continued eligibility.
105.308 Payment conditioned on appropriation.
105.309 Technical review criteria.
105.310 Assignment to approved institution.
105.311 Institutional eligibility and approval.
105.312 Institutional allowance.

VOCATIONAL EDUCATION CERTIFICATION FELLOWSHIP PROGRAM

105.431 Purpose.
105.432 Awards to two categories of fellows.
105.433 Fellowship period.
105.434 Application procedures.
105.435 Equitable geographical distribution.
105.436 Stipends to fellows.
105.437 Conditions for continued eligibility.
105.438 Payment conditioned on appropriation.
105.439 Institutional allowance.
105.440 Institutional eligibility and approval.
105.441 Teaching fields in need of additional teachers.
105.442 Content of applications.
105.443 Technical review criteria.

Subpart 4—Emergency Assistance for Remodeling and Renovating of Vocational Education Facilities

105.501 Purpose.
105.502 Eligible applicants.
105.503 Content of applications.
105.504 Submission of applications through the State board.
105.505 Technical review criteria.
105.506 Payments to local educational agencies.
105.507 Construction requirements.

Subpart 5—Bilingual Vocational Education

BILINGUAL VOCATIONAL TRAINING PROGRAM
105.601 Purpose.
105.602 Eligible programs.
105.603 Eligible applicants.
105.604 Applications for grants or contracts.
105.605 Review of applications.
105.606 Technical review criteria.
105.607 Additional application review factors.

BILINGUAL VOCATIONAL INSTRUCTOR TRAINING PROGRAM

105.611 Purpose.
105.612 Eligible programs.
105.613 Eligible applicants.
105.614 Applications for grants or contracts.
105.615 Review of applications.
105.616 Technical review criteria.
105.617 Additional application review factors.

BILINGUAL VOCATIONAL INSTRUCTIONAL MATERIALS, METHODS, AND TECHNIQUES PROGRAM

105.621 Purposes.
105.622 Eligible programs.
105.623 Eligible applicants.
105.624 Applications for grants or contracts.
105.625 Review of applications.
105.626 Technical review criteria.
105.627 Additional application review factors.

AUTHORITY: Secs. 101–195 of Title II of Pub. L. 94–482 as further amended by Pub. L. 95–40 (20 U.S.C. 2301 to 2461), unless otherwise noted.

GENERAL

§ 105.1 Scope.

Part 105 contains regulations interpreting or implementing Part B (entitled "National Programs") of Title I of the Vocational Education Act of 1963, as amended by section 202 of Title II of the Education Amendments of 1976, Pub. L. 94–482 (referred to as "the Act"). Part 105 also contains regulations interpreting or implementing the Commissioner's discretionary program of contracts with Indian tribes contained in section 103 (a) (1) (B) of the Act.

(Sec. 103(a)(1)(B); Secs. 171 through 195; 20 U.S.C. 2303, 2401 et seq.)

§ 105.2 Purpose.

The purpose of Part 105 is to set forth the regulations which govern the Commissioner's discretionary programs of grants and contracts for vocational education.

(Secs. 171 through 195; 20 U.S.C. 2401 et seq.)

§ 105.3 Definitions.

The definitions common to all parts of the Act are contained in section 195 of the Act. These definitions and additional definitions necessary for the State vocational education programs are set forth in Appendix A of Part 104. Definitions necessary only for Part 105 are set forth in this Part 105 in the subparts in which they apply.

(Sec. 195; 20 U.S.C. 2461.)

§ 105.4 Applicability of General Education Provisions Regulations.

Provisions in Parts 100 and 100a of the General Education Provisions Regulations (45 CFR Parts 100 and 100a), entitled "General Provisions for Office of Education Programs," are applicable to programs under this Part 105.

(45 CFR Parts 100, 100a.)

§ 105.5 Applicability of technical review criteria.

(a) The technical review criteria in § 105.110 for Program Improvement and in § 105.626 for Bilingual Vocational Instructional Materials, Methods, and Techniques Program apply to the review of applications submitted for grants only.

(b) The evaluation of proposals submitted for procurement contracts for the two programs identified in paragraph (a) of this section are made in accordance with the Federal Procurement Regulations, Title 41, Code of Federal Regulations, Chapters 1 and 3. Technical review criteria that are consistent with the Act will be developed for each procurement contract and will be set forth specifically in the Request for Proposal (RFP) for the particular contract. These criteria will be consistent with the Act and the regulations. The RFP will be announced in the Commerce Business Daily (CBD).

(45 CFR Chapters 1 and 3.)

Subpart 1—Program Improvement

§ 105.101 Purpose.

The purpose of program improvement is to support projects for the improvement of vocational education and a national center for research in vocational education as authorized in section 171 of the Act. Funds available to the Commissioner for program improvement under section 103 of the Act will be used primarily for contracts and in some cases for grants.

(Secs. 103, 171; 20 U.S.C. 2303, 2401.)

§ 105.102 National center for research in vocational education.

(a) The Commissioner will support a national center for research in vocational education. The center (a non-profit agency) will be chosen once every five years. The Commissioner will appoint an advisory committee to assist the center. The center shall have such research locations, including contracts with one or more regional research centers, as shall be determined by the Commissioner after consultation with the national center and its advisory committee taking into consideration the vocational education research resources available, geographical area to be served, and the schools, programs, projects, and students and areas to be served by research activities.

(b) The center shall directly or through other public agencies:

- (1) Conduct applied research and development on problems of national significance in vocational education;
- (2) Provide leadership development through an advanced study center and in-service education activities for State and local leaders in vocational education;
- (3) Disseminate the results of research and development projects funded by the center;
- (4) Develop and provide information to facilitate national planning and policy development in vocational education;
- (5) Act as a clearinghouse for information on projects supported by the States and the Commissioner and compile an annotated bibliography of research, exemplary and innovative projects, and curriculum development projects assisted with funds made available under this Act since July 1, 1970; and
- (6) Work with States, local educational agencies, and other public agencies in developing methods of evaluating programs, including the follow-up studies of program completers and leavers required by section 112 of the Act, so that these agencies can offer job training programs which are more closely related to the types of jobs available in their communities, regions, and States.

(Sec. 171(a)(2); 20 U.S.C. 2401.)

§ 105.103 Armed services curriculum materials.

The Commissioner will make contracts to convert to use in local educational agencies, private nonprofit schools, and other public agencies curriculum materials involving job preparation which have been prepared for use by the armed services of the United States.

(Sec. 171(b)(3); 20 U.S.C. 2401.)

(a) The Commissioner will make a contract for an exemplary and innovative project only if the project provides for the participation of students enrolled in nonprofit private schools consistent with:

(1) The number of such students in the area to be served by the project; and

(2) The educational needs of those students is of the type which the project involved is to meet.

(b) The contract shall provide that the Federal funds will not be commingled with State or local funds.

(Sec. 171(b)(2); 20 U.S.C. 2401.)

§ 105.104 Authorized activities.

(a) The Commissioner will support projects of national significance for improvement of vocational education. The projects include the following activities as authorized in sections 131 through 136 of the Act:

- (1) Research (section 131 of the Act);
- (2) Exemplary and innovative programs (section 132 of the Act);
- (3) Curriculum development (section 133 of the Act);
- (4) Vocational guidance and counseling (section 134 of the Act);
- (5) Vocational education personnel training (section 135 of the Act); and
- (6) Grants to assist in overcoming sex bias and sex stereotyping (section 136 of the Act).

(b) Functions under the above may include: applied research and development; experimental and pilot programs; curriculum revision and development; demonstration, dissemination, and utilization of research and development products; personnel training; and evaluation.

(Secs. 131 through 136, 171(a)(1); 20 U.S.C. 2351–56, 2401.)

§ 105.105 Eligible applicants.

(a) Eligible applicants for project support include:

- (1) Public organizations, institutions, and agencies;
- (2) Nonprofit and profit-making private organizations, institutions, and agencies; and
- (3) Individuals.

(b) Profit-making private organizations, institutions, and agencies, and individuals are eligible for contracts only.

(c) Eligible applicants for the national center for research in vocational education include nonprofit agencies only.

(Interprets Sec. 171; 20 U.S.C. 2401.)

§ 105.106 Cost sharing.

No cost sharing is required. The Commissioner may pay all or part of the cost.

(Interprets Sec. 171(b)(5)(A); 20 U.S.C. 2401.)

§ 105.107 Duration of project support.

The Commissioner will not support a project for a period to exceed three fiscal years.

(Sec. 171(b)(5)(B); 20 U.S.C. 2401.)

§ 105.108 Improved teaching techniques or curriculum materials.

The Commissioner will not make a grant pursuant to § 105.104 unless the applicant can demonstrate a reasonable probability that the grant will result in improved teaching techniques or curriculum materials that will be used in a substantial number of classrooms or other learning situations within five years after the termination date of the grant.

(Sec. 171(b)(1); 20 U.S.C. 2401.)

§ 105.109 Exemplary and innovative projects.

(a) The Commissioner will make a contract for an exemplary and innovative project only if the project provides for the participation of students enrolled in nonprofit private schools consistent with:

- (1) The number of such students in the area to be served by the project; and
- (2) The educational needs of those students is of the type which the project involved is to meet.

(b) The contract shall provide that the Federal funds will not be commingled with State or local funds.

(Sec. 171(b)(2); 20 U.S.C. 2401.)

§ 105.110 Technical review criteria.

The following criteria will be used in reviewing applications. These criteria are consistent with 45 CFR 100a.26, Review of Applications, in the General Provisions for Office of Education Programs. A segment or segments of an application should address each criterion. Each criterion is weighted and includes the maximum score that can be given to an application in relation to the criterion. The maximum score for the criteria is 100 points, and the maximum weight for each criterion is listed below. Applications that receive less than 50 points will not be funded.

(a) *National need.* (Maximum 15 points.) The need section clearly: (1) Describes the national need in vocational education for the proposed project; (2) Provides specific evidence of the need; (3) Indicates specifically who or what will be helped; and (4) Describes the problem rather than symptoms of the problem.

(b) *Literature review.* (Maximum 5 points.) The literature review is sufficiently comprehensive to:

- (1) Establish the basis for the problem;
- (2) Describe the problem in contrast to the symptoms of the problem;
- (3) Provide a strong conceptual framework for the proposed objectives and proposed plan, including the general design and specific procedures of the proposed plan, along with the management, evaluation, dissemination, and training procedures, when appropriate; and
- (4) Describe what has been done previously to alleviate the problem and point out the gaps that will be alleviated by this specific proposed work.

(c) *Objectives.* (Maximum 10 points.) The objectives are related to the problem and: (1) Are significant for vocational education; (2) Clearly describe proposed project outcomes; (3) Are capable of being attained; and (4) Are measurable.

(d) *Plan.* (Maximum 18 points.) The plan clearly describes: (1) The overall design for the proposed project; and (2) The specific procedures by which each objective will be accomplished. Normally the plan will include:

- (i) Precise definitions of terms; (ii) Description of the characteristics and number of subjects; (iii) Sampling procedures and control groups; (iv) Instru-

mentation; and (c) Statistical and analytical procedures.

(e) *Management plan.* (Maximum 8 points.) The management plan adequately describes the way in which personnel and resources will be used to accomplish each component of the plan developed in criterion (c).

(f) *Evaluation plan.* (Maximum 8 points.) The plan includes valid and reliable instruments and procedures for assessing and documenting the impact of project results and end products or outcomes in terms of the achievement of project goals and objectives.

(g) *Results, end products, outcomes, and dissemination.* (Maximum 10 points.) The application clearly describes:

(1) What will be delivered to the government; (2) The format in which the results, products, or outcomes will be delivered to the government;

(3) The way in which results, products, or outcomes will be developed or provided for dissemination purposes to specified user populations; and

(4) The procedures to be used in disseminating the results, end products, or outcomes at the local, State, and/or national levels.

(h) *Staff competencies and experience.* (Maximum 7 points.) The application clearly describes:

(1) The names and qualifications (including project management qualifications) of the project director; key professional staff, advisory groups, and consultants;

(2) Time commitments planned for the project by the project director, key staff, advisory groups, and consultants;

(3) Evidence of past and successful experience of the proposed project director and key staff members in similar or related projects;

(4) Use of professional staff members from minorities or women; and

(5) The competencies that are required for the proposed project.

(i) *Budget and cost effectiveness.* (Maximum 7 points.) The application provides a justifiable and itemized statement of cost which is substantiated by line items in the proposed budget and appears to be cost effective with respect to proposed results, products, or outcomes.

(j) *Institutional capability and commitment.* (Maximum 4 points.) The application provides adequate evidence of:

(1) Institutional or individual's experience and commitment to the proposed work;

(2) Appropriate facilities and equipment; and

(3) Assurance of support from cooperating agencies, local educational agencies, postsecondary institutions, business, industry, and labor, where applicable for successful implementation of the project.

(k) *Sex bias and stereotyping.* (Maximum 4 points.) The application provides appropriate plans to eliminate sex bias and stereotyping in the proposed results, end products, and outcomes, and the proposed dissemination plans.

(Implements Sec. 171; 20 U.S.C. 2401.)

§ 105.111 Additional application review factors.

In addition to the criteria listed in § 105.110, the Commissioner may utilize factors such as the following in making decisions regarding whether to fund applications: (a) Duplication of effort; (b) Duplication of funding; and (c) Evidence that an applicant has not performed satisfactorily on previous projects.

(Implements Sec. 171; 20 U.S.C. 2401.)

Subpart 2—Indian Tribes

CONTRACT PROGRAM FOR INDIAN TRIBES AND INDIAN ORGANIZATIONS

§ 105.201 Purpose.

The purpose of the program for Indian tribes and Indian organizations is for the Commissioner, at the request of an Indian tribe, to make a contract or contracts directly with Indian tribal organizations, with funds available under section 103(a)(1) of the Act, to plan, conduct, and administer programs, or portions thereof, which are authorized by and consistent with the Act, particularly section 103(a)(1)(B)(iii) of the Act.

(Sec. 103(a)(1); 20 U.S.C. 2303.)

§ 105.202 Applicability of the Indian Self-Determination Act of 1975.

(a) Any contract entered into under this subpart is subject to the provisions of sections 4, 5, 6, 7(b) and 102 of the "Indian Self-Determination and Education Assistance Act of 1975," Pub. L. 93-638.

(b) Regulations implementing the above sections of the Indian Self-Determination and Education Assistance Act, Title 25 of the Code of Federal Regulations, §§ 271.44, 271.46, 271.47, and 271.50 are applicable to the extent that they are relevant and practicable.

(c) Whenever the term "Secretary of the Interior" is used, in the Indian Self-Determination and Education Assistance Act, the term means, for the purposes of this subpart, "Commissioner of Education."

(Sec. 103(a)(1)(B)(iii); 20 U.S.C. 2303; 25 U.S.C. 450a, et seq.)

§ 105.203 Definitions.

(a) "Indian tribe" means any Indian tribe, band, nation, or other organized group or community, including any Alaskan native village or regional or village corporation as defined in or established pursuant to the Alaska Native Claims Settlement Act which is recognized as eligible for special programs and services provided by the United States to Indians because of their status as Indians.

(b) "Tribal organization" means the recognized governing body of any Indian tribe or any legally established organization of Indians which is controlled, sanctioned, or chartered by such governing body or which is democratically elected by the adult members of the Indian community to be served by the or-

ganization and which includes the maximum participation of Indians in all phases of its activities.

(25 U.S.C. 450b.)

§ 105.204 Assistance contracts.

Awards will be made competitively through assistance contracts governed by Subchapter A of Title 45, Code of Federal Regulations (entitled "General Provisions for Office of Education Programs"), except to the extent that appropriate sections of the Indian Self-Determination and Education Assistance Act of 1975 apply or to the extent that more specific regulations in this subpart apply. The criteria in 45 CFR 100a.26(b) do not apply to this program.

(Sec. 103(a)(1)(B)(iii); 20 U.S.C. 2303; 25 U.S.C. 450e(b).)

§ 105.205 Eligible applicants.

An Indian tribal organization of an Indian tribe which is eligible to contract with the Secretary of the Interior for the administration of programs under the Indian Self-Determination and Education Assistance Act of 1975 or under the Act of April 16, 1934, is eligible for assistance contracts.

(Sec. 103(a)(1)(B)(iii); 20 U.S.C. 2303; 25 U.S.C. 450f.)

§ 105.206 Applications for assistance contracts.

An application from an eligible tribal organization must be submitted to the Commissioner by the Indian tribe and must contain the information that the Commissioner requires. An application which serves more than one Indian tribe shall be approved by each tribe to be served in the application.

(Sec. 103(a)(1)(B)(iii); Pub. L. 93-638; 20 U.S.C. 2303; 25 U.S.C. 450b(c).)

§ 105.207 Review for duplication of effort.

An applicant shall submit a copy of the application directly to the Commissioner of the Bureau of Indian Affairs and the State board at the same time it submits an application to the Office of Education in order to avoid duplication of funding.

(Implements Sec. 103(a)(1)(B)(iii); 20 U.S.C. 2303.)

§ 105.208 No cost sharing.

No cost sharing by the applicant is required.

(Implements Sec. 103(a)(1)(B)(iii); 20 U.S.C. 2303.)

§ 105.209 Duration of awards.

(a) The total project period of an award may not exceed three years. The Commissioner may make multi-year awards if the nature of the project warrants multi-year funding. Continuation funding is contingent upon satisfactory performance. Application for multi-year awards shall have a detailed budget for the current year and total budget figures for the subsequent years.

(b) A request for continuation of a project beyond the project period will

be considered a new application and will be reviewed competitively with all other applications. In order for the Commissioner to make this determination, an applicant who has had a prior contract under this program shall include an evaluation of the previous project.

(Implements Sec. 103(a)(1)(B)(iii); 45 CFR 100a.432; 20 U.S.C. 2303.)

§ 105.210 Final reports.

The contractor shall submit final financial status and performance reports as the Commissioner shall request.

(45 CFR 100a.403; 45 CFR 100a.432; 20 U.S.C. 2303.)

§ 105.211 Technical review criteria.

The following criteria will be utilized in reviewing applications. These criteria are consistent with 45 CFR 100a.26(b). Review of Applications, in the General Provisions for Office of Education Programs. A segment or segments of an application should address each criterion. Each criterion is weighted and includes the maximum score that can be given to an application in relation to the criterion. The maximum aggregate score for the criteria is 100 points, and the maximum weight for each criterion is listed below in parentheses. Points will be awarded to the extent that evidence in the application satisfies each criterion. The review of these criteria shall constitute the basis for the Commissioner to enter or decline to enter into a contract with an eligible applicant. If the review of any application results in no recommendation to fund (where funds are available), this will mean that it is not satisfactory, as that term is used in the Indian Self-Determination Act (section 102). Applications must receive a minimum of 30 points to be considered for funding.

(a) *Program improvement.* (Maximum 15 points.) The application focuses on the improvement of occupational training opportunities for Indians and delineates the way in which the proposed program will contribute to improved programs for the specific target group.

(b) *Need.* (Maximum 10 points.) The need section clearly: (1) Describes the need for the proposed activity; (2) Provides specific evidence of the need; (3) Indicates specifically how the need will be met; and (4) Describes, where appropriate, ongoing and planned activities in the community relative to the need.

(c) *Objectives.* (Maximum 10 points.) The objectives: (1) Relate to the need; (2) Are significant for vocational education; (3) Clearly describe proposed program outcomes;

(4) Are capable of being attained; and

(5) Are measurable.

(d) *Plan.* (Maximum 15 points.) The plan clearly describes the way in which the objectives will be accomplished by:

(1) The overall design for the proposed program; and

(2) The use of specific procedures to implement activities designed to accomplish each objective of each segment of the proposed program;

(3) A description of: (i) Specific activities to be conducted in the proposed program;

(ii) Instruments to be used in the proposed program;

(iii) Instructional material to be used in the proposed program, if appropriate; and

(iv) Population to be served in the proposed program; and

(4) Statistical and analytical procedures, if appropriate.

(e) *Management plan.* (Maximum 10 points.) The management plan adequately describes the way in which personnel and resources will be utilized to accomplish each objective, the overall design, and each major procedure.

(f) *Evaluation plan.* (Maximum 10 points.) The plan includes valid and reliable instruments and procedures for assessing and documenting the impact of project results in terms of the achievement of project goals and objectives.

(g) *Applicant's staff competencies and experience.* (Maximum 10 points.) Points will be awarded on the extent to which the application clearly describes: (1) The competencies that are required for the proposed project;

(2) The names and qualifications (including project management qualifications) of the project director, key professional staff, advisory groups, and any consultants;

(3) Time commitments planned for the project by the project director, key staff, advisory groups, and any consultants;

(4) Evidence of past and successful experience of the proposed project director and key staff members in similar or related projects;

(5) Evidence of commitment to section 7(b) of the Indian Self-Determination and Education Assistance Act.

(h) *Budget and cost effectiveness.* (Maximum 10 points.) Points will be awarded on the extent to which the application provides a justifiable and itemized statement of cost which contains line items in the proposed budget and appears to be cost effective with respect to proposed results.

(i) *Institutional capability and commitment.* (Maximum 10 points.) The application provides adequate evidence of: (1) Institutional experience and commitment to the proposed work;

(2) Appropriate facilities and equipment; and

(3) Documented assurances of support from cooperating local educational agencies, postsecondary institutions, business, industry, or labor, if support from any of these groups is necessary for successful implementation of the project.

(Implements Sec. 103(a)(1)(B)(iii); 20 U.S.C. 2303; 25 U.S.C. 450f.)

§ 105.212 Additional factors for declining to contract.

In addition to the weighted technical review criteria listed in § 105.211, the Commissioner may use any of the factors listed below in making a decision whether to decline to enter into a contract with an eligible applicant.

(a) The program duplicates an effort already being made;

(b) Funding the program would create an inequitable distribution among tribes; or

(c) The applicant has not performed satisfactorily under a previous Office of Education award.

(Implements Sec. 103(a)(1)(B)(iii); 20 U.S.C. 2303; 25 U.S.C. 450f.)

§ 105.213 Hearing by the Commissioner after declining to enter into a contract.

After receiving notice from the Commissioner that the Office of Education will not award a contract to an eligible applicant, the tribal organization or the tribe shall have 30 calendar days to request a hearing, in writing, to review the Commissioner's decision.

(25 U.S.C. 450f.)

§ 105.214 Remaining funds.

From any remaining funds reserved for this subpart, the Commissioner is authorized to enter into an agreement with the Commissioner of the Bureau of Indian Affairs for the operation of vocational education programs authorized by this Act in institutions serving Indians as described in section 103(a)(B)(i) of the Act. The Secretary of the Interior is authorized to receive funds for that purpose.

(Sec. 103(a)(1)(B)(iii); 20 U.S.C. 2303.)

Subpart 3—Training and Development Programs for Vocational Education Personnel

LEADERSHIP DEVELOPMENT AWARD PROGRAM

§ 105.301 Purpose.

The purpose of the leadership development award program is to provide opportunities for experienced vocational educators to spend full time in advanced study of vocational education.

(Sec. 172(a)(1); 20 U.S.C. 2402.)

§ 105.302 Leadership development awards.

(a) *Awards.* The Commissioner will make leadership development awards to qualified vocational education personnel (such as administrators, supervisors, teacher educators, researchers, guidance and counseling personnel, and instructors in vocational education) for graduate training in an approved vocational education leadership development program of an approved institution of higher education.

(Sec. 172(b)(1), (3); 20 U.S.C. 2402.)

(b) *Award period.* Leadership development awards will be made for a period not to exceed 36 months.

(Sec. 172(b)(2)(A); 20 U.S.C. 2402.)

§ 105.303 Equitable geographical distribution.

In order to meet the needs for qualified vocational educational personnel in all the States, the Commissioner, without using any pre-determined formula for allocation among the States, but after

applications have been reviewed and scored on their merits, will make leadership development awards in an equitable manner among the States. The Commissioner will take into account such factors as:

- (a) The State's vocational education enrollments; and
- (b) The incidence of youth unemployment and school dropouts in the State. (Sec. 172(b)(4); 20 U.S.C. 2402.)

§ 105.304 Eligibility of individuals.

(a) A person is eligible to receive a leadership development award if such person:

- (1) Has had not less than two years of experience in vocational education or in business or industrial training or military technical training, or in the case of researchers, experience in social science research which is applicable to vocational education; and
- (2) Is currently employed or is reasonably assured of employment in vocational education and has successfully completed, as a minimum, a baccalaureate degree program; and
- (3) Is recommended by his or her employer, or others, as having leadership potential in the field of vocational education and is eligible for admission as a graduate student to a program of higher education approved by the Commissioner under § 105.311.

(b) In order to receive a leadership development award the person selected shall enroll for full-time graduate study in a vocational education leadership development program approved under § 105.311.

(Sec. 172(b)(1), (5); 20 U.S.C. 2402.)

§ 105.305 Application procedures.

(a) *Submission of applications.* Any eligible individual who wishes to receive a leadership development award shall submit an application to the Commissioner and send one copy of the application to the State board for vocational education for the State in which the applicant is a resident.

(b) *Role of the State board.* The State board, with advice from the State advisory council, from other agencies involved in State planning and reporting, and from representatives of vocational education programs in institutions of higher education, will:

- (1) Review the application;
- (2) Collect advice as to the merits of each application from the other agencies and the representatives noted in this paragraph;
- (3) Advise the Commissioner as to the merits of each application; and
- (4) Forward all applications and statements of advice to the Commissioner for review and decision by the Commissioner.

(Implements Sec. 172(a)(1), 20 U.S.C. 2402; H.R. Rept. No. 94-1085, pp. 54-55.)

§ 105.306 Stipends to individuals.

(a) *Academic year.* Each person awarded a leadership development award is entitled to receive a stipend of:

- (1) \$4500 for each academic year of full-time study at the institution of higher education; and

- (2) \$675 for each academic year for each dependent.

(b) *Summer session.* An additional stipend may be awarded of:

- (1) \$900 for full-time summer study at the same institution of higher education; and

- (2) \$170 for this period for each dependent.

(Implements Sec. 172(b)(2)(A); 20 U.S.C. 2402.)

§ 105.307 Conditions for continued eligibility.

(a) *Satisfactory participation.* A recipient of an award may continue to receive payments under § 105.306 only during such periods as the Commissioner finds that the recipient:

- (1) Is maintaining satisfactory proficiency in study or research in the field of vocational education in an institution of higher education;
- (2) Is devoting essentially full time to such study or research; and
- (3) Is not engaging in gainful employment, other than part-time employment in teaching, research, or similar activities endorsed by that institution and approved by the Commissioner.

(Sec. 172(b)(5); 20 U.S.C. 2402; H.R. Rept. No. 94-1085, pp. 55-56.)

(b) *Employment limitation.* The limitation with respect to employment set forth in paragraph (a)(3) of this section does not apply to the period of time between an academic year and a summer session (or between academic years if a stipend is not received under § 105.306(b) for full-time study).

(Implements Sec. 172(b)(5); 20 U.S.C. 2402.)

§ 105.308 Payment conditioned on appropriation.

Leadership development award payments under § 105.306 after the first year of the award period (in case of awards made for a period exceeding twelve months) are subject to the continued availability of Federal funds under section 172 of the Act.

(Interprets Sec. 172; 20 U.S.C. 2402.)

§ 105.309 Technical review criteria.

The Commissioner will use the following criteria in reviewing applications. The criteria in 45 CFR 100a.26(b) do not apply to this program. A segment or segments of an application should address each criterion. Each criterion is weighted and includes the maximum score that can be given to an application in relation to the criteria. The maximum score for the criteria is 100 points, and the maximum weight for each criterion is listed below. An application must receive a minimum of 50 points to be considered for funding.

- (a) *Academic ability.* (Maximum 30 points) The applicant provides evidence of his or her academic ability. This must include: (1) Transcripts of grades earned in college, including graduate courses; and may include (2) Scores

earned on the Graduate Record Examination, Miller Test of Analogies, or similar tests; and (3) Results earned on specific skill aptitude tests.

(b) *Leadership potential.* (Maximum 20 points) The applicant provides evidence of leadership potential. This may include awards or recognition received for: (1) Professional service; (2) Community activities; (3) Work with advisory committees; (4) Volunteer work; (5) Outstanding skill in interpersonal relations; and (6) Other activities as appropriate.

(c) *Managerial skills.* (Maximum 15 points) The applicant provides information concerning his or her experience in a managerial or administrative capacity. This may include evidence of the applicant's ability in: (1) Planning; (2) Problem solving; (3) Decision making; and (4) Other skills, where appropriate.

(d) *Communication skills.* (Maximum 20 points) The applicant provides evidence of experience in activities requiring oral and written language skills. This may include:

- (1) Public speaking experience to professional, community, or other groups;
- (2) Articles published in professional or popular journals; and
- (3) Other written materials such as reports, abstracts, and instructional materials.

(e) *National need.* (Maximum 15 points) The degree to which the applicant's goals, objectives, and aspirations in vocational education relate to national needs in vocational education, including developing expertise to serve: (1) disadvantaged persons; (2) members of minority groups, and (3) handicapped persons.

(H.R. Rept. No. 94-1085, p. 55.)

(g) *Additional criteria.* In addition to the criteria listed above the Commissioner will consider the following factors: (1) Equitable distribution among males and females; (2) Geographical distribution; (3) Membership in minority groups.

(Implements Sec. 172(a)(1); 20 U.S.C. 2402; U.S.C. 2402; H.R. Rept. No. 94-1085, p. 55.)

§ 105.310 Assignment to approved institution.

Each applicant for an award shall identify a first, second, and third choice of institutions (approved under § 105.311) he or she desires to attend. The Commissioner reserves the right to redistribute award recipients among approved institutions in order to assure that each institution will have a sufficient number of awardees to assure the effectiveness of the program of vocational leadership development.

(Implements Sec. 172(a)(1); 20 U.S.C. 2402; H.R. Rept. No. 94-1085, p. 55.)

§ 105.311 Institutional eligibility and approval.

Upon receipt of an application from an institution of higher education requesting approval of its vocational education leadership development program,

the Commissioner will approve the program only upon finding that:

(a) The institution offers a comprehensive program in vocational education with adequate supporting services and disciplines, such as education administration, guidance and counseling, research, and curriculum development, including:

(Sec. 172(b)(3)(A); 20 U.S.C. 2402.)

(1) Training in those leadership skills necessary to increase the participation of disadvantaged and underrepresented persons such as the handicapped, disadvantaged minorities, and women, in vocational education programs at all levels;

(Sec. 101(1); 20 U.S.C. 2301; H.R. Rept. No. 94-1085, p. 55.)

(2) Resources and supporting services for at least five of the generally recognized fields of vocational education, integrated into a comprehensive approach to vocational education;

(3) Practical experience and internship components; and

(Implements Sec. 172(b)(3)(A); 20 U.S.C. 2402.)

(4) A focus on familiarizing the individual with new curriculum materials in vocational education.

(Sec. 172(b)(7); 20 U.S.C. 2402.)

(b) The program under paragraph (a) of this section is designed to further substantially the objective of improving vocational education by providing opportunities for graduate training for vocational education teachers, supervisors, guidance and counseling personnel, and administrators, and of university level vocational education teacher educators and researchers.

(c) The program is conducted by a school of graduate study.

(Interprets Sec. 172(b)(3)(B); 20 U.S.C. 2402.)

§ 105.312 Institutional allowance.

(a) The Commissioner will (in addition to the stipend paid to an award recipient under § 105.306) pay an institutional allowance to the institution of higher education in which the recipient is pursuing a course of study, in the amount of \$3,200 per participant, per academic year, with an additional \$800 per participant for full-time study during the summer session.

(b) The institutional allowance is made in lieu of tuition and all non-refundable fees and deposits that would otherwise be required of the student.

(c) Any portion of the institutional allowance in excess of normal tuition, non-refundable fees, and deposits attributable to the awardee shall be used by the institution to improve the program of vocational education leadership development in that institution.

(Implements Sec. 172(b)(2)(B); 20 U.S.C. 2402.)

VOCATIONAL EDUCATION CERTIFICATION FELLOWSHIP PROGRAM

§ 105.431 Purpose.

The purpose of the vocational education certification fellowships is to provide opportunities for:

(a) Certified teachers who have been trained to teach in other fields to become vocational educators if those teachers have skills and experience in vocational fields for which there is a need for vocational teachers and for which they can be trained to be vocational educators; and

(Sec. 172(a)(2); 20 U.S.C. 2402.)

(b) Persons in industry, business, and agriculture who have skills and experience in vocational fields for which there is need for vocational educators (but who do not necessarily have baccalaureate degrees) to become vocational educators.

(Interprets Sec. 172(a)(3); 20 U.S.C. 2402.)

§ 105.432 Awards to two categories of fellows.

The Commissioner is authorized to award fellowships to two categories of persons for undergraduate study in institutions of higher education:

(a) Persons who are or have been certified by a State as teachers in elementary and secondary schools, community and junior colleges, and other thirteenth and fourteenth year programs within the ten-year period prior to the current closing date for applications under this program and who:

- (1) Have or have had skills and experience in vocational fields for which there is a need for vocational teachers and for which they can be trained to be vocational educators; and
- (2) Are unable to find employment in their field of previous training.

(Sec. 172(c)(1), (c)(1)(A); 20 U.S.C. 2402.)

(b) Persons (not necessarily baccalaureate degree holders) employed in industry, business, or agriculture who:

- (1) Have skills and experience in vocational fields in which there is a need for vocational educators; and
- (2) Have been accepted by a teacher training institution for enrollment in a program which will assist them in becoming vocational educators.

(Sec. 172(c)(1)(B); 20 U.S.C. 2402.)

§ 105.433 Fellowship period.

Fellowships will be made for periods not to exceed 24 months.

(Sec. 172(c)(2)(A); 20 U.S.C. 2402.)

§ 105.434 Application procedures.

(a) *Submission of applications.* Any eligible individual who wishes to receive a vocational education certification fellowship shall submit an application to the Commissioner and send one copy of the application to the State board for vocational education for the State in which the applicant is a resident.

(b) *Role of the State board.* The State board, with advice from the State advisory council, from other agencies involved in State planning and reporting,

and from representatives of vocational education programs in institutions of higher education, will:

- (1) Review the applications;
- (2) Collect advice as to the merits of each application;
- (3) Advise the Commissioner as to the merits of each application; and
- (4) Forward all applications and statements of advice to the Commissioner for review and decision by the Commissioner.

(Implements Sec. 172(c)(1); 20 U.S.C. 2402; H.R. Rept. No. 94-1085, p. 54.)

§ 105.435 Equitable geographical distribution.

In order to meet the needs for qualified vocational education personnel in all the States, the Commissioner, without using any pre-determined formula for allocation among the States, but after applications have been reviewed and scored on their merits will make certification fellowship awards in an equitable manner among the States, taking into account such factors as:

- (a) The State's vocational education enrollment; and
- (b) The incidence of youth unemployment and school dropouts in the State.

(Sec. 172(c)(4); 20 U.S.C. 2402.)

§ 105.436 Stipend to fellows.

(a) *Academic year.* Each person awarded a fellowship is entitled to receive a stipend of:

- (1) \$4500 for each academic year of full-time study at the institution of higher education to which that person is assigned for the fellowship period; and
- (2) \$675 for each academic year for each dependent.

(b) *Summer session.* An additional stipend may be awarded of:

- (1) \$900 for full-time summer study at the same institution of higher education; and
- (2) \$170 for this period for each dependent.

(Implements Sec. 172(c)(2)(A); 20 U.S.C. 2402.)

§ 105.437 Conditions for continued eligibility.

(a) *Satisfactory participation.* A recipient of a fellowship may continue to receive payment under § 105.436 only during such period as the Commissioner finds that the recipient:

- (1) Is maintaining satisfactory proficiency in study or research in the field of vocational education in an institution of higher education;
- (2) Is devoting essentially full time to such study or research; and
- (3) Is not engaging in gainful employment, other than part-time employment in teaching, research, or similar activities endorsed by that institution and approved by the Commissioner.

(Implements Sec. 172(c)(5); 20 U.S.C. 2402; H.R. Rept. No. 94-1085, pp. 55-56.)

(b) *Employment limitations.* The limitation with respect to employment set forth in paragraph (a)(3) of this

section does not apply to the period of time between an academic year and a summer session, or between academic years if a stipend is not received under § 105.436(b) for full-time summer study.

(Interprets Sec. 172(c)(5); 20 U.S.C. 2402.)

§ 105.438 Payment conditioned on appropriation.

Fellowship payments under § 105.436 after the first year of the fellowship period (in case of awards made for a period exceeding twelve months) are subject to the continued availability of Federal funds under section 172 of the Act.

(Interprets Sec. 172; 20 U.S.C. 2402.)

§ 105.439 Institutional allowance.

(a) The Commissioner will (in addition to the stipends paid to a fellowship recipient under § 105.436) pay an institutional allowance to the institution of higher education at which the recipient is pursuing his or her course of study in an amount of \$2,000 per participant per academic year, with an additional \$500 per participant for full-time study during the summer session;

(b) The institutional allowance is made in lieu of tuition and all non-refundable fees and deposits that would otherwise be required of the fellow; and

(c) Any portion of the institutional allowance in excess of the normal tuition, non-refundable fees, and deposits attributable to the fellow shall be used by the institution to improve the program of vocational education in that institution.

(Implements Sec. 172(c)(2)(B); 20 U.S.C. 2402.)

§ 105.440 Institutional eligibility and approval.

The Commissioner will approve the vocational education fellowship program of an institution of higher education only upon finding that:

(a) The program is capable of enabling unemployed certified teachers or persons from business, industry, or agriculture to become certified vocational education teachers;

(Interprets Sec. 172(c)(1)(B); 20 U.S.C. 2402.)

(b) The institution offers a program in vocational education which is sufficiently comprehensive to meet, at the undergraduate level, the requirements for certification of the applicant in the State where the institution is located;

(c) In the case of applicants seeking certification in a particular area of study designated by the Commissioner as being in need of additional personnel, the institution is capable of preparing students for certification in that particular area;

(Implements Sec. 172(c)(7); 20 U.S.C. 2402.)

(d) The fellow will receive education and training of the same type as that offered by the institution to undergraduate students preparing to become vocational education teachers; and

(e) The undergraduate program in vocational education includes adequate

support services and disciplines, such as education administration, guidance and counseling, special education for the handicapped, research, and curriculum development.

(Implements Sec. 172(c)(3); 20 U.S.C. 2402.)

§ 105.441 Teaching fields in need of additional teachers.

The Commissioner will publish, before the beginning of each fiscal year, a listing of the areas of teaching in vocational education where there are or will be shortages of personnel and will, to the maximum degree possible, award fellowships under § 105.432 to applicants seeking to become teachers in the areas identified.

(Sec. 172(c)(7); 20 U.S.C. 2402.)

§ 105.442 Content of applications.

(a) *For certified teachers.* Each certified teacher applicant shall provide in his or her application evidence of:

(1) Certification as a teacher in an elementary or secondary school or junior or community college or other thirteenth and fourteenth grade program within the ten-year period prior to the current closing date for applications under this program; and

(2) Past or current skills and experiences in the vocational field(s) in which there is a need for additional educators and for which he or she seeks training as a vocational educator; and

(3) Inability to find employment in his or her field of previous certification.

(b) *For applicants not certified as teachers.* Each applicant who has not been a certified teacher shall provide in his or her application evidence of:

(1) The nature and duration of his or her employment in business, agriculture, or industry; and

(Interprets Sec. 172(c)(1)(B); 20 U.S.C. 2402.)

(2) Having skills and experiences in one of the vocational areas where vocational educators are needed.

(Sec. 172(c)(1)(B); 20 U.S.C. 2402.)

(c) *Assurance by the institution.* The institution of higher education designated in the application for a fellowship shall provide in that application an assurance that the:

(1) Applicant has been accepted for enrollment in the program of vocational education designated in the application; and the

(2) Institution meets the requirements for institutional eligibility set forth in paragraphs (a) through (e) of § 105.440.

(Implements Sec. 172(c)(3); 20 U.S.C. 2402.)

§ 105.443 Technical review criteria.

The Commissioner will use the following criteria in reviewing formally transmitted applications. The criteria in 45 CFR 100a.26(b) do not apply to this program. A segment or segments of an application should address each criterion. Each criterion is weighted and includes the maximum score that can be given to an application in relation to the criteria.

The maximum score for the criteria is 100 points, and the maximum weight for each criterion is listed below. An application must receive a minimum of 50 points to be considered for funding.

(a) *Academic ability.* (Maximum 25 points.) The applicant provides evidence of his or her level of academic achievement and academic ability. This may include: (1) Transcripts of grades earned in secondary school and, where appropriate, college; (2) Results earned on specific skill aptitude tests; and (3) Results of other tests, where appropriate.

(b) *Vocational skills.* (Maximum 35 points.) The applicant provides evidence of his or her performance in a work situation requiring vocational skills. This may include: (1) Letters of recommendations of previous employers or others, as appropriate; (2) Results of National Occupational Competency Testing Institute, where appropriate; (3) Certificates or diplomas, as appropriate; and (4) Work related experience, including teaching, where appropriate.

(c) *Communication skills.* (Maximum 15 points.) The applicant provides evidence of experience in activities requiring oral and written language skills. This may include:

(1) Public speaking experience to professional, community, or other groups;

(2) Articles published in newspapers, professional or popular journals; and

(3) Other written materials such as reports, abstracts, or other materials, where appropriate.

(d) *Human relations skills.* (Maximum 15 points.) The applicant presents evidence of skills in interpersonal relations. This may include experience with: (1) Professional groups; (2) Community groups; (3) Volunteer groups; (4) Work related organizations; (5) Members of minority groups, the disadvantaged, and handicapped persons; and (6) Other groups, as appropriate.

(e) *National need.* (Maximum 10 points.) The applicant describes in writing his or her goals, objectives, and aspirations in vocational education and their relationship to national needs in vocational education with particular reference to the elimination of sex stereotyping and working with the following populations: (1) Disadvantaged persons; (2) Members of minority groups; and (3) Handicapped persons. (H.R. Rept. No. 94-1085, p. 55.)

(f) *Additional factors.* In addition to the criteria listed above, the Commissioner will consider the following factors: (1) Equitable distribution among males and females; (2) Geographical distribution; (3) Membership in minority groups; and (4) The applicant's intention to become certified in a vocational field not traditionally open to persons of the applicant's sex, or to become certified in a new field or one not commonly taught.

(Implements Sec. 101(3), 172(b)(4); 20 U.S.C. 2301, 2402; H.R. Rept. No. 94-1085, p. 55.)

Subpart 4—Emergency Assistance for Remodeling and Renovating of Vocational Education Facilities

§ 105.501 Purpose.

The purpose of this program is to provide emergency assistance to local educational agencies in urban and rural areas which are unable to provide vocational education designed to meet today's manpower needs due to the age of their vocational education facilities or the obsolete nature of the equipment used for vocational training. The purpose is to assist those local educational agencies in the modernization of facilities or equipment and the conversion of academic facilities necessary to assure that the facilities will be able to offer vocational education programs which give reasonable promise of employment.

(Sec. 191; 20 U.S.C. 2441.)

§ 105.502 Eligible applicants.

(a) Any local educational agency in an urban or rural area is an eligible applicant.

(Sec. 193(a); 20 U.S.C. 2443.)

(b) "Rural area" means an area which is not included within a Standard Metropolitan Area (as defined by the U.S. Bureau of Census) and which is not within or coterminous with, a city, town, borough, or village, or other subcounty political unit, the population of which exceeds 2,500.

(c) "Urban area" means an area within a city, town, or borough with a population of over 100,000.

(Implements Sec. 198(a); 20 U.S.C. 2443.)

§ 105.503 Content of applications.

An application for a grant or assistance contract shall set forth:

(a) A description of the facility to be remodeled or renovated, including:

(1) The date of completion of construction of the facility (or the part of the facility to be remodeled or renovated);

(2) The extent of remodeling or renovation necessary to enable the facility to provide a modern program of vocational education;

(b) A description of the equipment to be replaced or modernized and reference to the particular purpose for which the equipment will be used;

(c) A description of the extent to which the modernization or conversion of facilities and equipment will be consistent with, and further the goals of, the five-year State plan, including the elimination of sex and racial bias and sex stereotyping in vocational education programs;

(d) The financial ability of the local educational agency to undertake the modernization without Federal assistance;

(Implements Sec. 193(a)(1)-(4); 20 U.S.C. 2443.)

(e) Assurance that the facility to be remodeled or renovated will meet standards adopted pursuant to the Architectural Barriers Act;

(Sec. 193(a)(5); 20 U.S.C. 2443; 42 U.S.C. 4151-4156.)

(f) The extent of State and local funds available to match Federal funds together with the sources and amounts of the funds;

(g) Such other information as the State board determines to be appropriate.

(Sec. 193(a)(6), (7); 20 U.S.C. 2443.)

(h) The reasons why renovation or remodeling rather than replacement is planned or why some other facility is not available;

(i) The cost of each major item of renovation or remodeling; and

(j) Facts showing that renovation or remodeling is cost effective.

(Implements Sec. 193(a)(8); 20 U.S.C. 2443.)

§ 105.504 Submission of applications through the State board.

An applicant shall send the application to the Commissioner through the State board.

(Sec. 193(a); 20 U.S.C. 2443.)

§ 105.505 Technical review criteria.

(a) The Commissioner will rank all applicants according to their relative need for assistance.

(Sec. 193(c); 20 U.S.C. 2443.)

(b) The relative need for assistance will be determined by the following criteria (total 100 points):

(1) The age or obsolescence of the facilities and equipment for which assistance is sought (maximum 17 points);

(2) The rate of youth unemployment in the labor market area served by the local educational agency (maximum 12 points);

(3) The number of youth aged seventeen through twenty-one residing in the labor market area served by the local educational agency who are unemployed (maximum 12 points);

(4) The percentage such youth represent, as compared with the vocational education enrollment in the local educational agency (maximum 12 points);

(5) The ability of the facility to comply with the standards adopted pursuant to the Architectural Barriers Act (maximum 5 points);

(Sec. 193(b)(1)(A) through (E); 20 U.S.C. 2443; 42 U.S.C. 4151 through 4156.)

(6) The need for the proposed facilities or equipment in relation to the employment needs of the State or labor market area (maximum 12 points);

(7) Adequacy of the proposed facilities or equipment for the training or educational requirements of the specific vocational training program(s) to be accommodated by the proposed facilities or equipment (in terms of linedrawings and educational specifications) (maximum 10 points);

(8) Evidence that the proposed renovation or remodeling or equipment is economical and is not elaborate or extravagant (maximum 5 points);

(9) Evidence that the planned renovation or remodeling is a more cost-

effective approach than replacement (maximum 5 points); and

(10) Evidence that the local educational agency does not have the financial ability to undertake the proposed project without Federal assistance, and the ability of the State education agency and the local education agency to match proposed Federal funds (maximum 10 points).

(Implements, Sec. 192(b)(1); 20 U.S.C. 2442.)

(c) In approving applications, the Commissioner will consider the degree to which the modernization of facilities and equipment proposed in the application affords promise of achieving the goals set forth in the approved five-year State plan.

(Sec. 193(b)(2); 20 U.S.C. 2443.)

§ 105.506 Payments to local educational agencies.

(a) The Commissioner will pay 75 percent (except as noted in paragraph (b)) of the cost of approved applications in the order they are ranked under § 105.505(b).

(Sec. 193(c); 20 U.S.C. 2443.)

(b) The Commissioner may waive the 75 percent limit and may pay up to the full cost of the project upon the Commissioner's finding, in writing, that a local educational agency with an approved application is suffering from extreme financial need and cannot, because of the 75 percent limit, participate in the program.

(Sec. 193(e); 20 U.S.C. 2443.)

(c) Applications will be funded until the appropriation is exhausted.

(d) The Commissioner will reserve from the appropriation for the fiscal year for which the application is made an amount sufficient to pay the entire Federal share of each approved project and will obligate that amount from the appropriation even though the project may not be completed within the fiscal year.

(Interprets Sec. 194(a); 20 U.S.C. 2444.)

(e) The Commissioner will pay approved applicants in advance or by way of reimbursement, or in installments consistent with HEW practices.

(Sec. 194(b); 20 U.S.C. 2444.)

§ 105.507 Construction requirements.

The Office of Education's regulations for the Commissioner's direct project grant and contract programs (45 CFR Part 100a) shall apply to projects for assistance under this program, particularly the Commissioner's regulations on "Bonding and Insurance" (45 CFR Part 100a, Subpart J, §§ 100a.120-122) and on "Construction Requirements" (Subpart K, §§ 100a.155-192), (45 CFR Part 100a). In addition, the non-discrimination provisions in 45 CFR Part 80 apply. This includes 45 CFR 80.3(b)(3) which provides that, in determining the site or location of the facility, a recipient may not make selections with the effect of excluding individuals from, denying them the bene-

fits of, or subjecting them to discrimination on the grounds of race, color, or national origin.

(Implements Sec. 193; 20 U.S.C. 2443.)

Subpart 5—Bilingual Vocational Education

BILINGUAL VOCATIONAL TRAINING PROGRAM § 105.601 Purpose.

The purpose of the bilingual vocational training program is to prepare persons of limited English-speaking ability to perform adequately in an environment requiring English language skills and to fill the critical need for more and better trained persons in occupational categories vital to both the persons and the economy. Funds available to the Commissioner pursuant to section 183 of the Act may be used for making grants or contracts for bilingual vocational training programs.

(Sec. 181; 20 U.S.C. 2411; Conf. Rept. No. 94-1701, p. 228.)

§ 105.602 Eligible programs.

Sixty-five percent of the funds available under section 183 of the Act may be used by the Commissioner to award grants or contracts for the cost of operating programs designed to carry out the purposes set forth in § 105.601 in an amount equal to the total sum expended by the applicant for the purposes set forth in the application. No cost sharing is required. These programs include:

(a) Bilingual vocational training programs for persons who have completed or left elementary or secondary school. Programs for secondary school students are not eligible;

(b) Bilingual vocational training programs for persons who have already entered the labor market and who desire or need training or retraining to achieve year-round employment, adjust to changing employment needs, expand their range of skills, or advance in employment.

Training allowances for participants in bilingual vocational training programs described in paragraphs (a) and (b) of this section are an allowable cost. Allowances are subject to the same conditions and limitations as set forth in the Department of Labor Regulations 29 CFR 95.34. Applicants may waive training allowances in accordance with the waiver procedure in 29 CFR 95.34(j).

(Sec. 185; 20 U.S.C. 2415.)

§ 105.603 Eligible applicants.

The following agencies or institutions are eligible for grants or contracts, except item (f) being eligible only for contracts:

(a) Local educational agencies;
(b) State agencies;
(c) Postsecondary educational institutions;
(d) Private nonprofit vocational training institutions; and
(e) Nonprofit educational or training organizations especially created to serve a group whose language as normally used is other than English; and

(f) Private for profit agencies and organizations.

(Sec. 184; 20 U.S.C. 2414.)

§ 105.604 Applications for grants or contracts.

(a) An applicant shall submit a copy of the application to the State board at the same time it is submitted to the Office of Education. The State board shall submit its comments to the Office of Education within 30 days after the closing date for applications.

(b) An applicant shall provide an assurance that the activities and services for which assistance is sought will be administered by or under the supervision of the applicant.

(c) An applicant shall set forth a bilingual vocational training program of such size, scope, and design as will make a substantial contribution toward carrying out the purposes described in § 105.601.

(d) An applicant shall provide an assurance that the program will include instruction in the English language and in the trainee's dominant language in order to insure that participants in the training will be assisted to pursue occupations in work environments where English is the language normally used.

(e) An applicant shall submit an amendment, if any, to the application in the same manner as the applicant submitted the original application. A request for funding by an applicant who has had a prior award(s) shall include an evaluation of the previous project and will be reviewed competitively with new applications.

(Sec. 184; 20 U.S.C. 2414; Sec. 189A(b); 20 U.S.C. 2420.)

§ 105.605 Review of applications.

(a) The Commissioner may approve an application for assistance under the bilingual vocational training program only if the application:

(1) Meets the requirements set forth in § 105.604;

(2) Is consistent with the criteria set forth in § 105.606; and

(3) Is submitted to the Commissioner at the time, in the manner and containing the information the Commissioner deems necessary, as set forth in the Notice of Closing Date to be published in the FEDERAL REGISTER.

(b) Prior to making awards in a State, the Commissioner will, where feasible, consult with the State board to achieve equitable distribution of assistance among populations of persons of limited English-speaking ability with the most acute need for training within the State.

(Sec. 189A, 189B(a) (3); 20 U.S.C. 2420, 2421.)

§ 105.606 Technical review criteria.

The Commissioner will use the following criteria in reviewing formally transmitted applications. These criteria are consistent with 45 CFR 100a.26, Review of Applications in the Office of Education, General Provisions for Programs. A segment or segments of an application should address each criterion. Each criterion is weighted and includes the maximum score that can be given to an application in relation to the criterion. The maximum score for the criteria is 100 points, and the maximum weight for each criterion is listed below. An application must receive a minimum of 30 points to be considered for funding.

(a) *Need.* (Maximum 10 points.) (1) Describes the need for the proposed bilingual vocational training;

(2) Provides specific evidence of the need;

(3) Indicates specifically how the need will be met; and

(4) Describes, where appropriate, ongoing and planned activities in the community relative to the need.

(b) *Objectives.* (Maximum 10 points.)

(1) Are significant and meet clearly identified needs in bilingual vocational training;

(2) Clearly describe the proposed project outcomes; and

(3) Are capable of being measured and attained.

(c) *Plan.* (Maximum 15 points.) The plan clearly describes the way in which the objectives will be accomplished by:

(1) The overall design for the proposed project; and

(2) The specific procedures of each segment of the design. Normally the plan will include a description of:

(i) Proposed trainees;

(ii) Recruiting procedures to be used;

(iii) Training program including a description of both the bilingual vocational training and the language instruction which is designed to assure that trainees will acquire sufficient competency in English to work in environments where English is the language normally used;

(iv) Support services to be offered to trainees;

(v) Instructional materials to be used in the proposed program;

(vi) Anticipated level of skill of the trainees, at the end of the proposed training;

(vii) Activities to be used in aiding trainees to secure employment, if appropriate; and

(viii) Tests to be used in the proposed program components.

(d) *Management plan.* (Maximum 8 points.) The management plan adequately describes the way in which personnel and resources will be used to accomplish each component of the plan developed in criterion (c).

(e) *Evaluation plan.* (Maximum 12 points.) The plan includes valid and reliable procedures for assessing and documenting the bilingual vocational training program and the progress of the trainees.

(f) *Applicant's staff competencies and experience.* (Maximum 25 points.) The application clearly describes:

(1) The names and qualifications (including project management qualifications) of the project director, professional staff, consultants, and advisory groups;

(2) Time commitments planned for the project director, staff, advisory groups, and any consultants;

(3) Evidence of past and successful experience of the proposed project director and key staff members in similar or related projects; and

(4) Staff competencies that are essential for the proposed project including proficiency in the language of the trainees.

(g) *Budget and cost effectiveness.* (Maximum 10 points.)

(1) The application provides a justifiable and itemized statement of cost which is substantiated by line items in the proposed budget and is cost effective;

(2) The application includes information concerning the average cost per trainee.

(b) *Institutional capability and commitment.* (Maximum 10 points.) The application provides adequate evidence of:

(1) Institutional experience and commitment to the proposed work;

(2) Appropriate facilities and equipment necessary for the proposed project; and

(3) Documented assurance of support from cooperating agencies, institutions, or community groups where applicable for successful implementation of the project.

(Implements Sec. 189A; 20 U.S.C. 2420.)

§ 105.607 Additional application review factors.

In addition to the criteria listed in § 105.606, the Commissioner may utilize factors such as the following in making decisions regarding whether to fund applications. (a) Duplication of effort; (b) Duplication of funding; and (c) Evidence that an applicant has not performed satisfactorily on previous projects.

(Implements Sec. 181; 20 U.S.C. 2411.)

BILINGUAL VOCATIONAL INSTRUCTOR TRAINING PROGRAM

§ 105.611 Purpose.

The purpose of the bilingual vocational instructor training program is to provide training programs to meet the critical shortage of instructors possessing both the job knowledge and skills and the dual language capabilities required for adequate instruction of persons handicapped by their limited English-speaking ability. Funds available to the Commissioner pursuant to section 183 of the Act may be used for making grants or contracts for bilingual vocational instructor training programs.

(Sec. 186; 20 U.S.C. 2416.)

§ 105.612 Eligible programs.

Twenty-five percent of the funds available under section 183 of the Act may be used by the Commissioner to award grants or contracts for the cost of conducting training for instructors of bilingual vocational training programs in an amount equal to the total sum expended by the applicant for the purposes set forth in that application. No cost sharing is required. These programs include:

(a) Pre-service training programs designed to prepare persons to participate in bilingual vocational training or bilingual vocational education as: (1) Instructors; (2) Aides; and (3) Ancillary personnel such as guidance personnel and counselors.

(b) In-service and developmental programs designed to enable instructional and ancillary personnel to continue to improve their qualifications while participating in bilingual vocational training programs; fellowships or traineeships for persons engaged in activities described in (a) and (b) are an allowable cost. A fellowship is an award to an individual student made by a granting agency of the Department. A traineeship is an award to an institution for student support (stipends or allowances) and for institutional support (either in a predetermined amount or based on actual costs).

(Sec. 186; Sec. 187; 20 U.S.C. 2416; 20 U.S.C. 2417.)

§ 105.613 Eligible applicants.

The following categories of agencies or institutions are eligible for grants or contracts, except item (c) being eligible only for contracts: (a) State agencies; (b) Public and private nonprofit educational institutions; and (c) Private-for-profit educational institutions.

(Sec. 186; 20 U.S.C. 2416.)

§ 105.614 Applications for grants or contracts.

(a) An applicant shall provide an assurance that the activities and services for which assistance is sought will be administered by or under the supervision of the applicant.

(b) An applicant shall set forth in the application a bilingual vocational instructor training program of a type described in § 105.612;

(c) An applicant shall describe in the application the capabilities of the applicant institution in terms of:

(1) A listing of the vocational training or vocational education courses offered by that institution;

(2) Appropriate accreditation by regional or national associations, if any;

(3) Approval by appropriate State agencies of the courses offered; and

(4) Qualifications of the principal staff who will be responsible for the training program.

(d) An application shall describe clearly (and in detail) in the application the trainees in terms of the:

(1) Minimum qualifications of the persons to be enrolled in the training program;

(2) Selection process of the trainees; and

(3) Amounts of fellowships or traineeships, if any, to be granted to the persons enrolled.

(e) An applicant shall submit an amendment, if any, to the application in the same manner as the applicant submitted the original application. A request for funding by an applicant who has had a prior award(s) shall include

an evaluation of the previous project and will be reviewed competitively with new applications.

(Sec. 189A; 20 U.S.C. 2420.)

§ 105.615 Review of applications.

(a) The Commissioner may approve an application for assistance under the bilingual vocational instructor training program only if the application:

(1) Meets the requirements set forth in § 105.614;

(2) Is consistent with the criteria set forth in § 105.616;

(3) Is submitted to the Commissioner at the time, in the manner and containing the information the Commissioner deems necessary, as set forth in the Notice of Closing Date to be published in the FEDERAL REGISTER.

(4) The applicant institution actually has an ongoing vocational training program in the field in which persons are being trained; and

(5) The applicant institution can provide instructors with adequate language capabilities in the language other than English to be used in the bilingual vocational training program for which persons are being trained.

(b) Prior to making awards in a State, the Commissioner will, where feasible, consult with the State board to achieve equitable distribution of assistance among populations of persons of limited English-speaking ability with the most acute need for training within the State.

(Secs. 189A, 189B(a) (3); 20 U.S.C. 2420, 2421.)

§ 105.616 Technical review criteria.

The Commissioner will use the following criteria in reviewing formally transmitted applications. These criteria are consistent with 45 CFR 100.26, Review of Applications in the Office of Education, General Provisions for Programs. A segment or segments of an application should address each criterion. Each criterion is weighted and includes the maximum score that can be given to an application in relation to the criterion. The maximum score for the criterion is 100 points, and the maximum weight for each criterion is listed below. An application must receive a minimum of 30 points to be considered for funding.

(a) *Need.* (Maximum 10 points.) The need section clearly: (1) Describes the need for the proposed instructor training; (2) Provides specific evidence of the need; (3) Indicates specifically how the need will be met; and (4) Describes, where appropriate, ongoing and planned activities in the community relative to the need.

(b) *Objectives.* (Maximum 10 points.) The objectives are related to the problem and: (1) Are significant for pre-service or in-service training; (2) Clearly describe the proposed training program; and (3) Are capable of being measured and attained.

(c) *Plan.* (Maximum 15 points.) The plan clearly describes the way in which the objectives will be accomplished by the: (1) Overall design for the proposed

project; (2) Specific procedures of each segment of the design in terms of accomplishing the objectives; (3) Normally the plan will include:

(i) Description of the training program, including all program components;

(ii) Description of the minimum qualifications of the persons to be enrolled in the training program;

(iii) Description of the selection process and the amounts of the fellowships or traineeships, if any, to be granted to persons enrolled in the program;

(iv) Evidence that the applicant institution actually has an ongoing vocational training or vocational education program in the field for which persons are to be trained, including a listing of the vocational courses offered by the institutions;

(v) Evidence that the applicant institution can provide instructors with adequate language capabilities in the language other than English to be used in the bilingual job training program for which the persons are being trained; and

(vi) Evidence that a need exists for instructors who will receive training in the proposed project.

(d) *Management plan.* (Maximum 8 points) The management plan adequately describes the way in which personnel and resources will be used to accomplish each component of the plan developed in criterion (c).

(e) *Evaluation plan.* (Maximum 12 points) The plan includes rigorous procedures for assessing and documenting the instructor training program including both the vocational component and the language component.

(f) *Applicant's staff competencies and experience.* (Maximum 25 points) The application clearly describes:

(1) The names and qualifications (including project management qualifications) of the project director, professional staff, consultants, and advisory groups;

(2) Time commitments planned for the project director, key staff, advisory groups, and any consultants;

(3) Evidence of past and successful experience of the proposed project director and key staff members in similar or related projects; and

(4) Staff competencies that are essential for the proposed project, including proficiency in English and in the language other than English.

(g) *Budget and cost effectiveness.* (Maximum 10 points.) The application provides a justifiable and itemized statement of cost which is substantiated by line items in the proposed budget and appears to be cost effective.

(h) *Institutional capability and commitment.* (Maximum 10 points.) The application provides adequate evidence of:

(1) Institutional experience and commitment to the proposed work;

(2) Appropriate facilities and equipment necessary for the proposed project;

(3) Appropriate accreditation of the applicant institution by regional or national associations and approval by ap-

propriate State agencies of the courses offered; and

(4) Documented assurance of support from cooperating agencies, institutions, or community groups where applicable for successful implementation of the project.

(Implements Sec. 189A; 20 U.S.C. 2420.)

§ 105.617 Additional application review factors.

In addition to the criteria listed in § 105.616, the Commissioner may utilize factors such as the following in making decisions regarding whether to fund applications.

(a) Duplication of effort;

(b) Duplication of funding; and

(c) Evidence that an applicant has not performed satisfactorily on previous projects.

(Implements Sec. 181; 20 U.S.C. 2411.)

BILINGUAL VOCATIONAL INSTRUCTIONAL MATERIALS, METHODS, AND TECHNIQUES PROGRAM

§ 105.621 Purpose.

The purpose of the bilingual vocational instructional materials, methods, and techniques program is to develop instructional materials and encourage research programs and demonstration projects to meet the critical shortage of such instructional materials suitable for bilingual vocational training programs. Funds available to the Commissioner pursuant to section 183 of the Act may be used for making grants or contracts for bilingual vocational instructional materials, methods, and techniques.

(Sec. 188; 20 U.S.C. 2418.)

§ 105.622 Eligible programs.

Ten percent of the funds available under section 183 of the Act may be used by the Commissioner to award grants or contracts for the cost of developing and testing instructional materials, methods, or techniques for bilingual vocational training in an amount equal to the total sum expended by the application for the purposes set forth in that application. No cost sharing is required. These programs include:

(a) Research in bilingual vocational training;

(b) Development of instructional materials;

(c) Training programs designed to familiarize State agencies and training institutions with research findings and successful pilot and demonstration projects in bilingual vocational training;

(d) Experimental, developmental, and pilot programs and projects designed to test the effectiveness of research findings; and

(e) Other demonstration and dissemination projects in bilingual vocational training.

(Sec. 189; 20 U.S.C. 2419.)

§ 105.623 Eligible applicants.

The following categories of agencies or institutions are eligible for grants or

contracts, except items (e) and (f) being eligible only for contracts: (a) State agencies; (b) Public educational institutions; (c) Private educational institutions; (d) Nonprofit organizations; (e) Private-for-profit organizations; and (f) Individuals.

(Sec. 188; 20 U.S.C. 2418.)

§ 105.624 Applications for grants or contracts.

(a) An applicant shall provide an assurance that the activities and services for which assistance is sought will be administered by or under the supervision of the applicant.

(b) An applicant shall set forth in the application a bilingual vocational instructional materials, methods, and techniques program of a type described in § 105.622.

(c) An applicant shall set forth in the application the qualifications of the staff who will be responsible for the program for which assistance is sought.

(d) An applicant shall submit an amendment, if any, to the application in the same manner as the applicant submitted the original application. A request for funding by an applicant who has had a prior award(s) will be reviewed competitively with new applications.

(Sec. 189A; 20 U.S.C. 2420.)

§ 105.625 Review of applications.

The Commissioner may approve an application for assistance under the bilingual vocational instructional materials, methods, and techniques program only if the application:

(a) Meets the requirements set forth in § 105.624;

(b) Is consistent with the criteria set forth in § 105.626; and

(c) Is submitted to the Commissioner at the time, in the manner and containing the information the Commissioner deems necessary, as set forth in the Notice of Closing Date to be published in the FEDERAL REGISTER.

(Sec. 189A; 20 U.S.C. 2420.)

§ 105.626 Technical review criteria.

The Commissioner will use the following criteria in reviewing formally transmitted applications. These criteria are consistent with 45 CFR 100a.26. Review of Applications in the General Provisions for Office of Education Programs. A segment or segments of an application should address each criterion. Each criterion is weighted and includes the maximum score that can be given to an application in relation to the criterion. The maximum score for the criteria is 100 points, and the maximum weight for each criterion is listed below. An application must receive a minimum score of 50 points to be considered for funding.

(a) *Need.* (Maximum 20 points) The need section clearly:

(1) Describes the national significance and the need in bilingual vocational training for the proposed project;

(2) Provides specific evidence of the need;

(3) Indicates specifically who or what will be helped; and

(4) Describes the problem rather than the symptoms of the problem.

(b) *Literature review.* (Maximum 5 points) The literature review is sufficiently comprehensive to:

(1) Establish the basis for the problem;

(2) Describe the problem in contrast to the symptoms of the problem;

(3) Provide a strong conceptual framework for the proposed objectives and proposed plan, including the general design and specific procedures of the proposed plan, along with the management, evaluation, dissemination, and training procedures (when appropriate); and

(4) Describe what has been done previously to alleviate the problem and point out the gaps that will be alleviated by this specific proposed work.

(c) *Objectives.* (Maximum 10 points) The objectives are related to the problem and: (1) Are significant for bilingual vocational training; (2) Clearly describe proposed project outcomes; (3) Are capable of being attained; and (4) Are measurable.

(d) *Plan.* (Maximum 15 points) The plan clearly describes:

(1) The overall design for the proposed project; and

(2) The specific procedures by which each objective will be accomplished. Normally the plan will include:

(i) Precise definitions of terms; (ii) Description of the characteristics and number of subjects; (iii) Sampling procedures and control groups; (iv) Instrumentation; and (v) Statistical and analytical procedures.

(e) *Management plan.* (Maximum 10 points.) The management plan adequately describe the way in which personnel and resources will be used to accomplish each component of the plan developed in criterion (c).

(f) *Evaluation plan.* (Maximum 10 points.) The plan includes rigorous procedures for assessing and documenting the impact of project results and end products or outcomes in terms of the achievement of project goals and objectives.

(g) *Results, end products, outcomes, and dissemination.* (Maximum 10 points.) The application clearly describe:

(1) What will be delivered to the government;

(2) The format in which the results, products, or outcomes will be delivered to the government;

(3) The way in which results, products, or outcomes will be developed or provided for dissemination purposes to specified user populations; and

(4) The procedures to be used in disseminating the results, and products, or outcomes at the local, State, and/or national levels.

(h) *Applicant's staff competencies and experience.* (Maximum 10 points.) The application clearly describes:

(1) The names and qualifications (including project management qualifica-

tions) of the project director, key professional staff, advisory groups, and consultants;

(2) Time commitments planned for the project by the project director, key staff, advisory groups, and consultants;

(3) Evidence of past and successful experience of the proposed project director and key staff members in similar or related projects; and

(4) The competencies that are required for the proposed project.

(i) *Budget and cost effectiveness.* (Maximum 5 points.) The application provides a justifiable and itemized statement of cost which is substantiated by line items in the proposed budget and appears to be cost effective with respect to proposed results, products, or outcomes.

(j) *Applicant's capability and commitment.* (Maximum 5 points.) The application provides adequate evidence of:

(1) Institutional or individual's experience and commitment to the proposed work;

(2) Appropriate facilities and equipment; and

(3) Documented assurance of support from cooperating agencies, local educational agencies or postsecondary institutions, business, industry, and labor, where applicable for successful implementation of the project.

(Implements Sec. 189A; 20 U.S.C. 2420.)

§ 105.627 Additional application review factors.

In addition to the criteria listed in § 105.626, the Commissioner may utilize factors such as the following in making decisions regarding whether to fund applications.

(a) Duplication of effort;

(b) Duplication of funding; and

(c) Evidence that an applicant has not performed satisfactorily on previous projects.

(Implements Sec. 181; 20 U.S.C. 2411.)

APPENDIX A DEFINITIONS

"Act" means the Vocational Education Act of 1963, Pub. L. 88-210, as amended by Title II of the Education Amendments of 1976, Pub. L. 94-482, 90 Stat. 2168, 20 U.S.C. 2301 et seq.

(Secs. 101-195, 20 U.S.C. 2301 et seq.)

"Administration" means activities of a State or an eligible recipient necessary for the proper and efficient performance of its duties under the Act, including supervision, but not including ancillary services.

(Sec. 195(20); 20 U.S.C. 2461.)

"Adult program" means (for reporting purposes) vocational education for persons who have already entered the labor market or who are unemployed or who have completed or left high school and who are not described in the definition of "postsecondary program."

(Sec. 110(c); 20 U.S.C. 2461.)

"Ancillary services" means activities which contribute to the enhancement of quality in vocational education programs, including activities such as teacher training and curriculum development, but excluding administra-

tion (except in consumer and homemaking education under Section 150 of the Act).

(Implements Sec. 195(20); 20 U.S.C. 2461.)

"Area vocational education school" means:

(a) A specialized high school used exclusively or principally for the provision of vocational education to persons who are available for study in preparation for entering the labor market;

(b) The department of a high school exclusively or principally used for providing vocational education in no less than five different occupational fields to persons who are available for study in preparation for entering the labor market; or

(c) A technical or vocational school used exclusively or principally for the provision of vocational education to persons who have completed or left high school and who are available for study in preparation for entering the labor market; or

(d) The department or division of a junior college or community college or university operating under the policies of the State board which provides vocational education in no less than five different occupational fields, leading to immediate employment but not necessarily leading to a baccalaureate degree, if:

(1) The vocational programs are available to all residents of the State or an area of the State designated and approved by the State board; and

(2) In the case of a school, department, or division described in (c) or (d), it admits as regular students both persons who have completed high school and persons who have left high school.

(Sec. 195(2); 20 U.S.C. 2461.)

"Bilingual vocational training" means training or retraining in which instruction is presented in both the English language and the dominant language of the persons receiving training and which is conducted as part of a program designed to prepare individuals of limited English-speaking ability for gainful employment as semiskilled or skilled workers or technicians or subprofessionals in recognized occupations and in new and emerging occupations, but excluding any program to prepare individuals for employment in occupations which require a baccalaureate or advanced degree; bilingual vocational training includes guidance and counseling (either individually or through group instruction) in connection with such training or for the purpose of facilitating occupational choices; instruction related to the occupation or occupations for which the students are in training or instruction necessary for students to benefit from such training; the training of persons engaged as, or preparing to become, instructors in a bilingual vocational training program; and the acquisition, maintenance, and repair of instructional supplies, aids, and equipment, but such term does not include the construction, acquisition, or initial equipment of buildings or the acquisition or rental of land.

(Implements Sec. 181; 20 U.S.C. 2411.)

"CETA" means the Comprehensive Employment and Training Act of 1973, Pub. L. 93-23, 87 Stat. 839, as amended.

"Commissioner" means the U.S. Commissioner of Education or the Commissioner's designee.

(Sec. 195(5); Sec. 421A(a) of GEPA; 20 U.S.C. 2461.)

"Construction" includes:

(a) Construction of new buildings;

(b) Acquisition, expansion, remodeling, and alteration of existing buildings;

(c) Site grading and improvement; and

(d) Architect fees.

(Sec. 195(4); 20 U.S.C. 2461.)

"Cooperative education" means a program of vocational education for persons who, through written cooperative arrangements between the school and employers, receive instruction, including required academic courses and related vocational instruction by alternation of study in school with a job in any occupational field, but these two experiences must be planned and supervised by the school and employers so that each contributes to the student's education and to his or her employability. Work periods and school attendance may be on alternate half-days, full days, weeks, or other periods of time in fulfilling the cooperative program. (Sec. 195(18); 20 U.S.C. 2461.)

"Curriculum materials" means materials: (a) Covering instruction in a course or series of courses in any occupational field; and

(b) Designed to prepare persons for employment at the entry level; or

(c) Designed to upgrade occupational competencies of those previously or presently employed in any occupational field. (Sec. 195(19); 20 U.S.C. 2461.)

"Disadvantaged" means:

(a) Persons (other than handicapped persons) who:

(1) Have academic or economic disadvantages; and

(2) Require special services, assistance, or programs in order to enable them to succeed in vocational education programs. (Sec. 195(16); 20 U.S.C. 2461.)

(b) "Academic disadvantage," for the purposes of this definition of "disadvantaged," means that a person:

(1) Lacks reading and writing skills;

(2) Lacks mathematical skills; or

(3) Performs below grade level.

(c) "Economic disadvantage," for the purposes of this definition of "disadvantaged," means:

(1) Family income is at or below national poverty level;

(2) Participant or parent(s) or guardian of the participant is unemployed;

(3) Participant or parent of participant is recipient of public assistance; or

(4) Participant is institutionalized or under State guardianship. (Interprets Sec. 195(16); 20 U.S.C. 2461.)

"Eligible recipient" means:

(a) A local educational agency, or

(b) A postsecondary educational institution. (Sec. 195(13); 20 U.S.C. 2461.)

"Financial ability," as used in section 106(a)(5)(B)(i) of the Act means the property wealth per capita of local school districts and of other public agencies having a tax base or the total tax effort of the area served by these schools and agencies as that effort is a percentage of the income per capita of those within the taxing body. (Implements Sec. 106(a)(5)(B)(i); 20 U.S.C. 2306; H. Rept. No. 94-1085, p. 34.)

"Handicapped" means:

(a) A person who is:

(1) Mentally retarded;

(2) Hard of hearing;

(3) Deaf;

(4) Speech impaired;

(5) Visually handicapped;

(6) Seriously emotionally disturbed;

(7) Orthopedically impaired; or

(8) Other health impaired person, or persons with specific learning disabilities; and

(b) Who, by reason of the above:

(1) Requires special education and related services, and

(2) Cannot succeed in the regular vocational education program without special educational assistance; or

(3) Requires a modified vocational education program. (Sec. 195(7); Sec. 602(1) of the Education of Handicapped Act; 20 U.S.C. 2461; 20 U.S.C. 4001.)

"HEW" means the Department of Health, Education, and Welfare. (42 U.S.C. 3501.)

"High school program" means vocational education for persons in grades 9 through 12. (Implements Sec. 101; 20 U.S.C. 2461.)

"Industrial arts education programs" means those education programs:

(a) Which pertain to the body of related subject matter, or related courses, organized for the development of understanding about all aspects of industry and technology, including learning experiences involving activities such as experimenting, designing, constructing, evaluating, and using tools, machines, materials, and processes; and

(b) Which assist individuals in making informed and meaningful occupational choices or which prepare them for entry into advanced trade and industrial or technical education programs. (Sec. 195(15); 20 U.S.C. 2461.)

"Institution of higher education" means institution of higher education as defined in section 1201(a) of the Higher Education Act.

(Sec. 1201(a) of the Higher Education Act, 20 U.S.C. 1141(a).)

"Limited English-speaking ability" when used in reference to an individual means:

(a) Individuals who were not born in the United States or whose native tongue is a language other than English; and

(b) Individuals who came from environments where a language other than English is dominant, and by reasons thereof, have difficulties speaking and understanding instruction in the English language. (20 U.S.C. 880b-1.)

"Local educational agency" means:

(a) A board of education (or other legally constituted local school authority) having administrative control and direction of public elementary or secondary schools in a city, county, township, school district, or political subdivision of a State; or

(b) Any other public educational institution or agency having administrative control and direction of a vocational educational program. (Sec. 195(10); 20 U.S.C. 2461.)

"Low-income family or individual" means families or individuals who are determined to be low-income according to the latest available data from the Department of Commerce. (Sec. 195(17); 20 U.S.C. 2461.)

"National Advisory Council" (NACVE) means the previously existing National Advisory Council on Vocational Education which is continued by section 162 of the Act. (Sec. 195(14); 20 U.S.C. 2461.)

"Postsecondary educational institution" means a nonprofit institution legally authorized to provide postsecondary education within a State for persons sixteen years of age or older, who have graduated from or left elementary or secondary school. (Sec. 195(12); 20 U.S.C. 2461.)

"Postsecondary program" means (for reporting purposes) vocational education for persons who have completed or left high school and who are enrolled in organized programs of study for which credit is given toward an associate or other degree, but which programs are not designed as baccalaureate or higher degree programs. (Sec. 110(c); 20 U.S.C. 2310.)

"Private vocational training institution" means a business or trade school, or technical institution or other technical or vocational school, in any State, which (a) admits as regular students only persons who have completed or left elementary or secondary school and who have the ability to benefit from the training offered by such institution; (b) is legally authorized to provide, and provides within that State, a program of postsecondary vocational or technical education designed to fit individuals for useful employment in recognized occupations; (c) has been in existence for two years or has been specially accredited by the Commissioner as an institution meeting the other requirements of this subsection; and (d) is accredited (1) by a nationally recognized accrediting agency or association listed by the Commissioner pursuant to this clause, or (2) if the Commissioner determines that there is no nationally recognized or State agency or association qualified to accredit schools of a particular category, by an advisory committee appointed by him and composed of persons specially qualified to evaluate training provided by schools of that category, which committee shall prescribe the standards of content, scope, and quality which must be met by those schools and shall also determine whether particular schools meet those standards. For the purpose of this paragraph, the Commissioner shall publish a list of nationally recognized accrediting agencies or associations and State agencies which he determines to be reliable authority as to the quality of education or training afforded." (Pub. L. 95-40; 20 U.S.C. 2461(21).)

"School facilities" means:

(a) Classrooms and related facilities (including initial equipment) and interests in lands on which such facilities are constructed.

(b) "School facilities" does not include any facility intended primarily for events for which admission is to be charged to the general public. (Sec. 195(3); 20 U.S.C. 2461.)

"Secondary program" means vocational education for persons in secondary grades as defined by State law. (Implements Sec. 101; 20 U.S.C. 2301.)

"Secretary" means the Secretary of Health, Education, and Welfare. (Sec. 195(6); 20 U.S.C. 2461.)

"State" includes:

(a) The 50 States;

(b) The District of Columbia;

(c) The Commonwealth of Puerto Rico;

(d) The Virgin Islands;

(e) Guam;

(f) American Samoa; and

(g) The Trust Territory of the Pacific Islands. (Sec. 195(8); 20 U.S.C. 2461.)

"State board" means the State board designated or created by State law as the sole State agency responsible for:

(a) The administration of vocational education; or

(b) Supervision of the administration of vocational education in the State. (Sec. 195(9); 20 U.S.C. 2461.)

"State educational agency" (SEA) means:

(a) The State board of education; or

(b) Other agency or office primarily responsible for the State supervision of public elementary and secondary schools; or

(c) If there is no such office or agency, an office or agency designated by the Governor or by State law. (Sec. 195(11); 20 U.S.C. 2461.)

"Vocational education" means organized educational programs which are directly related to the preparation of individuals for paid or unpaid employment, or for additional preparation for a career requiring other than a baccalaureate or advanced degree; for purposes of this paragraph, the term "organized education program" means only:

(a) Instruction related to the occupation or occupations for which the students are in training or instruction necessary for students to benefit from such training; and

(b) The acquisition, maintenance, and repair of instructional supplies, teaching aids and equipment. The term "vocational education" does not mean the construction, acquisition, or initial equipment of buildings, or the acquisition or rental of land. (Sec. 195(1); 20 U.S.C. 2461.)

"Vocational instruction" means instruction which is designed to prepare individuals upon its completion for employment in a specific occupation or cluster of closely related occupations in an occupational field, and which is especially and particularly suited to the needs of those engaged in or preparing to engage in such occupation or occupations. Such instruction may include:

(a) Classroom instruction;

(b) Classroom related field, shop, and laboratory work;

(c) Programs providing occupational work experiences, including cooperative education and related instructional aspects of apprenticeship programs;

(d) Remedial programs which are designed to enable individuals to profit from instruction related to the occupation or occupations for which they are being trained by correcting what ever educational deficiencies or handicaps prevent them from benefiting from such instruction; and

(e) Activities of vocational student organizations which are an integral part of the vocational instruction, subject to the provisions in § 104.513. (Implements Sec. 120(b)(1)(A); 195(1); 20 U.S.C. 2330, 2461.)

150. In addition, certain parts of the Act impose other special funding criteria, priorities, and conditions which must be considered. For example, both the work study program (section 121) and cooperative vocational education program (section 122) require that priority in funding be given to areas of high youth dropouts or youth unemployment. (Sec. 195(9); 20 U.S.C. 2461.)

"State educational agency" (SEA) means:

(a) The State board of education; or

(b) Other agency or office primarily responsible for the State supervision of public elementary and secondary schools; or

(c) If there is no such office or agency, an office or agency designated by the Governor or by State law. (Sec. 195(11); 20 U.S.C. 2461.)

"Vocational education" means organized educational programs which are directly related to the preparation of individuals for paid or unpaid employment, or for additional preparation for a career requiring other than a baccalaureate or advanced degree; for purposes of this paragraph, the term "organized education program" means only:

(a) Instruction related to the occupation or occupations for which the students are in training or instruction necessary for students to benefit from such training; and

(b) The acquisition, maintenance, and repair of instructional supplies, teaching aids and equipment. The term "vocational education" does not mean the construction, acquisition, or initial equipment of buildings, or the acquisition or rental of land. (Sec. 195(1); 20 U.S.C. 2461.)

"Vocational instruction" means instruction which is designed to prepare individuals upon its completion for employment in a specific occupation or cluster of closely related occupations in an occupational field, and which is especially and particularly suited to the needs of those engaged in or preparing to engage in such occupation or occupations. Such instruction may include:

(a) Classroom instruction;

(b) Classroom related field, shop, and laboratory work;

(c) Programs providing occupational work experiences, including cooperative education and related instructional aspects of apprenticeship programs;

(d) Remedial programs which are designed to enable individuals to profit from instruction related to the occupation or occupations for which they are being trained by correcting what ever educational deficiencies or handicaps prevent them from benefiting from such instruction; and

(e) Activities of vocational student organizations which are an integral part of the vocational instruction, subject to the provisions in § 104.513. (Implements Sec. 120(b)(1)(A); 195(1); 20 U.S.C. 2330, 2461.)

"Vocational instruction" means instruction which is designed to prepare individuals upon its completion for employment in a specific occupation or cluster of closely related occupations in an occupational field, and which is especially and particularly suited to the needs of those engaged in or preparing to engage in such occupation or occupations. Such instruction may include:

(a) Classroom instruction;

(b) Classroom related field, shop, and laboratory work;

(c) Programs providing occupational work experiences, including cooperative education and related instructional aspects of apprenticeship programs;

(d) Remedial programs which are designed to enable individuals to profit from instruction related to the occupation or occupations for which they are being trained by correcting what ever educational deficiencies or handicaps prevent them from benefiting from such instruction; and

(e) Activities of vocational student organizations which are an integral part of the vocational instruction, subject to the provisions in § 104.513. (Implements Sec. 120(b)(1)(A); 195(1); 20 U.S.C. 2330, 2461.)

"Vocational instruction" means instruction which is designed to prepare individuals upon its completion for employment in a specific occupation or cluster of closely related occupations in an occupational field, and which is especially and particularly suited to the needs of those engaged in or preparing to engage in such occupation or occupations. Such instruction may include:

(a) Classroom instruction;

(b) Classroom related field, shop, and laboratory work;

(c) Programs providing occupational work experiences, including cooperative education and related instructional aspects of apprenticeship programs;

(d) Remedial programs which are designed to enable individuals to profit from instruction related to the occupation or occupations for which they are being trained by correcting what ever educational deficiencies or handicaps prevent them from benefiting from such instruction; and

(e) Activities of vocational student organizations which are an integral part of the vocational instruction, subject to the provisions in § 104.513. (Implements Sec. 120(b)(1)(A); 195(1); 20 U.S.C. 2330, 2461.)

"Vocational instruction" means instruction which is designed to prepare individuals upon its completion for employment in a specific occupation or cluster of closely related occupations in an occupational field, and which is especially and particularly suited to the needs of those engaged in or preparing to engage in such occupation or occupations. Such instruction may include:

(a) Classroom instruction;

(b) Classroom related field, shop, and laboratory work;

(c) Programs providing occupational work experiences, including cooperative education and related instructional aspects of apprenticeship programs;

(d) Remedial programs which are designed to enable individuals to profit from instruction related to the occupation or occupations for which they are being trained by correcting what ever educational deficiencies or handicaps prevent them from benefiting from such instruction; and

(e) Activities of vocational student organizations which are an integral part of the vocational instruction, subject to the provisions in § 104.513. (Implements Sec. 120(b)(1)(A); 195(1); 20 U.S.C. 2330, 2461.)

"Vocational instruction" means instruction which is designed to prepare individuals upon its completion for employment in a specific occupation or cluster of closely related occupations in an occupational field, and which is especially and particularly suited to the needs of those engaged in or preparing to engage in such occupation or occupations. Such instruction may include:

(a) Classroom instruction;

(b) Classroom related field, shop, and laboratory work;

(c) Programs providing occupational work experiences, including cooperative education and related instructional aspects of apprenticeship programs;

(d) Remedial programs which are designed to enable individuals to profit from instruction related to the occupation or occupations for which they are being trained by correcting what ever educational deficiencies or handicaps prevent them from benefiting from such instruction; and

(e) Activities of vocational student organizations which are an integral part of the vocational instruction, subject to the provisions in § 104.513. (Implements Sec. 120(b)(1)(A); 195(1); 20 U.S.C. 2330, 2461.)

"Vocational instruction" means instruction which is designed to prepare individuals upon its completion for employment in a specific occupation or cluster of closely related occupations in an occupational field, and which is especially and particularly suited to the needs of those engaged in or preparing to engage in such occupation or occupations. Such instruction may include:

(a) Classroom instruction;

(b) Classroom related field, shop, and laboratory work;

(c) Programs providing occupational work experiences, including cooperative education and related instructional aspects of apprenticeship programs;

(d) Remedial programs which are designed to enable individuals to profit from instruction related to the occupation or occupations for which they are being trained by correcting what ever educational deficiencies or handicaps prevent them from benefiting from such instruction; and

(e) Activities of vocational student organizations which are an integral part of the vocational instruction, subject to the provisions in § 104.513. (Implements Sec. 120(b)(1)(A); 195(1); 20 U.S.C. 2330, 2461.)

Answer: Yes. Section 108(b)(1)(B)(ii) of the Act provides that the annual program plan must "set out explicitly the proposed distribution of such funds among eligible recipients."

Question No. 8: Are there any complaint procedures available to parents, students, and other individuals to the State education agency?

Answer: Although the Act does not require the State to adopt a formal grievance procedure for parents, students, and other individuals, the State may wish to develop procedures for resolving these complaints. These procedures might include specific time limits for investigation and resolution of complaints, an opportunity for the complainant to present evidence to the State educational agency, and the dissemination of information concerning these procedures. In addition, the complaint procedure for violations of Title IX are contained in 45 CFR 86.8(b).

Question No. 9: How must the State make the five-year plan and annual program plan reasonably available to the public in accordance with section 106(a)(9)?

Answer: The State should make the plans readily available in places such as libraries, community colleges, and local school districts. With regard to members of the general public requesting copies of the plans, the State may wish to follow the standards and fee schedule of the Department's regulations under the Federal Freedom of Information Act (Pub. L. 90-23, 45 CFR Part 5).

Question No. 10: At what stage must the State make the plans available to the public?

Answer: Since the public must have some familiarity with the content of the planning documents prior to the public hearing the State should make drafts of the plans available prior to the public hearings.

Question No. 11: When will the Commissioner make the State plans available to the public?

Answer: Under the Department's Freedom of Information Regulations (45 CFR Part 5), "State plan material" is specifically listed in the Appendix as "Generally Available." This means that State plans sent or delivered to the Office of Education, or letters relating thereto, will be available. Therefore, both the five-year State plan and annual program plan will be available to members of the public, on request for the document, as soon as the document is received by the Office of Education in a regional office or the central office. The document will be available on receipt, before the Commissioner's review or approval.

Question No. 12: If the State legislature supports the entire cost (other than tuition payments) of operation of postsecondary area vocational schools, how would the relative financial ability of the institution be established pursuant to section 106(a)(5)(B)(i) of the Act?

Answer: An institution with no local tax base for support would have to calculate its relative financial ability on the amount of funds the State legislature makes available to it.

Question No. 13: Two commenters questioned the appropriateness of participants (other than those representatives specified in section 107(a)(1)) being involved in the development of the plan.

Answer: While a State may involve other participants, only one member of each of the designated agencies, councils, and individuals specified in section 107(a)(1) of the Act may be involved in the development of the plan.

Question No. 14: May the State board design the membership of the section 107 planning group in such a way that the State educational agency's personnel constitute a majority of the voting membership?

Answer: The section 106(a)(5) funding formula must be applied to all Federal funds distributed under sections 120, 134, 140 and

Answer: Membership on the planning group is limited to one official representative for each of the agencies, councils, and individual categories specified in section 107(a) (1) of the Act. One person may be the State agency's representative for more than one of the ten categories if that State agency has multi-responsibility. There is, however, no requirement for a vote by each representative.

Question No. 15: Should CETA be included "among the various institutions of the State" under section 107(b) (2) (A)?

Answer: No. CETA is not an institution for purposes of § 107(b) (2) (A). Through the coordination efforts in § 104.188 the State board will have data on programs conducted under CETA and will consider these data in its planning.

Question No. 16: What basis should the State use to determine if a shift in funding for programs in secondary schools has occurred in accordance with § 104.315?

Answer: The State should rely on the 601T forms submitted to the Office of Education for fiscal years 1975 and 1976. These reports should specify the amounts spent at the secondary level. If projected Federal expenditures for programs in secondary schools in either fiscal year 1978 or 1979 are not within 95 percent of the figures reported for fiscal years 1975 or 1976, then a justification must be set forth in the five-year State plan.

Question No. 17: How may a State comply with the section 107(a) (2) and section 108 (a) (2) requirement to provide sufficient public notice for public hearings on the five-year plan and annual program plans?

Answer: The State should mail invitations to organizations and individuals in the State having an interest in vocational education and civil rights, publish notices of the hearings in major newspapers, and place announcements on television and radio as appropriate throughout the State, beginning 30 days prior to the hearings.

Question No. 18: Must the section 110 minimum percentages for the national priority programs (handicapped, disadvantaged, post-secondary) be computed against the allotment under section 102(a) prior to the 80/20 split for subparts 2 and 3?

Answer: No. Regardless of whether the computation is made prior to or after the 80/20 division, the minimum percentages must be based on the total allocation, not just the 80 percent for subpart 2 or the 20 percent for subpart 3.

Question No. 19: Must the State pay exactly 50 percent, at least 50 percent, or up to 50 percent for the three national priority programs in section 110 of the Act?

Answer: The State must pay at least 50 percent of the cost of vocational education programs for the national priority programs in section 110 of the Act (§ 104.303).

Question No. 20: May a State use local funds earmarked for local administration as part of the State's matching share for State administration under section 111(a) (2)?

Answer: No. The State matching share must be earmarked for State administration, not local administration. The non-Federal source of funding for State administration, however, may be generated at either the State or local level.

Question No. 21: May a State use tuition fees to meet the statutory matching requirements?

Answer: No. In accordance with § 100b.58 of the General Education Provisions Regulations, tuition and fees collected may not be included as part of the Federal or non-Federal share of expenditures under any Federal program.

Question No. 22: Does the § 104.321 provision of maintenance of fiscal effort allow the State to use a per student basis one year

and then change and use aggregated cost the next year?

Answer: Yes. The State may annually select either of the two bases. Local educational agencies and postsecondary institutions may also select either of the two bases.

Question No. 23: To determine maintenance of fiscal effort, will the Commissioner compare the amount between the present and previous year or between the preceding and second preceding year?

Answer: In accordance with § 104.322, the Commissioner will determine maintenance of effort by comparing the preceding year to the second preceding year.

Question No. 24: Are the evaluations of programs conducted by the State board available to the general public?

Answer: Yes. The annual accountability report, which is available to the public, must contain a summary of the evaluations of programs conducted by the State.

Question No. 25: What does the requirement in section 120(b) (2) of the Act that the State board make a specific finding in each instance of funding for stipends in section 120(b) (1) (G) of the Act pertain to?

Answer: Each eligible recipient in the State desiring to provide stipends to students shall include an assurance in its local application to the State board that students to receive stipends have acute economic needs which cannot be met due to inadequate funding in other programs (§ 104.573).

Question No. 26: Section 104.402 of the regulation gives the State board wide latitude and discretion in regard to the collection and reporting of data to evaluate the effectiveness of its programs. Will it be possible to aggregate across all States the data thus collected and meet the reporting requirements of section 112(b) of the Act?

Answer: Aggregation of the data on program completers and leavers required by section 112(b) (1) (B) of the Act will be assured by use of the uniform definitions and information elements and the instructions and standards required by §§ 104.404(d) and 104.405 of the regulation. As for the evaluation required by section 112(b) (1) (A) of the Act, it is the Commissioner's preference that, in view of the increased burden of evaluation under the new Act and the as yet undetermined nature of the new national reporting and accounting system mandated by section 161 of the Act, the State board should be given considerable latitude. After a year of experience with the new Act, it may be found desirable to reconsider the reporting requirements.

Question No. 27: What programs are eligible for funding under the assurance which specifies "of significant assistance to individuals enrolled in making an informed and meaningful occupational choice as an integral part of a program of orientation and preparation"? At what grade level may these programs be offered?

Answer: Prevocational or exploratory programs which are designed to be of significant assistance to individuals enrolled in making an informed and meaningful occupational choice may be funded under the Act. Specifically, programs in industrial arts may be supported with funds under section 120 of the Act beginning at the secondary level (as defined by the State). Exemplary and innovative programs under section 132, consumer and homemaking programs under section 150, and vocational guidance under section 134 may be provided at all levels.

Question No. 28: May subpart 3 funds for program improvement and support services be used for the programs for the special populations described in section 120(b) (1) (L)?

Answer: No. The program outlined in section 120(b) (1) (L) is included among the purposes of the subpart 2 basic grant and, therefore, must be funded under subpart 2.

Question No. 29: May a State satisfy the requirement in § 104.502(b) by providing regular vocational education programs without special courses or instruction in how to seek employment for the special populations listed in § 104.621?

Answer: No. The State must provide these special populations with vocational education programs which offer special instruction in how to seek employment and placement services for graduates.

Question No. 30: Is a correctional institution of the State eligible to receive funds?

Answer: Yes. Under section 195(13) only LEA's or post-secondary institutions are "eligible recipients." The State or eligible recipient may, however, enter into an arrangement with the agency administering correctional institutions for the provision of vocational training.

Question No. 31: May funds available for establishing day care centers be used for the establishment of centers in schools? May these centers also be used as a laboratory for training students for employment in child care occupations?

Answer: Yes. The day care centers may be established in the schools and may serve as a learning laboratory for training students for employment in child care occupations.

Question No. 32: May a State use section 130 funds to support research activities in LEA's?

Answer: Yes. Section 130 authorizes the Commissioner to allocate funds to the States for, among others, the purposes of section 131. Section 131(a) authorizes the State to support a research coordinating unit (RCU) for research by the RCU itself or for contracts by the RCU for research. Thus, the RCU may enter into a contract with the LEA for research.

Question No. 33: Does the Act require the State to match funds for research, or for exemplary projects, or curriculum development projects, on a program-by-program basis?

Answer: No. Section 111 of the Act does not require a program-by-program matching by the State in programs under sections 130, 131, 132, or 133. See § 104.302 of the regulation as to matching on a State-wide basis and the exceptions.

Question No. 34: May States use funds under § 104.772 to train and upgrade high school counselors to enable them to serve vocational education students better?

Answer: Yes. If the State chooses to use its funds for this purpose, it must incorporate this type of training in its approved five-year State plan and annual program plan for vocational education. Sections 104.772 and 104.773 of the regulations address this point.

Question No. 35: May a State use its vocational education personnel training funds to train interpreter-tutors to work with deaf students of vocational education?

Answer: This use of the funds would be allowable if it is set forth in the approved five-year State plan and annual program plan for vocational education.

Question No. 36: May an LEA use funds under subpart 4, Part B of the Act, "Emergency Assistance for Remodeling and Renovation of Vocational Education Facilities" for new construction?

Answer: No. Section 191 of the Act is clear that this new program is for "modernization of facilities and equipment and the conversion of academic facilities necessary to assure that such facilities will be able to offer vocational education programs which give rea-

sonable promise of employment." The same section refers to "remodeling and renovation" of facilities. There is no authorization in subpart 4 for construction of new facilities. Use of funds for "construction of area vocational education facilities" is authorized in section 120(b) (1) (E).

Question No. 37: Are private, non-profit rehabilitation centers and workshops eligible for emergency remodeling funds under subpart 4?

Answer: No. Section 191 of the Act states, as eligible, only "local educational agencies in urban and rural areas."

Question No. 38: Are leased premises eligible for emergency assistance for remodeling under subpart 4?

Answer: Yes. The Act does not state whether leased premises are eligible for emergency remodeling assistance. Determinations will have to be made on a case-by-case basis. Facilities leased by an LEA under a 99-year lease should be treated as facilities owned by an LEA. Where facilities are leased on a short-term lease, the LEA might not score points under criterion 9 (§ 105.504(b) (9)), as use of funds to renovate premises on a short-term lease might not be economical.

COMMENTS AND RESPONSES

The following comments, suggestions, and criticisms were submitted in writing in response to the proposed rules. After the summary of each comment, a response is set forth stating the changes which have been made in the regulations or the reasons why no change is deemed necessary or appropriate. The comments are grouped based on the sections affected, arranged in sequence.

PART 104—STATE VOCATIONAL EDUCATION PROGRAMS

SUBPART 1—STATE ADMINISTRATION

§ 104.2 *Purpose:* Meaning of "where necessary maintain."

Comment: A commenter pointed out that one of the purposes of the new Act is to assist the States "in extending, improving, and, where necessary, maintaining existing programs of vocational education"; that the new Act specifically inserted "where necessary" in order to give the maintenance of existing programs a lesser priority than that given to expanding and improving programs; and that the proposed regulation fails to carry out that intention. Another commenter asked for a definition of "where necessary."

Response: In section 101 of the Act, Congress set forth the purposes of the new Vocational Education Act. The regulation, in § 104.2, repeats the language of section 101 exactly, leaving "extending" and "improving" programs of vocational education ahead of "maintaining" existing programs, and leaving in the phrase "where necessary" as modifying "maintaining existing programs." The Conference Report (Report No. 94-1701, p. 214) states: "The determination of necessity is to be made by appropriate State and local officials. The phrase is not intended to authorize the Commissioner of Education to apply a strict litmus test of absolute necessity before an on-going program can be funded. However, it is intended to encourage States to use their limited amount of Federal funds to invest in the often-expensive start-up costs of new programs." The maintaining of existing programs should be the subject of study in the preparation of the five-year State plan and the annual program plan and accountability report. Since the maintaining of existing programs is such a broad subject, no definition of "where necessary" has been attempted. No change is made in the regulation.

§ 104.2 *Purpose:* "Youth with specific learning disabilities."

Comment: A commenter recommended that § 104.2(a) (4) of the statement of "purpose" be amended to change the phrase "those with special educational handicaps" to "youth with specific learning disabilities."

Response: The "purpose" as set forth in § 104.2 is taken verbatim from section 101 of the Act. This statement of purpose was not changed by the Technical Amendments, Pub. L. 95-40. The Technical Amendments, however, include in the definition of handicapped, "persons with specific learning disabilities." A corresponding change is made in the definition of "handicapped" in the Appendix to Part 104 of the regulations.

STATE BOARD

§§ 104.31-104.33 *State board staff.*

Comment: A commenter recommended that the regulation include requirements for an adequate State board to carry out its responsibilities and functions, including, a full-time director.

Response: The recommendation is accepted. A section (§ 104.34) is added to require the State board to provide for a State staff sufficiently qualified and in sufficient number to administer properly the State's program of vocational education. Through oversight this provision was omitted from the NPRM. Section 104(a) of the Act places great responsibility on the State Board for administration and leadership. The requirement for adequate staffing by the State board is entirely appropriate.

§ 104.32 *State board: Definition of the term "coordination."*

Comment: Several commenters suggested that the regulation be amended to define the term "coordination." These comments also inquired: (1) If the responsibilities of the State board for coordination of the development of policy and the development of the State plans were intended to limit the authority of the State board, and (2) if the State board is to limit its coordination activities to the groups identified in clauses (A) through (J) of section 107(a) of the Act.

Response: In requiring the State board to coordinate the development of policy and the development of the State plans with the agencies, councils, and individuals identified in section 107(a) of the Act, it was the intent of Congress to establish a mechanism to strengthen the planning function of the State board, rather than limit its authority. To carry out the mandate of section 104(a) of the Act, the State board convenes the planning group, established by section 107(a) of the Act, for at least three meetings during each fiscal year concerning the development of the annual program plan and accountability report and for at least four meetings concerning the development of the five-year State plan.

Although only representatives of the agencies, councils, and individuals identified in section 107(a) of the Act must participate in the decision-making activities of the planning group, the State board is responsible for coordinating the State plan with any group or individual having an interest in vocational education. Section 107 of the Act requires that the State board hold public hearings to provide every interested person or group the opportunity to participate in the development of the State plan. No change is made in the regulation.

§ 104.32 *Responsibilities of the State board.*

Comment: A commenter suggested that it may be misleading to list only the coordi-

nate responsibilities of the State board in § 104.32 of the regulation. To correct this situation, it was suggested that the regulation be changed to read, "The State board's responsibilities shall include but not be limited to . . ."

Response: This recommendation is accepted. Section 104.32 of the regulation follows very closely the language of section 104 (a) of the Act which sets forth the (non-delegable) responsibilities of the State board. In order to assure that the regulation provides a clear interpretation of the intent of the Act, the first sentence of § 104.32 of the regulation is amended to read, "The responsibilities of the State board include (but are not limited to):"

Comment: A commenter expressed the view that it was the intent of Congress to have the inspiration for the planning of the vocational education programs arise from the local educational level where the needs of the student are "best seen and cared for."

Response: Each local educational agency and postsecondary educational institution that participates in the vocational education program submits an application to the State board. The State plan is formed, in part, from the vocational education programs that are identified in the applications from local educational agencies and postsecondary institutions. Since the planning group is responsible for assuring that the State plan provides a comprehensive and coordinated vocational education program that is responsive to the total vocational education program needs of the State, no change is made in the regulation.

§ 104.32(d) *State board consultation with the State advisory council.*

Comment: In noting that the regulation specifies that members of the State board are responsible for consulting with the State advisory council, a commenter suggested that it is also appropriate for the staff of the State board and the staff of the council to consult frequently on matters of mutual concern.

Response: Section 104.32(d) of the regulation is consistent with section 104(a) (1) of the Act which requires that the State board consult with the State advisory council regarding the planning and reporting of the State's vocational education programs. The regulation reflects the intent of Congress, which was to establish a procedure to ensure the participation of the State advisory council in the development of the State plans and accountability reports. It is not the intent of the Act nor the regulation to preclude, discourage, or hamper in any way the exchange of formal or informal communications between the State board and the State advisory council, or between the staffs of the board and the council. Consultation between the two staffs need not be required in the regulations. No change is made in the regulation.

FULL-TIME PERSONNEL AND FUNCTIONS TO ELIMINATE SEX DISCRIMINATION AND SEX STEREOTYPING

§§ 104.71-76 *More specific guidance on full-time personnel.*

Comment: Many commenters requested more specific language in the regulations on the designation, support, and functions of the full-time personnel to eliminate sex bias. All felt that too many decisions were left up to the individual States and that the States need more guidance, particularly in this area.

Response: Although many decisions (such as placement of the personnel within the

State structure, the number of personnel necessary) will be left to the States to make, changes have been made in §§ 104.71-76 of the regulation in an attempt to strengthen and clarify the activities under these sections. These changes are spelled out in more detail in the following comments and responses.

§ 104.72. "Employment/designation" of full-time personnel.

Comment. A commenter felt that the words "designation" and "assign" in this section convey the impression that the State education agency must utilize personnel already employed by the agency to fill the positions under this section. Suggested instead was the use of the terms "employment/designation" and "employ/assign."

Response. The use of the terms "designation" and "assign" in § 104.72 is not intended to indicate that current State agency personnel must be used to fill the positions under this section. There is no indication in either the Act or legislative history that such an interpretation is valid. In addition, the joint terms suggested by the commenter ("employment/designation" and "employ/assign") are not seen as clarifying the meaning. However, in light of other comments received, further clarification appears necessary, therefore, the terms "designation" and "assign" have been changed to "selection" and "select."

§ 104.72. Full-time personnel personnel working full time.

Comment. A number of commenters noted the difference between the language of the Act requiring "full-time personnel" and the language of the regulation requiring "personnel to work full time" on sex bias issues. Several of these commenters have requested that the language of the regulation be changed. Others, however, have opposed such a change on grounds that it might lead to hiring personnel to perform these functions on a less than full-time basis.

Response. The change of language in the regulation to "personnel to work full time" is intended to clarify the Act. It is apparent from the legislative history that Congress intended that the State have at least one professional working full time on the elimination of sex bias and sex stereotyping in vocational education rather than a person employed full time but working less than full time on the elimination of sex bias. Although personnel may be placed in any unit the State chooses, the professional personnel must work full time on elimination of sex bias and sex stereotyping in vocational education. Thus no change is made in the regulation.

§ 104.72. Placement of full-time personnel.

Comment. One commenter noted that neither the Act nor the regulation mandates the full-time personnel hired under this section to be employed by the State department of education, vocational education division. Therefore, this commenter interpreted this to mean that it is not necessary for personnel filling these positions to be employees of the State vocational division.

Response. The commenter is correct in this interpretation. It appears from the legislative history that Congressional intent was not to limit the State in placing this personnel within the State structure. Page 215 of the Conference Report (No. 94-1701) states that there is no intention "that the State must assign such personnel to the State board." Each State may decide where the personnel will function best. The personnel may operate within the vocational division or may work from another area. However, the personnel must work full time on elimination of sex bias and sex stereotyping in vocational edu-

cation. No change is made in the regulation.

§ 104.72. Criteria for selection of full-time personnel.

Comment. Many commenters expressed the concern that, unless criteria for the selection of the full-time personnel were set forth by the regulation, the positions might be filled with persons who are not qualified or who might compound the bias problems. The criterion most often suggested was that the persons chosen for these positions have demonstrated a commitment to the elimination of sex bias in educational programs. Other qualifications suggested include knowledge of sex bias problems and issues, leadership capability, vocational education background, creativity, patience, and determination. Several commenters felt that the States should be required to advertise the position widely and to assure that it be open to all applicants. One commenter proposed that there be a selection committee to be made up of individuals with knowledge of sex bias issues.

Response. The recommendation is accepted in part. The regulation will not prescribe specific criteria for the States to use in selecting the full-time personnel. As in selection of other State personnel, the criteria will vary from State to State; however, a paragraph has been added requiring that the States match the qualifications of the applicants with the responsibilities of the job.

§ 104.73(a). Definition of sex bias.

Comment. Several commenters expressed concern over the proposed definition of "sex bias." The difficulty stems from the statement that "as used in the Act and the regulations, sex bias . . . includes sex discrimination." One commenter remarked that bias and discrimination are not the same. Others were concerned that "sex stereotyping" had been left out. These commenters suggested that "sex stereotyping" be added wherever "sex bias" is used in the regulations or that "sex stereotyping" be added to the final sentence in the definition on the use of "sex bias" in the Act and regulations. Still others favored discarding the proposed definition for a new one.

Response. The recommendation that the definition of sex bias be modified is accepted. The final sentence of § 104.73(a) is deleted since it is confusing rather than clarifying. In addition, the use of the terms "sex bias," "sex discrimination," and "sex stereotyping" are clarified throughout the regulations.

§ 104.74. \$50,000 Minimum.

Comment. Several persons commented on the \$50,000 set by the regulation as a minimum for support of the full-time personnel. The comments were evenly divided regarding the words "at least \$50,000." Some commenters felt it important to stress that this is a minimum, while others felt that the \$50,000 is a specific amount set by the law to be no more and no less.

Response. There is nothing in the Act to prevent a State from spending more than \$50,000 to support the full-time personnel, but a State may not spend less than that amount. To emphasize this point, the language of the regulation has been amended to read "not less than" \$50,000.

Comment. A few commenters felt that the salary items (§ 104.74(b)(1) and (2)) should be combined to read "salaries for full-time staff," without making a distinction between professional and support staff.

Response. Section 104(b)(1) of the Act is interpreted to mean that the professional staff, but not necessarily the support staff, must work full time on the functions set forth in § 104.75. The regulation does not mandate that clerical and other support staff

work full time in this area. Thus, the question whether support staff must work full time is left to the discretion of the State. No change is made in the regulation.

§ 104.74(b). Allowable activities.

Comment. Many commenters were concerned that § 104.74(b) was too restrictive regarding use of the \$50,000. These commenters requested that items be added to the list of allowable expenditures, such as publications, workshops, and dissemination of information.

Response. The proposed language in § 104.74(b) is reasonable in that it provides sufficient guidance to the States on the use of funds while being broad enough to include the additional list of activities suggested. The measure of a legitimate expense under this section is the degree to which it relates to the support of the personnel in carrying out the functions set forth in § 104.75. No change is made in the regulation.

§ 104.75. Minimum requirements for accomplishing "sex bias" functions.

Comment. A number of commenters felt that the regulation should spell out the minimum requirements to accomplish the functions listed in § 104.75. They felt that the full-time personnel needed specific guidance in fulfilling their responsibilities. Specific suggestions include development of a complaint process, a strengthened public information component, an annual report on the status of women in vocational education programs, and the use of the Title IX self-evaluation.

Response. Although the functions listed in § 104.75 provide a framework within which the full-time personnel will work, some of the above suggestions offer more guidance and have been included. Requirements have been added to emphasize the public information function of the personnel, especially in assisting the State board in publicizing the State plan hearings. Also included are references to the Title IX complaint process and self-evaluation. Other more specific suggestions were not included, since the full-time personnel will develop a plan to implement the functions which will address the needs of the particular State, and further guidance was felt unnecessary.

§ 104.75(a). Reduce sex bias and sex stereotyping.

Comment. One commenter suggested that "sex bias" be added to the language in subsection (a) of § 104.75 in addition to sex stereotyping.

Response. The recommendation is accepted. To clarify the regulation, "sex bias" has been added.

§ 104.75(d). Review of distribution of grants and contracts.

Comment. A number of commenters felt that review of the distribution of contracts as well as grants should be included in this function.

Response. The recommendation is accepted. Since the State's research, exemplary, and curriculum development programs will be conducted through contracts and since these areas also emphasize elimination of sex bias and sex stereotyping, it appears that review of contracts as well as grants would comply with Congressional intent.

§ 104.75(h). Availability of information.

Comment. Several commenters recommended that the language of this subsection be changed to require the full-time personnel to make information developed pursuant to the statutory functions available to the groups listed in § 104.75(h) through the State board rather than supplying the information to the board as well as to the other groups.

Response. The regulation is consistent with the Act which states that the information will be made available to the State board, the National and State Advisory Councils on Vocational Education, the State Commission on the Status of Women, the Commissioner, and the general public. In addition, making information available to the general public through the State board would be difficult. Therefore, no change is made in the regulation.

STATE ADVISORY COUNCIL

§ 104.91. State advisory council establishment.

Comment. Commenters pointed out that the regulation does not conform to the Act regarding the appointment of the State advisory council in the case of States in which the members of the State board are elected. The regulation refers only to the "State board" while section 105(a) of the Act uses the term "State board of education."

Response. While this appears to be an inconsistency, the legislative history supports the reference to the State board designated or created by State law as the sole State agency responsible for the administration of vocational education or for supervision of the administration of vocational education in the State. In a great majority of the States, the State board of education serves also as the State board for vocational education. There appears to be no reason for denying to an elected State board for vocational education the authority to make the appointments to the State advisory council. Therefore, the broader term "State board" is not changed in the regulation.

§ 104.92(a). State advisory council membership.

Comment. Several commenters suggested that additional groups should be represented on the State advisory council. The additional group representatives suggested were: State planning agencies, adult education, homemaking, college career planning and placement services, State's agency on aging, and the planning and coordinating agency for postsecondary education.

Response. Since categories mandated by section 105 of the Act number twenty, many of which imply multiple representation, it appears unwise to require additional appointments, thereby making the councils too large, unwieldy, and costly to operate under existing budget limitations. Councils are urged to obtain input from interested groups, not directly represented by membership, through their evaluation and public hearing process. No change is made in the regulation.

§ 104.92(a). Women on State advisory councils.

Comment. Many commenters suggested that § 104.92(a)(17) include language to the effect that at least two women be required to fulfill the requirement. While the wording of the regulation is taken directly from the Act, it was clear that the Congress intended more than one woman to fill this category. Unless the regulation is so stated, there is danger of misinterpretation at the State level.

A commenter also recommended that the phrase "one or more persons" used in the sentence having reference to minority groups be changed to "women," which is the statutory language.

Response. The recommendation relating to the change in wording of § 104.92(a)(17) from "one or more persons" is accepted.

Although a number of categories listed in this regulation use plural words, the determination of the actual number necessary for each category should be left to the appointing authority rather than have the reg-

ulations specify an exact number. Specifically, in the case of category (17), whether one or two women are appointed may depend on the number of women already appointed to other categories. The Commissioner, however, encourages the States to appoint at least two women to fulfill the requirement in category (17). No further change is made in the regulation.

§ 104.92(b)(3). Appropriate representation.

Comment. A great many commenters pointed out the need to define "appropriate representation," especially as it relates to the representation of women on the council. It was recommended that "appropriateness" be based on such criteria as the proportion of women and minorities in the State's general population, the State's work force, their representation in vocational education programs, or a combination of such factors. Further, it was suggested that the membership must include persons with an understanding about and commitment to remedy the consequences of sex and minority discrimination.

Response. The recommendation is accepted. While specific quotas are not prescribed, the final regulation includes a statement intended to implement § 104.92(b)(3). In order to reflect effectively the diverse interests and needs of the general public served by the Act, the statement makes clear that the appointing authority shall appoint to the council a significant proportion of women, racial and ethnic minorities, and representatives of geographic regions in the State. The Commissioner considers the term "appropriate representation" to be representation which generally reflects the percentage of women or minorities in the population of the State or the percentage of women or minorities in the work force of the State.

§ 104.93. Liaison with State Advisory Panel for Handicapped.

Comment. Two commenters suggested a function of the State advisory council on vocational education be added requiring "appropriate liaison and coordination activities with the State Advisory Panel for the Handicapped."

Response. It is agreed that to insure consistency in planning and program implementation, liaison and coordination between the two agencies are essential. However, as a result of the Technical Amendments, § 104.93(f) has been amended to include "special education" as one of the programs to be assessed for its part in the consistent, integrated, and coordinated approach to meeting the employment and training needs of the State. This provision, along with the required representative of the handicapped on the State advisory council, is intended to assure the necessary coordination. No change is made in the regulation.

§ 104.93(a). Council certification.

Comment. A commenter requested the deletion of the last sentence of § 104.93(a) since this appeared to be a duplication of the certification required by the council representative in § 104.171(b)(2).

Response. In addition to the certification by the council representative relating to the opportunity to participate in the planning process, the council itself must be consulted in the plan development process. Thus, the council has two avenues for involvement in the planning, with the latter being a greater commitment than that afforded other agencies. Since this procedure is statutorily mandated, no change is made in the regulation.

§ 104.93(d). State board evaluation.

Comment. A commenter objected to the word "assist" and stated that the law used the word "consult."

Response. Section 112(b) of the Act says that the State shall "consult" with the council and that the council shall "assist" the State in developing the plans. Since the regulation (§ 104.93(d)) uses the word "assist" in relation to assisting the State board, no change is made in the regulation.

§ 104.93. SACVE function—Evaluation.

Comment. Commenters suggested that the regulation provide additional direction with regard to certain of the council functions including the following: freedom to conduct whatever independent evaluation it chooses, requirement that data requested from the State board not be denied, evaluation by the council be of State board programs and not LEA programs, the time, frequency and use to be made of the "employment needs" assessment, compatibility of council findings with State-wide goals of State board, relationship of councils to State Occupational Information Coordinating Committee and the State Manpower Services Council, kinds of technical assistance to be given local advisory councils and input into the evaluation process by the local councils.

Response. While the comments have merit, the regulation intentionally provides considerable flexibility to councils in dealing with the newly assigned functions and responsibilities. If problems persist, additional technical assistance may be provided by the staff of the National Advisory Council on Vocational Education or the Office of Education. No change is made in the regulation.

§ 104.94. Public meetings.

Comment. A commenter suggested that guidelines be provided for public meetings and that these meetings be held separately from hearings on State plans.

Response. The requirement for public meetings is well established since this procedure was initiated through the Vocational Education Amendments of 1968. Since the council's public meeting is for a different purpose than the public hearings on the State plans, there is no justification for combining meetings. No change is made in the regulation.

§ 104.95(a). Staff.

Comment. A commenter suggested that professional and technical personnel be required to demonstrate a commitment to equal rights and sensitivity to the needs of populations being served. Another commenter requested deletion of the provision that the personnel not include members of the State board staff.

Response. Even though the qualifications for personnel suggested are desirable, the matter of personnel selection and the qualifications desired is a responsibility of the council. The exclusion of State board staff from serving as council staff is consistent with the Congressional intent of maintaining council independence from the administering agency. No change is made in the regulation.

§ 104.95(b). Compatibility with State policies.

Comment. Two commenters suggested that paragraph 104.95(b) be deleted since it is an infringement on the fiscal independence of the council.

Response. While it is agreed that the council should have independence from the program administrative agency, it was not intended that councils act outside the existing framework of State law and regulations on fiscal matters. Accordingly, the regulation is necessary to establish a degree of responsibility in fiscal matters and compatibility with other State agencies. This is intended to fore-

shall excesses which could bring criticism of the council. No change is made in the regulation.

§ 104.96 Fiscal independence.

Comment. Commenters suggested that the regulation make clear that councils are to be solely responsible for the expenditure and use of their funds. Regulations should provide that if the State board is the fiscal agent, the council must certify that its selection was of its own initiative and not subject to influence by the State board. It was also suggested that the phrase "except as provided in § 104.95(b)" be deleted.

Response. Section 105(f)(2) of the Act provides that the expenditure of council funds is to be determined solely by the council for carrying out its functions. However, as noted in the response under § 104.95(b) above, the councils cannot act outside the existing framework of State law and regulations on fiscal matters. The regulation makes it clear though that the responsibility for designating a fiscal agent is assigned directly to the council. No change is made in the regulation.

§ 104.97 Evaluation report.

Comment. Commenters suggested that the regulation require additional procedures related to the council evaluations, including public comment on the council's evaluation report, review of the content, techniques, and validity of the vocational education data system and assessment of the impact of vocational education programs on women and minorities.

Response. While all the suggestions are worthy of consideration by councils in performing their functions, the Congressional intent, as evidenced by the Act and legislative history, was to allow flexibility in the procedures used by councils. Since the Act requires at least one public meeting, a vocational education data system, and no discrimination on the basis of sex or minority groups, it is reasonable to expect that the council's evaluation will give consideration to these items. No change is made in the regulation.

§ 104.97 Evaluation by State advisory council.

Comment. A commenter recommended that the regulation require a written agreement between the State board and the State advisory council as to the role of each in evaluating programs.

Response. The State board and the State advisory council may wish to reduce their working agreement to writing. However, in the interest of keeping regulatory requirements to the minimum, the Commissioner has decided not to require a written agreement between the State board and the State advisory council. No change is made in the regulation.

§ 104.97 State board comment.

Comment. A commenter suggested that the council's evaluation report be accompanied by comments of the State board and that the response in writing to each recommendation accompany the State plan.

Response. The annual evaluation report is required to be submitted through the State board, at which time the board may attach comments if it desires. However, § 104.241(b)(2) requires that the accountability report, which must be submitted by the State board, include the board's consideration of each recommendation in the council evaluation report. Therefore, no change is made in the regulation.

LOCAL ADVISORY COUNCILS

§ 104.111 Local advisory councils—representatives of additional groups.

Comment. Many commenters suggested broadening the categories of membership required on the local advisory council so that the categories would be similar to the categories required of membership on the State advisory councils. Others recommended the addition of representatives of specific categories. Specific categories mentioned were: categories (17), (18), (19), and (20) described in § 104.92(a) in relation to the State advisory council; women; racial, ethnic, or major language minorities; private schools; persons knowledgeable in vocational education (but not administration); manpower services; local prime sponsor councils under the authority of CETA; the State agency responsible for data collection; and community based organization. Commenters particularly recommended that the phrase "shall be composed of members of the general public" be interpreted to include appropriate representation of women and minorities.

Response. The recommendations have been accepted in part. Since one of the main purposes of the Act is "to overcome sex discrimination and sex stereotyping in vocational education" and to "furnish equal educational opportunity" (sec. 101(3)) the Commissioner will require that an appropriate representation of women and minorities be represented on the local advisory council. Therefore, a new paragraph has been added to § 104.111 to read as follows:

(d) Each eligible recipient shall establish a local advisory council which has an appropriate representation of both sexes and an appropriate representation of the racial and ethnic minorities found in the program areas, schools, community, or region which the local advisory council serves.

§ 104.111(b) Local advisory council establishment.

Comment. A few commenters asked whether the regulation governing the establishment of local councils precludes the possibility of LEAs establishing local advisory councils on a regional basis with other LEAs. In the same connection, some commenters asked whether one council may serve more than one eligible recipient.

Response. Section 104.111(b) of the regulation is based on section 105(g)(1) of the Act which provides in part that "local advisory councils may be established for program areas, schools, communities, or regions, whichever the recipient determines best to meet the needs of that recipient." The eligible recipient, therefore, has the option to establish a local council which also serves another eligible recipient in the same geographical region of the State. For example, an LEA and a community college in the same region may decide to establish one local council to advise both recipients. This arrangement may be highly desirable for both recipients in the event they are striving for greater articulation between secondary and postsecondary interests. Accordingly, no change is made in the regulation.

§ 104.111(d) Craft committees.

Comment. A commenter pointed out that the regulation implies that only advisory councils would be required at the local educational agency or postsecondary level, despite the fact that advisory assistance through craft committees to each vocationally-funded teacher is considered essential to insure an effective instructional program.

Response. There is no intent to diminish the importance of craft committees. In fact, by making reference in the regulation to "representatives from several craft committees, . . ." the regulation assumes that craft committees are in existence and will be continued. No change is made in the regulation.

§ 104.111(d) General local advisory council.

Comment. A commenter suggested that paragraph (d) of § 104.111 be eliminated since it appears to be in conflict with paragraph (a) wherein eligible recipients are required to establish local advisory councils. It is contended that this paragraph, by suggesting that existing craft committees "may join together" to form an advisory council, takes away from the eligible recipient the responsibility for determining the make-up and method of establishing its council.

Response. The regulation is considered to be merely suggestive of a method of establishing the mandated local advisory council where craft committees or school councils already exist. It is intended to be supplementary to paragraph (a) rather than in conflict with it. No change is made in the regulation.

§ 104.112 Public meeting.

Comment. A commenter suggested the addition of a requirement for the local advisory council to hold not less than one public meeting each year at which time the public is given an opportunity to express views concerning the programs being offered by the local educational agency and the postsecondary educational agency.

Response. While the recommendation has merit, it is not appropriate to assign additional duties to the local advisory council when there is no authority for funding. No change is made in the regulation.

§ 104.112(b) Local advisory council duties.

Comment. Commenters suggested that mandating local advisory councils to "assist" the eligible recipient in developing its application goes beyond Congressional intent and would exert an undue hardship on local educational agencies. Commenters also suggested that local advisory councils be required to take an active role in the evaluation of local programs.

Response. The first recommendation is accepted. Since the Act in section 106(a)(4) (A) uses the word "consultation," the regulation is rewritten to state "consult with" in place of "assist."

With respect to the issue of whether local councils are to conduct evaluations, section 105(g)(1) provides that the local council advise the eligible recipient on the degree to which the courses being offered by the eligible recipient meet current job needs in the area. Although this activity may be viewed as a minor component of program evaluation, it should not be considered the equivalent of evaluation. Furthermore, since the Act does not provide any funding for the local councils; assigning the costly function of evaluation to the local council does not seem appropriate. However, it is expected that local councils will make extensive use of secondary data sources and any relevant evaluations that are made by other agencies. No change is made in the regulation.

NATIONAL OCCUPATIONAL INFORMATION COORDINATING COMMITTEE

§ 104.121 Establishment of the National Occupational Information Coordinating Committee (NOICC).

Comment. A commenter recommended that a section be added, prior to the state-

ment on the State Occupational Information Committee (SOICC), on the establishment of NOICC.

Response. The recommendation is accepted. Although the regulation does not include rules governing NOICC and SOICC, or other rules governing internal Federal organization, SOICC is described, and for consistency, NOICC is also described. A new § 104.121 on NOICC has been added.

STATE OCCUPATIONAL INFORMATION COORDINATING COMMITTEE

§ 104.121 Fiscal agent for State Occupational Information Coordinating Committee.

Comment. Several commenters recommended that the regulation identify the fiscal agent for the State Occupational Information Coordinating Committee (SOICC). Some of the commenters suggested that the State board for vocational education should be the fiscal agent. One commenter suggested that the Governor should appoint the agent.

Response. The regulation, as written, does not state who the fiscal agent shall be. NOICC, when making funds available to SOICCs, may require the establishment or naming of a fiscal agent. No change is made in the regulation.

§ 104.121 State Advisory Council involvement with State Occupational Information Coordinating Committee.

Comment. A commenter, noting that a representative of the SACVE is not named in section 161(b)(2) of the Act as a member of the SOICC, recommended that the regulation encourage SACVE involvement in the development of the State's occupational information data system which SOICC will develop and SACVE will use.

Response. The Act (section 161(b)(2)) and the regulation (§ 104.121(b)) set forth the required membership of SOICC. SOICC officially will be made up of representatives of only the four agencies named. Additional involvement with individuals and agencies may take place. No change is made in the regulation.

§ 104.121(c) Representatives on State Occupational Information Coordinating Committee.

Comment. A commenter suggested that the Governor, rather than the respective agency, should appoint the agency's representatives on SOICC. Another commenter suggested that staff represent the State Manpower Services Council rather than a member of the Council. Another recommended that the chief executive officer be the representative. Others suggested that the Governor should appoint additional members such as representatives of the CETA prime sponsor, guidance and counseling personnel, and career education personnel.

Response. Section 161(b)(2) of the Act states that SOICC shall be composed of a representative of each of four designated State agencies; § 104.121(b) carefully follows the Act. In paragraph (c) it is stated that the "representatives shall be selected by the respective State board, agency, or council." The Commissioner believes this is the proper interpretation of the word "representative," i.e., a person chosen by the group he or she represents. The Commissioner also believes that the representatives of the four designated groups should make up the entire voting membership of SOICC. The State might, however, appoint other observers or non-voting members. Therefore, no change is made in the regulation.

GENERAL APPLICATION

§ 104.141(c) General application amendment.

Comment. A commenter questioned the provision of § 104.141(c) that amendments to the general application be made only if and when "provisions of section 106 of the Act are changed or expire." For example, it was suggested that if a State changes its fiscal control and accounting procedures under assurance (7), this should be reflected by amending the general application.

Response. The assurances are comprehensive in coverage and obligate the State to adhere to the provisions of the general application in the future. Hence any change in procedures by a State would also be subject to compliance with the assurance on file, and no amendment to the general application is necessary. At such time, however, that a change in procedures violates the assurances of the general application, the State should notify the Commissioner accordingly. No change is made in the regulation.

§ 104.141(e) Procedures to carry out assurances.

Comment. A commenter stated that the procedures to be included in the five-year State plan for assurances 4, 5, 9, and 10 are not mandated in the Act, and that the requirement is inconsistent and arbitrary since procedures are not required for other assurances. The commenter suggested that the requirement be deleted.

Response. Section 109 requires determination by the Commissioner that adequate procedures exist "to insure that the assurances of the general application" will be carried out. Accordingly, it was determined that assurances 4, 5, 9 and 10 require a description of procedures in order for the Commissioner to approve a plan as being in compliance with the law. No change is made in the regulation.

§ 104.141(f)(4)(A) Consultation with Prime Sponsor.

Comment. A commenter recommended revision of § 104.141(f)(4)(A) to include a representative of prime sponsors in those areas where there is a prime sponsor.

Response. Section 104.141(f)(4)(A) provides that the annual application be developed in consultation "with representatives of the educational and training resources available in the area." While prime sponsors are not specifically named, they are certainly recognized as a training resource and should be consulted. No change is made in the regulation.

§ 104.141(f)(5) Consistency with the Handicapped Act.

Comment. A commenter suggested the addition of "(C) have the State vocational education plan be fully consistent with the State plan under the Education for All Handicapped Children Act of 1975 and the Federal regulations under that Act."

Response. Section 104.141(f)(10) restates the Act and requires that funds used for programs for the handicapped be consistent with the State plan under the Education of the Handicapped Act, which includes the Education for All Handicapped Children Act and the regulations under that Act. Therefore, the suggested phrase is a duplication. Also, a new regulation, § 104.5 has been added which cross-references the requirements in Part B of the Education of the Handicapped Act. Each State education agency should read the relevant regulatory provisions in 45 CFR Part 121a since those regulations provide the specific rules which govern the expenditure

of Federal vocational education funds for handicapped children within the State.

§ 104.141(g) (Renumbered § 104.141(f)(11)) Assurance of cooperation with NCES.

Comment. Several commenters suggested that the assurance in § 104.141(g) be deleted since there is an inconsistency with the assurance in § 104.141(f)(3) which requires supplying information to the Commissioner. It was contended that the Administrator of the National Center for Education Statistics (NCES) should get any information needed from the Commissioner. One commenter indicated that this assurance is a duplication and, in fact, may cause great confusion in terms of the report that is collected. Two of the commenters suggested the regulation was more stringent than the Act in using "shall assure" rather than the Act language "shall cooperate."

Response. Section 161(a) places responsibility for operating the national vocational education data reporting and accounting system with the Administrator of NCES, after jointly developing with the Commissioner the information elements and uniform definitions. Accordingly, the Commissioner believes it is essential to require an assurance that the State will cooperate with NCES in supplying the data jointly agreed to be collected under the system. No change is made in the regulation.

§ 104.141(h) (Renumbered § 104.141(f)(12)) Indian participation.

Comment. Several commenters questioned the inclusion of the assurance in § 104.141(h) since this is not contained in the law and suggested it be deleted. Other commenters proposed revised language for clarification that the State board does not allocate funds directly to Indian tribal organizations.

Response. Because of the potential for excluding Indians from the regular vocational programs, the recommendation for revision is accepted and the assurance in § 104.141(f)(12) will now read:

"The State board shall also assure that students served by Indian tribal organizations applying for or receiving funds under the Commissioner's discretionary programs, under the authority of section 103(a)(1)(B) of the Act, shall be afforded the opportunity to participate in vocational education programs administered by the State."

DEVELOPMENT OF FIVE-YEAR STATE PLAN

§ 104.161 Development of five-year State plan.

Comment. A commenter recommended that consideration be given to more appropriate planning and management procedures. The opinion was expressed that the planning process suggested is completely outdated, and that learner-oriented goals for vocational education should be used instead of goals based on employment needs. Further, if the legislation stressed what outcomes are desirable, States could use their own discretion as to how to achieve these outcomes.

The same commenter recommended that every effort be made to secure additional funding for planning and evaluation purposes and also make provision to compensate the representatives involved in the planning group.

Response. The language of the regulation concerning the planning process follows closely the Act. The State may, of course, employ planning procedures beyond those specified so long as the State plan requirements are met. The matter of changing the planning procedures and obtaining additional funding must be resolved through the legislative process. No change is made in the regulation.

§ 104.161 Time for development of a model plan.

Comment. Several commenters indicated that the period of time for development of plans is too short. One commenter suggested that the five-year State plan be revised by July 1, 1978, on a one time basis, since lack of experience and the short deadline for the initial plan will make it difficult for States to prepare a model plan by July 1, 1977.

Response. The Commissioner has no authority to waive the requirement of a complete five-year State plan by July 1, 1977. While States may not be able to develop an exemplary plan initially, the minimum requirement must be met. It is anticipated that States may wish to make amendments to improve the plan during the first year. In addition, the updating procedures in the annual program plan provide a mechanism for change and improvement of the five-year State plan. No change is made in the regulation.

§ 104.162 Local Educational Agency (LEA) input to State plan.

Comment. A commenter suggested that the use of a representative group for planning is a good procedure. Input and data from local educational agencies should be used as one of the key bases for formulating the State plan.

Response. While not specifically so outlined, sections 107 and 108 of the Act rely heavily on input and data from eligible recipients in formulating both the five-year State plan and the annual program plan. The plans in fact constitute an aggregation of the State's total effort in vocational education, and the State must rely on the eligible recipients for this data. No change is made in the regulation.

§ 104.162 Appointing authority for selecting representatives.

Comment. Commenters objected to the requirement that the appointing authority under State law designate the representatives for § 104.162(e), a local school board; § 104.162(f), vocational education teachers; and § 104.162(g), local school administrators. These objections were based on the commenters' interpretation that these appointments might be political appointments by the Governor. These commenters expressed a preference for a requirement that each of the agencies appoint its own representative.

Response. The language of the Act reads: "as determined by State law." This language was subject to interpretation and was construed to mean the appropriate appointing authority in the State. Accordingly, the language "as designated by the appropriate appointing authority" was added to § 104.162(e) through (g) to assign the responsibility for appointing these three representatives to the individual or State agency (i.e., the Governor or the State board) having authority to make appointments under State law. No change is made in the regulation.

§ 104.162 Representation on planning group.

Comment. A number of commenters suggested additional representatives and rationale for their inclusion in the development of the five-year State plan. The list included: Four-year institutions of higher education; State educational agency responsible for education programs for the handicapped; State agency on aging; State agency administering the vocational rehabilitation program; and State Commission on the Status of Women.

Response. The Act is specific relative to membership on the planning group. It is inappropriate for the regulation to require additional representation on the planning

group beyond the representatives of the ten groups specified in Section 107(a)(1) of the Act. States may involve the above groups and other groups it wishes to include in the planning process; however, only those ten groups designated by the Act constitute the decision-making group. Other groups are encouraged to provide input either directly to the planning group or through the public hearing process. No change is made in the regulation.

§ 104.162 Number of representatives on the planning group.

Comment. Two commenters raised the question of whether it would be appropriate for a State to have participants other than the ten representatives specified in section 107(a)(1) of the Act involved in the decision-making process regarding provisions of the State plan.

Response. While representatives of other groups may participate in the planning process, only one designated representative from each of the ten groups specified in section 107(a)(1) of the Act must be involved in the approval of the provisions of the five-year State plan or the annual plan. No change is made in the regulation.

Comment. A commenter asked if it is possible for the State board to design the membership of the planning group in such a way that the State educational agency's personnel constitute a majority of the voting membership. This commenter also wanted to know whether the State board may appoint several persons for each category or if it is limited to only one representative for each.

Response. Although there is no requirement that each representative to the planning group have a vote, the responsibility for decisionmaking regarding approval of the provisions of the State plans is limited to one designated representative for each of the ten categories set forth in section 107(a)(1) of the Act. One person may represent more than one of the ten categories if the agency he or she represents has responsibility in more than one of the designated areas. No change is made in the regulation.

§ 104.162(f) Representatives of vocational teachers.

Comment. A commenter recommended that "including guidance specialist" be added after "vocational education teacher" in § 104.162(f). Another commenter recommended that the regulation preclude supportive staff being included in the vocational teacher category.

Response. While certain guidance personnel may be considered vocational education teachers, the regulation does not go beyond the Act in requiring the inclusion of such personnel. The Commissioner believes the State law will determine which supportive staff, if any, are eligible. No change is made in the regulation.

§ 104.164(b) State plan content relative to rejected recommendations.

Comment. Concerning the inclusion of rejected recommendations in the State plan, a commenter suggested that the regulation should require only a summary of the recommendations rejected and the reasons for rejection rather than the original correspondence and any primary data.

Response. Section 104.164(b) requires only a listing of the rejected recommendations, the individual, agency, or council making the recommendation and the reason for rejection. These items in fact constitute a summary and should not result in a voluminous data requirement. No change is made in the regulation.

§ 104.164(b)(1) State board adoption of State plan.

Comment. One commenter recommended that the language in this paragraph be changed to read, "Any recommendation which is rejected by the State board indicating its source," rather than "and its source." *Response.* The recommendation is accepted. This change in language will clarify the requirement that the State board specify the particular agency making the recommendation.

§ 104.165 Public hearings.

Comment. Several commenters objected to the phrase "Prior to adoption" in § 104.165(a)(1) because it seems to compromise significantly the entire purpose of public hearings on the plan. In their view, the regulation permits a State to conceive, develop, and draft the plan without any significant input from the public. Their further contention is that the plan, once drafted, would not likely be changed. It is suggested that the phrase be changed to read: "Before the plan is written."

Response. The recommendation is accepted in part. The opportune time to hold public hearing is during the period of the plan's development. Accordingly, the regulation is changed to require the hearings "during the development, prior to adoption." If public hearings were held prior to the preparation of an initial draft, it would be difficult for the public to provide any meaningful direction since there would be no framework to initiate public discussion and reaction. Public input can be most important after there is a draft of the plan; however, the State may hold public hearings before there is a first draft or at any stage during the development of the plan when input may be useful.

§ 104.165(a)(3) Public hearings by region.

Comment. Commenters requested a definition of "all regions of the State." A few commenters suggested that several definitions be developed so that the State may choose from among them. Definitions suggested include (1) commonly recognized geographic divisions, (2) quadrants, and (3) areas feeding vocational-technical schools.

Response. Since most States have recognized regional divisions, it would be preferable to leave to the State how to define its regions and how best to serve the populace in the respective regions with regard to holding public hearings. No change is made in the regulations.

§ 104.165(c) Public views included in State plan.

Comment. A commenter suggested that, because of the volume of paperwork involved in including all views expressed at the public hearings in the State plan, only a summary of those views be included along with an explanation of how the State board plans to consider those views.

Response. Provisions of §§ 104.165(c) and 104.171(d) are intended to require inclusion of a summary of the views expressed at the public hearing and written comments submitted rather than letters, statements, and other primary data. Also to be included are the plans to implement those views accepted and the reasons for rejecting those views not included as part of the plan. No change is made in the regulations.

§ 104.165(c)(3) Public hearings.

Comment. A commenter recommended that the phrase "accepted for inclusion" be substituted for the term "included" in line 2 of § 104.165(c)(3).

Response. The recommendation is accepted. The revision will provide greater clarity to the State board's responsibility of setting forth the reason for rejecting any view submitted. The regulation is changed to read: "The reasons for rejecting any view which is not accepted for inclusion in the five-year State plan."

§ 104.171 Certification of plans.

Comment. A commenter recommended that this regulation include a paragraph which states: "The approval of an application under this part does not relieve an applicant agency of the responsibility to carry out its project or projects in accordance with the general application," the statute, and applicable regulations." The commenter felt this paragraph was necessary because the State board might consider compliance with certification requirements tantamount to approval by the Commissioner and write its plans accordingly.

Response. Section 104.171 requires a number of certifications regarding the State plan but does not serve as a guide for preparing the plan. Specific requirements for the content of the five-year State plan are set forth in §§ 104.181 through 188, and these detailed requirements must be adequately described before the Commissioner will approve a plan. No change is made in the regulation.

§ 104.171 Number of certifications required.

Comment. A few commenters suggested that many more certifications are required by the regulation than are mandated by the Act. A further comment was that the signature of each representative on the planning group required in § 104.171(b)(2) goes beyond the law and could be embarrassing to some of the signers.

Response. The inclusion of additional certifications in § 104.171 is intended to clarify statutory requirements necessary for compliance. By signing the certification required in § 104.171(b)(2), each representative on the planning group merely certifies that he or she had the opportunity to take an active part in formulating the plan. No change is made in the regulation.

§ 104.181 Guidelines.

Comment. Several commenters requested that the Office of Education reconsider the issue of promulgating separate guidelines for State plans. The view was expressed that, in fact, the proposed regulations are not precise, particularly with regard to State plans and State administration. They fear that plans will be weak and will not comply with the law. Concern related especially to the need to have State plan sections dealing with elimination of sex bias and sex stereotyping evaluated by persons with special knowledge of those issues.

Response. Public response to the Notice of Intent was divided on the issue of the need for additional guidelines. The Commissioner concluded that it was preferable not to issue separate guidelines, but rather to issue regulations which specify precisely what is required by the Act. With respect to the statutory requirements, the States will have considerable flexibility in determining how to meet the requirements of the Act and the regulations in the development of the State plan. Regarding the review of the plan, particularly in the area of sex bias and sex stereotyping, that review is one of the functions of the full-time personnel to eliminate sex bias listed under § 104.75, and § 104.171(g) requires that this personnel certify that

they have had an opportunity to review the plan. No change is made in the regulation.

§ 104.182 Procedures to assure compliance.

Comment. A commenter felt that the regulations have an inordinate number of very specific requirements which would, in effect, reduce the State's options. As an example, the commenter cited § 104.182 and suggested that this regulation be deleted.

Response. The language of the regulations follows closely the language of the Act. The procedures to assure compliance contained in § 104.182 are deemed necessary by the Commissioner as a minimum to comply with section 109(a)(1) of the Act. No change is made in the regulations.

§ 104.182 Additional procedures.

Comment. A commenter suggested that the State Commission on the Status of Women in each State be designated as the agency to review the compliance procedures and to make a public statement as to the degree of progress relative to the elimination of sex role stereotyping.

Response. Although the State Commission on the Status of Women is encouraged to study the progress being made within a State to eliminate sex bias, there is no legal basis for requiring that Commission to monitor compliance procedures in the State. The personnel working to eliminate sex bias, under § 104.72, must review State plans and State programs, particularly for elimination of sex bias and sex stereotyping. The Commission may work with this personnel in accomplishing the functions under § 104.75. Also, the Commission may provide input annually to the State board through the public hearing process. No change is made in the regulation.

§ 104.182(f) Consistency with Handicapped Act

Comment. Two commenters recommended that the reference in this section to "child" be changed to "student" so that it includes not only children but adults as well.

Response. Section 106(a)(10) requires that the use of funds for the handicapped under section 110(a) of the Act be consistent with section 613 of the Education of the Handicapped Act. Section 613 requires an individualized educational program for handicapped children in certain age ranges and does not apply to any person over 21 years of age. Accordingly, to be completely consistent with the Handicapped Act, and to make clear that the applicability is to children, not adults, it is appropriate to refer to "child" rather than "student." No change is made in the regulation.

§ 104.182(f) Additional citations.

Comment. A commenter suggested that the applicability of Section 504 of the Rehabilitation Act of 1973 be specified. Another commenter suggested that "and the Education for All Handicapped Children Act of 1975" be added to the last sentence of § 104.182(f).

Response. The correct citation is the Education of the Handicapped Act, which was amended by the Education for All Handicapped Children Act of 1975. With respect to the applicability of Section 504 of the Rehabilitation Act of 1973, the Department promulgated final regulations on May 4, 1977, at 42 F.R. 22676. This regulation, which applies to all recipients of Federal assistance from HEW, including State Departments of Education and local educational agencies receiving vocational education funds, is intended to ensure that their federally assisted

programs and activities are operated without discrimination on the basis of handicap.

§ 104.183 Assessment of employment opportunities.

Comment. A commenter requested that the assessment of current and future needs for workers specify workers "of all ages."

Response. While there is some rationale for specifying the need for workers by age, it does not seem appropriate to go beyond the Act in mandating these data. Further, it is doubtful whether the data are readily available. No change is made in the regulation.

§ 104.184 Limitation to four specified elements.

Comment. A commenter suggested that § 104.184 limits unduly the flexibility of the plan and recommended that the words "at least" be added after "of" in the first paragraph. The regulation would then read: "This description shall be in terms of at least the following four elements . . ."

Response. The State may include in the plan any information it desires beyond that specified in the regulation as long as mandated requirements are met. Therefore, the State may describe its goals in terms of additional elements beyond the four elements specified. No change is made in the regulation.

§ 104.184(c) Allocation of funds by institution.

Comment. A commenter recommended that the regulation be changed to read "various types of institutions" instead of "various institutions." Other commenters felt that reporting program allocations by school district would result in too much detail.

Response. The first recommendation is accepted. The added language will clarify the intent of the regulation. In response to the second comment, only the annual program plan includes the proposed distribution of funds listed by eligible recipient and is mandated by section 108(b) of the Act. The five-year State plan includes allocation of funds by various types of institutions.

§ 104.184 (c) and (d) Inclusion of CETA as an institution.

Comment. A commenter suggested including CETA in "among the various institutions of the State."

Response. The provision for coordination with CETA is set forth in § 104.188. Furthermore, CETA is not an institution, and the Act provides no authority for including it with the "various institutions of the State." No change is made in the regulations.

§ 104.185(a) Meaning of "as precisely as possible."

Comment. A commenter asked what the phrase "as precisely as possible" means and asked if each State is to make its own interpretation. Another commenter suggested the deletion of the words "as possible" from the phrase in order to clarify the meaning.

Response. The recommendation to delete "as possible" from the phrase is accepted. Section 104.185(a) and 104.186 (a) and (c) will read: "set forth precisely." In light of this modification, the term does not appear to need further interpretation.

§ 104.186(c) Special needs of older people.

Comment. A commenter suggested that § 104.186(c) specify that the State plan must set forth funding to meet the special needs of older people, including persons over 65 years of age.

Response. The definitions of the handicapped and the disadvantaged do not identify specifically "older persons." The definitions include persons of all ages having special needs which cannot be met in the regular vocational education program without special assistance. While there is nothing to preclude the use of these funds for older persons, provided they meet the specific requirements, there is no statutory basis for including them as a separate category. No change is made in the regulation.

§ 104.186(d) Matching set-aside funds.

Comment. A commenter recommended that paragraph (d) of § 104.186 be deleted, since neither Section 107 nor Section 110 of the Act requires State and local matching funds for this purpose to be included in the five-year State plan. It was suggested that documentation regarding the matching requirements be included in the accountability report.

Response. While the matching of funds for the national priority programs is not specifically required in Section 107 of the Act, nor in the accountability report, it is essential to include this information in order to provide a complete plan of uses of all Federal, State, and local funds. It should be noted that the annual program plan and accountability report constitute an updating and tracking of the five-year State plan. No change is made in the regulation.

§ 104.187 Eradicating sex discrimination.

Comment. Several commenters observed that the mandate to simplify regulations has been carried to the extreme and recommended that this regulation spell out in detail how vocational opportunities, particularly for women, will be expanded. One of the commenters stated that the State plan should include (1) an assessment of the current status of vocational education with respect to equality of access to and equality of use of vocational education programs by both sexes, and (2) goals and timetables for achieving the changes the State intends to make. Another commenter recommended that States establish an incentive system in which priority is given to LEA applications that indicate both strategies and the commitment to overcome sex bias and sex stereotyping. Commenters also charged that public comments on the Notice of Intent issue of incentives were ignored and believe that incentives are necessary. Another commenter suggested that the reference to "both men and women" is not compatible with § 104.75 (d).

Response. The regulation outlines the requirements of the Act but purposely allows the State ample flexibility in meeting these requirements. It is anticipated that the content of the five-year State plan will be improved, particularly in the area of elimination of sex bias and sex discrimination, by updating through the annual program plan as a result of the activities of the personnel under § 104.75. Regarding incentives, the State is required by the Act to provide incentives for eligible recipients but has flexibility in developing a system of priorities for these incentives. The reference to "both men and women" is taken directly from the Act. No change is made in the regulation.

§ 104.187 Eradicating sex discrimination.

Comment. A commenter suggested that the term "eradicate" is a strong mandate for something which vocational education may have little control over and should be changed to a less strongly worded intent.

Response. The term "eradicate" as used in relation to sex discrimination is from the legislative history and appears to be synonymous with the term "overcome" used in the Act. No change is made in the regulation.

§ 104.187(a) Quota for equal access.

Comment. A commenter recommended that the words "but not necessarily quotas" be added in the sentence following "to ensure equal access."

Response. It is not appropriate for the regulations to require quotas for enrollments in vocational education programs. The States are required to set forth in detail their policies and procedures "to ensure equal access." Although some States may apply a system of quotas as part of these procedures, it is not mandated by the Act or regulations. No change is made in the regulation.

§ 104.187(a) Time for planning.

Comment. A commenter objected to including the requirements of § 104.187(a) in the five-year State plan due on July 1, 1977, since funds are not yet available for the persons who will do the work.

Response. The Commissioner is not authorized to waive this requirement for the initial year of the legislation. Although it is probable that, when in place, the full-time personnel to eliminate sex bias will work on this section of the plan, there is no requirement in the Act regarding who will develop this section of the plan. States have been encouraged to develop the best possible State plan in the limited time available and according to the requirements of the Act. The five-year State plan may be improved through the annual program plan updating or by amendment during the year. No change is made in the regulation.

§ 104.187(a) (2) (ii) Sex stereotyping.

Comment. A commenter suggested that § 104.187(a) (2) (ii) be changed to read: "Develop model programs to reduce sex stereotyping in training for all occupations," rather than "to reduce sex stereotyping in all occupations."

Response. The recommendation is accepted. While vocational education programs may not directly influence the reduction of sex stereotyping in all occupations, developing model programs which prepare persons of both sexes for occupations may have a positive impact on reducing sex stereotyping in occupations. Accordingly, inserting "in training for and placement in all occupations" will assure that the program proposed by the eligible recipient will focus on the reduction of sex stereotyping.

§ 104.188 Coordination with CETA.

Comment. Several commenters expressed concern about the implementation of coordination between vocational education and CETA. One commenter suggested that additional agreements may be needed at the national level. Another commenter suggested that the required "description of the mechanism established for coordination" may be reduced to mere observance of form. The recommendation was that more concrete links, such as mutual signature of plans, should be required.

Response. Section 104.188 requires the five-year State plan to describe the mechanism established for coordinating vocational education programs with manpower training programs. While only this description of the working relationship is required in the five-year State plan, the annual program plan in § 104.222(e) requires reporting of the results of the coordination annually in order to assure consistency from year to year. In addition, the statutorily created National Occupational Information Coordinating Committee will provide for coordination between vocational education and CETA at the national level. At the State level, a representative of the State Manpower Services Council is required to be a member of the planning group for the State plan, of the State Ad-

visory Council, and of the State occupational information coordinating committee. Since the regulation repeats the language of the Act, the States are free to include in the plan those concrete links, such as mutual signatures, which they consider desirable. No change is made in the regulation.

DEVELOPMENT OF ANNUAL PROGRAM PLAN AND ACCOUNTABILITY REPORT

§ 104.203 Due date of accountability report.

Comment. A commenter felt that too much time is allowed between the end of the fiscal year and the due date of the accountability report for that fiscal year. The commenter felt that current program information could be provided in less than the nine months the proposed regulation allows.

Response. Some of the data included in the accountability report will be reported earlier in the vocational education data system to the National Center for Education Statistics for use in preparing the annual report to Congress and other purposes. Thus, certain data will be available sooner than the July 1 deadline. Section 108(b) of the Act, however, requires submission of the accountability report with the annual program plan on the July 1 preceding the beginning of the fiscal year for which the plan will be effective. This accountability report will list the accomplishments achieved during the fiscal year preceding the submission of the plan and report. No change is made in the regulation.

§ 104.22 Annual program plan for 1978.

Comment. A commenter recommended that reference to §§ 104.183 and 104.184 be included in § 104.221. The commenter also felt that the requirement to include in the State plan the proposed distribution of funds among eligible recipients is an unreasonable burden and suggested that this requirement be deleted.

Response. The first recommendation is accepted. The reference to §§ 104.183 and 104.184 was inadvertently omitted from the NPRM. Section 104.221 is rewritten to include a reference in the second line to §§ 104.183 and 104.184.

In response to the second suggestion, the regulation follows the language of section 108(b) (1) (B) (ii) of the Act which requires the State plan to show the distribution of funds among eligible recipients. Therefore, this requirement cannot be deleted.

§ 104.222 Five-year State plan update.

Comment. Two commenters requested clarification regarding the yearly update of the five-year State plan. It was suggested that the five-year plan would stand as submitted with the annual program plan reflecting changes anticipated or projected which could affect the outcomes of the five-year plan.

Response. The five-year State plan will stand as it is submitted. The annual program plan will update any obsolete or inaccurate information in the five-year State plan relating to employment needs and goals for meeting these needs. The annual program plan will also include a more detailed description of how the funds projected in the five-year State plan will be used and any changes in funding proposed, along with the reasons for those changes. No change is made in the regulation.

§ 104.261 Review of plans by full-time personnel to eliminate sex bias.

Comment. A few commenters suggested that the full-time personnel to eliminate sex bias certify that they have made comments and recommendations on the State plan in addition to certifying that they have been afforded an opportunity to review the plan.

One commenter felt that it should be stated that the certification did not necessarily constitute an endorsement of the plan. Another commenter stated that the full-time personnel will not be employed until October 1, 1977, and therefore, cannot review the 1978 plan.

Response. In accordance with section 109 (a) (3) (B), the certification in § 104.261 (d) provides evidence to the Commissioner that the opportunity to review the plan was afforded the full-time personnel. This certification does not preclude inclusion of any comments the full-time personnel wish to make. Indeed, one of the functions of personnel under § 104.75 is to make information readily available to the State board and the Commissioner. Comments on the State plan may be submitted with the certification or at any other convenient time. By certifying that an opportunity to review the plan was afforded, the full-time personnel are not necessarily endorsing the content of the plan. It is recognized that all States may not have the full-time personnel employed until October 1, 1977; nevertheless, it is the responsibility of the State to assure that the plan is in compliance with the Act. No change is made in the regulation.

§§ 104.261 and 104.262 Criteria for approval of plans.

Comment. A commenter asked if criteria will be developed to assist the Commissioner in determining that the State has set forth adequate procedures to carry out the general application assurances and the provisions of the plan.

Response. The requirements of §§ 104.182 through 104.188 and §§ 104.221 through 104.241 are detailed enough to provide adequate criteria on the basis of which the Commissioner can determine whether the State is in compliance with the Act. No change is made in the regulation.

§ 104.262 (f) Content of accountability report.

Comment. A commenter recommended that the accountability report include course enrollment by race and by sex. It was contended that the report would be inadequate if it reports race and sex data without cross-tabulating them.

Response. To reduce duplication of reporting, the accountability report is not required to include program enrollment data by race or sex. These types of data will be supplied in the vocational education data system developed under section 161 of the Act. The data, therefore, are available to the State and may be included in the accountability report if desired. No change is made in the regulation.

§ 104.271 Disapproval of plan.

Comment. A commenter requested clarification of § 104.271 (b) providing that the Commissioner will not disapprove a State plan solely on the basis of the distribution of State and local expenditures. The commenter asked which sections of the Act are covered by this provision.

Response. Since there is no legislative history to indicate otherwise, it is assumed that § 104.271 (b) applies to all State and local expenditures for vocational education. Therefore, no change is made in the regulation.

HEARINGS BEFORE THE COMMISSIONER ON AGENCY OR COUNCIL CHALLENGES TO THE FIVE-YEAR STATE PLAN OR ANNUAL PROGRAM PLAN

§ 104.281 Cost of appeal to the Commissioner.

Comment. A commenter suggested that the cost of an appeal to the Commissioner should

be borne by the agency bringing the appeal, particularly the cost of travel of the agency's representative.

Response. The cost principles governing the vocational education State-administered program are contained in Appendix B to 45 CFR Parts 100-100d. In general, these principles provide that a cost of the grant program may be reimbursed with Federal funds if the cost is necessary and reasonable for the proper and efficient administration of the program, unless specifically provided otherwise by Federal law and regulation or State or local law.

With respect to the legal expenses incurred during a section 107 appeal between two State agencies to the Commissioner, item 16 in Appendix B (45 CFR Parts 100-100d) is controlling. In accordance with this provision, if the legal services for the appeal are furnished by the State's Attorney General or staff, the costs would be unallowable because these attorneys would be discharging their general responsibilities. If one of the State agencies, however, retains private counsel because of a conflict of interest situation arising due to the State Attorney General representing two State agencies in an adversarial capacity, the legal expenses are allowable as a bona fide State administrative expense.

The travel costs of the agency representative involved in the appeal proceeding are also allowable in accordance with the principles contained in item 28 of Appendix B (45 CFR Parts 100-100d).

Since these principles are contained in the General Education Provisions Regulations, which are directly applicable to the Vocational Education Act, no change is made in the regulation.

§ 104.283(a) Hearing officer.

Comment. A commenter suggested there should be more than one hearing officer on a panel to hear an appeal to the Commissioner from agencies and council on State plans, as two or more hearing officers could share the responsibilities.

Response. Appeals on State plans should be heard promptly so that the plan may become effective as soon as possible. Although experience has indicated that it is difficult to obtain the services of hearing officers at short notice because of their prior commitments, it should be possible to obtain one experienced hearing officer in the prescribed time. However, if more than one hearing officer were to be used, three would be needed in order to avoid the possibility of a one-to-one tie vote. No change is made in the regulation.

§ 104.286 Criteria for Commissioner's decision on appeal.

Comment. A commenter suggested that the proposed regulations "completely miss the point" in not setting out objective criteria so that interested parties will know in advance by what standards an appeal to the Commissioner will be judged, and so that the criteria can be uniformly applied to all States engaged in appeals to the Commissioner.

Response. The Act (section 107 as to the five-year State plan, section 108 as to the annual program plan) does not require, or authorize, the Commissioner to set criteria for the Commissioner's decision. The Act says that the Commissioner shall afford an opportunity for a hearing and "shall determine whether the State board's decision is supported by substantial evidence, as shown in the State plan, and will best carry out the purposes of the Act." Substantial evidence is a legal term which is used in relation to the standard for judging evidence in administrative hearings and on appeals to the

courts. The regulation (§ 104.286(c)) uses the legal term and gives it the meaning given by the Supreme Court in the case of *Consolidated Edison Co. vs. National Labor Relations Board* at "305 U.S. 197, 229 (1938)." This definition of "substantial evidence" has been cited and followed in numerous administrative hearings and court cases since it was defined by the Supreme Court in the 1938 opinion. The legislative history in relation to the hearing (House Report No. 94-1085; Senate Report No. 94-882, p. 76; Conference Report No. 94-1701, p. 221) makes no reference to separate criteria.

Since it cannot be anticipated what part of the State plan may be the subject of the appeal, it would be very difficult, if not impossible, to set criteria, as recommended by the commenter, in relation to every possible appeal for the source of the evidence, the purposes of the Act, or for determining what the Commissioner believes will best carry out the purposes of the Act. No change is made in the regulation.

§ 104.287 Determinations on appeal.

Comment. The same commenter objected to the requirements in § 104.287(a) (1)-(4) as being "a farce."

Response. These requirements are based on language in section 107(a) (1) of the Act and repeated in § 104.287(a) (1). The Act and the regulation first require the hearing officer to determine whether the procedures of that section (section 107(a) (1)) have been followed. Then § 104.287(a) (2) requires a finding that the State board's plan is legal. Paragraph (a) (3) repeats the "substantial evidence" rule of section 107(a) (1), and paragraph (a) (4) repeats the standard that the hearing examiner determine that the State board's decision (rather than the appealing agency's recommendations) "best carry out the purposes of the Act."

As to purposes, section 101 of the Act entitled "Declaration of Purpose" states the purpose of the Act, and the legislative history should also be reviewed to determine the purposes of the Act. It is the opinion of the Commissioner that any attempt to restate the purposes of the Act as criteria for any appeal to the Commissioner would in effect be limiting and would be substituting the Commissioner's view of the purposes for that expressed by the Congress. No change is made in the regulation.

§ 104.288(c) Commissioner's decision on appeal of the State plan.

Comment. A commenter suggested that if the Commissioner disapproves a State plan, the disapproval must be "based on a review of the entire plan."

Response. The Commissioner (through the hearing officer) will review the recommendations about the State plan made by the appealing agency or council and the State board's reasons for rejecting the recommendations. Depending on the nature of the recommendations, this may not require a review of the entire State plan. The language in § 104.288(c) is based on language on page 216 of the Conference Report which says that, if the Commissioner does not approve the part of the plan in contention, the Commissioner does not rewrite the plan, but disapproves of it "in its entirety" and returns it to the State board for revision. No change is made in the regulation.

§ 104.289 Appeal of the Commissioner's action to the Court of Appeals.

Comment. With respect to the section 107 (a) appeal, a commenter pointed out that § 104.289 of the regulation states that a "State board, agency, or council" may appeal the final action of the Commissioner to the Court of Appeals, whereas section 107(a) of the Act states only that any "agency or State

board" may appeal to the Court of Appeals. *Response.* The regulation is amended to use the exact language of the Act. The right to appeal to the courts must depend on the language of the Act, not upon different language in the regulation. The House Report (H. Rept. No. 94-1085, p. 36) states: "After the Commissioner makes this determination, any dissatisfied agency or State board (but not the State advisory council on vocational education or the State Manpower Services Council) may appeal the Commissioner's decision to the Federal circuit court of appeals."

FISCAL REQUIREMENTS

§ 104.301 Zero-based budgeting.

Comment. A commenter, after pointing out that zero-based budgeting forces programs to analyze periodically their goals and objectives, to evaluate results regularly, and to spotlight duplication of effort, recommended that the regulation require zero-based budgeting by both Federal and State programs.

Response. In keeping with the general practice that the regulations do not regulate internal Federal matters, a statement that the Office of Education shall use zero-based budgeting is not set forth in the regulation. As to the States, a requirement in the regulation that the States adopt zero-based funding would interfere unduly in the States' own administrative matters. Therefore, no change is made in the regulation.

FEDERAL SHARE

§ 104.301(d) Matching in-kind.

Comment. A commenter asked whether the prohibition against using in-kind contributions to meet the matching and maintenance of effort requirements applies to both State and local levels.

Response. Section 104.301(d) provides that only actual expenditures of State and local funds shall be accepted as part of the State's matching and maintenance of effort requirements. This means that the prohibition against the use of in-kind contributions applies to both State and local levels. No change is made in the regulation.

§ 104.302 Distribution of funds for men and women.

Comment. A commenter suggested that the distribution of Federal funds should be controlled so that the availability of funds to men and women is equal.

Response. The Commissioner is prohibited by section 421A(c)(2)(B) of the General Education Provisions Act from imposing a funding distribution method different from that specified in the law authorizing the appropriation. Since the Act contains no authority for distributing funds equally among men and women, the Commissioner is not authorized to require it by regulation. No change is made in the regulation.

§ 104.302(a) Matching requirements.

Comment. A commenter stated that the 50 percent matching provision in § 104.302(a) is in error because some program sections allow 90 percent.

Response. Section 104.302(a) contains the general statutory matching requirement in section 111(a) that the Commissioner will pay to each State an amount not to exceed 50 percent of the cost of carrying out its annual program plan. The exceptions to this general requirement are enumerated in other regulatory sections. Since the fiscal regulations are interdependent and must be read together, it is unnecessary to list all the exceptions to the general 50 percent requirement in one section of the regulation. No change is made in the regulation.

§ 104.303 Matching for national priority programs.

Comment. Many commenters recommended that the 50 percent matching requirements for programs for the handicapped and disadvantaged as set forth in § 104.303 be reconsidered. These commenters have stated that it is inequitable for the State and local school districts to pay 50 percent of the cost of these programs when they are already supporting vocational educational education at such a high percentage. To expect State and local programs to adhere to these matching requirements when the proportion of Federal funding is so small is unrealistic.

Response. Section 110 of the Act provides that Federal funds shall be used to pay up to 50 percent of the excess of programs, services and activities for handicapped and disadvantaged persons. Section 104.303 of the regulation is based directly on this statutory provision. Section 421A(c)(2)(B) of the General Education Provisions Act (the Cranston Amendment) prohibits any funds to be apportioned, allocated, or otherwise distributed in any manner or by any method different from that specified in the law. Accordingly, no change is made in the regulation.

§ 104.303(c) and § 104.314 Postsecondary and adult programs.

Comment. Several commenters have pointed out that the word "and" is omitted between paragraphs (1) and (2) of § 104.303(c) and between paragraphs (a) and (b) of § 104.314 and recommend that it be added.

Response. This recommendation is accepted. The final regulation has added the word "and" between paragraphs (1) and (2) of subsection § 104.303 and between paragraphs (a) and (b) of § 104.314. Accordingly, in § 104.303(c) the Commissioner will pay an amount not to exceed 50 percent of the cost of both postsecondary and adult programs. In § 104.314, the State shall expend 15 percent of the section 102(a) allotment for both postsecondary and adult programs.

§ 104.303 Mainstreaming requirements.

Comment. A commenter suggested a new paragraph (d) be added to § 104.303 to read "Each State shall use, to the maximum extent possible, the funds required to be used for the purposes specified in subsections (a) and (b) to assist individuals described in those subsections to participate in regular vocational education programs."

Response. The mainstreaming requirement for handicapped persons is contained in § 104.312. The mainstreaming requirement for disadvantaged persons and persons of limited English-speaking ability is set forth in § 104.313(b). Since the inclusion of these provisions into § 104.303 would result in a duplication, no change is made in the regulation.

§ 104.305(a)(3) Administrative costs.

Comment. A commenter requested the deletion of the phrase "excluding State administration and ancillary services" in subparagraph (3) of § 104.305(a). The commenter pointed out that the Act has no such limitation.

Response. The comment has been accepted. Section 140(b)(1) of the Act provides that the State shall use Federal funds allocated for the Special Programs for the Disadvantaged to pay the full cost of vocational education for disadvantaged persons. Since State administration and ancillary services may be characterized as part of the full cost of the programs, expenditures for the administration of the program and ancillary services

directly related to the program may be attributed to the section 102(b) allotment.

MINIMUM PERCENTAGES

§ 104.312 Minimum percentage for the handicapped.

Comment. A commenter suggested that because Part B of the Education of the Handicapped Act, as amended by the Education for All Handicapped Children Act of 1975, Pub. L. 94-142, mandates that each individual handicapped person be served in the "least restrictive environment," the regulation should require the States to use section 110(a) funds to the maximum extent possible to assist handicapped persons to participate in vocational education programs provided in the "least restrictive environment."

Response. Section 612(5) of Pub. L. 94-142 requires the State to establish procedures to assure that special classes or other removal of handicapped children from the regular educational environment occurs only when the nature or severity of the handicap is such that education in regular classes with the use of supplementary aids and services cannot be achieved satisfactorily. Since funds used for the purposes of section 110(a) of the Vocational Education Act must be consistent with the State plan submitted pursuant to section 613(a) of the Education for All Handicapped Children Act, the statutory requirement on least restrictive environments is binding on section 110(a) of the Vocational Education Act. Furthermore, § 104.182(f) of this regulation requires the vocational education programs for handicapped children to be planned and coordinated in conformity with and as a part of the child's individualized education program as required by the handicapped legislation. Therefore, no change is made in the regulation.

§ 104.313 Minimum percentage for the disadvantaged.

Comment. Many commenters expressed concern over the inconsistency in § 104.313(a) and the overview of the regulations in the Notice of Proposed Rulemaking. Section 104.313(a) provides that the State shall expend "at least" 20 percent of the section 102(a) allotment for the disadvantaged. The overview of the regulations at 42 FR 18542 states "up to 20 percent."

Response. The statement contained in the overview concerning the minimum percentage for the disadvantaged is incorrect. The text should read "at least 20 percent to pay up to 50 percent of the costs of programs for the disadvantaged." Since the language in § 104.313(a) is correct, no change is made in the regulation.

§ 104.313 Minimum percentage for the disadvantaged.

Comment. A commenter expressed a view that the proposed rules, which allow the local educational agencies to charge the cost of vocational education programs for the disadvantaged, would result in supplanting of funds. According to this commenter, a strong possibility exists whereby the schools in economically disadvantaged areas will take students who succeed in regular programs, identify them as disadvantaged, and charge the set-aside for complete teacher salaries. In order to avoid supplanting, the commenter suggested that an individualized plan for each disadvantaged student be developed which would indicate that supplemental assistance is essential to enable that student to succeed in the regular program.

Response. The term "disadvantaged" is defined in Appendix A. In accord with this definition, a disadvantaged person must re-

quire special services and assistance in order to succeed in vocational education programs. Students who can succeed in the regular vocational education program are not eligible for funding under the minimum percentage for the disadvantaged.

Furthermore, the dollar for dollar matching provision required by section 110(b) of the Act for programs for the disadvantaged would seem to preclude any possibility of supplanting of funds. The statutory "no-supplant" provision in § 106(a)(6) is designed to assure that the aggregate of State and local funds available for a specific purpose, such as the disadvantaged set-aside, is not reduced because of the receipt of Federal funds under the Act. Therefore, as long as the combined State and local funds match the Federal funds earmarked for the purposes of section 110(b), it is unlikely that a violation of the "no-supplant" requirement would occur.

The suggestion for requiring an individualized plan for the disadvantaged, as required for the handicapped, may be found desirable by some States but it is not mandated by the Act. Since this procedure is not required by the Act, it is not appropriate to be included in the regulation. Thus, no change is made in the regulation.

§ 104.313(b) Minimum percentage for the disadvantaged.

Comment. A commenter stated that because of the history of minorities and the disadvantaged in vocational education, it is critical for the regulation governing the national priority program for the disadvantaged to offer disadvantaged students a genuine opportunity and not the traditional "dumping ground." In order to accomplish this objective, the commenter suggested incorporating into the regulation reporting requirements on criteria for selecting students, the kinds of programs available, needs assessments, evaluation tools, and enrollment data.

Response. The suggestions offered by this commenter are already an integral part of the regulation. The criteria are set forth in Appendix A; the regulations contained in §§ 104.183 through 104.188 govern the various requirements pertaining to kinds of programs, needs assessments, and enrollment data; and §§ 104.401 through 104.405 set forth the program evaluation requirements. Since the commenter's recommendation is incorporated into the regulation, no change is made.

MAINTENANCE OF EFFORT

§ 104.323 Reductions in expenditures.

Comment. A commenter questioned the basis in §§ 104.323 and 104.324 for permitting reductions in expenditures for vocational education. The commenter contends that any reduction would be a violation of section 111(b) of the Act.

Response. The term "fiscal effort" as used in section 111(b) is not defined in the Act or in the legislative history. For the purpose of this regulation, therefore, the term relates to tax effort and takes into account the relationship between tax rate and tax base. If the tax base declines but the tax rate remains constant, fiscal effort is considered to be maintained even though the tax yield declines proportionately. If, on the other hand, section 111(b) was written in terms of absolute spending levels, rather than fiscal effort, then the regulation would not permit any flexibility or deviation from the base year.

Since in the Act the funding requirement is stated in terms of maintenance of fiscal effort, a tolerance of five percent or less, as set forth in § 104.323, can be justified on the grounds that the State's effort can be

said to be sustained although there was a minor decrease in actual spending levels. An allowance of any more than five percent would risk transgressing statutory intent.

Similarly the unusual circumstance rule in § 104.324 is justified because an event which is out of the control of the State does not reflect a diminished fiscal effort. An event warranting such an exception must be unusual in the sense that the grantee clearly could not have anticipated it or compensated for it.

Accordingly, no change is made in the regulation.

STATE EVALUATION

§ 104.402 Evaluation requirements.

Comment. Several commenters were concerned by what they perceived as the excessive burden of performing all of the kinds of evaluation listed in § 104.402 (a), (b), and (c). Some recommended that subsections (a) and (b) be deleted for that reason. Other commenters wanted additional criteria such as "job mobility" and "student satisfaction." Several urged that the States be allowed to choose whether or not to use the suggested criteria. Most of these commenters wanted the State board to be free to determine and use the criteria for program and project evaluation which it considers to be most appropriate.

Response. It should be noted that while the Act requires evaluation during the five-year period of the effectiveness of each program or project, the numbered examples in paragraphs (a), (b), and (c) are only suggestive and the lists are not exhaustive. Therefore, with respect to § 104.402, the States already have the freedom of action described and desired by these commenters. The extent of the burden of evaluation will be determined largely by the State board. No change is made in the regulation.

§ 104.402 Use of sampling for evaluation.

Comment. Several commenters urged that the States be allowed to use sampling techniques in evaluating the effectiveness of their programs and projects of vocational education.

Response. The regulation does not preclude use of reasonable sampling procedures for the purposes of § 104.402. Therefore, the regulation has not been modified.

§ 104.402 Evaluation of State and local programs.

Comment. A commenter objected to the required inclusion of State- and locally-supported programs and projects in the evaluation, on the grounds that the Act does not contain this requirement.

Response. Paragraph (c) of § 104.301 states that "... every program or activity supported in whole or in part by State or local funds which are used to match Federal funds must meet the same conditions and requirements as those supported by Federal funds." Therefore, State and locally supported programs and projects cannot be exempted from the requirement. Thus, no change is made in the regulation.

§ 104.402 Employer satisfaction.

Comment. One commenter urged that the regulation permit and encourage the States to secure data on employer satisfaction and student performance by any means considered appropriate by the State, including surveys conducted by local educational agencies.

Response. Except for the data on program completers and leavers required by § 104.404, the States may perform the evaluations required by § 104.402 by any appropriate procedures. Therefore, the regulation has not been amended in this regard.

§ 104.402 Financial and legislative limitations.

Comment. One commenter urged the inclusion of evaluative criteria related to the financial limitations and other limitations set by the State's legislature.

Response. Since the lists of numbered criteria in § 104.402 (a), (b), (c), and (d) are only suggestive and not exhaustive, the States are already free to use additional criteria in their evaluation of program and project effectiveness. No change is made in the regulation.

§ 104.402 Qualitative versus quantitative.

Comment. A commenter finds confusing the requirement that program effectiveness and other essentially qualitative factors should be evaluated in quantitative terms. The recommendation is that the regulation be amended to read "... evaluate in quantitative and/or qualitative terms as appropriate ..."

Response. The intent of the regulation is that the report of the evaluations be expressed in objective terms that facilitate verification and make possible the aggregation of data within a State and across States, rather than in subjective, impressionistic terms. For example, instead of describing services to women students in qualitative terms of "excellent" and "cooperative" attitudes and efforts of the staff, the regulation means to encourage reporting the facts as the number of women who enrolled in and completed each course traditionally reserved for men, the comparative numbers of men and women in the courses, and the number of each sex who found (or were placed in) employment in the field of training. The same kind of objective reporting would apply to all programs and projects supported under the Act. The recommended change is therefore not accepted because it would seem to encourage less objective and less useful kinds of reporting. No change is made in the regulation.

§ 104.402 Services to special populations.

Comment. A commenter found § 104.402 (d) "particularly inept and confusing" and recommended that services to women, members of minority groups, handicapped persons, and disadvantaged persons be measured by the same criteria used for measuring services to other students.

Response. The criticism is well taken. The intent of the regulation was that service to the named "special populations" should be measured by the same criteria as are used with all other students, and that in addition the State's evaluation would report on any other services provided for those special groups. The proposed regulatory language is not clear, and § 104.402(d) has been amended to read "The results of additional services as measured by the suggested criteria under paragraphs (a), (b), and (c) of this section, that the State provides under the Act to these special populations."

Comment. A commenter recommended that paragraph (d) of § 104.402 be amended to mandate evaluation of the effectiveness of services to the special populations named there instead of making that part of the evaluation optional.

Response. The recommendation is accepted because the law not only requires evaluation of the effectiveness of all programs, projects and activities assisted under the Act, but also gives particular emphasis to those special populations. As amended, paragraph (d) becomes mandatory. In keeping with this rationale, a fifth special population category "persons of limited English-speaking ability" is added to paragraph (d).

§ 104.402 Services to the handicapped.

Comment. A commenter recommended that for each handicapped student, the State be required to include in its evaluation information about the instructional environment of the student, identification of the handicapping condition, and the specific occupational program in which the student is enrolled.

Response. The act provides no basis for requiring these data, and there is provision in other legislation, e.g., the Education of the Handicapped Act, as amended by the Education for All Handicapped Children Act of 1975, for reporting on services to handicapped students. Therefore, no change is made in the regulation.

§ 104.402 Fluctuations of the economy.

Comment. A commenter wanted the State's evaluation of the extent of placement of vocational education students in jobs to take into account changing economic conditions which affect the job market.

Response. Although the intent of such an amendment is meritorious, the recommendation is not accepted, because it would increase without statutory justification the already heavy burden borne by the State boards. The State board is, of course, free to take changing economic conditions into consideration in making the evaluation if it chooses to do so. No change is made in the regulation.

§ 104.404 Follow-up of all students.

Comment. One commenter interpreted § 104.404 to mean that follow-up data should be secured for only those "completers" and "leavers" who find employment, and urged that the follow-up survey both those employed and those unemployed.

Response. No modification of the regulation is required, since § 104.404(b)(1) will show whether or not the completer or the leaver found employment and whether the employment was or was not related to the vocational training.

§ 104.404 Definition of program leaver.

Comment. Two commenters recommended deletion of § 104.404(c)(2)(ii), "all other leavers," on the grounds that the inclusion of that part of the definition would require follow-up of students, for example, who enroll in a single vocational education course and leave two weeks later. This would impose an unreasonable burden if such a leaver must be included in the follow-up survey.

Response. The Commissioner is aware of the problem posed by students whose enrollment is of such limited duration that they should not be counted in any survey of program leavers. However, instead of setting by regulation a maximum duration of enrollments that are not to be counted, the Commissioner prefers that such guidance be furnished as part of the instruction for submission of required reports and data. No change is made in the regulation.

Comment. A commenter recommended changing the definition of "program leaver" to say that the leaver has nevertheless "acquired sufficient entry-level job skills to work in the field for which he or she was trained."

Response. It is the view of the Commissioner that the recommended change would eliminate from consideration in the evaluation and reporting those persons who do not acquire entry-level job skills either because they have not learned satisfactorily or have not been taught satisfactorily. It is believed that failure to include these persons in the report would violate the intent of the Congress. Therefore, no change is made in the regulation.

Comment. A commenter suggested that the definition of "program leaver" should be made parallel to the definition of "program completer" by adding in § 104.404(c)(2) that program leaver means a student who has been enrolled in and has attended a program of vocational education "which purports to teach entry level job skills."

Response. This suggestion has been accepted. It was intended that the definitions of "program completer" and "program leaver" be parallel. It was also intended to include the phrase "which purports to teach entry level job skills" in both definitions. The regulation has been amended accordingly.

§ 104.404 Instructions by National Center for Education Statistics.

Comment. Two commenters asked whether the NCES instructions and standards referred to in § 104.404(d) are mandatory or whether the State may choose to use a different reporting system.

Response. Use of the NCES instructions and standards is mandatory. The Act (sec. 161(a)(3)(B)) emphasizes and mandates reporting on program "completers" and "leavers." Without a uniform data reporting system it would not be possible to aggregate and report the data across States (i.e., nationwide). No change is made in the regulation.

§ 104.404 Exclusion of homemaking job skills.

Comment. Two commenters wanted the reference in § 104.404(a) to "entry-level job skills" to be expanded thus: "which purports to teach entry-level job skills, not to include the occupation of homemaking," on the grounds that it is unreasonable to try to evaluate the adequacy of training for homemaking.

Response. "Entry-level job skills" is interpreted as referring solely to paid employment, which eliminates from consideration homemaking by either spouse or parent. Homemaking by a paid housekeeper, nursemaid, or other such paid employee would be treated in the same way as any other gainful employment. No change is made in the regulation.

§ 104.404 Scrutiny of teaching materials.

Comment. A commenter urged the Office of Education to improve the effectiveness of program evaluation by examining vocational education courses and teaching materials to determine their "pertinency" and "currency," especially for the future needs of the nation.

Response. It is the view of the Commissioner that the effect of the recommendation would be to involve the Federal government in matters which are the prerogative of the States and local schools. No basis was found in the Act to support the recommendation. Therefore, no change is made in the regulation.

SUBPART 2—BASIC GRANTS

§ 104.502(b) Distribution of basic grant funds.

Comment. Many commenters objected to the mandatory reservation of funds under the basic grants in § 104.502(b) for special programs and placement services tailored to meet the need of the special populations described in § 104.621. Some of these commenters were concerned that if funds are reserved for displaced homemakers and other special groups, the remaining funds may be insufficient for vocational education programs described in § 104.511. Other commenters suggested that funding for programs for these special populations be attributed to another section of the law.

Response. Section 107(b)(4)(B) of the Act requires that the State set forth in its five-

year plan a program to assess and meet the needs of persons described in section 120(b)(1)(2). This program will provide for special courses for these persons in learning how to seek employment and placement services for the graduates. Therefore, even though the Act attempted to consolidate numerous programs under section 120 to provide greater flexibility and discretion to the State, funding for programs for displaced homemakers as well as for full-time personnel to perform the functions in § 104.75 is mandatory. Funding for the balance of activities listed in section 120 is permissive. Neither the Act nor the regulation, however, requires a minimum funding level for programs for these special populations. The State must earmark an amount of funds it considers adequate to support the courses and services which are described in its five-year plan to meet the needs of these special populations. Accordingly, no change is made in the regulation.

§ 104.502(c) Support for guidance under the basic grant.

Comment. A commenter recommended that guidance and counseling be added to the list of purposes for which funds under section 120 of the Act may be used. The rationale for the comment is that guidance and counseling services are essential to the successful placement of individuals in careers.

Response. The Commissioner agrees that guidance and counseling are essential for the successful placement of individuals. However, the Act provides funding for this activity in subpart 3—Program Improvement and Support Services. Section 134 requires the State to expend at least 20 percent of the subpart 3 allotment for guidance and counseling services. Thus, no change is made in the regulation.

§ 104.502(c) Consolidation of programs.

Comment. A few commenters perceived the consolidation of the expansive list of programs, services, and activities in § 104.502(c) as a "danger point" because if States can determine their own priorities for funding, low priority may be given to support services for women. These commenters suggested that with respect to programs which may contribute to eliminating sex stereotyping, the regulation should mandate funding.

Response. One of the major purposes of this new Act is the consolidation of numerous programs and activities into a single basic grant. This consolidation allows the State to determine its own priorities for funding. Consequently, there is no legal justification to undo by regulation what Congress specifically directed by statute. Thus, no change is made in the regulation.

§ 104.511(b) Initial equipment.

Comment. Many commenters expressed some confusion with respect to the inclusion of "instructional equipment" and the exclusion of "initial equipment" in the definition of vocational education programs in § 104.511(b). Part of the confusion seems to stem from the fact that the definition of "school facilities" in section 195 includes "initial equipment." Some of these commenters requested that the regulation clearly distinguish these terms.

Response. The language contained in § 104.511(b) is based directly on the statutory definition of vocational education in section 195. This definition provides in part that the term "vocational education" does not mean the construction, acquisition or initial equipment of buildings. "Initial equipment" includes building fixtures, utilities and furnishings or simply the materials which must be placed in a facility to accommodate the type of instruction or other voca-

tional education purpose for which the facility is designed. Although the definition of "vocational education" does not allow for the purchase of initial equipment, States may use funds under the authority of section 120(b)(1)(E) (construction of area vocational education school facilities) for initial equipment. It should also be noted that the definition of vocational education allows for the acquisition of instructional equipment. No change is made in the regulation.

§ 104.512(b)(3) Apprenticeship related instructional programs.

Comment. A commenter expressed the view that, since apprenticeship-related instructional programs are directly tied to the process of job placement, more than a simple reference to them in § 104.512 should be given. This commenter suggested that a more detailed regulation governing the operation of these programs be adopted.

Response. The comment is accepted. In view of the importance of related instruction to apprentices who are employed to learn trade skills, a new regulation, § 104.515, has been added. The language of this provision is adopted from the regulation promulgated in 1975 by the Commissioner at 40 FR 57760 (December 11, 1975) on this same subject matter. This regulation requires the State to include certain assurances in the five-year plan if apprenticeship-related instructional programs are offered.

These assurances will (1) insure that the vocational training is supplemental to on-the-job training experience of the apprentice; (2) set minimum age standards; (3) require an apprentice training agreement; (4) outline the required characteristics of the skilled trade; (5) specify the classifications of registered and non-registered apprentices; and (6) require conformity with Department of Labor regulations on apprenticeship programs.

§ 104.513 Student organizations.

Comment. A great many commenters submitted their views both in writing to the Regulations Task Force and at the public meetings on the subject of vocational education student organizations. Although the vast majority of these commenters expressed their satisfaction with the inclusion of a regulation authorizing the expenditure of funds for activities of vocational education youth organizations which are an integral part of the vocational education programs, many commenters objected to certain aspects of the regulation.

Many commenters objected to paragraph (c) which lists six activities which cannot be considered an integral part of vocational instruction. Some believe that it is entirely unnecessary to regulate on nonreimbursable activities because it is generally assumed that if an activity is not explicitly set forth, it cannot be funded.

A number of commenters expressed disapproval with some of the items listed as nonreimbursable in paragraph (c). Some commenters felt strongly that attendance at conventions, student organization newsletters, and recognition of outstanding performance are all vital elements of the student organization instructional and leadership program. Since these activities are designed to prepare youth to become responsible members of society, these items should be moved into reimbursable activities in paragraph (b). Many members of student organizations either testified at the public meetings or wrote letters explaining that the elements in paragraph (c) represented an important educational function and should be supported financially. One individual testified that students value their awards more than anything.

The one item in paragraph (c) which received the most comment was the prohibition against using funds for lodging, feeding, conveying, or furnishing transportation to conventions or other forms of assemblage. Some commenters pointed out that national and State conventions, culminating the experience of conferences held locally and regionally, provide an excellent educational forum for an exchange of ideas and are an integral part of the instruction. Limiting funds for this purpose will have a negative impact on the future of vocational education.

A few commenters objected to the use of the term "assemblage" in paragraph (c)(1). They felt this term would preclude the furnishing of transportation to any activity in which groups of students come together, including field or laboratory work incidental to the vocational training. Others argued that funds should be available for furnishing transportation to skill competitions which are directly related to the instructional program. Some commenters expressed the view that allowing funds to be used for transportation of students for student organization activities may lead to abuse in the use of funds.

A few commenters stated that the regulations may be fostering a discriminatory policy if the lodging and travel of statewide coordinators are reimbursable, but student costs are not. Others generally questioned whether funds may be used to pay the salaries of statewide coordinators.

One commenter suggested that if Federal funds are to be used to support the cost of instructional supplies and materials for student organizations, then a requirement should be imposed to insure that such materials are free of sex stereotyping. Another commenter recommended that States be required to match dollar for dollar Federal funds used for student organizations.

Many commenters recommended that the regulations be amended to insure explicitly that any activity of an organization funded with Federal dollars be available to all students in the instructional program without regard to membership in the student organization. In this connection, Congressmen Perkins and Quie in the House Committee on Education and Labor stated in a letter to the Commissioner, "We do not believe that any activity can be supported with Federal funds unless all of the students in the instructional program are eligible to participate without regard to membership in any student organization. Otherwise, we feel that the Federal government would be in the untenable position of excluding students from the benefits of a Federally-funded program solely because they do not choose to join a private organization."

A few commenters strongly objected to the use of Federal funds to support any activity of a student organization. They stated that there is no authority in the law or legislative history to support the regulation. In their view, Congress considered and rejected proposals which would have expressly permitted support for such activities.

Still others who expressed strong support for student organizations urged that the Office of Education not control by regulation that which was not deemed necessary to impose by legislation. They argue that the intent of Congress was to leave student organizations out of the law because, "The student organizations are doing fine. It may be doing them a disservice to put them in the Federal law, thus making them part of the system, subject to its structure. Any legislative support is best left to the individual States."

Response. The Office of Education recognizes the educational programs and philoso-

phies embraced by vocational education student organizations as being an integral part of the vocational education system of training. The efforts of these student organizations to improve the quality and relevance of instruction, to develop student leadership and to enhance citizenship responsibilities have equipped and will continue to equip vocational education students with the tools necessary to enter the labor market and to assume successful roles in society. To this end, § 104.513 of the regulations allows that Federal, State, and local funds available under the five-year State plan (subject to the overall matching requirements) may be used to give support to the activities of vocational education student organizations which are directly related to the vocational education instructional programs under the approved five-year State plan. It should be made clear at the outset that, since the activities of student organizations are not explicitly authorized in the Act, the activities can only benefit from the vocational education program to the degree to which the activity is directly integrated into the regular instructional program.

It has been apparent to the Office of Education that this national policy on student organizations has been interpreted differently by the States. Some States have construed the policy in earlier regulations broadly to reimburse all student organization activities. Other States have adopted a very limited view of specific activities which are reimbursable. As a result of this demonstrated ambiguity, the Commissioner has decided to provide the States with uniform guidance on reimbursable activities of student organizations. This guidance was set forth in proposed form in § 104.513 of the Notice of Proposed Rulemaking.

The language of the final regulation closely resembles the proposed regulation with minor amendments to reflect some of the more compelling comments submitted. In the first place, paragraph (b) continues to list supportable activities, and paragraph (c) lists non-supportable activities. These paragraphs are not intended to be exhaustive lists, but merely a framework the State should use in distinguishing between reimbursable and non-reimbursable activities. Despite the comments to the contrary, the Commissioner believes it is essential to list non-reimbursable activities in order to avoid misinterpretation.

The specific items listed in paragraph (b) are extrapolated in large part from the statutory definition of vocational education. (All of the student organizations, of course, are subject to the Title IX provisions on sex discrimination and the section 107(b)(4)(A) requirement to eliminate sex stereotyping. Instructional materials used by the student organizations are subject to the same requirements, which are not repeated in the regulation.) Support is not limited, however, to training, field work, and acquisition of instructional supplies. Instruction oriented activities such as special demonstration projects, lectures and exhibits initiated by vocational education personnel may also be supported. Salaries of State-wide coordinators responsible for the aforementioned activities are also reimbursable as an administrative cost. Vocational counseling in connection with vocational training for the purpose of facilitating occupational choices may be supported with funds available under section 130, not section 120.

The text of paragraph (b) has been amended under subparagraph (2). The final clause "cost of travel thereto" has been deleted because, as some commenters indicated, the generally-accepted prohibition against use of Federal funds for transportation to conventions could too easily be cir-

convened by permitting use of Federal funds for any type of travel of students. This does not mean that funds cannot be used for travel which is part of the instructional program. Funds may be expended on an activity such as travel of class members when such travel is necessary to carry out an otherwise allowable activity such as field work.

Although paragraph (c) lists six items which cannot be funded due to their non-instructional nature, the language in (c) (1) received the most criticism. This subparagraph provides that "an integral part of vocational instruction" does not include lodging, feeding, conveying, or furnishing transportation to conventions or other forms of assemblage. This language, which is taken directly from 31 U.S.C. 551, controls the expenditure of Federal funds and all State and local funds set forth under the plan. The word "assemblage" in this subparagraph, however, was not intended to include field work and laboratory work, but rather social, athletic, or recreational events. Accordingly, the word "social" has been inserted before the word "assemblage."

Finally, paragraph (a) lists the general conditions for funding vocational education student organizations described in the approved five-year State plan. In addition to the activity being an integral part of the instruction and supervised by vocational education personnel, another condition is made explicit in light of the comments received. The activity must be available to all students in the instructional program without regard to membership in any student organization. Students cannot be excluded from the benefits of a program receiving Federal funds because they do not choose to join the student organization.

§ 104.514 Vocational instruction under contract

Comment. Many commenters expressed confusion with respect to the scope of § 104.514. Some questioned whether private vocational training institutions include both private-for-profit and private nonprofit institutions. Others requested clarification on any special requirements pertaining to arrangements with private post-secondary vocational training institutions.

Response. Part of the confusion on the issue of private vocational training institutions was due to the omission of the contracting authority for private vocational training institutions in the Act. The Technical Amendments, however, restore this contracting authority. Accordingly, the regulation has been amended to reflect this revision to the Act. A new paragraph (c) has been added to § 104.514 permitting the State or LEA to make arrangements with private vocational training institutions provided that the institution (1) can make a significant contribution to attaining the objectives of the plan and can provide substantially equivalent training at a lesser cost, or (2) can provide equipment or services not available in public institutions.

In addition, paragraph (a) of § 104.514 has been amended to clarify the fact that contracts with private vocational training institutions include both for profit and nonprofit institutions.

§ 104.514 Discrimination in private education institutions

Comment. A commenter suggested that no Federal funds should be shared with private educational institutions without an active effort to make certain that they do not discriminate.

Response. Title VI of the Civil Rights Act, which prohibits discrimination on the basis

of race, Title IX of the Education Amendments of 1972, which prohibits sex discrimination, and section 504 of the Rehabilitation Act of 1973 which prohibits discrimination on the basis of the handicapped, are applicable to all institutions receiving Federal funds, whether public or private. The State educational agency has the responsibility for assuring that these civil rights provisions are being carried out. Since these non-discriminatory provisions are already binding on private educational institutions, no change is made in the regulation.

§ 104.521 Work study—discrimination

Comment. Several commenters pointed out that some of the most overt discrimination against students takes place in the employment they obtain through their schools. School officials often acquiesce to requests from employers which discriminate on the basis of sex in placement, responsibility, salary, and advancement, and the practice has continued unabated since the implementation of Title IX. These commenters also believe that it would be contrary to the purpose of the Act to prohibit sex discrimination in vocational training but to permit it to occur in employment. They suggest that the regulation should require that no student be recommended for, placed in, or receive benefits under a job which discriminates on the basis of sex and race. Employers seeking to employ students under work study programs or cooperative vocational education programs should be required to sign assurances that they will not discriminate on the basis of sex or race in hiring, placing, or paying students.

Under all employment programs, school officials should be required to reject sex-specific employment requests and to make an affirmative effort to inform employers that the school is prohibited by law from maintaining cooperative arrangements with any employer which discriminates. Furthermore, these commenters contend that officials should bear some responsibility for monitoring employers' compliance. This could be accomplished by maintaining a simple data file indicating the company by which each student is employed; the race and sex of the student and the level in the vocational education program which she or he had completed when employed; a summary of the student's previous work experience, and a job description and the starting salary at which the student was employed. Where a school finds indications of discrimination in the employment of its students, it should be required to conduct a full investigation and withdraw the cooperation of its job referral offices if businesses are engaging in discriminatory hiring practices which they refuse to make an affirmative effort to correct.

Response. The Commissioner concurs with the concern expressed in this comment that overt discrimination against students frequently occurs in the employment the students obtain through their schools. Such discrimination practices are in direct violation of Title IX of the Education Amendments of 1972 which prohibits sex discrimination under any education program or activity receiving Federal financial assistance. This requirement, which is referenced in 45 CFR 100b.262 of GEPR, is binding on the work study program, apprenticeship program, and the cooperative education program where the issue of sex discrimination in student employment is most significant. Since the prohibition against sex discrimination is already in the GEPR, it is unnecessary to repeat the provision in the separate program regulations.

A change has been made, however, in § 104.75(e) of the regulation. Since the func-

tions of the full-time personnel include the review of all vocational education programs in the State for sex bias, an explicit reference is now made to the review of work study programs, apprenticeship programs, and cooperative vocational education programs and the placement of students who have successfully completed vocational education programs.

Although these regulations do not require LEAs to maintain the type of data file on each student participating in work study or cooperative programs as suggested by these commenters, the full-time personnel designated to eliminate sex discrimination may want to consider seriously the adoption of this recommendation.

§ 104.521 Work study—disadvantaged participation

Comment. Many commenters questioned whether work study funds would be a legitimate expenditure under the minimum percentage for the disadvantaged in section 110 (b) of the Act.

Response. In light of the enactment of the Technical Amendments, States may compute work study funds expended for the disadvantaged as a legitimate expenditure for the minimum percentage for the disadvantaged. Section 110(b) now allows for the cost of programs, services and activities under subpart 2 to be applied against the 20 percent set-aside. Since work study is a permissible activity under subpart 2, the funding of work study for the disadvantaged is an allowable cost under section 110(b). A change has been made to § 104.303 to clarify this matter.

§ 104.522(b) Work study—ranking of applications

Comment. A commenter questioned whether the State must fund work study programs for all LEAs or only for some of them.

Response. Under the consolidation imposed by the Act, the State retains the discretion of determining which programs under section 120 will be funded. If work study programs are funded, then the State must give funding preference to applications submitted by LEAs serving communities having substantial numbers of youths who have dropped out of school or who are unemployed in accordance with § 104.522(b). No change is made in the regulation.

§ 104.523(a) Work study administrative costs

Comment. Many commenters suggested that the last sentence of § 104.523(a) requiring work study administrative costs to be supported with non-Federal funds be deleted. Some of these commenters suggested that the following sentence be substituted: "Funds shall be expended solely for payment or compensation to students employed in work study programs."

Response. In view of the fact that the Technical Amendments now authorize the use of Federal funds for local administrative costs, the provision in § 104.523(a) prohibiting such use has been deleted. Nevertheless, section 121(b) (1) of the Act requires that Federal funds for work study be expended solely for the payment of students employed pursuant to work-study programs. As long as all Federal funds distributed under the specific work-study application are earmarked for payment to students, LEAs may use other Federal funds for local administrative costs pursuant to the methods described in § 104.307.

§ 104.523 Work study eligibility

Comment. A commenter asked whether work study programs could be administered by local educational agencies only. This com-

menter stated that it should be permissible for the State board to administer the program if the State board directly operates the school.

Response. Section 121(a) of the Act limits the administration of work study programs to local educational agencies. Section 104.523 of the regulation also limits the eligibility to LEAs. In order for the State board or other eligible recipients to administer work study programs, legislative relief would be necessary. Accordingly, no change is made in the regulation.

§ 104.523(c) Work study—20-hour limit

Comment. A commenter asked whether the 20-hour limit per week in the work study program conforms to Department of Labor standards. Another commenter stated that the 20-hour limit for a student 18-21 years of age may not provide enough earnings to meet the student's needs.

Response. Since section 121(a) (3) requires the Commissioner to determine a reasonable number of hours per week that a student may be employed under a work study program, it is unnecessary to conform the 20-hour limit in § 104.523(c) to Department of Labor standards. With respect to the issue of the 20-hour limit in employment being too low, it is the Commissioner's position that an amount in excess of 20 hours per week would be potentially detrimental to the student's academic efforts. Furthermore, a ceiling of 20 hours should permit the limited resources available for work study to be shared among more students. Accordingly, no change is made in the regulation.

§ 104.531 Cooperative programs—100 percent funding

Comment. Many commenters questioned whether all cooperative vocational education programs may receive 100 percent Federal funding or just those cooperative programs serving students in nonprofit private schools. Some of these commenters indicated that only the cooperative vocational education program described in section 122 of the Act should include nonprofit private school students.

Response. The Vocational Education Act does not provide authority for two types of cooperative vocational education programs. Any basic grant funds used by a State for cooperative vocational education programs must meet all the statutory requirements of section 122 of the Act and §§ 104.531 through 104.533 of this regulation. States may not legally circumvent these requirements by labeling "cooperative vocational education programs" as "vocational education programs" and funding the activity under section 120(b) (1) (A).

With respect to the issue of funding, the State may fund, with up to 100 percent Federal monies, those cooperative vocational education programs being carried out by LEAs which include the participation of students from nonprofit private schools. This does not mean that the program must be designed exclusively for students in nonprofit private schools; but rather, if the program includes such students, it may be funded up to 100 percent. In order to clarify this matter in the regulation, § 104.305(a) (1) is amended to read, "Cooperative vocational education programs which include students enrolled in nonprofit private schools * * *."

§ 104.531(b) Cooperative education priorities

Comment. A few commenters perceived some difficulty in LEAs utilizing the funding priority in § 104.531(b) (areas that have high rates of school dropouts or youth unemployment) because of the consolidation of cooperative vocational education programs under

the grant. The issue raised is whether the LEA, having received a grant from the State, must give priority in funding cooperative education programs to areas that have high rates of school dropouts or youth unemployment.

Response. Even though the cooperative vocational education program has been consolidated under the basic grant, section 122(e) requires the State to give priority to funding cooperative programs to areas that have high rates of school dropouts or youth unemployment. The State must give priority to the applications of local educational agencies on the basis of the statutory criteria. The determination of the amount of funds earmarked for cooperative programs, however, is entirely within the domain of the State. If the State decides to fund cooperative programs, based on the local applications, then any Federal funds encumbered for cooperative programs must be expended by the LEA in accordance with the local application it submitted. In order to clarify the fact that the funding determination for cooperative programs is based on the local application, the language in § 104.531 (b) has been amended.

§ 104.532 Cooperative assurances

Comment. A commenter suggested that the list of assurances in § 104.532 be deleted because the Act does not require these assurances to be contained in the five-year State plan.

Response. Section 122 of the Act requires that cooperative vocational education programs conducted by LEAs include a variety of assurances enumerated in paragraphs (a) through (h). In order to ensure that the State adheres to these provisions when funding proposed cooperative programs described in the local application, the Commissioner believes it is imperative that the assurances be included in the approved five-year State plan. No change is made in the regulation.

§ 104.532 Cooperative programs—reimbursement of added costs

Comment. Many commenters questioned the meaning of the provision in § 104.532(c) for reimbursement of added costs to employers for on-the-job training of students. Some of these commenters cautioned against reimbursing employers for students' mistakes on the job.

Response. This provision relating to the reimbursement of employers for the added costs has been a part of the cooperative program since 1968. The provision entitles the employer to receive the necessary reimbursement in the event the employer is faced with additional costs to his or her business because of such factors as the participating of many students or the participation of disadvantaged or handicapped students. For example, if a number of students are placed in a business establishment and the employer assigns employees to supervise those students while they are on the job then the employer may be entitled to be reimbursed for the added cost of the time the employees supervise those students. No change is made in the regulation.

§ 104.532 Cooperative programs—private non-profit schools

Comment. One commenter pointed out that the proposed regulation governing the participation of students in nonprofit private schools in cooperative vocational education programs is taken almost verbatim from the corresponding statutory language. This commenter stated that the regulation ignores the specific concerns expressed by the House Committee on Education and Labor in H.R. 94-1085 at page 46. In this passage the Committee urged the Office of Education

to take more vigorous steps to implement the statutory provisions for the funding of programs involving students enrolled in nonprofit private schools. Without further elaboration in the regulation to reflect these concerns, this commenter believes that there will not be adequate safeguards to assure that eligible students enrolled in nonprofit private schools will participate in the programs on an equitable basis.

Response. The comment is accepted. A new regulation, § 104.533, is added to the section on cooperative vocational education programs to reflect the language contained in the House Report. In accordance with this regulation, the State must consult with the appropriate nonprofit private school officials at the State and local levels in order to make provision for the participation of students enrolled in nonprofit private schools. In addition, LEAs receiving funds for cooperative programs shall identify the eligible students, assess their needs, and provide them with the type of programs and services which will most effectively meet their needs. The personnel, materials and equipment necessary to provide these cooperative vocational education programs and services shall remain under the administration, direction and control of the LEA.

§ 104.532 Cooperative programs—on-the-job training

Comment. Commenters expressed strong disapproval of the omission in § 104.532 of two important on-the-job training requirements which were included in the regulations (§102.98) implementing the 1968 legislation. These requirements would insure that the cooperative program provide on-the-job training that:

1. "Employs and compensates student-learners in conformity with Federal, State, and local laws and regulations and in a manner not resulting in exploitation of the student-learner for private gain"; and

2. "Is conducted in accordance with written training agreements between local educational agencies and employers". According to these commenters, the cooperative vocational programs may be converted into a job-placement type of program with less emphasis on high quality, bona fide cooperative programs. Without the structure of the training agreement, LEAs may increase the pupil-teacher ratio, increase the class size, and add responsibilities for the teacher-coordinator. Non-compensation of the student-learner may have an adverse effect on liability in case of injury to the student, and there would be no employer-employee relationship under State workmen's compensation laws.

Response. The comments are accepted and the regulation is amended to reflect the requirement for compensation and written training agreements. These requirements were inadvertently omitted from the NPRM. The Commissioner agrees with the point of view expressed by these commenters that the omission of these two requirements may have a detrimental effect on the overall quality of the cooperative vocational education program. It should be noted, however, that whereas the former regulation required the written training agreements to be submitted to the State for filing with the local application, this submission is not required by this regulation. The State shall only provide an assurance of these two requirements along with the other assurances set forth in § 104.532.

§ 104.541 Energy education—secondary level

Comment. Several commenters objected to the language in § 104.541 which provides

that funds may be used for grants to postsecondary institutions for energy education. These commenters raised serious questions as to the exclusion of energy education programs from secondary schools. Some of these commenters stated that students who have no opportunity for postsecondary training deserve, nevertheless, as much chance as possible to get good training. Other commenters pointed out that their States already have successful energy education projects at the secondary level.

Response. The language of the regulation is based directly on section 123 of the Act which provides for grants to postsecondary institutions. Neither this statutory provision nor § 104.511 of the regulation has been viewed as limiting the funding of those energy education programs which may be characterized as vocational education programs exclusively to postsecondary institutions. In the event an LEA has incorporated an energy education program into its regular vocational education curriculum at the secondary level, the LEA may use funds it receives under its local application to support this program. It is imperative, however, that the energy education program at the secondary level be considered a vocational education program under section 120(b)(1)(A) and not under section 120(b)(1)(D) of the Act.

§ 104.543 *Solar energy.*

Comment. A few commenters objected to the fact that the regulation provides for the support of programs for solar energy but makes no mention of other energy areas such as oil shale. Other commenters stated that training limited only to installation of solar energy equipment is too narrow.

Response. Although the regulation follows the Act very closely in this new and emerging area, it was not intended to exclude vocational training in other energy areas such as oil shale, or hydroelectric power. Neither was it intended to exclude training in the operation and maintenance of solar and other energy producing equipment. As long as the training program may be characterized as vocational education under section 120(b)(1)(A), Federal funds may be used to support the program. No change is made in the regulation.

§ 104.552 *Location of vocational facilities*

Comment. One commenter stated that many area vocational schools constructed with Federal funds serve racially identifiable populations and areas, often to the detriment of central city school districts which serve predominantly non-white student populations. This commenter recommended that the regulation be amended to require the State board to act affirmatively to ensure equal educational opportunities for all students.

Response. Since the construction of area vocational schools is an authorized activity under section 120 of the Act, the sites of the schools are chosen at the discretion of the State and LEA. However, the nondiscrimination provisions in 45 CFR Part 80, which effectuate Title VI of the Civil Rights Act of 1964 are binding on the State. Section 45 CFR 80.3(b)(3) provides that in determining the site or location of a facility, a recipient may not make selections with the effect of excluding individuals from, denying them the benefits of, or subjecting them to discrimination on the grounds of race, color or national origin. Furthermore, if the State makes Federal funds available to an eligible recipient for construction of a vocational facility, the funds must be distributed on the basis of the funding formula described in Section 106(a)(5) of the Act. Under this formula, priority must be given to eligible recipients located in economically depressed areas and areas

with high rates of unemployment. Accordingly, Federal funds used for construction must be distributed to communities in economically depressed areas such as central city school districts.

With respect to the issue of equal educational opportunities for all students and admission policies, Title VI of the Civil Rights Act and Title IX of the Education Amendments of 1972 prohibit discrimination on the basis of race and sex. Since these provisions are binding on all institutions receiving Federal assistance, vocational facilities constructed with Federal monies may not adopt discriminatory admission policies. Thus, no change is made in the regulation.

§ 104.571 *Provision for stipends.*

Comment. Many commenters suggested that since Federal vocational education resources are so limited, the use of funds to pay stipends to students is highly questionable. These commenters believe that the available dollars should be spent to upgrade and maintain existing programs and provide for expansion.

Response. Although section 120 of the Act allows for the provisions of stipends, the decision to permit funds to be earmarked for stipends lies within the discretion of the individual States. Since the Act provides the State with this option, no change is made in the regulation.

§ 104.581 *Placement services.*

Comment. A commenter suggested that the language of § 104.581 be revised to include guidance and counseling explicitly under the section of the basic grant which permits funding of placement services for students who have successfully completed vocational education programs.

Response. Section 120(b)(1)(H) of the Act permits the expenditure of subpart 2 funds for placement services if there is inadequate funding in other programs providing similar activities, or other services are inadequate to meet the needs of the State. Although placement services are an integral part of guidance and counseling, the Act does not allow section 120 funds to be used for all activities under the general heading of guidance and counseling. Since the regulation conforms to these statutory limitations, no change is made in the regulation.

§ 104.581 *Placement services for completers.*

Comment. A few commenters were critical of the language in § 104.581 which provides placement services for students who have successfully completed the vocational education program. These commenters have urged that the placement services be made to all students who have enrolled in a vocational education program regardless of whether the program is completed or not completed.

Response. The language in § 104.581 is based directly on section 120(b)(1)(H) of the Act which limits the eligibility of this activity to "students who have successfully completed vocational education programs." To expand the eligibility would contravene both the Act and the legislative history. Thus, no change is made in the regulation.

§ 104.591 *Industrial arts—mandatory funding.*

Comment. A few commenters asked whether a State could legally refuse to make Federal funds available for industrial arts programs.

Response. Although industrial arts is an authorized activity under section 120 of the Act, the matter of funding such programs lies within the discretion of the State. There is no requirement in the Act that each spe-

cific program enumerated in section 120 be funded. No change is made in the regulation.

§ 104.591 *Industrial arts for the disadvantaged and handicapped.*

Comment. A commenter asked whether prevocational and exploratory programs of industrial arts programs designed for the handicapped and disadvantaged may be charged against the section 110 minimum percentages.

Response. Prevocational and exploratory programs in industrial arts are permissible expenditures under section 120 of the Act. Since expenditures for all programs, services and activities under section 120 may be applied against the minimum percentage requirements for the handicapped and disadvantaged in section 110, the cost of prevocational and exploratory programs in industrial arts may be charged against the section 110 minimum percentages. No change is made in the regulation.

§ 104.592 *Industrial arts—sex stereotyping.*

Comment. Many commenters stated that industrial arts programs traditionally have discriminated against women by denying them entry into male-intensive fields. According to these commenters, female students encountering discrimination at the introductory vocational level are less likely to develop an interest later in nontraditional vocational courses and are handicapped when they try to enter vocational programs which require prerequisite skills and courses acquired in industrial arts programs. These commenters have recommended that, since participation in industrial arts programs can provide a crucial opportunity for introduction of women to the higher paying industrial and technical occupations, the regulation should require that industrial arts programs contribute to the reduction of sex stereotyping in the overall vocational education programs.

Response. The comment is accepted. Section 120(b)(1)(I) provides for the support of industrial arts programs which will assist in meeting the purposes of the Act. One of the primary purposes set forth in the declaration of purpose, section 101, is the development of programs to overcome sex stereotyping; therefore, the references to the purpose of the Act of overcoming sex stereotyping should be made explicit in the regulation. Accordingly, § 104.592 has been amended to reflect this concern.

§ 104.601 *Support services for women.*

Comment. Many commenters expressed concern with this section of the regulation because it only singles out problems related to women. Some of these commenters believe that, inasmuch as the Federal law is designed to eliminate sex bias, this regulation violates Title IX which provides that no program can discriminate against either sex. Others recommended that the regulation provide support services for men who enter programs designed to prepare persons for employment in jobs which have traditionally been limited to women.

Response. One of the major conclusions reached by Congress during its two years of hearings on the Vocational Education Act is that the inferior position which women now hold in the labor market is reinforced by the type of training programs available to and selected by them. Consequently, the legislation was drafted in a way to attempt to solve this problem. One of the key provisions on this matter incorporated into the Act was the section 120(b)(1)(J) program of support services for women. Section 104.601 of the regulations is based on this statutory provision. It should be noted, how-

ever, that support services for men (e.g., counseling, placement) are reimbursable under other sections of the Act. Thus, no change is made in the regulation.

§ 104.602(a) *Support services for women—counseling.*

Comment. A commenter suggested the language in § 104.602(a) be amended to include counseling on the ways to overcome the difficulties encountered in enrolling in non-traditional programs.

Response. The comment is accepted. Mere counseling on the problems involved in enrolling in non-traditional programs is inadequate if these problems are to be solved. Therefore, § 104.602(a) has been rewritten to provide for counseling on the ways of overcoming the difficulties which may be encountered by women in these programs.

§ 104.602(b) *Support services for women—job development.*

Comment. A commenter questioned whether this type of service was limited only to women who are already enrolled in non-traditional programs.

Response. Since the wording of this regulation may give the impression that the service is available only to women directly enrolled in non-traditional programs, the regulation has been clarified so that the service will be available also to women entering the programs or interested in the programs. This revision is necessary because part of the problem women encounter is overcoming previous socialization and barriers to entry in these programs.

§ 104.612(b) *Standards for day care services.*

Comment. Many commenters objected to the requirement in § 104.612(b) that day care services be governed by applicable standards of State law. Some of these commenters pointed out that certain States presently have no such standards. Some requested that all State standards be certified, and others requested clarification and guidance on the expenditure of these funds.

Response. In order to develop a degree of uniformity in the expenditure of funds for day care services, the standards set forth in the Federal Interagency Day Care Regulations, 45 CFR Part 71, will govern the provision of day care services. Accordingly, the reference in § 104.612(b) to the standards imposed by State law has been deleted.

§ 104.621(a) *Meaning of dissolution of marriage.*

Comment. A commenter asked whether the special programs for persons who had been homemakers but who now, because of dissolution of marriage, must seek employment apply only to divorced individuals.

Response. The term "dissolution of marriage" is not to be interpreted only in the strict sense of divorce. Vocational training is available to the homemaker who has experienced a separation, annulment or any other type of dissolution of marriage. No change is made in the regulation.

§ 104.622(a) *Instructional supplies.*

Comment. A commenter suggested that the language in § 104.622(a) "repair of instructional supplies" be changed to "repair of instructional equipment" because supplies are not normally repaired.

Response. The comment is accepted. The Commissioner agrees that since supplies are not normally repaired, the substitution of the term equipment would be appropriate.

§ 104.633 *Residential schools—discrimination.*

Comment. A commenter requested that the standards of Title VI of the 1964 Civil

Rights Act be substituted for the present language which provides that funds may not be used for schools in which students are segregated because of race. Another commenter suggested that a new paragraph (c) be added to prohibit the use of funds for schools where there are different standards for admission based on sex.

Response. With respect to the matter of race, the regulation repeats the statutory provision that no funds may be used for residential vocational schools in which students are segregated because of race. Title VI provisions, however, are also applicable to the entire program and are referenced in 45 CFR 100b.262 of the General Education Provisions Regulations (GEPR). Also applicable are regulations in 45 CFR Part 84 which effectuate section 504 of the Rehabilitation Act of 1973. In addition, Title IX, also referenced in GEPR, prohibits the adoption of different standards for admission based on sex. Therefore, no change is made in the regulation.

SUBPART 3—PROGRAM IMPROVEMENT AND SUPPORTIVE SERVICES

§ 104.701 *Authorization for program improvement and supportive services.*

Comment. A commenter stated that § 104.701 should read that a State shall use "up to 20 percent" for program improvement and supportive services, and that a State is not required to use the full 20 percent for these activities.

Response. The Act specifically states "20 percent" and not "up to 20 percent." This is not a matter of discretion. The State must expend 20 percent of its funds for activities under Subpart 3. Funds not obligated for Subpart 3 may be carried over under the Tydings Amendment (section 412(b) of GEPA) for one year and, if not obligated during that year, would revert to the government. No change is made in the regulation.

§ 104.703 *Research coordinating unit (RCU).*

Comment. Many commenters stated that the Act permits a State to establish a research coordinating unit, and that it is not mandatory for the State to do so. Commenters recommended that the regulation be clarified.

Response. The Act states that a State "may" (not "shall") use the funds for the establishment of a research-coordinating unit. However, if a State is to use any funds for research, exemplary and innovative programs, or curriculum development, it must establish a research coordinating unit in order to do so is correct as written. No change is made in the regulation.

Comment. A commenter stated that the Act stipulates that the research coordinating unit is to contract for research, exemplary and innovative programs, and curriculum development, and that the research coordinating unit may perform directly the research activities, but not the exemplary and innovative programs nor the curriculum development activities.

Response. The Technical Amendments and the legislative history of the Technical Amendments (Senate Report No. 95-142) make it clear that the RCU may perform all functions, research, exemplary and innovative programs, or curriculum development functions itself or may contract for the functions. Section 104.705, 104.706, and 104.708 are amended accordingly.

Comment. Two commenters recommended that the term "unit to coordinate research" be substituted for "research coordinating unit."

Response. The Act consistently uses the term "research coordinating unit." However, a State could call its research coordination unit by another title if it so desired. No change is made in the regulation.

Comment. A commenter suggested that the research coordinating unit be responsible for the vocational education personnel training activities as well as the research, exemplary and innovative programs, and curriculum development.

Response. There is no legal basis in the Act for requiring the RCU to be responsible for vocational education personnel training. A State may, if it chooses, charge the RCU with responsibility for coordination of vocational education personnel training. No change is made in the regulation.

Comment. Several commenters stated that the program improvement funds are a part of the State grant and must be governed by the State plan, and it is the responsibility of the State board, not the research coordinating unit, to develop the State plan. Commenters recommended that the regulation clarify the roles of the State board and the RCU.

Response. The RCU is not responsible for the development of the State plan or the comprehensive plan of program improvement. The development of these documents is the responsibility of the State board. Section 104.703(c) is amended to clarify the role of the RCU.

Comment. Several commenters were concerned that the regulation did not adequately control possible duplication of efforts in the State, and that abstracts of planned projects should be submitted to the National Center for Research in Vocational Education and the U.S. Office of Education.

Response. Section § 104.703(e)(1) requires that two copies of approved projects be submitted to the National Center and to the Commissioner. It would be an undue burden on the States to have to submit abstracts of planned projects. No change is made in the regulation.

§ 104.704 *Contract requirements.*

Comment. A commenter recommended that "demonstrate a reasonable probability" be defined.

Response. The Act does not define the expression "demonstrate a reasonable probability." The burden is on the applicant to set forth a reasoned probability that the project will result in usable improved teaching techniques or curriculum materials. Since the expression is not defined in the regulation, the State must make the determination of "reasonable probability." No change is made in the regulation.

Comment. Two commenters recommended that the words "instructional programs" be substituted for "teaching techniques or curriculum materials."

Response. "Teaching techniques or curriculum materials" is taken directly from the Act. Substituting "instructional programs" would apparently change the intent of the Act. Thus, no change is made in the regulation.

§ 104.705 *Research programs.*

Comment. One commenter recommended that States should be permitted to use results of projects that were not supported with vocational research funds.

Response. The recommendation is accepted. It is clear that the intent of the legislation is not to restrict the dissemination activities to the results of projects that were supported with vocational education funds. Section 104.705(5) is changed to implement this recommendation.

Comment. A commenter recommended that the following be added to § 104.705(2) "and programs and projects for occupational and vocational guidance which utilizes the services of certified guidance counselors. This should include programs where training and retraining of guidance personnel can be effectively evaluated as well as programs

which directly provide guidance counseling and placement services as part of the vocational education effort."

Response. The research activities listed in this regulation are taken directly from the Act. Under this present authority, the State may evaluate the effectiveness of training and retraining of guidance personnel or other personnel. No change is made in the regulation.

§ 104.706 Exemplary and Innovative Programs.

Comment. A commenter recommended that programs designed to facilitate the employment of older people, including people over 65 years of age be included in the list of possible uses of exemplary and innovative funds.

Response. Although older people are not separately identified as persons who would benefit from exemplary and innovative projects, they clearly are included. No change is made in the regulation.

Comment. One commenter recommended that § 104.706 give special consideration to four-year postsecondary institutions as contractors for the funds for exemplary and innovative programs.

Response. Although there is no legal basis in the Act for giving special consideration to four-year postsecondary institutions as contractors, they are not excluded. No change is made in the regulation.

§ 104.708 Curriculum development.

Comment. Several commenters questioned why the research coordinating units must do the contracting for the curriculum development effort.

Response. Section 133(a) of the Act, as amended by the Technical Amendments, clearly states that the contracts for curriculum development are to be made by the research coordinating units. No change is made in the regulation.

Comment. A commenter recommended the phrase "sex stereotyping" be added after "sex bias" in § 104.708(c).

Response. The recommendation is accepted. It was an oversight in the proposed regulation to have left out "sex stereotyping."

§ 104.761 Qualifications of counselors.

Comment. A commenter recommended that the regulation associated with the administration, supervision, conduct, and design of vocational guidance and counseling programs and services set forth the qualifications of personnel to be supported by available funds. This would include setting minimum professional standards for counselors. Administrators and practitioners should be required to meet the certification standards for practicing counselors.

Response. Since the current law does not set forth specific qualifications for these personnel and the criteria will vary from State to State, the States have discretion to establish their own certification standards. No change is made in the regulation.

§ 104.761 Needed personnel for guidance and counseling.

Comment. A commenter indicated that vocational guidance and counseling are vastly needed to improve vocational education programs. However, guidance and counseling personnel cannot be expected to provide all the vocational education services as outlined in the regulation. Other personnel and funds should be available to coordinate services.

Response. It is expected that the Federal funds earmarked by the State to support vocational development and guidance under this section of the Act will supplement the State's ongoing effort to improve the guidance, counseling, placement and follow-up services offered to their students. No change is made in the regulation.

ance, counseling, placement and follow-up services offered to their students. No change is made in the regulation.

§ 104.763 Activities eligible for funding.

Comment. Several commenters recommended a rephrasing of the statement, "funds made available to a State under the vocational guidance and counseling program (Section 134 of the Act) shall be used to support one or more of the following" Various substitute language was suggested by the commenters for the phrase "to support one or more of the following" In most instances, the commenters offered recommendations that, if put into the regulation, would assure the funding of specific activities and in some cases each of the eight activities listed in the Act.

Response. The Technical Amendments make the intent of Congress clear on this issue. The language of the Technical Amendments is "shall include one or more of the following activities" No change is made in the regulation.

§ 107.763 Organization of vocational guidance activities.

Comment. A substantial number of commenters expressed the opinion that while they agreed that funds allocated under Section 130(a) shall be used to support one or more of the eight activities listed in section 134 of the Act, they questioned the reorganization of the eight activities into five as proposed in the NPRM. The commenters preferred for reason of interpretation that the eight activities be enumerated in the regulation as they appear in the Act.

Response. The major purpose for reorganizing the eight groups of activities listed in the Act into five, with appropriate subgroups, was to simplify and make clearer the meaning of the Act. Judging from the many comments received from the public on this regulation, the purpose for regrouping was not achieved. Therefore, the recommendation of the commenters is accepted, and § 104.763 is changed to conform to the language of the Act.

§ 104.763 Eligibility for placement and follow-up services.

Comment. Several commenters raised questions about the meaning of educational placement and job placement services, and which groups or individuals are eligible to receive funds for this activity under the Act.

Response. The law provides funds for educational and job placement services, including follow-up services, for high school, college, and university students. Educational and job placement services and follow-up is one of the eight vocational guidance and counseling activities included in the Act. The Technical Amendments make it clear that funds shall be used for one or more of these eight activities, and that the one or more activities funded shall be determined by the State. No change is made in the regulation.

§ 104.763 Placement and follow-up services.

Comment. A commenter recommended that the regulation specify that placement and follow-up services are concerned with the occupational programs in secondary schools, area vocational schools, community colleges, and baccalaureate or higher degree-granting institutions.

Response. The current language of § 104.763 (3) makes it clear that all the groups identified by the commenter are eligible for placement and follow-up services. No change is made in the regulation.

§ 104.764(a) Special emphasis.

Comment. A commenter expressed the opinion that the term "counselor" as used in this regulation could be misinterpreted or puzzling and might pose a problem regarding official counselor qualifications. This commenter recommended the deletion of the phrase "into schools as counselors" and the use of the phrase "into schools as vocational career advisors for students."

Response. The language of the Act is "to bring individuals with experience in business and industry, the professions, and other occupational pursuits into schools as counselors or advisors for students." Both the Act and the regulation allow the local schools the flexibility to bring these individuals in as advisors. No change is made in the regulation.

VOCATIONAL EDUCATION PERSONNEL TRAINING

§ 104.774 Other types of training.

Comment. A commenter asked whether funds available under section 130 of the Act could be used to provide training for competency-based programs, teacher certification programs, vocational degree programs, and vocational leadership development programs. This commenter recommended a regulation stipulating that locally-oriented evaluation and needs assessment must be the basis for determining the uses to be made of vocational education personnel training funds.

Response. The State, through its five-year State plan and annual program plan, has the option of providing any kind of training that it believes will improve the quality of instruction, supervision, or administration of vocational education. The State may choose to base its determinations on local evaluation and local needs assessments. The recommendation that the State's options in this matter be limited by regulation is not accepted because there is nothing in the Act on which to base such a limitation. No change is made in the regulation.

Comment. One commenter recommended that § 104.774(b) be amended to read "In-service training . . . to overcome sex bias and sex stereotyping" in vocational education programs."

Response. The recommendation to add "and sex stereotyping" is accepted, because the Congress, in the Act's declaration of purpose (Section 101(3)), emphasized equal opportunity in vocational education for persons of both sexes, and because it is not reasonable to suppose that after the Congress included overcoming both sex discrimination and sex stereotyping in the declaration of purpose, it meant to exclude the latter concern in programs of vocational education personnel training.

Comment. One commenter wanted the regulation to include, specifically, training in curriculum development.

Response. The recommendation is not accepted because such training may be included under the non-exhaustive list in § 104.774 at the option of the State. No change is made in the regulation.

§ 104.774 Handicapped or disadvantaged students.

Comment. A commenter recommended that the regulation include, as an allowable category, training to improve vocational education for handicapped and disadvantaged persons; another commenter similarly wanted to include, as a category, training to deal with "learning disabilities."

Response. Such training may already be included under the non-exhaustive list in § 104.774 at the option of the State. Nevertheless, because of the emphasis in the Act on these categories, the regulation has been amended to include them specifically.

GRANTS TO OVERCOME SEX BIAS

§ 104.792 Overcome sex bias "and sex stereotyping."

Comment. One commenter requested that "sex stereotyping" be added to § 104.792(a).

Response. The recommendation is accepted. Although the title of section 136 in the Act uses only the term "sex bias," the body of that section refers to "sex stereotyping and bias." It appears that "sex stereotyping" was inadvertently omitted from the regulation.

§ 104.793 Types of projects.

Comment. Many commenters felt that the activities listed were too limiting and examples should be deleted altogether. Many others, however, felt that the list was not comprehensive enough. Of these commenters, most wanted to add "programs to overcome sex bias" to the list.

Response. The activities listed in § 104.793 are intended to be examples, and the list is not exhaustive. Section 136 of the Act, which authorizes grants to overcome sex bias and sex stereotyping, falls under subpart 3, Program Improvement and Supportive Services; therefore, funds used under this section must go for support or improvement of vocational education programs. Insofar as programs to overcome sex bias fall into this category, they may be supported by funds under this section. No change is made in the regulation.

§ 104.793(e) "Assisting girls and women" in selecting careers.

Comment. Several commenters felt that § 104.793(e)(2) should not be restricted to women and girls and that the regulation should read: "Assisting persons in selecting careers." The rationale they gave for requesting the change was that males, too, need assistance in selecting careers according to their interests rather than according to stereotypes. They felt that, in leaving males out, the regulation was "sexist."

Response. The recommendation is accepted to include males as well as females. Paragraph (e) is rewritten to include assistance for all persons in selecting careers since sex stereotyping is not limited to females.

SUBPART 4—SPECIAL PROGRAMS FOR THE DISADVANTAGED

§ 104.801 Girls and women as disadvantaged.

Comment. A commenter has recommended that "because girls and women traditionally have been channeled into educational tracks which have not enabled them to acquire the prerequisites to pursue training for a wide range of occupations," "girls and women" should be added as a group who require special services in order for them to succeed in vocational education programs. The same commenter recommended an additional criterion, "those who lack prerequisites as a result of previous discrimination."

Response. Since the criteria for identifying those who are academically disadvantaged already include the lack of reading, writing, or mathematical skills, and failure to perform at the necessary grade level, adding a specific category for "girls and women" as disadvantaged (even those who have the necessary skills and perform at the necessary grade level) would seem unnecessary. Therefore, this recommendation is not accepted. No change is made in the regulation.

§ 104.802(a) Youth unemployment and school dropouts.

Comment. A commenter suggested that although the phrase used in section 140(b)(1) of the Act is "youth unemployment and school dropouts," the word "or" should be

used in the regulation as both criteria need not be met.

Response. The recommendation is accepted. In order to provide a degree of consistency in the regulations for funding those programs which require prioritizing of local applications on the basis of youth unemployment or school dropouts (the work study program, the cooperative vocational education program, and special programs for the disadvantaged), the word "and" in § 104.531(b) and § 104.802(a) has been changed to "or." Funds may be used in areas of either high concentration of youth unemployment or high concentration of school dropouts.

§ 104.804 Academic disadvantage.

Comment. A commenter pointed out that, since academic handicaps are of such a variety, detection of academic handicaps, and symptoms of underachievement could be made earlier by a school counselor than by an instructor. The commenter recommended that qualified counseling be provided at the elementary school level and through the implementation of programs for the disadvantaged.

Response. The regulation for subpart 4, "Special Programs for the Disadvantaged," does not state who shall apply the criteria of "disadvantaged" to a particular individual. By not prescribing who must apply the criteria, the State or the LEA has the full range of options. The student, the student's parents, the student's teacher, and the school's guidance counselor may all be involved in the decision. Individual guidance and counseling for the academically and economically disadvantaged is very important. Elsewhere in the Act (section 130) and in the regulations (§§ 104.761-764) the importance of guidance and counseling activities is stressed; however, the regulation does not require the advice of a guidance counselor in every situation. No change is made in the regulation.

§ 104.804(b)(3) Performance below grade level.

Comment. Another commenter recommended deletion of "performance below grade level" in the definition of "academic disadvantage," considering the criteria of (b)(1) or (b)(2) adequate.

Response. Since the three criteria of paragraph (b) of § 104.804 (that is the criteria in (b)(1), (2) and (3)) are alternatives, criteria (3) need not be applied by those who do not believe performance below grade level to be a valid criterion. These criteria must, of course, be applied in relation to paragraph (d)(1) and (2) in reaching a decision whether special services are necessary. Likewise, the four alternative criteria of paragraph (c) of § 104.804 must be applied in relation to paragraph (b)(1) and (2). No change is made in the regulation.

SUBPART 5—CONSUMER AND HOMEMAKING EDUCATION

§ 104.903 Occupation of consumer and homemaking.

Comment. Many commenters recommended that the regulation use the term "occupation" (singular) of consumer and homemaker even though the Act uses "occupations" (plural).

Response. The recommendation is accepted. The phrase "occupation of consumer and homemaker" has been substituted. Although the regulation follows very closely after the Act, since the persons most closely associated with administration of, or instruction in, consumer and homemaking education feel strongly that the occupation of consumer and homemaker should be

referred to in the singular, the regulation is amended accordingly.

§ 104.903(a) Consumer and homemaking education at the elementary level.

Comment. A commenter questioned the inclusion of "elementary" after the phrase "at all educational levels" because elsewhere vocational education is only for secondary, postsecondary, and adult levels.

Response. The House Report (No. 94-1085, page 50) expressly states that the program of consumer and homemaking education was expanded to include the elementary level. Therefore, no change is made in the regulation.

§ 104.904 Preference to LEAs for creative approaches in eliminating sex stereotyping in consumer and homemaking programs.

Comment. A commenter stated: "The regulations should require that State Plans include criteria for selection of applicants based on the degree to which the applicant places emphasis on the preparation of males and females for combining the roles of homemaker and wage earner. Local education agencies should receive preference for funding if they develop or utilize creative approaches for achieving this objective."

Response. This recommendation goes beyond the terms of the Act. While section 150(b)(1)(B) of the Act requires the State plan "to encourage elimination of sex stereotyping in consumer and homemaking programs by promoting the development of curriculum materials" and to "prepare males and females who have entered or are preparing to enter the work of the home," the Act does not provide for preference in funding LEAs which show a creative approach in eliminating sex stereotyping. The Commissioner urges the States to encourage all LEAs to assure participation of both males and females in consumer and homemaking programs. The Act does not support criteria for competition among LEAs with preference in funding on this basis for some and the non-funding of others. Exemplary projects in consumer and homemaking education may, however, be funded by the State under § 104.706 or by the Commissioner under § 105.104(a)(2). No change is made in the regulation.

§ 104.904 Scheduling for consumer and homemaking courses.

Comment. A commenter stated: "To ensure greater availability of consumer and homemaking education programs to both males and females, the regulations must address the problem of scheduling. To implement the intent of the law there must be much greater flexibility in the scheduling of classes. Most secondary schools schedule consumer and homemaking courses during the same periods as courses which traditionally have catered to boys. Both sexes are thereby prevented from participating in the other course or both courses. The regulations should require scheduling which provides authentic options for students."

Response. I would be inappropriate for the Commissioner's regulation to require a particular scheduling of classes within a school or school system. In fact, section 432 of the General Education Provisions Act prohibits the Commissioner from exercising "any direction, supervision, or control over the . . . administration of any educational institution, school or school system" A scheduling of classes, however, which prevents persons of one sex from participating in courses which have additionally catered to persons of the other sex, would be a violation of Title IX. No change is made in the regulation.

§ 104.904 *Curriculum materials which address sex stereotyping.*

Comment. A commenter recommended: "Regulations should state that no programs will be funded under this section unless they show evidence of using or developing curriculum materials that will address sex stereotyping and sex bias in the area they are addressing, e.g., programs for handicapped persons."

Response. Section 432 of the General Education Provisions Act, described in the previous response, also prohibits the Commissioner from exercising any direction, supervision or control over the "textbooks or other printed or published instructional materials by any education institution."

While the Act and regulation require the elimination of sex bias and sex stereotyping in curriculum materials, it would be inappropriate, and possibly illegal under section 432 of GEPA, for the Commissioner to require all schools to use textbooks or other material which specifically address sex stereotyping. On the other hand, schools must use textbooks and other material which are free from sex bias and sex stereotyping. No change is made in the regulation.

§ 104.904(d) *Definition of "outreach."*

Comment. A commenter recommended that "outreach programs" be defined.

Response. Section 150(b) (1) (D) of the Act and § 104.904(d) of the regulation encourage consumer and homemaking outreach programs for "... aged, young children, school-age parents, single parents, handicapped persons," and many others. It seems evident that consumer and home-making education programs are encouraged to "reach out" for those not normally in formal school settings. Any further definition might be limiting to the broad scope obviously intended. No change is made in the regulation.

§ 104.905 *Consumer and homemaking—guidance and counseling.*

Comment. A commenter recommended that, since the Act makes many references to guidance and counseling activities, these activities are a permissible use of funds, that is, a permissible ancillary service, in consumer and homemaking education and recommends that "guidance and counseling" be added under § 104.905.

Response. The recommendation is accepted. Guidance and counseling is recognized as an ancillary service. Funds under section 150(b) (1) of the Act for the purpose of § 104.903(c) (4) may be used for guidance and counseling of students. Therefore, a new paragraph (k) has been added at the end of § 104.905 to read:

"(k) guidance and counseling."

§ 104.906 *Federal share.*

Comment. A commenter recommended that paragraphs (a) and (b) of § 104.906 should be reversed so that the major rule as to matching (50-50) which may apply to two-thirds of the funds is stated first, and the secondary rule (90-10 matching) which applies to (at least) one third follows.

Response. The recommendation has been accepted. The two paragraphs are reversed and rewritten accordingly.

PART 105—COMMISSIONER'S DISCRETIONARY PROGRAMS OF VOCATIONAL EDUCATION

SUBPART I—PROGRAM IMPROVEMENT

§ 105.5 *Applicability of technical review criteria.*

Comment. Several commenters recommended that it should be made clear that the technical review criteria in Part 105 apply to the review of applications for grants

and assistance contracts and not for procurement contracts.

Response. The recommendation is accepted. The proposed technical review criteria in the Commissioner's discretionary programs were not intended to apply to the review of proposals for procurement contracts because procurement contracts are covered by the Federal Procurement Regulations in Title 41, Code of Federal Regulations. Projects for Program Improvement under section 171 of the Act and for the Bilingual Vocational Instructional Materials, Methods, and Techniques Program under section 188 will be supported primarily through procurement contracts. A new § 105.5 is added to reference the Federal Procurement Regulations. Each Request for Proposal (RFP) will specify the criteria which will be used to select the contractor. These criteria will, of course, be consistent with the Act and the regulation. RFPs are announced in the Commerce Business Daily, not the FEDERAL REGISTER.

§ 105.101 *Elimination of sex bias.*

Comment. Several commenters expressed concern that there was not sufficient emphasis on elimination of sex bias and sex stereotyping in §§ 105.101-111. Two commenters suggested giving more points to projects dealing with this concern.

Response. The comments are accepted. In light of the fact that one of the major purposes of the Act is the elimination of sex bias, the weight given to this criterion in § 105.110 (k) has been increased to eight points. In addition, the concerns of sex bias and sex stereotyping will be dealt with through the setting of priorities.

§ 105.101 *Emphasis on contracts.*

Comment. Two commenters expressed concern that the legislative intent of emphasizing contracts over grants needs to be spelled out more clearly.

Response. The regulation now conforms to the Act with regard to this matter. Section 171(a) states that program funds are to be "used primarily for contracts, and in some cases for grants." It is clear that the program is to be administered primarily through procurement contracts rather than through grants. This mode of program administration will apply to all of the activities listed in § 105.104. No change is made in the regulation.

§ 105.102 *National Center for Research in Vocational Education.*

Comment. Some commenters expressed concern that the regulation did not reflect the language of the Act in terms of the regional research centers. The commenters recommended that § 105.102 be rewritten.

Response. The recommendation is accepted. The regulation is changed to read exactly as it is in the Act in regard to the regional research centers.

Comment. A commenter expressed concern that the section on the national center did not mention elimination of sex bias or sex stereotyping as a special concern.

Response. Section 171 of the Act, which is the section concerned with the national center, does not give special mention to sex bias and sex stereotyping. However, since a major emphasis of the Act is on the elimination of sex bias and sex stereotyping, it will directly affect the administration of programs of the center. No change is made in the regulation.

Comment. A commenter expressed concern that the national center will have an unfair preemptive position in competing for contracts.

Response. Even though the national center will develop planning information for the Commissioner, it will in no way establish

the priorities for the project support program to be administered by the Commissioner. The national center will not assist the Commissioner in the development of individual Requests for Proposals (RFPs). If the national center assisted in the preparation of a particular RFP, then the national center would not be eligible to compete for the contract under the RFP. The Commissioner will secure sole source procurements only in extremely limited circumstances and situations. No change is made in the regulation.

Comment. A commenter expressed concern that the national center could preempt all of the research activities to be funded by the Commissioner and none would be done through individually funded projects.

Response. The Commissioner does not plan to administer the program in a manner that would allow the center to preempt research activities. Greater resources will certainly be allocated to funding individual projects than to funding the national center. No change is made in the regulation.

Comment. A commenter expressed concern that the national center would have access to confidential financial information of competitors.

Response. The national center will not have access to confidential information that is protected by the Privacy Act or that is not included under the Freedom of Information Act. Copies of unfunded proposals would not be available to the national center. Copies of funded proposals, less those items protected by the Privacy Act, would be available to the national center if needed by the national center in order to carry out its clearinghouse functions. No change is made in the regulation.

§ 105.104 *Role of States.*

Comment. A commenter expressed concern that States would have too great a role in the administration of the Commissioner's discretionary projects under this section.

Response. The Act does not require that proposals requesting support from the Commissioner under the terms of section 171 be sent through the States. The Commissioner does not plan to request that proposals be sent through the States in the administration of this program. No change is made in the regulation.

§ 105.105 *Eligibility of individuals.*

Comment. Several commenters suggested that individuals not be included as eligible applicants.

Response. Since the Act does not exclude individuals as eligible applicants, no change is made in the regulation.

§ 105.106 *Cost sharing.*

Comment. A commenter objected to the statement in § 105.106 in relation to grants or contracts for program improvement: "No cost sharing is required." The objection was based on the implication, which the short sentence carries, that cost sharing will not be sought or accepted from any applicant. The commenter recommended that the sentence be reworded.

Response. This recommendation is accepted. While cost sharing is not required by the Act, an applicant may indicate it intends to contribute part of the cost of a project. The heading is changed to "cost sharing," and a new sentence is added as follows: "The Commissioner may pay all or part of the cost."

§ 105.110 *Technical review criteria.*

Comment. A commenter suggested that the requirement in § 105.108—that the grant will result in improved teaching techniques.

etc.—should be reflected in the technical review criteria in § 105.110.

Response. Section 105.108 sets forth a requirement of eligibility for grant applications. All applications for grants will be reviewed for compliance with this requirement, and then, only if the application meets this requirement will it be evaluated in accordance with the technical review criteria in § 105.110. No change is made in the regulation.

§ 105.110(k) *Sex bias.*

Comment. Several commenters recommended that points should be given in the review of applications for exemplary and innovative projects which seek to "eliminate," not "minimize" sex bias; in other words that the word "minimize" in paragraph (k) of the technical review criteria be changed to read "eliminate." Another commenter recommended that "sex stereotyping" be added to the criterion on sex bias.

Response. The recommendation is accepted. The sentence is amended to read: "The application provides appropriate plans to eliminate sex bias and sex stereotyping."

Comment. A commenter recommended that a separate criterion be established to give additional weight to applications for projects employing women and minorities in the planning and implementing of the project.

Response. The technical review criteria do not include a specific weighted criterion for proposed projects on which women or minorities will be employed. Section 105.110(h) does, however, include under "Staff Competencies and Experience" the "use of professional staff members from minorities and who are women." The Commissioner will review the applications in relation to the criteria listed in § 105.110, including paragraph (h) on staffing and paragraph (k) on elimination of sex bias. Therefore, no change is made in the regulation.

SUBPART 2—INDIAN TRIBES

§ 105.202(b) *Applicability of the Indian Self-Determination and Education Assistance Act.*

Comment. A commenter asked who determines the extent to which implementation of the regulation concerning the sections of the Indian Self-Determination and Education Assistance Act are relevant and practicable.

Response. The Commissioner of Education in the first instance is responsible for implementing the applicable sections. In the event that questions arise which might affect Bureau of Indian Affairs (BIA) policy, the Commissioner will consult the Bureau of Indian Affairs for guidance. No change is made in the regulation.

§ 105.203 *Definition of Indian tribe.*

Comment. A commenter stated that the definition of an Indian tribe and the section on eligibility were overly restrictive, and therefore, result in an inequity for an Indian organization comprised of Indians who reside in urban areas or who are not members of federally recognized tribes. The commenter further stated that Indian organizations that are not federally recognized are eligible for assistance.

Response. Section 103(a) (1) (B) (iii) of the Act is restrictively written with regard to the parties eligible to contract with the Office of Education. By reference, a tribe or tribal organization must comply with the definition in the Indian Self-Determination and Education Assistance Act, which requires that the tribe or tribal organization be federally recognized. Moreover, to be eligible, the tribe must be eligible to contract with the Secre-

tary of the Interior under the Indian Self-Determination Act of April 16, 1934.

To the extent that other Federal departments or agencies award grants or enter into contracts with Indian tribes or organizations which are not federally recognized, it is because the definitions of Indian tribe and the standards for eligibility vary. For example, the Indian Education Act defines the term Indian to include "any individual who (1) is a member of a tribe, band, or other organized group of Indians, including those tribes, bands, or groups terminated since 1940 and those recognized now or in the future, by the State in which they reside." Thus, given the less inclusive definition in the Act and the Self-Determination Act, the Commissioner has no authority to fund Indian organizations which are not federally recognized. No change is made in the regulation.

§ 105.205 *Eligible applicants.*

Comment. A commenter asked if the contract program for Indian tribes and Indian organizations would preclude Indians, specifically non-reservation Indians, from participating in non-discretionary State administered programs.

Response. The Indian contract program does not preclude members of Indian tribes from participating in State administered vocational education programs. Conference Report 94-1701 (p. 215) states that the Indian contract program is not intended to relieve the States of their obligation to provide vocational education to urban Indians. No change is made in the regulation.

§ 105.211 *Review of applications.*

Comment. A commenter suggested that applications be reviewed by the National Advisory Council on Indian Education.

Response. While some programs administered under the Indian Education Act, Pub. L. 92-318, as amended, require review by the National Advisory Council on Indian Education (NACIE), the Vocational Education Act does not provide statutory authority for the review of applications by the NACIE. However, the NACIE was afforded an opportunity to review and comment upon the Notice of Proposed Rulemaking thereby allowing for input from the Indian community. It is the statutory responsibility of the Commissioner to provide for the review of applications. No change is made in the regulation.

§ 105.211 *Minimum points received by applications to be considered for funding.*

Comment. A commenter asked if applications should receive a minimum of 50 rather than 30 points to be considered for funding.

Response. The minimum number of points an application must receive to be considered for funding remains 30 points. The Commissioner feels that this lower minimum should result in a larger number of applications which may be considered for funding. No change is made in the regulation.

§ 105.211 *Technical review criteria.*

Comment. A commenter suggested that priority in contracting be accorded to vocational education programs which serve Indians in urban areas.

Response. The Act limits the eligibility of applicants to Indian tribal organizations which are eligible to contract under the Indian Self-Determination and Education Assistance Act. Therefore, urban Indian groups are not a priority group in the regulation because the Act is written so that eligibility turns on whether an Indian organization is federally recognized under the Indian Self-Determination and Education Assistance Act. However, urban Indians are eligible to participate in the regular program. No change is made in the regulation.

Comment. A commenter suggested that the regulation give consideration to the special cultural, legal, and socio-economic status of the Indian population. The commenter further suggested that program design and service delivery include: (a) The provision of basic skills training necessary to facilitate vocational training; (b) the provision of supportive services such as child care and transportation; and (c) the payment of stipends so that Indian people can afford to participate in training.

Response. Section 103(a) (1) (B) (iii) provides broad authority for the Indian contract program. Therefore, an applicant may request support for basic vocational skills training, supportive services, and stipend support. The applicant should respond to each of the technical review criteria. No change is made in the regulation.

Comment. A commenter suggested that the need section of an application should be based upon the tribe's economic development plan, including tribal manpower data.

Response. The need section of the application may include information concerning a tribe's economic development plan. However, this should not be the sole or major criterion in that the overall objectives for an economic development plan may vary significantly from the legislative intent of this Act. No change is made in the regulation.

SUBPART 3—TRAINING AND DEVELOPMENT PROGRAMS FOR VOCATIONAL EDUCATION PERSONNEL

LEADERSHIP DEVELOPMENT AWARD PROGRAM

§ 105.302 *Length of award.*

Comment. A commenter, wishing to assure an award period of adequate length to permit effective education for leadership development, recommended that § 105.302(b) be amended to assure a minimum award period of at least 24 months to each approved applicant.

Response. The recommendation is not accepted because the expressed intent of the Congress eliminated the policy which in the past has sometimes limited the duration of leadership development awards to one year. Emphasis on a minimal commitment of 24 months would tend to weaken the effect of the present regulation which is addressed to an award period of 36 months. Furthermore, it is not believed to be in the best interest of the government or of the awardee to weaken in any way the requirement in § 105.307 that the awardee perform satisfactorily and in accordance with the regulation. No change is made in the regulation.

§ 105.303 *Equitable distribution.*

Comment. Several commenters objected to the language in § 105.303 that "the Commissioner will apportion leadership development awards equitably among the States . . ." for the reason that the word "apportion" gives the impression that the awards will be apportioned, by formula, in advance of receipt of applications. They recommended that the sentence be reworded.

Response. This recommendation has been accepted. Although the proposed regulation follows section 172(b) (4) of the Act closely, the language of § 105.303 of the regulation is changed to make clear that there will not be a formula allocation of awards to the States.

§ 105.304 *Post-doctoral study.*

Comment. A commenter recommended specific prohibition of awards to post-doctoral students.

Response. It is possible that a person with the doctoral degree in engineering, or any other field, might seek to become a professional leader in vocational education. Although the Act and its legislative history do

not address this point, it cannot safely be assumed that the Congress meant to preclude giving an award to such a person. No change is made in the regulation.

§ 105.304 Role of research.

Comment. A commenter recommended deletion of the phrase "or research" from paragraph (b), which would then read, "In order to receive a leadership development award the person selected shall enroll for full-time graduate study in a vocational education leadership . . ."

Response. The recommendation is accepted and the regulation is changed accordingly. Graduate study includes all of the employment categories suggested in the Act (e.g., administrators, supervisors, teacher educators, researchers, guidance and counseling personnel). Nothing in the Act warrants establishing the elements of study and research as mutually exclusive alternatives.

§ 105.305 Graduate-level study.

Comment. A commenter pointed out that although in H.R. Report No. 94-1085, p. 54, the Congress advises the Commissioner to solicit recommendations "from graduate schools offering these programs," the regulation reads "from representatives of vocational education programs in institutions of higher education." The commenter notes that the programs might or might not be at the post-baccalaureate or doctoral level.

Response. The point is well taken. However, the Commissioner prefers not to make the suggested change in order to permit and encourage solicitation of recommendations from all levels of instruction, including the doctoral level. No change is made in the regulation.

§ 105.305 Role of the State board.

Comment. A commenter finds paragraph § 105.305(b) to be "extra-statutory and misrepresentative of H.R. Report No. 94-1085" in that it gives excessive authority to the State board.

Response. The Commissioner was keenly aware of the criticism expressed in H.R. Report No. 94-1085 and it took fully into account in drafting the regulation. In light of the legislative history, the regulation is designed to obtain advice from the State board and to use the board as a conduit for securing advice from the "other agencies." On the other hand, the total role of the State board has been changed because the applications are sent directly to the Commissioner (rather than through the State boards, as in previous years) and will be reviewed independently by the Commissioner's designees in the Office of Education. For these reasons, the recommendation to revise the regulation is not accepted.

§ 105.305 Advice from others.

Comment. Several commenters objected to having the State board forward to the Commissioner only a summary of its own advice and that of the "other agencies" and "representatives," on the grounds that the authority to prepare such a summary increases unduly the role of the State board.

Response. In order to clarify the role of the State board, the regulation is revised to require the State board to forward the complete statement of advice from each such agency and representative.

§ 105.307 Part-time employment.

Comment. A commenter wanted the part-time employment referred to in § 105.307(a) (3) to be limited to 50 percent of the awardee's time, and wanted a regulation to clarify how approval for part-time employment is obtained.

Response. Experience with the leadership development award program in previous years shows that there are many patterns of part-time employment in terms of hours per day or week and number of weeks or months. It has not seemed feasible to attempt to foresee them all and regulate accordingly. Therefore, the matter will be handled as in the past, by individual request from each participating institution to the Commissioner and review of each request on its merits. No change is made in the regulation.

§ 105.309 Application review criteria.

Comment. Many persons took exception to the proposed criteria for judging applications. One wanted the weights of the criteria changed to favor younger, less experienced applicants. Several commenters wanted much more weight given to evidence of intellectual ability as shown by academic achievement. One pointed out the similarity of criteria (b) *Leadership potential and criterion*, and (e) *Human relations skills*, which would tend to favor certain candidates. Several wanted the Commissioner to set minimum levels which must be attained for each criterion. Several perceived that the proposed criteria would result in discrimination against women and racial minorities, and would favor older persons with "stereotyped" accomplishments. One commenter recommended that in paragraph (g) of § 105.309 special consideration be given to women. One commenter urged elimination of the entire section on review criteria.

Response. Since the Commissioner must review all applications and must, of necessity, use criteria for that purpose, it is the policy of the Office of Education to publish the criteria in advance.

Most of the other comments and recommendations relate to the weight assigned to each of the criteria. In view of the comments, a reconsideration of the weighting has resulted in several revisions set forth in the final regulation.

The weight given to evidence of academic ability has been increased, and the weight given to communication skills has been reduced. The criterion (e) *Human relations skills* has been eliminated as such and included under criterion (b) *Leadership potential* as skill in interpersonal relations.

Neither the Act nor its legislative history provides any support for weighting of the criteria to favor either younger or older persons. Consequently, the recommendations in this regard were not accepted.

§ 105.309 Application review criteria—academic ability.

Comment. A commenter recommended changing criterion (a) *Academic ability* to require the applicant to submit transcripts of grades earned in college, including graduate courses, instead of leaving this submission to the option of the applicant. The same commenter suggested that item (3) of the same criterion be deleted, on the grounds that skill aptitude tests are not given at the graduate study level.

Response. The recommendation to require submission of transcripts is accepted and the regulation changed accordingly. A record of the applicant's grades is indispensable for proper review of his or her qualifications. The second recommendation, to delete the item referring to skill aptitude test, is not accepted, because submission of such information is optional, and because the applicant's scores on such tests, irrespective of when the tests were taken, is evidence of the applicant's abilities.

§ 105.310 Number of participating institutions.

Comment. A commenter recommended that the number of approved institutions be limited to twenty. The commenter saw this as a means of helping to assure that only institutions with highest quality doctoral level programs would be assigned leadership development awards. The recommendation was perceived also as a way to assure a "critical mass" of awardees at each participating institution. A commenter with the same concern wanted the number of awardees per institution to be no fewer than ten and no more than twenty.

Response. While these concerns are shared by the Commissioner, § 105.310 was not made more specific because of the need to accommodate possible fluctuations in the level of funding allocated to this program. It is believed that, by judicious use of the right to redistribute award recipients among approved institutions, the effect desired by both commenters will be achieved, whatever the level of funding of the program. No change is made in the regulation.

§ 105.311 Comprehensive graduate programs.

Comment. A commenter recommended that a participating institution should be required to offer at least four doctoral programs in supporting technical disciplines of agriculture, business administration, engineering, health sciences, and home economics, plus doctoral level programs in sociology, psychology, computer science, philosophy, and an area of "communications." The same commenter recommended that the regulation require a much broader, more comprehensive graduate program of vocational education than is now stipulated.

Response. The recommendation is not accepted. Despite the desirability of the recommended program, to require such a program would exclude from participation in the leadership development program many of the institutions which have already demonstrated their capabilities for training leaders. In setting the standards presently required in the proposed regulation, the Commissioner has in mind first the interest of the student awardees, who will legitimately have preferences among institutions, in respect to distance from their present homes, etc. The Commissioner's decision to make no change in the proposed requirements for eligibility of institutions is based also on the grounds that more restrictive criteria for eligibility would tend to enmesh the leadership development program unduly into the specific doctoral requirements of traditional technical fields. No change is made in the regulation.

VOCATIONAL EDUCATION CERTIFICATION FELLOWSHIP PROGRAM

§ 105.431 Source of funding.

Comment. A commenter advised against having the certification fellowship program "compete for funds" with the leadership development program, and recommended that the former program be supported with funds provided to the States through Section 135 (§ 104.771 of the regulation). The commenter reasoned that the need for leadership development awards would so lessen the "critical mass" of awardees as to lose the benefits of group interaction.

Response. Funds for both the State-administered Vocational Education Personnel Training (§§ 104.771-104.776) and the Commissioner's two discretionary programs, *Leadership Development* (§§ 105.301-105.312) and *Certification Fellowships* (§§ 105.431-105.443), are authorized by Section 103 of

the Act. Section 103 requires that a specified portion of the appropriated funds be reserved for use by the Commissioner and that the balance be allotted to the States. The Commissioner's portion and the State's portion cannot be modified without a Congressional amendment. Therefore, funds available for the State-administered part under Section 135 cannot be used to support the Commissioner's Vocational Education Certification Fellowship Program. No change is made in the regulation.

§ 105.431 Teacher or educators.

Comment. Two commenters recommended that in § 105.431 the term "vocational educator" should be changed each time it occurs to "vocational teacher."

Response. Although there is merit in the suggestion for use of the more widely used term, teacher, the recommendation is not accepted. The Congress used "educator" in the statute, and without compelling reasons to the contrary, the Commissioner prefers that the regulation use the terminology of the statute. No change is made in the regulation.

§ 105.431 Emphasis on shortage of teachers.

Comment. A commenter recommended that § 105.431(a) be changed to read " . . . if those teachers have skills and experience in vocational fields for which there is a need for vocational teachers and for which they can be trained . . ." The rationale for adding the clause for which there is a need for vocational teachers is that there are some fields of vocational education which have a surplus of teachers and for which no additional ones should be trained. The commenter wanted the same change in § 105.432 (a) (1), for the same reason.

Response. The recommendation is accepted. Although the statute does not require that there be a need for vocational teachers in reference to applicants for fellowships who are certified teachers, it does contain this requirement with respect to applicants who are employed in industry. That both classes of applicants should be treated alike in this respect is supported at two points in the statute: first, section 172(c) (1) states that the fellowship program exists "in order to meet the need to provide adequate numbers of teachers . . ." and thereby establishes the overall criterion of need; and second, section 172(c) (7) requires the Commissioner to determine, annually, the areas of teaching where there is need of additional teachers and to award the fellowships, preferentially, for study in those areas. The amendments will help to assure that the limited funds available to the fellowship program are used where they are most needed.

§ 105.432 Categories of fellows.

Comment. A commenter advised that in paragraph (a) of § 105.432 the word "including" be changed to "other than" on the grounds that if a person has already been certified to teach vocational education, there is no need for additional training.

Response. There is nothing in the statute or its history to suggest that a person who has been a teacher of vocational education in a field where there is no longer employment could not apply for a certification fellowship in order to be able to work in a field where there is need for teachers. Therefore, no change is made in the regulation.

Comment. Another commenter urged that the parenthetical expression in paragraph (a) of § 105.442 be changed to read "(including other thirteenth and fourteenth year programs)." The rationale was that there are hundreds of educational programs at the thirteenth and fourteenth year levels which

are not in community or junior colleges and where there are teachers in a variety of fields who should be eligible for consideration as applicants for certification fellowships.

Response. The recommendation is accepted. It seems reasonable to include as potential beneficiaries teachers in all programs at the thirteenth and fourteenth grade levels, rather than only those designated as junior or community colleges. The recommendation is particularly valid because many of the "other" programs are in technical and vocational education. The regulation is changed accordingly.

§ 105.434 Role of the State boards.

Comment. A commenter feared that State boards might be inclined to favor certified teachers, and recommended therefore that a more objective procedure be adopted for reviewing applications.

Response. All applications will be objectively reviewed by the Commissioner, who customarily uses teams of persons drawn from both inside and outside the Office of Education for this purpose. The review by the State board (with advice from the State advisory council and other agencies and representative individuals) will provide valuable additional input to the Commissioner's review of the applications. No change is made in the regulation.

§ 105.434 Advice from others.

The recommendation regarding § 105.305 (b), that the State board should transmit to the Commissioner the full statements of advice about applications rather than a mere summary of that advice, was found to be equally applicable to the certification fellowships program. Accordingly, § 105.434 (b) is amended to correspond to the changes made in § 105.305 (b).

§ 105.440 Eligibility of institutions.

Comment. A commenter asked generally about the difference in stringency of criteria for eligibility of institutions to participate in the Leadership Development Program and the Certification Fellowships Program.

Response. The requirements for institutional participation in the Leadership Development Program (§ 105.311) are for work at the level of graduate study and are therefore much more demanding than the requirements for the baccalaureate level fellowships program.

§ 105.441 Priority to areas of need.

Comment. A commenter noted the omission in the regulation of the language in Section 172(c) (7) which requires the Commissioner to give priority in the awarding of fellowships to those which are focused on the designated areas of need for vocational education teachers. The commenter requested that the omission be corrected.

Response. In view of the omission, the recommendation is accepted. Section 105.441(a) is amended by the addition of this language: "and will, to the maximum degree possible, award fellowships under § 105.432 to applicants seeking to become teachers in the areas identified."

§ 105.442 Emphasis on areas of need.

Comment. A commenter wanted § 105.442 (a) (2) amended to recognize the emphasis on areas or fields of vocational education where additional vocational educators are needed (as required by § 105.441). The amended text would read, "Past or current skills and experiences in the vocational field(s) in which there is a need for additional educators and . . ."

The same commenter requested the addition of an item (3) to § 105.442: "inability to

find employment in his or her field of previous certification." The rationale was that Section 172(c) (1) includes that qualification, which must therefore have been omitted by inadvertence.

Response. Both recommendations are accepted. The change in § 105.442(a) (2) serves to emphasize the requirement of § 105.441 of the regulation, and a new subsection (3) under § 105.442(a) has been added which reads "inability to find employment in his or her field of previous certification."

§ 105.443 Emphasis on the handicapped.

Comment. A commenter recommended that the application review criterion related to national need (paragraph (e) of § 105.443) be strengthened by adding special education for the handicapped to paragraph (e) of § 105.440 as a part of the undergraduate program of vocational education.

Response. The Act requires that the undergraduate program of vocational education have adequate support services and disciplines, but does not go beyond suggesting which support services and disciplines shall be included. Since special education for the handicapped is a critical program element, the recommendation is accepted and § 105.440(e) is changed accordingly.

§ 105.443 Additional review criteria.

Comment. A commenter recommended that a fourth category, "women," be added to the list of groups meriting special attention under paragraph (e) of § 105.443, *National need*.

Response. Because of the strong emphasis in the Act on eliminating sex bias and sex stereotyping, the recommendation is accepted. The initial sentence of the paragraph is modified to read " . . . with particular reference to the elimination of sex stereotyping and to working with the following populations." Further support for this change is found in § 105.441, which provides that the Commissioner will identify areas of teaching in vocational education where there are or will be shortages of personnel. Also a reasonable assumption may be made that there is a shortage of women teachers and of persons capable of teaching women in many areas of vocational education.

Comment. A commenter asks that a fourth category be added to paragraph (f) of § 105.443 to favor applicants who desire to be trained in a "nontraditional" teaching field.

Response. The recommendation is accepted. H.R. Report No. 94-1085, p. 55, supports this non-traditional emphasis which may be interpreted to mean women (or men) teaching in fields traditionally reserved to the other sex, and also to mean any person teaching in a new field or a field not commonly taught. The new fourth item has been added to § 105.443(f) which reads as follows: "(4) The applicant's intention to become certified in a vocational field not traditionally open to persons of the applicant's sex, or to become certified in a new field or one not commonly taught."

§ 105.443 Weighting of review criteria.

Comment. Two commenters urged that the weight assigned to criterion (a) *Academic ability* be increased to 30 points and the weights for criterion (b) *Vocational skills* be increased to 40 points, with corresponding reductions in the weights assigned to other criteria. The rationale was that criteria (a) and (b) are by far the most important.

Response. Due to the overall importance of criteria (a) and (b) the regulation is revised to increase criterion (a) to 25 points and criterion (b) to 35 points, and criterion

(c) *Communication skills* is reduced to 15 points.

SUPPORT 4—EMERGENCY ASSISTANCE FOR REMODELING AND RENOVATING OF VOCATIONAL EDUCATION FACILITIES

§ 105.502 Eligible applicants for emergency assistance for remodeling.

Comment. Commenters indicated that the legislative history does not sustain the argument made on page 18549 of the preamble to the NPRM that the bill, as enacted into law, was expanded to include all LEAs as eligible applicants; to the contrary, they maintain that only LEAs "in urban and rural areas" are eligible and recommend that § 105.502 be amended accordingly.

Response. The recommendation is accepted. Congressional intent indicates that only urban and rural LEAs are eligible under this program, and that suburban LEAs are not eligible. Section 105.502 is amended to limit eligibility to LEAs in urban and rural areas and definitions on "urban" and "rural" have been added. Since these definitions apply only to the emergency facilities program, they are not repeated among the definitions of general applicability in Appendix A.

§ 105.504 Functions of the State board in relation to applications for emergency assistance for remodeling.

Comment. A commenter asked what the State board must do in relation to applications by LEAs for emergency assistance for remodeling and renovation. The commenter questioned whether the State board makes the decision on funding in the State and suggested that the State board's functions be specified in the regulation.

Response. Section 193(a) of the Act requires that the LEA send its application to the Commissioner through the State board. This requirement is repeated in § 105.504 of the regulation. Section 193(a) of the Act requires that the application contain "such other information as the State board determines to be appropriate." This requirement is repeated in § 105.503(g) of the regulation. Thus, the Act and the regulation require the application to be sent to the State board and require that when the application is sent on by the State board to the Commissioner, it contain whatever additional information the State board considers necessary. The State board should review the application and ask the applicant to add to its application any information which the Commissioner will need for decision. The decisions on awards must be made by the Commissioner. Since § 105.503(g) follows the Act and gives the State board wide leeway in requesting any additional information it considers appropriate, no change is made in the regulation.

Response. The comment is accepted. The procedure set forth in § 105.604(a) is for the applicant to submit a copy of the application to the State board for comment. Since a copy would be submitted to the board, it was implicit in this regulation that the original application be submitted directly to the Commissioner. The regulation reflects this procedure. In addition, the regulation is amended to require that the State board submit its comments to the Commissioner within 30 days following the closing date for applications.

Response. The comment is accepted. The procedure set forth in § 105.604(a) is for the applicant to submit a copy of the application to the State board for comment. Since a copy would be submitted to the board, it was implicit in this regulation that the original application be submitted directly to the Commissioner. The regulation reflects this procedure. In addition, the regulation is amended to require that the State board submit its comments to the Commissioner within 30 days following the closing date for applications.

§ 105.505 Emergency assistance for remodeling.

Comment. A commenter asked what is meant by "emergency assistance for remodeling" and whether the program is limited to assistance after a natural disaster or to assistance for renovation where local tax efforts have been insufficient.

Response. The program of "emergency assistance" is not limited to assistance for remodeling after a natural disaster. The program is a special four-year program of assistance for remodeling in urban and rural areas which was added after Congress heard testimony of "the inadequacy of facilities in urban and rural areas." (Senate Report No. 94-882, p. 88.) As to assistance where local tax efforts have been insufficient, section 193(b)(1) of the Act stresses as the first criterion the need for Federal assistance. Applications will, under § 105.505,

be ranked according to the relative need for assistance as determined by the criteria in § 105.505(b). No change is made in the regulation.

§ 105.505(b)(8) Criteria for award of emergency assistance for remodeling.

Comment. Commenters suggested that criterion (8) in § 105.505(b) for review of applications submitted to the Commissioner for emergency assistance for remodeling should be deleted; five points should not be given for evidence that the proposed facilities "complied with the law and did not result in sex discrimination or bias against the handicapped."

Response. The recommendation is accepted. Criterion (8) is deleted and the five points are added to criterion (1), giving a maximum of 17 points for evidence of the age or obsolescence of the facilities for which Federal assistance is sought. Since it is a requirement of law that educational facilities not discriminate on the basis of sex or discriminate against the handicapped, it is not reasonable to give five points for evidence in the application that these requirements of law have been met. For that reason, criterion (8) is deleted. Applications will be reviewed, of course, to make sure that the proposed remodeled facilities do not result in discrimination on the basis of sex or handicap.

SUPPORT 5—BILINGUAL VOCATIONAL EDUCATION

§ 105.604(a) Submission of applications.

Comment. A commenter suggested that in order not to delay the submission of applications they should be submitted simultaneously to the Office of Education and to the State Board for Vocational Education, and that the State board be given 30 days following the closing date for applications to submit its comments to the Office of Education.

Response. The comment is accepted. The procedure set forth in § 105.604(a) is for the applicant to submit a copy of the application to the State board for comment. Since a copy would be submitted to the board, it was implicit in this regulation that the original application be submitted directly to the Commissioner. The regulation reflects this procedure. In addition, the regulation is amended to require that the State board submit its comments to the Commissioner within 30 days following the closing date for applications.

§ 105.611 Bilingual Vocational Instructor Training Program.

Comment. A commenter recommended that the Commissioner make an effort to simplify the various teacher training programs within the Vocational Education Act and also to develop an effective means of coordinating these programs with similar teacher training programs administered by the Office of Education. This commenter contended that, without simplification and coordination, American education will be confronted with overlapping and ineffective management.

Response. The Vocational Education Act contains three separate authorities for teacher training programs.

The Vocational Education Personnel Training set forth in § 104.771 is a State-administered program. The Bilingual Vocational Instructor Training Program in § 105.611 addresses a specific need to improve the overall Bilingual Vocational Training Program. The Vocational Education Leadership Development Program in § 105.301 allows experienced vocational educators to spend full time in advanced study of vocational education. In view of the fact that one program lies exclusively within the domain of the State, and the other two discretionary programs address separate objectives in—as a

general rule—separate institutions, it is not feasible to consolidate or simplify the three programs. Therefore, no change is made in the regulation.

**APPENDIX A
DEFINITION**

Comment. One commenter strongly supported a comment recorded in response to the NOI that the definition of vocational education should be broadened to include guidance elements and thus reduce the need for funding guidance as a supportive service.

Response. While there is merit in the comment, the definition of vocational education in the Act (Sec. 195(1)) does not include vocational guidance and counseling. No change is made in the regulation.

APPENDIX—"COOPERATIVE EDUCATION."

Comment. A commenter recommended expanding the definition of "cooperative education" to add two requirements that the program:

- (1) "employs and compensates student-learners in conformity with Federal, State, and local laws and regulations in a manner not resulting in exploitation of the student-learner for private gain, and
- (2) "is conducted in accordance with written training agreements between local educational agencies and employers."

Response. While the recommendation raises two very important points, the definition of "cooperative education" comes directly from section 195(18) of the Act and is not changed. The recommendations are added as requirements in the Cooperative Vocational Education Programs in § 104.531 as new paragraphs (c) and (d).

APPENDIX—"CURRICULUM MATERIALS."

Comment. A commenter suggested as an alternative definition of "curriculum materials" the following:

"Curriculum materials" means instructional resources both print and non-print, used in any teaching and learning process designed to prepare persons for employment or to upgrade the competencies of persons previously or presently employed in any occupational field."

Response. While the proposed definition has much merit, particularly in not limiting curriculum materials to printed materials, the definition in the Appendix comes from section 195(19) of the Act with only slight modification. No change is made in the regulation.

APPENDIX—"FINANCIAL ABILITY."

Comment. A commenter recommended that a definition of "financial ability" be added, to define the term as used in section 106(a)(5)(B)(i) of the Act.

Response. The recommendation is accepted. A definition of "financial ability," taken from the House Report (H. Rept. No. 94-1085, p. 34) is added.

APPENDIX—"HANDICAPPED."

Comment. Many commenters objected to that part of the definition of handicapped which included "learning disabilities to the extent the disability is a health impairment," pointing out that most learning disabilities (LD) are not health-related problems at all, but are learning-related problems (perceptual handicaps, brain injury, dyslexia or developmental aphasia). Commenters recommended that the definition in the Appendix to the Vocational Education Act should conform to the definition in the Education of the Handicapped Act, Pub. L. 94-142 and the regulations thereunder.

Response. The Technical Amendments (Pub. L. 95-40) conformed the definition of "handicapped" in the Vocational Educa-

tion Act to that in the Education of the Handicapped Act. The amended definition includes "specific learning disabilities" as a handicapping condition. The definition of "specific learning disabilities" will be consistent with the definition finally promulgated by the Commissioner under the Education of the Handicapped Act. It will be necessary to look to the regulations under the Education of the Handicapped Act as published in final form for the definition of "specific learning disabilities."

APPENDIX—"HIGH SCHOOL."

Comment. A commenter recommended a definition of "high school" be added to replace that of "secondary programs."

Response. The recommendation has been accepted by adding the definition of "high school program" and revising the definition of "secondary program" as follows:

"High school program" means vocational education for persons in grades 9 through 12. "Secondary program" means vocational education for persons in secondary grades as defined by State law.

APPENDIX—"INSTRUCTIONAL TECHNOLOGY."

Comment. A commenter objected that the definitions do not include a definition of "instructional technology" since instructional technology "is playing an ever increasing role in the armed services, industry, government, medicine and the whole of education." No proposed definition was included in the comment.

Response. While there are many terms which could be defined, the Appendix contains only definitions of terms which must be defined for interpretation of the Act or

APPENDIX—"SECONDARY PROGRAM"

Comment. A commenter urged that the word "usually" be dropped from the definition of "secondary" and that the grades be specified as "beginning with grade 9 and ending with grade 12."

Response. The definition of "secondary program" has been rewritten to leave to determination by State law the span of grades considered as "secondary." A definition of "high school" has also been added to the Appendix.

**APPENDIX—"VOCATIONAL EDUCATION"—
GUIDANCE**

Comment. A commenter strongly urged that the definition of vocational education should be broadened to include guidance elements and thus reduce the need for funding guidance as a supportive service.

Response. While there is merit in the comment, the definition of vocational education in the Act (Sec. 195(1)) does not include vocational guidance and counseling. No change is made in the regulation.

APPENDIX—"VOCATIONAL INSTRUCTION"

Comment. A commenter objected that the definition of "vocational instruction" does not include planning, assessment, and evaluation.

Response. Planning, assessment, and evaluation are not elements of the statutory definition of "vocational instruction." For that reason they should not be included in the definition of "vocational instruction" in § 104.512 or in the Appendix. No change is made in the regulation.

TUESDAY, OCTOBER 4, 1977

highlights

SUNSHINE ACT MEETINGS..... 54055

G. JOSEPH MINETTI

Executive order exempting Mr. Minetti from mandatory retirement 53899

AMERICAN EDUCATION WEEK

Presidential proclamation..... 53983

COUNTRY MUSIC MONTH

Presidential proclamation..... 53987

NATIONAL FOREST PRODUCTS WEEK

Presidential proclamation..... 53985

EMPLOYEE BENEFIT PLANS

LABOR/P&WBP adopts regulation relating to maintenance of indicia of ownership of plan assets outside U.S. District Court jurisdiction (Part IV of this issue)..... 54122

TOXIC SUBSTANCES

Labor/OSHA issues proposal on identification, classification and regulation of possible carcinogens; comments by 12-877 and hearing 3-14-78 (Part VI of this issue) 54148

MOTOR CARRIER SAFETY

DOT/FHA amends regulations on settlements and hearings in driver disqualification procedures; effective 10-4-77 53964

OCS OIL AND GAS OPERATIONS

Interior/GS adopts emergency suspension procedures.... 53956
Interior/BLM clarifies manner in which term of a lease runs when lease is subject to suspension..... 53963

LIVESTOCK

USDA/AMS issues regulations for the grading and standardization programs; effective 10-1-77..... 53902

URBAN MASS TRANSPORTATION SYSTEMS

DOT/UMTA publishes FY 1978 apportionment of capital and operating assistance funds (Part V of this issue)..... 54126

HEALTH CAREER OPPORTUNITY PROGRAMS

HEW/HRA announces grant orientation conferences; various locations, 10-17 through 10-28-77..... 54012

GOVERNMENT-OWNED INVENTIONS

DOD/AF adopts policies and conditions for licensing of rights in domestic patents; effective 7-22-77..... 53958

CONTINUED INSIDE

AGENCY PUBLICATION ON ASSIGNED DAYS OF THE WEEK

The six-month trial period ended August 6. The program is being continued on a voluntary basis (see OFR notice, 41 FR 32914, August 6, 1976). The following agencies have agreed to remain in the program:

Monday	Tuesday	Wednesday	Thursday	Friday
NRC	USDA/ASCS		NRC	USDA/ASCS
DOT/COAST GUARD	USDA/APHIS		DOT/COAST GUARD	USDA/APHIS
DOT/NHTSA	USDA/FNS		DOT/NHTSA	USDA/FNS
DOT/FAA	USDA/REA		DOT/FAA	USDA/REA
DOT/OHMO	CSC		DOT/OHMO	CSC
DOT/OPSO	LABOR		DOT/OPSO	LABOR
	HEW/ADAMHA			HEW/ADAMHA
	HEW/CDC			HEW/CDC
	HEW/FDA			HEW/FDA
	HEW/HRA			HEW/HRA
	HEW/HSA			HEW/HSA
	HEW/NIH			HEW/NIH
	HEW/PHS			HEW/PHS

Documents normally scheduled on a day that will be a Federal holiday will be published the next work day following the holiday.

Comments on this program are still invited. Comments should be submitted to the Day-of-the-Week Program Coordinator, Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408.

ATTENTION: For questions, corrections, or requests for information please see the list of telephone numbers appearing on opposite page.

federal register

Area Code 202 Phone 523-5240

Published daily, Monday through Friday (no publication on Saturdays, Sundays, or on official Federal holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C., Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for \$5.00 per month or \$50 per year, payable in advance. The charge for individual copies is 75 cents for each issue, or 75 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

INFORMATION AND ASSISTANCE

Title 3—The President

PROCLAMATION 4529

American Education Week, 1977

By the President of the United States of America

A Proclamation

At the base of any democracy must lie a commitment to education for all.

Americans, accordingly, have an enormous stake in the vitality of our schools.

Parents, instead of being strangers to the classrooms in which their children spend so much of their lives, must become partners with teachers.

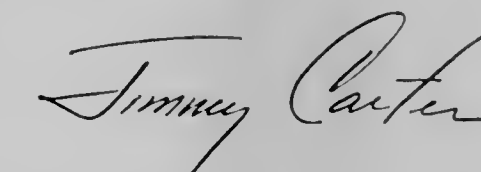

But parents and teachers cannot do the job alone. In our attitudes and our actions, in a hundred different ways, each of us influences young people toward education or away from it. This is the significance of this year's theme for American Education Week: "Working Together for Education".

By sharing our expertise and interests with the schools, we can all enrich educational programs and help determine the course along which our young people will lead America in the years to come.

NOW, THEREFORE, I, JIMMY CARTER, President of the United States of America, do hereby designate the week beginning November 13, 1977, as American Education Week.

I ask every American to consider how he or she can work with our Nation's educational community to help America prepare its youngsters to meet the responsibilities they will some day assume.

IN WITNESS WHEREOF, I have hereunto set my hand this thirtieth day of September, in the year of our Lord nineteen hundred seventy-seven, and of the Independence of the United States of America the two hundred and second.

PROCLAMATION 4530

National Forest Products Week, 1977

By the President of the United States of America

A Proclamation

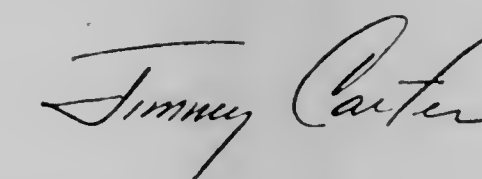

From the time the first explorers and settlers set foot on this land, the abundant products of America's forests have been regarded as a major resource. Today they still provide a significant portion of our materials for construction, furniture and other important industries and create millions of jobs.

Unlike many of our precious natural resources, our forest products can be replenished. The need to make optimum use of these important resources must be balanced with vital environmental concerns, so that we make the best possible use of our forest lands, preserving the irreplaceable, conserving the beauty and ecological balance while providing important raw materials for our Nation's economic well-being. Small, private non-industrial interests own 59 per cent of our commercial forest land. We encourage them to make wise use of this land. As a Nation we must all work together to prevent and control pollution, fires, insects and diseases that damage our forests, while striving to maintain and improve fish and wildlife habitats.

In recognition of the importance of America's forest resources and in the contributions of the forest products industry to our Nation's growth, the Congress has, by joint resolution of September 13, 1960 (74 Stat. 898), designated the week beginning the third Sunday of October in each year as National Forest Products Week and has requested the President to issue an annual proclamation calling for its observance.

NOW, THEREFORE, I, JIMMY CARTER, President of the United States of America, do hereby call upon the people of the United States to observe the week beginning October 16, 1977, as National Forest Products Week, with activities and ceremonies designed to direct public attention to, and demonstrate our gratitude for, the forest resources with which we are blessed.

IN WITNESS WHEREOF, I have hereunto set my hand this thirtieth day of September, in the year of our Lord nineteen hundred seventy-seven, and of the Independence of the United States of America the two hundred and second.

PROCLAMATION 4531

Country Music Month, 1977

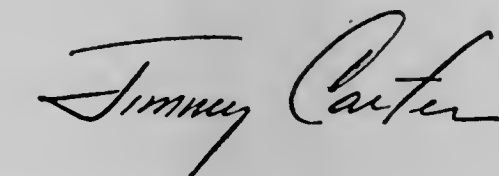

By the President of the United States of America

A Proclamation

Country music, once the simple expression of America's isolated hill country and farms, has spread to our most sophisticated cities. It has always told of the basic human emotions and experiences—of childhood heroes and lost places, forgotten dreams and everyday goodness and disappointments as well as great sadness, love and loneliness, honor and humor. It vibrates with the passions and scenes that make up our common heritage. Country music is as universal as a sunset and as personal as a baby's smile. It is fitting that we acknowledge the importance of a form that reflects so much the lives and hopes of the people who make up our Nation and pay tribute to the talented people who have contributed to its growing popularity.

NOW, THEREFORE, I, JIMMY CARTER, President of the United States of America, ask the people of this Nation to mark the month of October 1977, with suitable observances as Country Music Month.

IN WITNESS WHEREOF, I have hereunto set my hand this thirtieth day of September, in the year of our Lord nineteen hundred seventy-seven, and of the Independence of the United States of America the two hundred and second.

[FR Doc.77-29277 Filed 9-30-77;5:04 pm]

EDITORIAL NOTE: The President's message to the Country Music Association in Nashville, Tenn., on Country Music Month, dated Sept. 28, 1977, is printed in the Weekly Compilation of Presidential Documents (vol. 13, no. 40).

Executive Order 12011

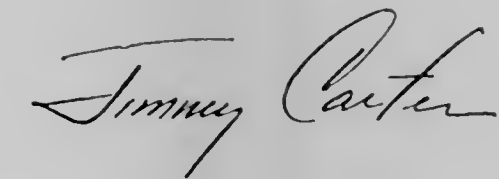

September 30, 1977

Exemption of G. Joseph Minetti from Mandatory Retirement

G. Joseph Minetti, Member, Civil Aeronautics Board, became subject to mandatory retirement for age on July 31, 1977, under the provisions of Section 8335 of Title 5 of the United States Code unless exempted by Executive Order. Mr. Minetti was exempted from mandatory retirement until September 30, 1977, by Executive Order No. 12006 of July 29, 1977.

In my judgment, the public interest requires that G. Joseph Minetti continue to be exempted from such mandatory retirement.

NOW, THEREFORE, by virtue of the authority vested in me by subsection (c) of Section 8335 of Title 5 of the United States Code, I hereby exempt G. Joseph Minetti from mandatory retirement until October 31, 1977.

THE WHITE HOUSE,
September 30, 1977.

(a) Office of the Secretary. . . .
(49) One Secretary (Steno) to the Secretary.

(i) National Highway Traffic Safety Administration. . . .

(6) One Policy Advisor to the Administrator.

(5 U.S.C. 3301, 3302; E.O. 10577, 3 CFR 1954-1958 Comp., p. 218)

UNITED STATES CIVIL SERVICE COMMISSION,
JAMES C. SPRY,
Executive Assistant
to the Commissioners.

[FR Doc 77-28047 Filed 10-3-77; 8:45 am]

[6325-01]

PART 213—EXCEPTED SERVICE

Entire Executive Civil Service

AGENCY: Civil Service Commission.

ACTION: Final Rule.

SUMMARY: This amendment reflects the Conservation Corps name change and the CETA title change applicable to this exception and caused by the enactment of Pub. L. 95-93. The amendment further provides expansion of the period of employment under this authority in order to meet the staffing needs during the period in which examination for the positions is impracticable.

EFFECTIVE DATE: October 4, 1977.

FOR FURTHER INFORMATION CONTACT:

William Bohling, 202-632-4533.

Accordingly, 5 CFR 213.3102(hh) is amended as set out below:

§ 213.3102 Entire Executive Civil Service.

(hh) Positions as needed not in excess of GS-13, whose incumbents will implement the Young Adult Conservation Corps program and are to be paid out of funds allocated under title VIII of the Comprehensive Employment and Training Act of 1973, as amended. Employment under this exception is not to exceed 36 months from the date that funds are received by heads of Executive agencies for this program under title VIII of CETA. No new appointments may be made under this authority after 18 months from the above referenced date.

RULES AND REGULATIONS

[3410-02]

Title 7—Agriculture

CHAPTER I—AGRICULTURAL MARKETING SERVICE (STANDARDS, INSPECTIONS, MARKETING PRACTICES), DEPARTMENT OF AGRICULTURE

SUBCHAPTER C—REGULATIONS AND STANDARDS UNDER THE AGRICULTURAL MARKETING ACT OF 1946

PART 53—LIVESTOCK (GRADING, CERTIFICATION, AND STANDARDS)

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: The purpose of this rule is to revise 7 CFR Part 53 Subpart A, and to delete the grade standards for meats in 7 CFR Part 53 Subpart B. On April 18, 1977, a notice was published in the FEDERAL REGISTER (42 FR 20165) transferring the responsibilities relating to meat grading and standardization from the Agricultural Marketing Service to the Food Safety and Quality Service and to the separation of livestock grading and standardization from meat grading and standardization, the activities were carried out under the same regulations. The revision of Part 53 is necessary so that the livestock grading and standardization programs will continue to have regulations and standards under which to operate.

EFFECTIVE DATE: October 1, 1977.

FOR FURTHER INFORMATION CONTACT:

Paul M. Fuller, U.S. Department of Agriculture, Washington, D.C. 20250 (202-447-6231).

SUPPLEMENTARY INFORMATION: Since former Part 53 Subpart A is applicable to both agencies, former Subpart A will be adopted with editorial changes by Food Safety and Quality Service. Prior will appear in Chapter 7 Part 2853. Part 53, Subpart B will be separated, with the standards relating to livestock being retained in Part 53 Subpart B and the standards relating to meats being adopted by Food Safety and Quality Service and appearing in Part 2853.

This document is a revision of the former Part 53 which deletes meat grading regulations and standards for meat and references to meat grading and products. This document and the document prepared by Food Safety and Quality Service, which appears elsewhere in this issue of the FEDERAL REGISTER and which incorporates the regulations and standards removed from the former Part

53 into the new Part 2853 are being published simultaneously. It has been determined that this document does not substantially affect any member of the public. Under the administrative procedure provisions in 5 U.S.C. 553, it is found to be impracticable, unnecessary, and contrary to public interest to delay the effectiveness of this rule until 30 days after publication in the FEDERAL REGISTER in that (1) no substantive rule or change of rule is involved and (2) revisions are editorial changes only.

Accordingly, the title of 7 CFR Part 53 is hereby revised by deleting the words "meats, prepared meats, and meat products" so that the title of Part 53 reads "Livestock (grading, certification and standards)." Section 53.1 is revised to remove references to meat grading products. Sections 53.18 through 53.28 will be deleted and §§ 53.29 through 53.32 will be renumbered 53.18 through 53.21. Minor editorial revisions of the sections in Part 53 Subpart A will delete references to meat grading and standardization and add references to livestock and standardization. In Subpart B of Part 53 §§ 53.100 through 53.119 and §§ 53.140 through 53.145 will be deleted.

Therefore the title of Part 53 is revised to read as set forth above and the text of Part 53 is revised to read as follows:

(Agricultural Marketing Act of 1946, Sections 203, 205, 60 Stat. 1090, 7 U.S.C. 1622, 1624.)

Done at Washington, D.C., on this 27th day of September 1977.

IRVING W. THOMAS,
Acting Deputy Administrator,
Program Operations.

Subpart A—Regulations DEFINITIONS

Sec.
53.1 Meaning of words.
53.2 Designation of official certificates, memoranda, marks, other identifications, and devices for purposes of the Agricultural Marketing Act.

ADMINISTRATION

53.3 Authority.

53.204 Specifications for official United States standards for grades of slaughter steers, heifers, and cows (quality).
53.205 Specifications for official U.S. standards for grades of slaughter bullocks (quality).
53.206 Specifications for official United States standards for grades of slaughter cattle (yields).
53.208 Feeder cattle grades.
53.209 Specifications for official United States standards for grades of feeder cattle (steers, heifers, and cows).

Subpart A—Regulations

DEFINITIONS

§ 53.1 Meaning of words.

Words used in this subpart in the singular form shall be deemed to import the plural, and vice versa, as the case may demand. For the purpose of such regulations, unless the context otherwise requires, the following terms shall be construed, respectively, to mean:

Acceptance service. The service established and conducted under the regulations for the determination and certification or other identification of the compliance of livestock with specifications.

Act. The Agricultural Marketing Act of 1946 (Title II of the act of Congress

approved August 14, 1946, 60 Stat. 1087, as amended by Pub. Law 272, 84th Congr., 69 Stat. 553, 7 U.S.C. 1621-1627).

Administrator. The Administrator of the Agricultural Marketing Service, or any officer or employee of the Agricultural Marketing Service to whom authority has heretofore been delegated, or to whom authority may hereafter be delegated, to act in his stead.

Agricultural Marketing Service. The Agricultural Marketing Service of the Department.

Applicant. Any person who has applied for service under the regulations.

Branch. The Livestock Market News Branch of the Division.

Chief. The Chief of the Branch, or any officer or employee of the Branch to whom authority has heretofore been delegated, or to whom authority may hereafter be delegated, to act in his stead.

Class. A subdivision of livestock based on essential physical characteristics that differentiate between major groups of the same kind of species.

Compliance. Conformity of livestock to the specifications under which the livestock was purchased or sold, with particular reference to the weight, quality or other characteristics of livestock.

Cooperative agreement. A cooperative agreement between the Agricultural Marketing Service and another Federal agency or a State agency, or other agency, organization or person as specified in the Agricultural Marketing Act of 1946, as amended, for conducting the service.

Department. The United States Department of Agriculture.

Director. The Director of the Division or any officer or employee of the Division to whom authority has heretofore been delegated, or to whom authority may hereafter be delegated, to act in his stead.

Division. Livestock, Poultry, Grain and Seed Division.

Financially interested person. Any person having a financial interest in the livestock involved, including but not limited to the shipper, receiver, producer, seller, buyer, or carrier of the livestock or products.

Grade. (1) As a noun, this term means an important commercial subdivision of livestock based on certain definite and preference determining factors, such as, but not limited to, conformation, finish, and muscling in livestock.

(2) As a verb, this term means to determine the class, grade, or other quality of livestock according to applicable standards for such livestock in Subpart B of this part.

Grading service. The service established and conducted under the regulations for the determination and certification or other identification of the class, grade, or other quality of livestock under standards.

Legal holiday. Those days designated as legal public holidays in title 5, United States Code, section 6103(a).

Livestock. Cattle, sheep, swine, or goats.

Official grader. An employee of the Department or other person authorized by the Department to determine and certify or otherwise identify the class, grade, other quality, or compliance of livestock under the regulations.

Person. Any individual, partnership, corporation, or other legal entity, or Government agency.

Regulations. The regulations in this subpart.

Service. Grading service or acceptance service.

Specifications. Description with respect to the class, grade, other quality, quantity or condition of livestock approved by the Administrator, and available for use by the industry regardless of the origin of the descriptions.

Standards. The standards of the Department contained in Subpart B of this part.

Supervisor. An official person designated by the Director or Chief to supervise and maintain uniformity and accuracy of service under the regulations.

§ 53.2 Designation of official certificates, memoranda, marks, other identifications for purposes of the Agricultural Marketing Act.

Subsection 203(h) of the Agricultural Marketing Act of 1946, as amended by Public Law 272, 84th Congress, provides criminal penalties for various specified offenses relating to official certificates, memoranda, marks or other identifications, and devices for making such marks or identifications, issued or authorized under section 203 of said act, and certain misrepresentations concerning the inspection or grading of agricultural products under said section. For the purposes of said subsection and the provisions in this part, the terms listed below shall have the respective meanings specified:

(a) "Official certificate" means any form of certification, either written or printed, including that prescribed in § 53.16, used under the regulations to certify with respect to the inspection, class, grade, quality, size, quantity, or condition of livestock with applicable specifications.

(b) "Official memorandum" means any initial record of findings made by an authorized person in the process of grading, determining compliance, or inspecting, pursuant to the regulations, any processing or plant-operation report made by an authorized person in connection with grading, determining compliance, inspecting, or sampling under the regulations, and any report made by an authorized person of services performed pursuant to the regulations.

(c) "Official mark" or "other official identification" means any form of mark or other identification, used under the regulations in marking livestock thereof, to show inspection, class, grade, quality, size, quantity, or condition of the livestock (including the compliance of livestock with applicable specifications), or to maintain the identity of livestock for which service is provided under the regulations.

ADMINISTRATION

§ 53.3 Authority.

The Director is charged with the administration of the regulations and the Act insofar as they relate to livestock.

SERVICE

§ 53.4 Kind of service.

Grading service under the regulations shall consist of the determination and certification and other identification, upon request by the applicant, of the class, grade, or other quality of livestock under applicable standards in Subpart B of this part. Class, grade and other quality may be determined under said standards for livestock. Acceptance service under the regulations shall consist of the determination of the conformity of livestock to specifications approved by the Director or Chief and the certification and other identification of such livestock in accordance with specifications, upon request by the applicant.

§ 53.5 Availability of service.

Service under these regulations may be made available with respect to livestock shipped or received in interstate commerce, and with respect to the livestock not so shipped or received if the Director or Chief determines that the furnishing of service for such livestock would facilitate the marketing, distribution, processing, or utilization of agricultural products through commercial channels. Also, such service may be made available under a cooperative agreement. Service under these regulations shall be provided without discrimination as to race, color, sex, creed, or national origin.

§ 53.8 How to obtain service.

(a) *Application.* Any person may apply to the Director or Chief for service under the regulations with respect to livestock in which the applicant is financially interested. The application shall be made on a form approved by the Director.

(b) *Notice of eligibility for service.* The applicant for service will be notified whether his application is approved.

(c) *Request by applicant for service—*
(1) *Noncommitment.* Upon notification of the approval of an application for service, the applicant may, from time to time as desired, make oral or written requests for service under the regulations with respect to specific livestock for which the service is to be furnished under such application. Such requests shall be made at a market news office either directly or through any employee of the Agricultural Marketing Service who may be designated for such purposes.

§ 53.9 Order of furnishing service.

Service under the regulations shall be furnished to applicants in the order in which requests therefor are received, insofar as consistent with good management, efficiency and economy. Precedence will be given, when necessary, to requests made by any government agency or any regular user of the service.

§ 53.10 When request for service deemed made.

A request for service under the regulations shall be deemed to be made when received by a market news office. Records showing the date and time of the request shall be made and kept in such office.

§ 53.11 Withdrawal of application or request for service.

An application or a request for service under the regulations may be withdrawn by the applicant at any time before the application is approved or prior to performance of service, upon payment, in accordance with §§ 53.18 and 53.19 of any expenses already incurred by the Agricultural Marketing Service in connection therewith.

§ 53.12 Authority of agent.

Proof of the authority of any person making an application or a request for service under the regulations on behalf of any other person may be required at the discretion of the Director or Chief or the official in charge of the market news office or other employee receiving the application or request under § 53.8.

§ 53.13 Denial or withdrawal of service.

(a) *For misconduct—*(1) *Bases for denial or withdrawal.* An application or a request for service may be rejected, or the benefits of the service may be otherwise denied to, or withdrawn from, any person who, or whose employee or agent in the scope of his employment or agency, (i) has wilfully made any misrepresentation or has committed any other fraudulent or deceptive practice in connection with any application or request for service under the regulations; (ii) has given or attempted to give, as a loan or for any other purpose, any money, favor, or other thing of value, to any employee of the Department authorized to perform any function under the regulations; (iii) has interfered with or obstructed, or attempted to interfere with or to obstruct, any employee of the Department in the performance of his duties under the regulations by intimidation, threats, assaults, abuse, or any other improper means; (iv) has knowingly falsely made, issued, altered, forged, or counterfeited any official certificate, memorandum, mark, or other identification; (v) has knowingly uttered, published, or used as true any such falsely made, issued, altered, forged, or counterfeited certificate, memorandum, mark, identification, or device; (vi) has knowingly obtained or retained possession of any such falsely made, issued, altered, forged, or counterfeited certificate, memorandum, mark, identification, or device, or of any livestock bearing any such falsely made, issued, altered, forged, or counterfeited mark or identification, or (vii) has in any manner not specified in this paragraph violated subsection 203(h) of the Act: *Provided,* That paragraph (a) (1) (vi) of this section shall not be deemed to be violated if the person in possession of any item mentioned therein notifies the Director or Chief without delay that he has possession of such item and, surrenders it to the Director or Chief or destroys it or brings it into compliance with the regulations by obliterating or removing the violative features under supervision of the Director or Chief: *And provided, further,* That paragraph (a) (1) (ii) through (vi) of this section shall not be deemed to be violated by any act committed by any person prior to the making of an application for service under the regulations by the principal person. An application or a request for service may be rejected, or the benefits of the service may be otherwise denied to, or withdrawn from, any person who, or whose employee or agent in the scope of his employment or agency, has committed any of the offenses specified in paragraph (a) (1) (i) through (vii) of this section after such application was made. Moreover, an application or a request for service made in the name of a person otherwise eligible for service under the regulations may be rejected, or the benefits of the service may be otherwise denied to, or withdrawn from, such a person (a) in case the service is or would be performed at an establishment operated (1) by a corporation, partnership, or other person from whom the benefits of the service are currently being withheld under this paragraph, or (2) by a corporation, partnership, or other person having an officer, director, partner, or substantial investor from whom the benefits of the service are currently being withheld and who has any authority with respect to the establishment where service is or would be performed, or (b) in case the service is or would be performed with respect to any livestock in which any corporation, partnership, or other person within paragraph (a) (1) (vii) (a) (1) of this section has a contract or other financial interest.

(2) *Procedure.* All cases arising under this paragraph shall be conducted in accordance with the rules of practice governing withdrawal of inspection and grading service under the Agricultural Marketing Act of 1946 as contained in Part 50 of this chapter.

(b) *For miscellaneous reasons.* An application or a request for service may be rejected, or the benefits of the service may be otherwise denied to, or withdrawn from, any person, without a hearing, by the official in charge of the appropriate market news office with the concurrence of the Director or Chief (1) for administrative reasons such as the nonavailability of personnel to perform the service; (2) for the failure to pay for service; (3) for other non-compliance with the conditions on which service is available as provided in the regulations, except matters covered by paragraph (a) of this section; or (4) in case the person is a partnership, corporation, or other person from whom the benefits of the service are currently being withheld under paragraph (a) of this section. Notice of such denial or withdrawal, and the reasons therefor, shall promptly be given to the person involved.

rector or Chief without delay that he has possession of such item and, surrenders it to the Director or Chief or destroys it or brings it into compliance with the regulations by obliterating or removing the violative features under supervision of the Director or Chief: *And provided, further,* That paragraph (a) (1) (ii) through (vi) of this section shall not be deemed to be violated by any act committed by any person prior to the making of an application for service under the regulations by the principal person. An application or a request for service may be rejected, or the benefits of the service may be otherwise denied to, or withdrawn from, any person who, or whose employee or agent in the scope of his employment or agency, has committed any of the offenses specified in paragraph (a) (1) (i) through (vii) of this section after such application was made. Moreover, an application or a request for service made in the name of a person otherwise eligible for service under the regulations may be rejected, or the benefits of the service may be otherwise denied to, or withdrawn from, such a person (a) in case the service is or would be performed at an establishment operated (1) by a corporation, partnership, or other person from whom the benefits of the service are currently being withheld under this paragraph, or (2) by a corporation, partnership, or other person having an officer, director, partner, or substantial investor from whom the benefits of the service are currently being withheld and who has any authority with respect to the establishment where service is or would be performed, or (b) in case the service is or would be performed with respect to any livestock in which any corporation, partnership, or other person within paragraph (a) (1) (vii) (a) (1) of this section has a contract or other financial interest.

(2) *Procedure.* All cases arising under this paragraph shall be conducted in accordance with the rules of practice governing withdrawal of inspection and grading service under the Agricultural Marketing Act of 1946 as contained in Part 50 of this chapter.

(b) *For miscellaneous reasons.* An application or a request for service may be rejected, or the benefits of the service may be otherwise denied to, or withdrawn from, any person, without a hearing, by the official in charge of the appropriate market news office with the concurrence of the Director or Chief (1) for administrative reasons such as the nonavailability of personnel to perform the service; (2) for the failure to pay for service; (3) for other non-compliance with the conditions on which service is available as provided in the regulations, except matters covered by paragraph (a) of this section; or (4) in case the person is a partnership, corporation, or other person from whom the benefits of the service are currently being withheld under paragraph (a) of this section. Notice of such denial or withdrawal, and the reasons therefor, shall promptly be given to the person involved.

CHARGES FOR SERVICE

§ 53.18 Fees and other charges for service.

Fees and other charges equal as nearly as may be to the cost of the services rendered shall be assessed and collected from applicants in accordance with the following provisions unless otherwise provided in the cooperative agreement under which the services are furnished, or as provided in § 53.8.

(a) *Fees based on hourly rates.* Except as otherwise provided in this section, fees for service shall be based on the time required to render the service, calculated to the nearest 15-minute period, including the time required for the preparation of certificates and travel of the official grader in connection with the performance of the service. A minimum charge for one-half hour shall be made for service pursuant to each request notwithstanding that the time required to perform the service may be less than 30 minutes. The base hourly rate shall be \$19.00 per hour for work performed between the hours of 6 a.m. and 6 p.m. Monday through Friday, except on legal holidays; \$23.00 per hour for work performed before 6 a.m. or after 6 p.m. Monday through Friday, and anytime Saturday or Sunday except on legal holidays; and \$38.00 per hour for all work performed on legal holidays.

(b) *Travel charges.* (1) When service is requested at a place so distant from an official grader's headquarters, or place of prior assignment on a circuit routing, that a total of one-half hour or more is required for the grader to travel to such place and back to the headquarters or to the next place of assignment on a circuitous routing, the charge for such service shall include a mileage charge administratively determined by the Chief, and travel tolls if applicable, for such travel prorated against all the applicants furnished the service involved on an equitable basis, or, where the travel is made by public transportation (including hired vehicle), a fee equal to the actual cost thereof. However, the applicant will not be charged a new mileage rate without notification before the service is rendered.

(c) *Per diem charges.* When service is requested at a place away from the official grader's headquarters, the fee for such service shall include a per diem charge if the employee performing the service is paid per diem in accordance with existing travel regulations. Per diem charges to applicants will cover the same period of time for which the grader receives per diem reimbursement. The per diem rate will be administratively determined by the Chief. However, the applicant will not be charged a new per diem rate without notification before the service is rendered.

(d) *Fees for extra copies of certificates.* In addition to copies of certificates furnished under § 53.16, any financially interested person may obtain not to exceed three copies of any such certificate within one year from its date of issuance upon payment of a fee of \$1.00, and not to exceed three copies of

any such certificate at any time thereafter, while a copy of such certificate is on file in the Department, upon payment of a fee of \$5.00.

(e) *Other charges.* When costs, other than costs specified in paragraphs (a), (b), (c) and (d) of this section, are involved in providing the services, the applicant will be charged for these costs. The amount of these charges will be determined administratively by the Chief. However, the applicant will not be charged for such cost without notification before the service is rendered of the charge for such item of expense.

§ 53.19 Payment of fees and other charges.

Fees and other charges for service shall be paid in accordance with the following provisions unless otherwise provided in the cooperative agreement under which the service is furnished. Upon receipt of billing for fees and other charges for service the applicant shall remit by check, draft, or money order, made payable to the Agricultural Marketing Service, U.S.D.A., payment for the service in accordance with directions on the billing, and such fees and charges shall be paid in advance if required by the official grader or other authorized official.

MISCELLANEOUS

§ 53.20 Identification.

All official graders and supervisors shall have their Agricultural Marketing Service identification cards in their possession at all times while they are performing any function under the regulations and shall identify themselves by such cards upon request.

§ 53.21 Errors in service.

When an official grader, supervisor, or other responsible employee of the Branch has evidence of misgrading, or of incorrect certification or other incorrect determination or identification as to the class, grade, other quality, or compliance of livestock he shall report the matter to his immediate supervisor. The supervisor will investigate the matter and, if he deems advisable, will report it to the owner or his agent. The supervisor shall take appropriate action to correct errors found in the determination or identification of class, grade or other quality or compliance of livestock if the livestock is still owned by the person who owned them when, and are still located at the establishment where, the incorrect service was rendered and if such service was rendered by a grader under the jurisdiction of such supervisor, and the supervisor shall take adequate measures to prevent the recurrence of such errors.

Subpart B

Standards

VEALERS AND SLAUGHTER CALVES

§ 53.120 Differentiation between vealers and calves.

Young bovine animals are segregated for market purposes as vealers or calves and this differentiation is intended to reflect the kind of carcass (veal or calf)

they will produce. The differentiation between veal and calf carcasses is based very largely on the color of their lean and this is determined almost entirely by the extent to which the animal's diet has consisted of milk or a milk replacer. Therefore, the differentiation between vealers and calves is based primarily on evidences of type of feeding and age. Vealers that have subsisted largely on milk usually are less than 3 months of age. However, animals that have been raised on milk replacer rations frequently will be considerably more mature. In no case, though, may such an animal be considered a vealer if its evidences of maturity indicate that it is too mature to be classed as calf. Since vealers have consumed little, if any, roughages, they have the characteristic trimness of middle associated with limited paunch development. Calves are usually between 3 and 8 months of age, have subsisted partially or entirely on feeds other than milk or milk replacers for a substantial period of time, and have developed the heavier middles and other physical characteristics associated with maturity beyond the vealer stage.

§ 53.121 Classes of vealers and calves.

There are three classes of vealers and calves, based on sex condition—steers, heifers, and bulls. While recognition may sometimes be given to these different classes on the market, especially bull calves approaching beef in maturity, the market desirability of all three classes is sufficiently similar to permit them to be graded on the same standards.

§ 53.122 Application of standards.

(a) The grade of a vealer or slaughter calf is determined by a composite evaluation of two general considerations which influence carcass excellence, (1) conformation and (2) fatness, maturity, and other factors responsible for differences in quality of the lean flesh.

(b) Conformation refers to the general body proportions of the animal and to the ratio of meat to bone. Although primarily determined by the inherent muscular and skeletal systems, it is also influenced by the degree of fatness. Excellent conformation in vealers and slaughter calves is denoted by a wide-topped, straight-lined, thick-fleshed individual that is deep and full in the twist.

(c) In grading vealers and slaughter calves, quality of the lean flesh must necessarily be evaluated indirectly from consideration, primarily, of the quantity, distribution, and type of fat or finish. Limited consideration is also given to such factors as the refinement of hair, hide, and bone and the smoothness and symmetry of the body. Finish is evaluated by noting variations in fullness in the brisket, flanks, and cod or udder and the apparent thickness of the fat covering over the back, loin, ribs, and legs.

(d) Since relatively few vealers or calves have an identical development of conformation and quality, it is obvious

that each grade will include animals having various combinations of these two characteristics. Examples of how conformation and quality are combined into the final quality grade are included in each of the grade descriptions. However, the principles governing the compensation of variations in development of quality and conformation are as follows: In each of the grades superior quality is permitted to compensate for deficient conformation, without limit. The reverse type of compensation—superior conformation for inferior quality—is not permitted in the Prime and Choice grades. To qualify for one of these grades, a slaughter animal must have the minimum requirements specified for quality regardless of how much the conformation may exceed the minimum specified. In all other grades, such compensation is permitted but only to the extent of one-third of a grade of deficient quality. For both types of compensation, the rate of compensation is equal—a given degree of superior quality compensates for the same degree of deficient conformation and vice versa.

(e) Other factors—such as heredity and management—also may affect the development of grade-determining characteristics in vealers and calves. Although these factors do not lend themselves to descriptions in the standards, the use of factual information of this nature is justified in determining the grade of vealers and slaughter calves.

(f) Vealers or calves qualifying for any particular grade may vary with respect to the relative development of the individual grade factors. In fact, some will qualify for a particular grade although they have some characteristics more nearly typical of animals of another grade. Because it is impractical to describe the nearly infinite number of such recognizable combinations of characteristics, the standards describe only vealers and calves which have a relatively similar development of individual conformation and quality factors and which are also representative of the lower limits of each grade.

§ 53.123 Specifications for official United States standards for grades of vealers.

(a) *Prime.* (1) Vealers possessing minimum qualifications for the Prime grade tend to be moderately thick muscled throughout. They are moderately wide over the back and loin, and shoulders and hips are usually moderately neat and smoothly laid in, with only a slight tendency toward prominence. The loin, rump, and rounds appear almost flat, with little evidence of fullness. Prime grade vealers tend to have a very thin fat covering over the back, loin, and upper ribs. The brisket, rear flanks, and cod or udder are slightly full. Prime grade vealers usually present a moderately refined appearance.

(2) To qualify for the Prime grade, vealers must possess the minimum evidences of quality specified regardless of

the extent to which their conformation may exceed the minimum requirements for Prime. However, quality superior to that specified as the minimum for the Prime grade may compensate, without limit, for conformation inferior to that specified as the minimum for Prime at the rate indicated in the following example: Vealers which have quality equivalent to the midpoint of the Prime grade may have conformation equivalent to the midpoint of the Choice grade and remain eligible for Prime.

(b) *Choice.* (1) Vealers possessing minimum qualifications for Choice tend to be slightly thick muscled throughout. They are slightly wide over the back and loin, the shoulders and hips are slightly prominent, and the neck is slightly long and thin. The loin, rump, and rounds have a very slightly sunken or hollowed-out appearance. The fat covering is very limited and is discernible only over portions of the back and loin. The brisket, rear flanks, and cod or udder have small fat deposits but have no apparent fullness. Choice grade vealers are usually moderately smooth and slightly refined in appearance.

(2) To qualify for the Choice grade, vealers must possess the minimum evidences of quality specified regardless of the extent to which their conformation may exceed the minimum requirements for Choice. However, quality which is superior to that specified as the minimum for the Choice grade may compensate, without limit, for conformation which is inferior to that specified as the minimum for Choice at the rate indicated in the following example: Vealers which have quality equivalent to the midpoint of the Choice grade may have conformation equivalent to the midpoint of the Good grade and remain eligible for Choice.

(c) *Good.* (1) Vealers possessing minimum requirements for the Good grade tend to be thinly muscled throughout. They are narrow over the back, loin, and rump and shallow in the twist. They have a distinctly sunken or hollowed-out appearance over the back, loin, and rounds. Hips and shoulders appear moderately prominent. There is practically no fat covering on any part of the animal's body. Such vealers may show the heavy bones, thick hide, prominent hips and shoulders associated with coarseness, or they may show the small bones, tight hide, and angularity denoting overrefinement.

(2) Quality superior to that specified as the minimum for the Good grade may compensate, without limit, for conformation inferior to that specified as the minimum for Good at the rate indicated in the following example: Vealers with quality equivalent to the midpoint of the Good grade may have conformation equivalent to the midpoint of the Standard grade and remain eligible for Good. Also, vealers with conformation at least one-third of a grade superior to that specified as minimum for the Good grade may have quality equal to the lower limit of the upper third of the Standard grade and remain eligible for Good.

(d) *Standard.* (1) Vealers possessing minimum requirements for the Standard grade tend to be very thinly muscled throughout and tend to be very narrow over the back, loin, and rump and very shallow in the twist. Hips and shoulders are very prominent, and the crops, back, loin, rump, and rounds present a very sunken or hollowed-out appearance. They show no evidence of any fat covering. Standard vealers tend to be of low quality. The bones and joints are usually disproportionately large and the hide is either thick or tight and inelastic.

(2) Quality superior to that specified as minimum for the Standard grade may compensate, without limit, for conformation inferior to that specified as minimum for the Standard grade at the rate indicated in the following example: Vealers with quality equivalent to the midpoint of the Standard grade may have conformation equivalent to the midpoint of the Utility grade and remain eligible for Standard. Also, vealers with conformation at least one-third of a grade superior to that specified as minimum for the Standard grade may have quality equal to the lower limit of the upper third of the Utility grade and remain eligible for Standard.

(e) *Utility.* The Utility grade includes vealers whose characteristics are inferior to those specified as minimum for the Standard grade.

§ 53.124 Specifications for official United States standards for grades of slaughter calves.

(a) *Prime.* (1) Calves possessing minimum qualifications for the Prime grade tend to be moderately thick muscled throughout. They are moderately wide over the back and loin, and shoulders and hips are usually moderately neat and smoothly laid in. There is a slight fullness or plumpness over the crops, loin, rump, and rounds which contributes to a rather well-rounded appearance. Prime grade calves tend to have a slightly thick fat covering over the back, loin, rump, and upper ribs. The brisket, rear flanks, and cod or udder are moderately full. Prime grade calves usually present a moderately refined appearance.

(2) To qualify for the Prime grade, slaughter calves must possess the minimum evidences of quality specified regardless of the extent to which their conformation may exceed the minimum requirements for Prime. However, quality superior to that specified as the minimum for the Prime grade may compensate, without limit, for conformation inferior to that specified as the minimum for Prime at the rate indicated in the following example: Slaughter calves which have quality equivalent to the midpoint of the Prime grade may have conformation equivalent to the midpoint of the Choice grade and remain eligible for Prime.

(b) *Choice.* (1) Calves possessing minimum qualifications for the Choice grade tend to be slightly thick muscled throughout. They are slightly wide over the back and loin. The neck is slightly long and thin. The loin, rump, and

rounds are almost flat and have little or no evidence of fullness. The shoulders and hips are moderately neat and smoothly laid in but may appear slightly prominent. There is a thin fat covering over the back, loin, and upper ribs. The brisket, rear flanks, and cod or udder tend to be slightly full. Choice grade calves are usually moderately smooth and slightly refined in appearance.

(2) To qualify for the Choice grade, slaughter calves must possess the minimum evidences of quality specified regardless of the extent to which their conformation may exceed the minimum requirements for Choice. However, quality which is superior to that specified as the minimum for the Choice grade may compensate, without limit, for conformation which is inferior to that specified as the minimum for Choice at the rate indicated in the following example: Slaughter calves which have quality equivalent to the midpoint of the Choice grade may have conformation equivalent to the midpoint of the Good grade and remain eligible for Choice.

(c) *Good.* (1) Calves possessing minimum requirements for the Good grade tend to be thinly muscled throughout. They are narrow over the back, loin, and rump and shallow in the twist and have a slightly sunken or hollowed-out appearance over the back, loin, and rounds. Hips and shoulders appear somewhat prominent. There is a very thin fat covering that is discernible only over the back and loin. Such calves may show the heavy bones, thick hide, prominent hips and shoulders associated with coarseness; or they may show the small bones, tight hide, and angularity denoting overrefinement.

(2) Quality superior to that specified as the minimum for the Good grade may compensate, without limit, for conformation inferior to that specified as the minimum for Good at the rate indicated in the following example: Calves with quality equivalent to the midpoint of the Good grade may have conformation equivalent to the midpoint of the Standard grade and remain eligible for Good. Also, calves with conformation at least one-third of a grade superior to that specified as minimum for the Good grade may have quality equal to the lower limit of the upper third of the Standard grade and remain eligible for Good.

(d) *Standard.* (1) Calves possessing minimum requirements for the Standard grade tend to be very thinly muscled throughout and are very narrow over the back, loin, and rump, and very shallow in the twist. Hips and shoulders are very prominent and the crops, back, loin, rump, and rounds present a very sunken or hollowed-out appearance. There is practically no fat on any part of the animal's body. The bones and joints are usually disproportionately large, and the hide is either thick or tight and inelastic.

(2) Quality superior to that specified as minimum for the Standard grade may compensate, without limit, for conformation inferior to that specified as mini-

mum for the Standard grade at the rate indicated in the following example: Calves with quality equivalent to the midpoint of the Standard grade may have conformation equivalent to the midpoint of the Utility grade and remain eligible for Standard. Also, calves with conformation at least one-third of a grade superior to that specified as minimum for the Standard grade may have quality equal to the lower limit of the upper third of the Utility grade and remain eligible for Standard.

(e) *Utility.* The Utility grade includes slaughter calves whose characteristics are inferior to those specified as minimum for the Standard grade.

SLAUGHTER LAMBS, YEARLINGS, AND SHEEP § 53.130 Market sheep.

The official standards for market sheep, developed by the United States Department of Agriculture, provide for segregation according to (a) use as slaughter animals or feeders; (b) class or sex conditions; (c) age group; and (d) grade, which is determined by the apparent relative excellence and desirability of the individual animal for a particular use.

§ 53.131 Slaughter classes and market groups.

The classes of slaughter sheep are ram, ewe, and wether; the age groups are lambs, yearlings, and sheep. Definitions of the respective classes and age groups are as follows:

(a) *Ram.* A ram is an uncastrated male ovine.

(b) *Ewe.* A ewe is a female ovine.

(c) *Wether.* A male ovine castrated when young and prior to developing the secondary physical characteristics of a ram.

(d) *Lamb.* A lamb is an immature ovine, usually under 14 months of age, that has not cut its first pair of permanent incisor teeth.

(e) *Yearling.* A yearling is an ovine usually between one and two years of age, that has cut its first pair of permanent incisor teeth but has not cut the second pair.

(f) *Sheep.* A sheep is an ovine, usually over 24 months of age, that has cut its second pair of permanent incisor teeth.

§ 53.132 Application of standards.

(a) *Grade factors.* Grades of slaughter ovines are intended to be directly related to the grades of the carcasses they produce. To accomplish this, these slaughter ovine grade standards are based on factors which are directly related to the quality grades and the yield grades of ovine carcasses. The standards are written so that the quality and yield grade standards are contained in separate sections. The quality grade standards are divided into two sections applicable to slaughter lambs and slaughter yearlings and sheep. There are five quality grades—Prime, Choice, Good, Utility,

Cull—applicable to slaughter lambs, yearlings, and sheep, except that sheep are not eligible for Prime. Also, there are five yield grades applicable to all classes of slaughter ovines, denoted by numbers 1 through 5, with Yield Grade 1 representing the highest degree of cutability.

(b) *General principles.* (1) The determination of the carcass grade that the slaughter animal will produce requires the exercise of well-regulated judgment. Each animal presents a different combination of the grade-determining factors. Animals frequently have characteristics associated with two or more grades. Therefore, a composite evaluation of all inherent physical characteristics is essential for accuracy in determining grade.

(2) The accurate determination of the grade of a slaughter lamb or sheep requires handling in addition to visual observation. The length and density of the fleece varies greatly with individuals and the thickness and firmness of the flesh covering of woolled lambs and sheep can only be roughly estimated without handling. The technique used in handling usually varies with the degree of precision in mind as well as the experience of the grader. Experienced graders may find one quick handling satisfactory. This usually consists of placing one open hand over the back and ribs in simultaneous motion. The thumb extends just over the backbone, while the fingers, which are held close together, cover the rib section and pressure is applied very lightly with a slight lateral and forward and backward motion. The generally accepted technique of handling sheep where time permits, and especially when noting slight differences between individuals, is to handle forward from the dock to neck with the open hand, fingers together, laid flat and with a slight lateral motion. Both hands may then be used, one on each side, in a similar manner to determine the fleshing over the shoulders, ribs, and hips. Regardless of the method, considerable experience is necessary in handling lambs or sheep to accurately determine the grade.

(c) *Quality grades.* (1) The quality grade of a slaughter lamb or sheep is determined by a composite evaluation of two general considerations which influence carcass excellence: Conformation and quality—fatness, maturity, and other indicators of differences in palatability of the lean flesh.

(2) Conformation refers to the general body proportions of the animal and to the ratio of meat to bone. Although primarily determined by the inherent muscular and skeletal systems, it is also influenced by the degree of fatness. Excellent conformation in slaughter lambs and sheep is denoted by a compact, wide-topped, thick-fleshed individual that has a large plump leg. Fullness and thickness should be especially evident in the portions of the body producing the more desirable cuts of meat—loin, hotel rack, and leg.

(3) In grading slaughter lamb and sheep, quality of the lean flesh must necessarily be evaluated indirectly from consideration primarily of the quantity, distribution, and type of fat or finish in relation to the maturity of the animal being graded. Limited consideration is also given to such factors as character of bone and smoothness and symmetry of body. Finish is evaluated by noting variations in the fullness and apparent thickness of the fat covering over the back, loin, ribs, and legs. A high degree of desirable finish is evidenced by a firm, smooth layer of fat which is uniformly distributed over the body.

(4) Although the market designation of slaughter lambs and sheep is usually made by classes, the quality standards are intended to apply to all classes without regard to sex condition. However, male animals which have thick heavy necks and shoulders typical of uncastrated males are discounted in grade in proportion to the extent to which these characteristics are developed. Such discounts may vary from less than half a grade in young lambs in which such characteristics are barely noticeable to as much as two full grades in mature rams in which such characteristics are very pronounced.

(d) *Yield grades.* (1) The yield grades for slaughter lambs, yearlings, and sheep are based on the same factors used in the official yield grade standards for ovine carcasses. These factors are as follows:

(i) *Thickness of fat over ribeye.* As the amount of external fat increases, the percent of retail cuts decreases and the numerical yield grade increases. Assuming no change in the other factors, each 0.15 inch change in adjusted fat thickness over the ribeye changes the yield grade by a full grade.

(ii) *Percent of kidney and pelvic fat.* As the amount of these fats increases, the percent of retail cuts decreases. A change of 4 percent of the carcass weight in kidney and pelvic fat changes the yield grade by a full grade.

(iii) *Leg conformation grade.* An increase in the conformation grade of the legs increases the percent of retail cuts. A change of two full grades in conformation of the legs changes the yield grade by approximately one-third of a yield grade.

(2) When evaluating slaughter ovines for yield grade, each of these factors can be estimated and the yield grade determined therefrom by using the equation contained in the official standards for yield grades of lamb, yearling mutton, and mutton carcasses. However, a more practical method of appraising slaughter ovines for yield grade is to use only two factors normally considered in evaluating live ovines—leg conformation and degree of fatness. In this approach, the degree of fatness largely accounts for the effects of thickness of fat over the ribeye and the percent of kidney and pelvic fat.

(3) The overall fatness of an animal can be determined best by giving particular attention to those parts on which fat is deposited at a faster-than-average rate. These include the back, loin, rump, flank, brisket, cod or udder. As ovines increase in fatness, these parts become progressively fuller, thicker, and more distended in relation to the thickness and fullness of the other parts, particularly the legs. However, since an animal's thickness of muscling also affects the development of its various parts, this also needs to be considered when evaluating the degree of fatness. In thinly muscled ovines with a low degree of finish, the width of the back usually will be greater than the width through the center of the legs. Conversely, in thickly muscled ovines with a low degree of finish, the thickness through the legs will be greater than through the back and the back will be full and rounded. At an intermediate degree of fatness, ovines which are thinly muscled will be considerably wider through the back than through the leg and will be nearly flat across the back. Thickly muscled ovines that have an intermediate degree of fatness will be about the same width through the legs as through the back and the back will appear only slightly rounded. Very fat ovines will be wider through the back than through the legs, but this difference will be greater in thinly muscled ovines than in those that are thickly muscled. As ovines increase in fatness, they also become deeper bodied because of large deposits of fat in the flanks and brisket and along the underline. In determining yield grade, variations in fatness are very much more important than variations in conformation of the leg.

(e) *Other considerations.* (1) Other factors such as sex, heredity, and management also may affect the development of grade-determining characteristics in slaughter ovines. Although these factors do not lend themselves to descriptions in the standards, the use of factual information of this nature is justified in determining the grade of slaughter ovines. The ability to make proper allowances for the effects of genetic and management factors on the appearance of grade-determining characteristics must be developed through experience.

(2) Slaughter ovines qualifying for any particular grade may vary with respect to the relative development of their individual grade factors. In fact, some will qualify for a particular grade although they have some characteristics more typical of ovines of another grade. Because it is impractical to describe the nearly infinite number of such recognizable combinations of characteristics, the standards describe only ovines which have a relatively similar development of the various quality and yield grade-determining factors and which are near the lower limits of quality or yield for the grade. However, examples of the extent to which superiority in quality-indicating characteristics may compensate for defi-

ciencies in conformation, and vice versa, are indicated for each quality grade. In the quality grade standards, the requirements are given for two maturity groups. In the yield grade standards ovines with two levels of muscling are described and specific examples in terms of carcass characteristics also are included.

§ 53.133 Specifications for official U.S. standards for grades of slaughter lambs (quality).¹

(a) *Prime.* (1) Lambs possessing the minimum requirements for the Prime grade are moderately lowset and blocky and thick-fleshed. They are moderately wide over the back, loin, and rump. Shoulders and hips are usually moderately smooth. The twist is moderately deep and full and the legs are moderately large and plump. They generally present a well-rounded appearance due to a slight fullness or plumpness over the crops, loin, and rump. Relatively young lambs, under seven months of age, tend to have a moderately thin fat covering over the back, ribs, loin, and rump. In handling, the backbone and ribs are readily discernible. Older, more mature lambs have a slightly thin fat covering over the back, ribs, loin, and rump. In handling, the backbone and ribs are slightly discernible. Prime lambs exhibit evidences of rather high quality. The bones tend to be proportionately small, the joints tend to be smooth, and the body tends to be trim, smooth, and symmetrical.

(2) To qualify for the Prime grade, a lamb must possess the minimum qualifications for finish regardless of the extent that its conformation may exceed the minimum requirements for Prime. However, a development of finish which is superior to that specified as minimum for the Prime grade may compensate, on an equal basis, for a development of conformation which is inferior to that specified for Prime as indicated in the following example: A lamb which has evidences of finish equivalent to the midpoint of the Prime grade may have conformation equivalent to the mid-point of the Choice grade and remain eligible for Prime. However, in no instance may a lamb be graded Prime which has a development of conformation inferior to that specified as minimum for the Choice grade.

(b) *Choice.* (1) Lambs possessing the minimum requirements for the Choice grade tend to be slightly lowset and blocky and thick-fleshed. They tend to be slightly wide over the back, loin, and rump. The shoulders and hips are usually slightly smooth but may exhibit a slight tendency toward prominence. The twist tends to be slightly deep and full, and the legs tend to be slightly thick and plump. Relatively young lambs, under seven months of age, have a thin fat covering over the back, ribs, loin, and rump. In handling, the backbone and ribs are moderately prominent. Older, more mature lambs have a moderately thin fat covering over the back, ribs, loin,

¹ 34 F.R. 243, Jan. 8, 1969.

and rump. In handling, the backbone and ribs are slightly prominent. Choice lambs usually present a moderately refined appearance.

(2) A lamb which has conformation equivalent to at least the mid-point of the Choice grade may have a development of finish equivalent to the minimum for the upper one-third of the Good grade and remain eligible for Choice. Also, a development of finish which is superior to that specified as minimum for the Choice grade may compensate on an equal basis, for a development of conformation which is inferior to that specified for Choice as indicated in the following example: A lamb which has a development of finish equivalent to the mid-point of the Choice grade may have conformation equivalent to the mid-point of the Good grade and remain eligible for Choice. However, in no instance may a lamb be graded Choice which has a development of conformation inferior to that specified as minimum for the Good grade.

(c) *Good.* (1) Lambs possessing the minimum requirements for the Good grade are moderately rangy and upstanding and thin-fleshed. They are slightly narrow over the back, loin, and rump. Hips and shoulders are moderately prominent. The twist is slightly shallow and the legs are slightly small and thin. Relatively young lambs, under seven months of age, have slightly more than a very thin, uneven fat covering over the back, loin, and upper ribs. In handling, the shoulders, backbone, hips, and ribs are prominent. Older, more mature lambs have slightly more than a thin fat covering over the back, ribs, and loin. In handling, the bones of the shoulders, backbone, hips, and ribs are rather prominent. Lambs of this grade may present evidences of slightly low quality. The bones and joints are usually moderately large, and the body is somewhat lacking in symmetry and smoothness.

(2) A lamb which has conformation equivalent to at least the midpoint of the Good grade may have a development of finish equivalent to the minimum for the upper one-third of the Utility grade and remain eligible for Good. Also, a development of finish which is superior to that specified as minimum for the Good grade may compensate for a development of conformation which is inferior to that specified for Good on the basis of one-half grade of superior finish for one-third grade of deficient conformation as indicated in the following example: A lamb which has a development of finish equivalent to the midpoint of the Good grade may have conformation equivalent to the minimum for the upper one-third of the Utility grade and remain eligible for Good. However, in no instance may a lamb be graded Good which has a development of conformation inferior to that specified as minimum for the Utility grade.

(d) *Utility.* (1) Lambs meeting the minimum requirements for the Utility grade are very rangy and angular. They are very thin-fleshed, very narrow over

the back, loin, and rump, and very shallow in the twist. The hips are very prominent and the shoulders are usually open, rough, and prominent. The legs are very small and thin, and present a slightly concave appearance. Regardless of age, Utility lambs show no visible evidence of fat covering. In handling, bones of the shoulders, backbone, hips, and ribs are very prominent. Utility grade lambs are of rather low quality. The bones and joints are proportionately large and the body is very rough and unsymmetrical.

(2) A lamb which has conformation equivalent to at least the midpoint of the Utility grade may have a development of finish equivalent to the minimum for the upper one-third of the Cull grade and remain eligible for Utility. Also, a development of finish which is superior to that specified as minimum for the Utility grade may compensate for a development of conformation which is inferior to that specified for Utility on the basis of one-half grade of superior finish for one-third grade of deficient conformation as indicated in the following example: A lamb which has a development of finish equivalent to the midpoint of the Utility grade may have conformation equivalent to the minimum for the upper one-third of the Cull grade and remain eligible for Utility.

(e) *Cull.* (1) Typical Cull grade lambs are extremely rangy, angular, and thin-fleshed and extremely narrow and shallow bodied. Shoulders and hips are very prominent. The legs are extremely small and thin and present a very concave appearance. In handling, the bones of the shoulders, backbone, hips, and ribs are extremely prominent and the entire bony framework is very evident. The general appearance is that of low quality. The relative proportion of meat to bone is quite low, joints appear large, and the body is very unsymmetrical.

§ 53.134 Specifications for official U.S. standards for grades of slaughter yearlings and sheep (quality).¹

(a) *Prime.* (1) Slaughter sheep older than yearlings are not eligible for the Prime grade.

(2) Yearling sheep possessing the minimum requirements for the Prime grade are moderately lowset and blocky and thick-fleshed. They are moderately wide over the back, loin, and rump. Shoulders and hips are usually moderately smooth. The twist is moderately deep and full, and the legs are moderately large and plump. There is a rather distinct fullness or plumpness evident over the crops, loins, and rump which contributes to a well-rounded appearance. There is a slightly thick fat covering over the back, ribs, loin, and rump. In handling, the backbone and ribs are hardly discernible. Prime slaughter yearling sheep exhibit evidences of rather high quality. The bones tend to be proportionately small, the joints tend to be smooth, and the body tends to be trim, smooth, and symmetrical.

¹ 34 F.R. 243, Jan. 8, 1969.

(3) To qualify for the Prime grade, a yearling must possess the minimum qualifications for finish regardless of the extent that its conformation may exceed the minimum requirements for Prime. However, a development of finish which is superior to that specified as minimum for the Prime grade may compensate, on an equal basis, for a development of conformation which is inferior to that specified for Prime as indicated in the following example: A yearling which has a development of finish equivalent to the mid-point of the Prime grade may have conformation equivalent to the mid-point of the Choice grade and remain eligible for Prime. However, in no instance may a yearling be graded Prime which has a development of conformation inferior to that specified as minimum for the Choice grade.

(4) Yearlings which are otherwise eligible for the Prime grade but which have excessive external fat are not eligible for Prime.

(b) *Choice.* (1) Slaughter sheep possessing the minimum requirements for the Choice grade tend to be slightly low-set and blocky and thick-fleshed. They tend to be slightly wide over the back, loin, and rump. The shoulders and hips are usually slightly smooth but may show a slight tendency toward prominence. The twist tends to be slightly deep and full and the legs tend to be slightly thick and plump. Yearling sheep have a slightly thin fat covering over the back, ribs, loin, and rump. In handling, the backbone and ribs are readily discernible. Mature sheep have a slightly thick fat covering over the back, ribs, loin, and rump. In handling, the backbone and ribs are slightly discernible. Choice slaughter sheep usually present a moderately refined appearance.

(2) A sheep which has conformation equivalent to at least the midpoint of the Choice grade may have a development of finish equivalent to the minimum for the upper one-third of the Good grade and remain eligible for Choice. Also, a development of finish which is superior to that specified as minimum for the Choice grade may compensate, on an equal basis, for a development of conformation which is inferior to that specified for Choice as indicated in the following example: A sheep which has a development of finish equivalent to the mid-point of the Choice grade may have conformation equivalent to the mid-point of the Good grade and remain eligible for Choice. However, in no instance may a sheep be graded Choice which has a development of conformation inferior to that specified as minimum for the Good grade.

(3) Yearlings which are otherwise eligible for the Prime grade but which have excessive external fat are included in the Choice grade. Sheep which are otherwise eligible for the Choice grade but which have excessive external fat are not eligible for Choice.

(c) *Good.* (1) Slaughter sheep possessing the minimum requirements for

the Good grade are slightly rangy and upstanding and thin-fleshed. They are slightly narrow over the back, loin, and rump. Hips and shoulders are moderately prominent. The twist is slightly shallow and the legs slightly small and thin. Yearling sheep have slightly more than a moderately thin fat covering over the back, loin, and upper ribs. In handling, the shoulders, backbone, hips, and ribs are rather prominent. Mature sheep have a slightly thin fat covering over the back, ribs, and loin. In handling, the bones of the shoulders, backbone, hips, and ribs are slightly prominent. Sheep of this grade may present evidences of slightly low quality. The body is somewhat lacking in symmetry and smoothness.

(2) A sheep which has conformation equivalent to at least the mid-point of the Good grade may have a development of finish equivalent to the minimum for the upper one-third of the Utility grade and remain eligible for Good. Also, a development of finish which is superior to that specified as minimum for the Good grade may compensate for a development of conformation which is inferior to that specified for Good on the basis of one-half grade of superior finish for one-third grade of deficient conformation as indicated in the following example: A sheep which has evidences of finish equivalent to the mid-point of the Good grade may have conformation equivalent to the minimum for the upper one-third of the Utility grade and remain eligible for Good. However, in no instance may a sheep be graded Good which has a development of conformation inferior to that specified as minimum for the Utility grade.

(d) *Utility.* (1) Slaughter sheep meeting the minimum requirements for the Utility grade are very rangy and angular. They are very thin-fleshed, very narrow over the back, loin, and rump, and very shallow in the twist. The hips are very prominent and the shoulders are usually open, rough, and prominent. The legs are very small and thin and present a slightly concave appearance. Regardless of age, Utility grade slaughter sheep show no visible evidences of fat covering. In handling, the bones of the shoulders, backbone, hips, and ribs are so thinly covered that they are very prominent. Utility grade slaughter sheep are of rather low quality. The bones and joints are proportionately large and the body is very rough and unsymmetrical.

(2) A sheep which has conformation equivalent to at least the mid-point of the Utility grade may have a development of finish equivalent to the minimum for the upper one-third of the Cull grade and remain eligible for Utility. Also, a development of finish which is superior to that specified as minimum for the Utility grade may compensate for a development of conformation which is inferior to that specified for Utility on the basis of one-half grade of superior finish for one-third grade of deficient conformation as indicated in the following example: A sheep which has a devel-

opment of finish equivalent to the mid-point of the Utility grade may have conformation equivalent to the minimum for the upper one-third of the Cull grade and remain eligible for Utility.

(e) *Cull.* (1) Typical Cull grade sheep are extremely rangy, angular, and thin-fleshed and extremely narrow and shallow bodied. Shoulders and hips are very prominent. The legs are extremely small and thin and present a very concave appearance. In handling, the bones of the shoulders, backbone, hips, and ribs are extremely prominent and the entire bony framework is very evident. The general appearance is that of low quality. The relative proportion of meat to bone is quite low, joints appear large, and the body is very unsymmetrical.

§ 53.135 Specifications for official U.S. standards for grades of slaughter lambs, yearlings, and sheep (yield).

(a) *Yield Grade 1.* (1) Yield Grade 1 slaughter lambs, yearlings, and sheep produce carcasses which have very high yields of boneless retail cuts. Ovines with characteristics qualifying them for the lower limits of Yield Grade 1 (near the borderline between Yield Grade 1 and Yield Grade 2) will differ considerably because of inherent differences in the development of their muscling and skeletal systems and related differences in fatness.

(2) Very thickly muscled ovines typical of the minimum of this grade have a high proportion of lean to bone. They are moderately wide and usually the width through the shoulders and legs is greater than through the back. The top is well-rounded with no evidence of flatness and the back and loin are moderately full and plump. The legs are moderately large and plump and the width through the middle part of the legs is greater than through the back. The shoulders and hips are slightly prominent. These ovines have only a thin covering of external fat over the back and loin and a slightly thick covering of fat over the rump and down over the ribs. They are shallow through the flanks and the brisket and cod or udder have little evidence of fullness. In handling, the backbone, ribs, and ends of bones at the loin edge are moderately prominent. A carcass produced from slaughter ovines of this description might have 0.1 inch of fat over the ribeye and a low Prime leg conformation grade.

(b) *Yield Grade 2.* (1) Yield Grade 2 slaughter lambs, yearlings, and sheep produce carcasses with high yields of boneless retail cuts. Ovines with characteristics qualifying them for the lower limits of Yield Grade 2 (near the borderline between Yield Grade 2 and Yield Grade 3) will differ considerably because of inherent differences in the development of their muscling and skeletal systems and related differences in fatness.

(2) Very thickly muscled ovines typical of the minimum of this grade have a high proportion of lean to bone. They are wide through the back and loin and have slightly greater width through the shoulders and legs than through the back. The top is well-rounded with little evidence of flatness and the back and

loin are full and plump. The legs are large and plump and the width through the middle part of the legs is slightly greater than through the back. The shoulders and hips are slightly smooth. These ovines have a slightly thin layer of external fat over the back and loin and a thick covering of fat over the rump and down over the ribs. They are slightly shallow through the flanks and the brisket and cod or udder are slightly full. In handling, the backbone, ribs, and ends of bones at the loin edge are readily discernible. A carcass produced from slaughter ovines of this description might have 0.2 inch of fat over the ribeye and an average Prime Leg conformation grade.

(3) Thinly muscled ovines typical of the minimum of this grade have a relatively low proportion of lean to bone. They tend to be slightly narrow over the back, loin, and rump. The legs tend to be slightly small and thin and the width over the back is slightly greater than through the legs. The shoulders and hips tend to be moderately prominent. These ovines have a thin covering of external fat over the back and loin and a moderately thick covering of fat over the rump and down over the ribs. They tend to be slightly shallow through the flanks. The brisket and cod or udder have little evidence of fullness. In handling, the backbone, ribs, and ends of the bones at the loin edge are moderately prominent. A carcass produced from slaughter ovines of this description might have 0.15 inch of fat over the ribeye and high Good leg conformation grade.

(c) *Yield Grade 3.* (1) Yield Grade 3 slaughter lambs, yearlings, and sheep produce carcasses with intermediate yields of boneless retail cuts. Ovines with characteristics qualifying them for the lower limits of Yield Grade 3 (near the borderline between Yield Grade 3 and Yield Grade 4) will differ considerably because of inherent differences in the development of their muscling and skeletal systems and related differences in fatness.

(2) Very thickly muscled ovines typical of the minimum of this grade have a high proportion of lean to bone. They are very wide through the back and loin and are uniform in width from front to rear. The top is nearly flat with only a slight tendency toward roundness. The back and loin are very full and plump. The legs are very large and plump. The shoulders and hips are moderately smooth. These ovines have a slightly thick covering of fat over the back and loin and a very thick covering of fat over the rump and down over the ribs. The flanks are slightly deep and full and the brisket and cod or udder are moderately full. In handling, the backbone, ribs, and ends of bones at the loin edge are moderately discernible. A carcass produced from slaughter ovines of this description might have 0.3 inch of fat over the ribeye and a high Prime leg conformation grade.

(3) Thinly muscled ovines typical of the minimum of this grade have a relatively low proportion of lean to bone. They tend to be slightly wide over the

back, loin and rump. The legs tend to be slightly thick and plump. The width over the back is moderately greater than through the legs. The shoulders and hips are slightly prominent. These ovines have a slightly thin covering of external fat over the back and loin and a thick covering of fat over the rump and down over the ribs. The flanks tend to be slightly deep and full. The brisket and cod or udder are slightly full. In handling, the backbone, ribs, and ends of bones at the loin edge tend to be moderately discernible. A carcass produced from slaughter ovines of this description might have 0.25 inch of fat over the ribeye and a low Choice leg conformation grade.

(d) *Yield Grade 4.* (1) Yield Grade 4 slaughter lambs, yearlings, and sheep produce carcasses with moderately low yields of boneless retail cuts. Ovines with characteristics qualifying them for the lower limits of Yield Grade 4 (near the borderline between Yield Grade 4 and Yield Grade 5) will differ considerably because of inherent differences in the development of their muscling and skeletal systems and related differences in fatness.

(2) Very thickly muscled ovines typical of the minimum of this grade have a high proportion of lean to bone. They are extremely wide through the back and loin and are slightly wider over the top than through the shoulders and legs. The back and loin are extremely full and plump. The legs are extremely large and plump. The shoulders and hips are smooth. These ovines have a moderately thick covering of fat over the back and loin, and an extremely thick covering of fat over the rump and down over the ribs. The flanks are moderately deep and full and the brisket and cod or udder are full. In handling, the backbone, ribs, and ends of bones at the loin edge are slightly discernible. A carcass produced from slaughter ovines of this description might have 0.4 inch of fat over the ribeye and a high Prime leg conformation grade.

(3) Thinly muscled ovines typical of the minimum of this grade have a relatively low proportion of lean to bone. They tend to be moderately wide over the back, loin, and rump. The legs tend to be moderately thick and plump. They are wider over the back than through the legs. The shoulders and hips are slightly smooth. These ovines have a slightly thick covering of external fat over the back and loin and a very thick covering of fat over the rump and down over the ribs. The flanks are slightly deep and full. The brisket and cod or udder are moderately full. In handling, the backbone, ribs, and ends of bones at the loin edge tend to be slightly discernible. A carcass produced from slaughter ovines of this description might have 0.35 inch of fat over the ribeye and an average Choice leg conformation grade.

(e) *Yield Grade 5.* Yield Grade 5 slaughter lambs, yearlings, and sheep produce carcasses with low yields of boneless retail cuts. Ovines of this grade consist of those not meeting the minimum requirements of Yield Grade 4 be-

cause of either more fat or a lower leg conformation grade or a combination of these characteristics.

SWINE

§ 53.150 Swine.

The official standards for swine developed by the U.S. Department of Agriculture provide for segregation first according to intended use—slaughter or feeder—then as to class, as determined by sex condition, and then as to grade, which is determined by the apparent relative excellence and desirability of the animal for a particular use. Differentiation between slaughter and feeder swine is based solely on their intended use rather than on specific identifiable characteristics of the swine. Slaughter swine are those which are intended for slaughter immediately or in the near future. Feeder swine are those which are intended for slaughter after a period of feeding.

§ 53.151 Slaughter and feeder swine classes.

There are five classes of slaughter and feeder swine. Definitions of the respective classes are as follows:

(a) *Barrow.* A barrow is a male swine castrated when young and before development of the secondary physical characteristics of a boar.

(b) *Gilt.* A gilt is a young female swine that has not produced young and has not reached an advanced stage of pregnancy.

(c) *Sow.* A sow is a mature female swine that usually shows evidence of having reproduced or having reached an advanced stage of pregnancy.

(d) *Boar.* A boar is an uncastrated male swine.

(e) *Stag.* A stag is a male swine castrated after development or beginning of development of the secondary physical characteristics of a boar. Typical stags are somewhat coarse and lack balance—the head and shoulders are more fully developed than the hindquarter parts, bones and joints are large, the skin is thick and rough, and the hair is coarse.

§ 53.152 Application of standards for grades of slaughter barrows and gilts.

(a) Grades of slaughter barrows and gilts are intended to be directly related to the grades of the carcasses they produce. To accomplish this, the slaughter barrow and gilt grades are predicated on the same two general considerations that provide the basis for the grades of barrow and gilt carcasses: (1) Quality of the lean, and (2) expected combined carcass yields of the four lean cuts (ham, loin, picnic shoulder, and Boston butt).

(b) With respect to quality, two general levels are considered: One for barrows and gilts with characteristics which indicate that the carcasses lean will have acceptable quality and acceptable belly

thickness and one for barrows and gilts with characteristics which indicate that the carcass lean will have unacceptable quality and/or the belly will be of unacceptable thickness. Since carcass indices of lean quality are not directly evident in barrows and gilts, some other factors in which differences can be noted must be used to evaluate quality. Therefore, the amount and distribution of external finish, firmness of fat, and firmness of lean are used as quality-indicating factors.

(c) Barrows and gilts with characteristics which indicate that the carcass lean will have an unacceptable level of quality and/or the belly will be of unacceptable thickness are graded U.S. Utility. Also graded U.S. Utility—regardless of their development of other quality-indicating characteristics—are slaughter barrows and gilts with indications that their carcasses will be soft and oily.

(d) Four grades—U.S. No. 1, U.S. No. 2, U.S. No. 3, and U.S. No. 4—are provided for barrows and gilts with characteristics which indicate that the carcass lean will have an acceptable level of quality. These grades are based entirely on the expected combined carcass yields of the four lean cuts.

(e) Average backfat thickness in relation to carcass length or live weight is used as a guide to expected yields of the four lean cuts in these standards. In grading barrows and gilts, these factors normally are appraised visually; live weight is the only one that can be readily determined in the live animal. The average backfat thickness appraisal includes consideration of the distribution of fat on other parts of the animal in addition to those points on the back where it is measured on the carcass.

(f) Barrows and gilts will produce carcasses that vary in yields of four lean cuts because of variations in their degree of fatness (expressed as average thickness of backfat), and in their degree of muscling (thickness of muscling in relation to skeletal size). Since many slaughter swine have a normal development of muscling for their degree of fatness, in determining their grade the average thickness of backfat and carcass length or live weight are the only factors considered. These relationships are illustrated in Figure I for barrows and gilts weighing 170 to 350 pounds that will produce carcasses 27 to 36 inches long. For slaughter swine of other lengths or weights, average backfat thickness requirements for the various grades can be determined by an extension of the lines in this figure. The degree of muscling specified for each of the four grades decreases progressively from the U.S. No. 1 grade through the U.S. No. 4 grade. This reflects the fact that among barrows and gilts of the same weight, the fatter animals normally have a lesser degree of muscling. For purposes of these standards six degrees of muscling are

recognized: Very thick, thick, moderately thick, slightly thin, thin, and very thin. These degrees are intended to cover the entire range of muscling present among slaughter swine. The degrees specified as typical for barrows and gilts at the minimum of the U.S. No. 1, U.S. No. 2, U.S. No. 3, and U.S. No. 4 grades are, respectively: Thick, moderately thick, slightly thin, and thin. For animals having a development of muscling which is different from that normally associated with their degree of fatness, the average backfat thickness-carcass length or average backfat thickness-live weight relationships for the various grades are different from those shown in Figure I. Consideration is given such unusual de-

velopments of muscling as follows: In each grade, superior muscling is permitted to compensate for greater fatness of the rate of one full degree of superior muscling for a one-tenth inch increase in average backfat. Except for the U.S. No. 1 grade, the reverse type of compensation is also permitted and at the same rate; one-tenth inch less fat compensates for a full degree of inferior muscling. In the U.S. No. 1 grade, this type of compensation is limited to one full degree of inferior muscling; barrows and gilts which have less than moderately thick muscling but which otherwise qualify for the U.S. No. 1 grade are graded U.S. No. 2.

(g) In no case, however, may variations from normal muscling alter the final grade more than one full grade.

RELATIONSHIP BETWEEN AVERAGE THICKNESS OF BACKFAT, WEIGHT OR CARCASS LENGTH, AND GRADE FOR BARROWS AND GILTS WITH MUSCLING TYPICAL OF THEIR DEGREE OF FATNESS.

- 1/ An average of three measurements including the skin made opposite the first and last ribs and the last lumbar vertebra. It also reflects adjustment, as appropriate, to compensate for variations from normal fat distribution.
- 2/ Carcass length is measured from the anterior point of the sixth bone to the anterior edge of the first rib.

Figure I

(h) In evaluating barrows and gilts for fatness and muscling, variations in the degree of fatness have a greater effect on the yield of the lean cuts than do variations in muscling. The fatness and muscling evaluations can best be made simultaneously. This is accomplished by considering the development of the various parts based on an understanding of how the appearance of each part is affected by variations in muscling and fatness. While the muscling of most swine develops uniformly, fat is normally deposited at a considerably faster rate on some parts than on others. Therefore, muscling can be appraised best by giving primary consideration to the parts least affected by fatness, such as the ham. Differences in thickness and fullness of the ham—with appropriate adjustments for the effects of variations in fatness—are the best indicators of the overall degree of muscling in slaughter

barrows and gilts. Conversely, the overall fatness of barrows and gilts can be determined best by observing those parts on which fat is deposited at a faster-than-average rate. These include the edge of the loin, the rear flank, the shoulder, the jowls, and the belly. As swine increase in fatness, these parts appear progressively fuller, thicker, and more distended in relation to the thickness and fullness of the other parts, especially the thickness through the hams. In thinly muscled swine with a low degree of fatness, the width of the back usually will be greater than the width through the center of the hams. The back on either side of the backbone will appear sloping and flat. Conversely, in thickly muscled swine with a similar degree of fatness, the thickness through the hams will be greater than through the back and the back will appear full and well rounded. Very fat swine will be wider through the

back than through the hams, but this difference will be greater in thinly muscled swine than in those that are thickly muscled. Such swine with thin muscling also will have a distinct break from the back into the sides, while those with thick muscling will be nearly flat on top but will have a less distinct break into the sides. As slaughter swine increase in fatness, they also become deeper bodied because of deposits of fat in the flanks and along the underline. The bulge of the flanks, best observed when the animal walks, and the thickness and fullness of the jowls are other indications of fatness.

(i) Barrows and gilts qualifying for the U.S. No. 1, U.S. No. 2, U.S. No. 3, or U.S. No. 4 grades may vary with respect to the relative development of the individual grade factors. In fact, some will qualify for a particular grade although they have some characteristics more nearly typical of another grade. Because it is impractical to describe the nearly infinite number of such recognizable combinations of characteristics, the standards for each grade describe only barrows and gilts whose expected carcass yield of the four lean cuts is at the lower limit of each grade and which have a development of muscling that is normal for such swine.

(j) Other factors such as heredity and management also may affect the development of the grade-determining characteristics in slaughter swine. Although these factors do not lend themselves to description in the standards, the use of factual information of this nature is justifiable in determining the grade of barrows and gilts. The ability to make proper allowances for the effects of genetic and management factors on the appearance of grade-determining characteristics must be developed through experience.

[33 F.R. 9249, June 22, 1968]

§ 53.153 Specifications for official U.S. standards for grades of slaughter barrows and gilts.

(a) U.S. No. 1. Barrows and gilts in this grade will produce carcasses with acceptable lean quality and acceptable belly thickness and a high percentage of lean cuts. Swine near the borderline between the U.S. No. 1 and U.S. No. 2 grades are thickly muscled in the hams, loins, and shoulders. The width through the hams is nearly equal to the width through the shoulders and both are wider than the back. The back is slightly full, is well rounded, and blends smoothly into the sides. The sides are moderately long and smooth. The rear flank is slightly full and its depth is less than the depth of the fore flank. The jowls are firm and slightly thick and full. A development of muscling superior to that specified as minimum for the U.S. No. 1 grade may compensate for a development of fatness which is greater than that indicated in Figure I as maximum for the U.S. No. 1 grade at

the rate of one full degree of muscling for one-tenth of an inch greater thickness of backfat. For example, a barrow or gilt with very thick muscling may have one-tenth of an inch more backfat than that indicated in Figure I as maximum for this grade and remain eligible for the U.S. No. 1 grade. The reverse type of compensation is also permitted at the same rate—except that in no case may a barrow or gilt be graded U.S. No. 1 with less than moderately thick muscling.

(b) U.S. No. 2. Slaughter barrows and gilts in this grade will produce carcasses with acceptable lean quality, acceptable belly thickness, and a slightly high percentage of lean cuts. Swine near the borderline between the U.S. No. 2 and U.S. No. 3 grades are moderately thickly muscled in the hams, loins, and shoulders. The width through the shoulders is slightly more than the width through the hams. The back is moderately full and is slightly rounded but with a slight break into the sides. The sides are slightly short and smooth. The rear flank is moderately full and its depth is slightly less than the depth of the fore flank. The jowls are moderately thick and full. A development of muscling superior to that specified as minimum for the U.S. No. 2 grade may compensate for a development of fatness which is greater than that indicated in Figure I as maximum for the U.S. No. 2 grade at the rate of one full degree of muscling for one-tenth of an inch greater thickness of backfat. For example, a barrow or gilt with thick muscling may have one-tenth of an inch more backfat than that indicated in Figure I as maximum for this grade and remain eligible for the U.S. No. 2 grade. The reverse type of compensation is also permitted at the same rate. For example, a barrow or gilt with slightly thin muscling may have one-tenth of an inch less backfat than that indicated in Figure I as maximum for this grade and remain eligible for the U.S. No. 2 grade.

(c) U.S. No. 3. Slaughter barrows and gilts in this grade will produce carcasses with acceptable lean quality and acceptable belly thickness and a slightly low percentage of four lean cuts. Swine near the borderline between the U.S. No. 3 and U.S. No. 4 grades are slightly thinly muscled in the hams, loins, and shoulders. The width through the shoulders is definitely greater than the width through the hams. The back is full and nearly flat with a pronounced break into the sides. The sides are short and smooth. The rear flank is full and its depth is equal to the depth of the fore flank. The jowls are thick and full. A development of muscling superior to that specified as minimum for the U.S. No. 3 grade may compensate for a development of fatness which is greater than that indicated in Figure I as maximum for the U.S. No. 3 grade at the rate of one full degree of muscling for one-tenth of an inch greater thickness of backfat. For ex-

ample, a barrow or gilt with moderately thick muscling may have one-tenth of an inch more backfat than that indicated in Figure I as maximum for this grade and remain eligible for the U.S. No. 3 grade. The reverse type of compensation is also permitted at the same rate. For example, a barrow or gilt with thin muscling may have one-tenth of an inch less backfat than that indicated in Figure I as maximum for this grade and remain eligible for the U.S. No. 3 grade.

(d) U.S. No. 4. Barrows and gilts in this grade will produce carcasses with acceptable lean quality and acceptable belly thickness. However, they are fatter and less muscular and will have a lower carcass yield of the four lean cuts than those in the U.S. No. 3 grade.

(e) U.S. Utility. Barrows and gilts typical of this grade will have a thin covering of fat. The sides are wrinkled and the flanks are shallow and thin. Barrows and gilts in this grade will produce carcasses with unacceptable lean quality and/or unacceptable belly thickness.

§ 53.154 Application of standards for grades of slaughter sows.

(a) The standards for grades of slaughter sows are based on (1) differences in yields of lean cuts and of fat cuts and (2) differences in quality of cuts. These characteristics vary rather consistently from one grade to another. The U.S. No. 1 grade has about the minimum degree of finish necessary to produce pork carcasses with quality characteristics indicative of acceptable palatability in the cuts. The U.S. No. 2 grade is overfinished and the U.S. No. 3 grade is decidedly overfinished in relation to the minimum finish associated with acceptable palatability. Yields of lean cuts are lower and yields of fat cuts are higher, in proportion to the degree of overfinish, in these grades than in the U.S. No. 1 grade. Medium grade sows are underfinished and produce carcasses which are soft and have indications of insufficient quality for acceptably palatable cuts. Cull grade sows are decidedly underfinished and the pork is soft and watery with little or no marbling and low palatability.

(b) The grades for slaughter sows are closely related to the grades for sow carcasses, and the desired objective in grading sows is the accurate prediction of the carcass grade that will be produced. Degree of finish is an important factor in grading, and the expected average back fat thickness of carcasses produced by each grade of slaughter sows forms a part of the standards. The results of study of carcass measurement and cutting data show that carcasses equal in fat thickness are approximately equal in yields of cuts regardless of differences in weight. Therefore, the expected back fat thickness of carcasses from each grade of slaughter sows is the same at all weights. The following

table outlines the carcass fat thickness guides for each grade of slaughter sows.

Grade:	Average back fat thickness
U. S. No. 1	1.5 to 1.9 inches.
U. S. No. 2	1.9 to 2.3 inches.
U. S. No. 3	2.3 or more inches.
Medium	1.1 to 1.5 inches.
Cull	Less than 1.1 inches.

(c) The standards for grades also include descriptive specifications of the characteristics of slaughter sows with the minimum degree of finish for each grade. Application of the standards requires an accurate appraisal of these live animal characteristics indicative of carcass finish and grade. No attempt is made to describe in the standards the many combinations of characteristics which may qualify an animal for a particular grade, and sound judgment is required to appropriately analyze varying combinations.

(d) Slaughter sows that have produced several litters of pigs may show considerable roughness along the underline due to extensive development of mammary tissue. In addition, sows from which pigs were weaned only a short time prior to grading may show evidence that the mammary tissue is still active in milk production and not completely dry. Since smoothness and dryness of the underline have little effect on the basic grade determining factors, no provision is made in the standards for altering the grade of slaughter sows due to differences in these characteristics. It is recognized that the value determining factors to be considered in marketing sows include dryness and smoothness as well as such other factors as weight, degree of finish, quality, and fill. However, consideration of all such factors in determining grade would require a complicated system with a great number of grades in order to make each grade sufficiently restrictive to be practical and useful. Therefore, the grades outlined in these standards identify differences in slaughter sows with respect to yields of cuts and quality. They were designed as practical aids in evaluating slaughter sows when used in conjunction with other factors such as weight, fill, smoothness, and dryness.

§ 53.155 Specifications for official United States standards for grades of slaughter sows.

(a) **U. S. No. 1 grade.** U. S. No. 1 grade slaughter sows have an intermediate degree of finish near the minimum required to produce pork cuts of acceptable palatability. Sows with the minimum finish for U. S. No. 1 grade are moderately long and slightly wide in relation to weight. Width of body is rather uniform from top to bottom and from front to rear. The back, from side to side, is moderately full and thick with a well-rounded appearance and blends

smoothly into the sides. The sides are moderately long and slightly thick; the flanks are slightly thick and full. Depth at the rear flank may be slightly less than depth at the fore flank. Hams are usually moderately thick and full with a slightly thick covering of fat. Jowls are usually moderately thick and full but appear trim. Sows in this grade produce U. S. No. 1 grade carcasses.

(b) **U. S. No. 2 grade.** U. S. No. 2 grade slaughter sows have a moderately high degree of finish that is somewhat greater than the minimum required to produce pork cuts of acceptable palatability. Sows with the minimum finish for the U. S. No. 2 grade are slightly short and moderately wide in relation to weight. Width of body is often greater over the top than at the underline and tends to be slightly greater through the shoulders than through the hams. The back, from side to side, is full and thick and appears slightly flat with a noticeable break into the sides. The sides are slightly short and moderately thick; the flanks are moderately thick and full. Depth at the rear flank is nearly equal to depth at the fore flank. Hams are usually thick and full with a moderately thick covering of fat, especially over the lower part. Jowls are usually full and thick, and the neck appears rather short. Sows in this grade produce U. S. No. 2 grade carcasses.

(c) **U. S. No. 3 grade.** U. S. No. 3 grade slaughter sows have a high degree of finish that is considerably greater than the minimum required to produce pork cuts of acceptable palatability. Sows with the minimum finish for U. S. No. 3 grade are short and wide in relation to weight. Width of body is often somewhat greater over the top than at the underline and tends to be greater through the shoulders than through the hams. The back, from side to side, is very full and thick and appears nearly flat with a pronounced break into the sides. The sides are short and thick; the flanks are thick and full. Depth at the rear flank is equal to depth at the fore flank. Hams are usually very thick and full with a thick covering of fat especially over the lower part. Jowls are usually very full and thick, and the neck appears short. Sows of this grade produce U. S. No. 3 grade carcasses.

(d) **Medium grade.** Medium grade slaughter sows have a low degree of finish which is somewhat less than the minimum required to produce pork cuts of acceptable palatability. Sows with the minimum finish for Medium grade are long and moderately narrow in relation to weight. Width of body is often less over the top than at the underline and tends to be slightly less through the shoulders than through the hams. The back, from side to side, is moderately thin and appears rather peaked at the center with a distinct slope toward the sides. The hips are moderately prominent. The sides are long and moderately thin; the

flanks are thin. Depth at the rear flank is less than depth at the fore flank. Hams are usually moderately thin and flat and taper toward the shank. Jowls are usually slightly thin and flat, and the neck appears rather long. Sows in this grade produce Medium grade carcasses.

(e) **Cull grade.** Cull grade slaughter sows have a very low degree of finish which is considerably lower than that required to produce pork cuts of acceptable palatability. Sows with the finish typical of the Cull grade are long and narrow in relation to weight. Width of body is often somewhat less over the top than at the underline and tends to be less through the shoulders than through the hams. The back, from side to side, is thin and lacks fullness and is peaked at the center with a decided slope toward the sides. The hips are prominent. The sides are very long and thin; the flanks are very thin. Depth at the rear flank is considerably less than depth at the fore flank. Hams are usually thin and flat with a definite taper toward the shank. Jowls are usually thin and flat, and the neck appears long. Sows in this grade produce Cull grade carcasses.

§ 53.158 Application of standards for grades of feeder pigs.

(a) The grade of a feeder pig is determined by evaluating two general value-determining characteristics—its logical slaughter potential and its thriftiness.

(b) The logical slaughter potential of a thrifty feeder pig is its expected slaughter grade at a market weight of 220 pounds after a normal feeding period. In these feeder pig standards, logical slaughter potential is determined by a composite appraisal of the development of the muscular system and the skeletal system. Both of these factors have an important effect on the development of lean and fat as the animal grows and fattens, and therefore, on the expected slaughter and carcass grade.

(c) Thriftiness in a feeder pig is its apparent ability to gain weight rapidly and efficiently. Size for age, health, and other general indications of thriftiness are considered in appraising the thriftiness of feeder pigs.

(d) The standards provide for six grades of feeder pigs—U. S. No. 1, U. S. No. 2, U. S. No. 3, U. S. No. 4, U. S. Utility, and U. S. Cull. Except for the U. S. Cull grade, these names correspond to the five grade names for slaughter swine and pork carcasses. The U. S. No. 1, U. S. No. 2, U. S. No. 3, and U. S. No. 4 grades include all pigs which are thrifty. Differentiation between the U. S. No. 1, U. S. No. 2, U. S. No. 3, and U. S. No. 4 grades is based entirely on differences in logical slaughter potential. Feeder pigs in the U. S. No. 1 grade have sufficient muscling and frame to reach a market weight of 220 pounds with a minimum degree of finish. Feeder pigs in the U. S. No. 2, U. S. No. 3, and U. S. No. 4 grades usually have

progressively less muscling and less frame and are expected to have progressively more finish when marketed at 220 pounds. The U. S. Utility and U. S. Cull grades include only pigs which lack thriftiness. Differentiation between the U. S. Utility and U. S. Cull grades is based entirely on differences in thriftiness.

(e) Most feeder pigs are marketed when relatively young and before reaching a weight of 125 pounds. At this age, sex condition exerts little influence on the basic factors determining the feeder grade. Therefore, these standards are equally applicable for grading barrow, gilt, and boar pigs, although it is recognized that sex condition may influence the market price in some instances. It is assumed that boar pigs will be castrated prior to developing the secondary physical characteristics of a boar. Sows, stags, and mature boars are seldom used as feeder animals, and these standards do not apply to those classes.

(f) Only one combination of muscling and skeletal characteristics is described in the standards for the U. S. No. 1, U. S. No. 2, U. S. No. 3, and U. S. No. 4 grades. However, feeder pigs qualifying for the U. S. No. 1, U. S. No. 2, U. S. No. 3 or U. S. No. 4 grades may vary with respect to the relative development of the individual grade factors. In fact, some will qualify for a particular grade although they have some characteristics more nearly typical of another grade, except that feeder pigs in the U. S. No. 1 grade must have at least moderately thick muscling. Feeder pigs with other characteristics of the U. S. No. 1 grade, but with less than moderately thick muscling would be in the U. S. No. 2 grade. Since no attempt is made to describe the numerous combinations of characteristics that may qualify a feeder pig for a specific grade, making appropriate compensations for varying combinations of characteristics requires the use of sound judgment.

§ 53.159 Specifications for official United States standards for grades of feeder pigs.

(a) **U. S. No. 1.** Feeder pigs in this grade near the borderline of the U. S. No. 2 grade are long and have thick muscling throughout. Thickness of muscling is particularly evident in thick and full hams and shoulders. The hams and shoulders are thicker than the back, which is well rounded. They usually present a well-balanced appearance. In no case may a feeder pig be graded U. S. No. 1 with less than moderately thick muscling. Feeder pigs in this grade are expected to produce U. S. No. 1 grade carcasses when slaughtered at 220 pounds.

(b) **U. S. No. 2.** Feeder pigs in this grade near the borderline of the U. S. No. 3 grade are moderately long and have moderately thick muscling throughout. Thickness of muscling is particularly evident in moderately thick and full hams and shoulders. The back usually appears slightly full and well-rounded. They usually present a well-balanced appearance. This grade also includes feeder pigs which otherwise qualify for

the U. S. No. 1 grade but have less than moderately thick muscling. Feeder pigs in this grade are expected to produce U. S. No. 3 grade carcasses when slaughtered at 220 pounds.

(c) **U. S. No. 3.** Feeder pigs in this grade near the borderline of the U. S. No. 4 grade are slightly short and have slightly thin muscling throughout. The hams and shoulders are slightly thin and flat and the back usually appears moderately full and thick. Feeder pigs in this grade are expected to produce U. S. No. 3 grade carcasses when slaughtered at 220 pounds.

(d) **U. S. No. 4.** Feeder pigs typical of the U. S. No. 4 grade are short and have thin muscling throughout. The hams are thin and rather flat, particularly in the lower parts toward the shanks. The back usually appears slightly flat and the width at the topline usually is greater than at the underline. Feeder pigs in this grade are expected to produce U. S. No. 4 grade carcasses when slaughtered at 220 pounds.

(e) **U. S. Utility.** Feeder pigs typical of this grade are small for their age and appear unthrifty. They often have a rough, unkempt appearance indicating the effects of disease or poor care. The hams and shoulders usually are thin and flat and taper toward the shanks. The back is thin and lacks fullness. Pigs in this grade near the borderline of the U. S. No. 1, U. S. No. 2, U. S. No. 3, and U. S. No. 4 grades are slightly small for their age and appear slightly unthrifty. It is recognized that U. S. Utility grade feeder pigs will produce U. S. No. 1, U. S. No. 2, U. S. No. 3, or U. S. No. 4 grade carcasses when slaughtered at 220 pounds provided their unthrifty condition is corrected. U. S. Utility grade feeder pigs whose unthrifty condition is not corrected will produce U. S. Utility grade carcasses.

(f) **U. S. Cull.** Feeder pigs typical of this grade are very deficient in thriftiness because of poor care or disease. They can be expected to reach a normal market weight only after an extremely long and costly feeding period, if at all.

CATTLE

§ 53.201 Cattle.

The official standards for live cattle developed by the United States Department of Agriculture provide for segregation first according to use—slaughter and feeder—then as to class, which is determined by sex condition, and then as to grade, which is determined by the apparent relative excellence and desirability of the animal for its particular use. Differentiation between slaughter and feeder cattle is based solely on their intended use rather than on specific identifiable characteristics of the cattle. Slaughter cattle are those which are intended use rather than on specific in the very near future. Feeder cattle are those which are intended for slaughter after a period of feeding. However, under some economic conditions specific kinds of cattle may be considered as feeders whereas under other economic conditions they might be considered as slaughter cattle.

§ 53.202 Classes of slaughter and feeder cattle.

The classes of slaughter and feeder cattle are steers, bullocks, bulls, heifers, and cows. Definitions of the respective classes are as follows:

(a) **Steer.** A steer is a male bovine castrated when young and which has not begun to develop the secondary physical characteristics of a bull.

(b) **Bullock.** A bullock is a young (under approximately 24 months of age) male bovine (castrated or uncastrated) that has developed or begun to develop the secondary physical characteristics of a bull.

(c) **Bull.** A bull is a mature (approximately 24 months of age or older) uncastrated, male bovine. However, for the purpose of these standards, any mature, castrated, male bovine which has developed or begun to develop the secondary physical characteristics of an uncastrated male also will be considered a bull.

(d) **Cow.** A cow is a female bovine that has developed through reproduction or with age, the relatively prominent hips, large middle, and other physical characteristics typical of mature females.

(e) **Heifer.** A heifer is an immature female bovine that has not developed the physical characteristics typical of cows.

§ 53.203 Application of Standards for Grades of Slaughter Cattle.

(a) **General.** Grades of slaughter cattle are intended to be directly related to the grades of the carcasses they produce. To accomplish this, these slaughter cattle grade standards are based on factors which are related to the grades of beef carcasses. The quality and yield grade standards are contained in separate sections of the standards. The quality grade standards are further divided into two sections applicable to (1) steers, heifers, and cows and (2) bullocks. Eight quality designations—Prime, Choice, Good, Standard, Commercial, Utility, Cutter, and Canner—are applicable to steers and heifers. Except for Prime, the same designations also apply to cows. The quality designations for bullocks are Prime, Choice, Good, Standard, and Utility. There are five yield grades, which are applicable to all classes of slaughter cattle and are designated by numbers 1 through 5, with Yield Grade 1 representing the highest degree of cutability. The grades of slaughter cattle shall be a combination of both their quality and yield grades, except that slaughter bulls are yield graded only.

(b) (1) **Quality Grades.** Slaughter cattle quality grades are based on an evaluation of factors related to the palatability of the lean, herein referred to as "quality." Quality in slaughter cattle is evaluated primarily by the amount and distribution of finish, the firmness of muscling, and the physical characteristics of the animal associated with maturity. Progressive changes in maturity past 30 months of age and in the amount and distribution of finish and firmness of muscling have opposite effects on

quality. Therefore, for cattle over 30 months of age in each grade, the standards require a progressively greater development of the other quality-indicating factors. In cattle under about 30 months of age, a progressively greater development of the other quality-indicating characteristics is not required.

(2) Since carcass indices of quality are not directly evident in slaughter cattle, some other factors in which differences can be noted must be used to evaluate their quality. Therefore, the amount of external finish is included as a major grade factor herein, even though cattle with a specific degree of fatness may have widely varying degrees of quality. Identification of differences in quality among cattle with the same degree of fatness is based on distribution of finish and firmness of muscling. Descriptions of these factors are included in the specifications. For example, cattle which have more fullness of the brisket, flank, twist, and cod or udder and which have firmer muscling than that indicated by any particular degree of fatness are considered to have higher quality than indicated by that degree of fatness.

(3) The approximate maximum age limitation for the Prime, Choice, Good, and Standard grades of steers, heifers, and cows is 42 months. The Commercial grade for steers, heifers, and cows includes only cattle over approximately 42 months. There are no age limitations for the Utility, Cutter, and Canner grades of steers, heifers, and cows. The maximum age limitation for all grades of bullocks is approximately 24 months.¹

(c) **Yield Grades.** (1) The yield grades for slaughter cattle are based on the same factors as used in the official yield grade standards for beef carcasses. Those factors and the change in each which is required to make a full yield grade change are as follows:

(2) When evaluating slaughter cattle for yield grade, each of these factors can

Factor	Effect of increase on yield grade ¹	Approximate change in each factor required to make a full yield grade change ²
Thickness of fat over ribs	Decreases...	4/10 in.
Percent of kidney, pelvic, and heart fatdo.....	5%
Carcass weightdo.....	260 lb.
Area of ribeye	Increases....	3 in. ²

¹ The yield grades are denoted by numbers 1 through 5 with Yield Grade 1 representing the highest cutability (or yield of closely trimmed retail cuts). Thus, an "increase" in cutability means a smaller yield grade number while a "decrease" in cutability means a larger yield grade number.

² This assumes no change in the other factors.

³ Maximum maturity limits for bullock carcasses are the same as those described in the beef carcass grade standards for steers, heifers, and cows at about 30 months of age. However, bullocks develop carcass indicators of maturity at younger chronological ages than steers. Therefore, the approximate age at which bullocks develop carcass indicators of maximum maturity is shown herein as 24 months rather than 30 months.

be estimated and the yield grade determined therefrom by using the equation contained in the official standards for grades of carcass beef. However, a more practical method of appraising slaughter cattle for yield grade is to use only two factors normally considered in evaluating live cattle—muscling and fatness.

(3) In the latter approach to determining yield grade, evaluation of the thickness and fullness of muscling in relation to skeletal size largely accounts for the effects of two of the factors—area of ribeye and carcass weight. By the same token, an appraisal of the degree of external fatness largely accounts for the effects of thickness of fat over the ribeye and the percent of kidney, pelvic, and heart fat.

(4) These fatness and muscling evaluations can best be made simultaneously. This is accomplished by considering the development of the various parts based on an understanding of how each part is affected by variations in muscling and fatness. While muscling of most cattle develops uniformly, fat is normally deposited at a considerably faster rate on some parts than on others. Therefore, muscling can be appraised best by giving primary consideration to the parts least affected by fatness, such as the round and the forearm. Differences in thickness and fullness of these parts—with appropriate adjustments for the effects of variations in fatness—are the best indicators of the overall degree of muscling in live cattle.

(5) On the other hand, the overall fatness of an animal can be determined best by observing those parts on which fat is deposited at a faster-than-average rate. These include the back, loin, rump, flank, cod or udder, twist, and brisket. As cattle increase in fatness, these parts appear progressively fuller, thicker, and more distended in relation to the thickness and fullness of the other parts, particularly the round. In thinly muscled cattle with a low degree of finish, the width of the back usually will be greater than the width through the center of the round. The back on either side of the backbone also will be flat or slightly sunken. Conversely, in thickly muscled cattle with a similar degree of finish, the thickness through the rounds will be greater than through the back and the back will appear full and rounded. At an intermediate degree of fatness, cattle which are thickly muscled will be about the same width through the round and back and the back will appear only slightly rounded. Thinly muscled cattle with an intermediate degree of finish will be considerably wider through the back than through the round and will be nearly flat across the back. Very fat cattle will be wider through the back than through the round, but this difference will be greater in thinly muscled cattle than in those that are thickly muscled. Such cattle with thin muscling also will have a distinct break from the back into the sides, while those with thick muscling will be nearly flat on top but will have a less distinct break into the sides. As

cattle increase in fatness, they also become deeper bodied because of large deposits of fat in the flanks and brisket and along the underline. Fullness of the twist and cod or udder and the bulge of the flanks, best observed when an animal walks, are other indications of fatness.

(6) In determining yield grade, variations in fatness are much more important than variations in muscling.

(d) **Other considerations.** (1) Other factors such as heredity and management also may affect the development of the grade-determining characteristics in slaughter cattle. Although these factors do not lend themselves to description in the standards, the use of factual information of this nature is justifiable in determining the grade of slaughter cattle.

(2) Slaughter cattle qualifying for any particular grade may vary with respect to the relative development of the individual grade factors. In fact, some will qualify for a particular grade although they have some characteristics more nearly typical of cattle of another grade. Because it is impractical to describe the nearly infinite number of recognizable combinations of characteristics, quality and yield grade standards describe only cattle which have a relatively similar development of the various quality and yield grade determining factors and which are near the lower limits of these grades. The requirements are given for two maturity groups in the quality grade standards for steers, heifers, and cows—but for only one maturity group for bullocks. In the yield grade standards, cattle with two levels of muscling are described and specific examples in terms of carcass characteristics also are included.

§ 53.204 Specifications for Official United States Standards for Grades of Slaughter Steers, Heifers, and Cows (Quality).

(a) **Prime.** (1) Slaughter steers and heifers 30 to 42 months of age possessing the minimum qualifications for Prime have a fat covering over the crops, back, ribs, loin, and rump that tends to be thick. The brisket, flanks, and cod or udder appear full and distended and the muscling is very firm. The fat covering tends to be smooth with only slight indications of patchiness. Steers and heifers under 30 months of age have a moderately thick but smooth covering of fat which extends over the back, ribs, loin, and rump. The brisket, flanks, and cod or udder show a marked fullness and the muscling is firm.

(2) Cattle qualifying for the minimum of the Prime grade will differ considerably in cutability because of varying combinations of muscling and degree of fatness. Cattle with higher cutability than normal for this grade are thickly muscled and have a lower degree of fatness than described for the Prime grade. Such cattle have less width of back and loin and are less uniform in width than normal for the Prime grade. The thick, full muscling gives the back and loin a well-

rounded appearance with very little evidence of flatness. The thickness through the middle part of the rounds is greater than over the top and the thick muscling through the shoulders causes them to be slightly prominent. Although such cattle have a lower degree of fatness over the back and loin than described as typical, evidence of more fatness than described is noticeable in the brisket, flanks, twist, and cod or udder and the muscling is firmer than described. Conversely, cattle with lower cutability than normal for this grade are thinly muscled and have a higher degree of fatness than described for the Prime grade. The distribution of fat is not typical, for it is thicker over the crops, back, loin, and rump than described while the brisket, flanks, twist, and cod or udder indicate less fatness. Such cattle are wide and nearly flat over the back and loin and there is a sharp break from these parts into the sides. The width over the back is much greater than through the rounds and shoulders.

(3) Cows are not eligible for the Prime grade.

(b) **Choice.** (1) Slaughter steers, heifers, and cows 30 to 42 months of age possessing the minimum qualifications for Choice have a fat covering over the crops, back, loin, rump, and ribs that tends to be moderately thick. The brisket, flanks, and cod or udder show a marked fullness and the muscling is firm. Cattle under 30 months of age carry a slightly thick fat covering over the top. The brisket, flanks, and cod or udder appear moderately full and the muscling is moderately firm.

(2) Cattle qualifying for the minimum of the Choice grade will differ considerably in cutability because of varying combinations of muscling and degree of fatness. Cattle with higher cutability than normal for this grade are thickly muscled and have a lower degree of fatness than described for the Choice grade. Such cattle are less uniform in width than normal for the Choice grade. The thick, full muscling over the top results in a rounded appearance with little evidence of flatness. The thickness through the middle part of the rounds is greater than over the top and the thick muscling through the shoulders causes them to be slightly prominent. Although such cattle have a lower degree of fatness over the back and loin than described as typical, evidence of more fatness than described is especially noticeable in the brisket, flanks, twist, and cod or udder and the muscling is firmer than described. Conversely, cattle with lower cutability than normal for this grade are thinly muscled and have a higher degree of fatness than described for the Choice grade. The distribution of fat is not typical, for it is thicker over the crops, back, loin, and rump than described but with evidence of less fatness in the brisket, flanks, twist, and cod or udder. The back and loin break sharply into the sides and the width over the back is much greater than through the rounds and shoulders.

(c) **Good.** (1) Slaughter steers, heifers, and cows 30 to 42 months of age possessing the minimum qualifications for Good

have a fat covering that tends to be slightly thin with some fullness evident in the brisket, flanks, twist, and cod or udder and the muscling is firm. Cattle under 30 months of age have a thin fat covering which is largely restricted to the back and loin. The brisket, flanks, twist, and cod or udder are slightly full and the muscling is slightly firm.

(2) Cattle qualifying for the minimum of the Good grade will differ considerably in cutability because of varying combinations of muscling and degree of fatness. Cattle with higher cutability than normal for the grade are thickly muscled and have a lower degree of fatness than described for the Good grade. Such cattle are less uniform in width than normal for the grade. The thick, full muscling through the back gives the back and loin a well-rounded appearance. The thickness through the middle part of the rounds is greater than over the top and the thick muscling through the shoulders causes them to be prominent. Evidence of more fatness than described is especially noticeable in the brisket, flanks, twist, and cod or udder and the muscling is firmer than described. Conversely, cattle with lower cutability than normal for the grade are thinly muscled and have a higher degree of fatness than described for the Good grade. The distribution of fat is not typical, for it is thicker over the crops, back, loin, and rump than described while the brisket, flanks, twist, and cod or udder indicate less fatness. Such cattle are nearly flat over the back and loin and the width over the back is greater than through the rounds and shoulders.

(d) **Standard.** (1) Slaughter steers, heifers, and cows 30 to 42 months of age possessing the minimum qualifications for Standard have a fat covering primarily over the back, loin, and ribs which tends to be very thin. Cattle under 30 months of age have a very thin covering of fat which is largely restricted to the back, loin, and upper ribs.

(2) Cattle qualifying for the minimum of this grade vary relatively little in their degree of fatness. Therefore, the range in cutability among cattle that qualify for this grade is somewhat less than in the higher grades. Most of the cutability differences among cattle qualifying for this grade are due to a wide range in muscling. Cattle with higher cutability than normal for this grade may have a slightly lower degree of fatness than described but will have thick, well-rounded backs, wide loins, and prominent, thickly muscled shoulders. The width through the rounds will be greater than over the back. Cattle with lower cutability than normal for this grade may have slightly more finish than described and will be upstanding and narrow. The loin, rump, and rounds will appear slightly sunken.

(e) **Commercial.** (1) The Commercial grade is limited to steers, heifers, and cows over approximately 42 months of age. Slaughter cattle possessing the minimum qualifications for Commercial and which slightly exceed the minimum maturity for the Commercial grade have a slightly thick fat covering over the

back, ribs, loin, and rump and the muscling is moderately firm. Very mature cattle usually have at least a moderately thick fat covering over the back, ribs, loin, and rump and considerable patchiness frequently is evident about the tailhead. The brisket, flanks, and cod or udder appear to be moderately full and the muscling is firm.

(2) Cattle qualifying for the minimum of the Commercial grade will differ considerably in cutability because of widely varying combinations of muscling and degree of fatness. Cattle with higher cutability than normal for this grade are thickly muscled and have a lower degree of fatness than described for the Commercial grade. The thick, full muscling over the top results in a rounded appearance with little evidence of flatness. The thickness through the middle part of the rounds is greater than over the top and the thick muscling through the shoulders causes them to be slightly prominent. Although such cattle have less thickness of fat over the back and loin than described as typical, evidence of more fatness than described is especially noticeable in the brisket, flanks, twist, and cod or udder and the muscling is firmer than described. Conversely, cattle with lower cutability than normal for this grade are thinly muscled and have a higher degree of fatness than described for the Commercial grade. The distribution of fat is not typical, being thicker over the crops, back, loin, and rump than described while the brisket, flanks, twist, and cod or udder indicate less fatness. The back and loin break sharply into the sides and the width over the back is much greater than through the rounds and shoulders.

(f) **Utility.** (1) The minimum degree of finish required for slaughter steers, heifers, and cows to qualify for the Utility grade varies throughout the range of maturity permitted in this grade from a very thin covering of fat for cattle under 30 months of age to a slightly thick fat covering, generally restricted to the back, loin, and rump for the very mature cattle in this grade. In such mature cattle, the crops are slightly thin and the brisket, flanks, and cod or udder indicate very slight fullness.

(2) Cattle qualifying for the minimum of the Utility grade vary somewhat in cutability especially among older animals. Those under 42 months of age are required to have very little fatness to qualify for the minimum of the grade; thus most of the variation in cutability of such cattle is due to differences in muscling. Cattle over 42 months of age will vary in their degree of fatness as well as muscling. Thus, cattle with thicker muscling than normal and less external fat than specified for this grade will have higher cutability than cattle with thinner muscling and more fatness.

(g) **Cutter.** (1) In slaughter cattle in the Cutter grade, the degree of finish ranges from practically none in cattle under 30 months of age to very mature cattle which have only a very thin covering of fat.

(2) The range in cutability among cattle that qualify for the minimum of this grade will be narrow because of

very small variations in fatness and muscling.

(b) **Canner.** Canner grade cattle are those which are inferior to the minimum specified for the Cutter grade.

§ 53.205 Specifications for Official United States Standards for Grades of Slaughter Bullocks (Quality).

(a) **Prime.** (1) Slaughter bullocks possessing the minimum qualifications for the Prime grade have a moderately thick but smooth covering of fat which extends over the back, ribs, loin, and rump. The brisket and flanks show a marked fullness and the muscling is firm.

(2) Bullocks qualifying for the minimum of the Prime grade will differ considerably in cutability because of varying combinations of muscling and degree of fatness. Bullocks with higher cutability than normal for this grade are thickly muscled and have a lower degree of fatness than described as minimum for the Prime grade. Such bullocks have less width of back and loin and are less uniform in width than described as typical for the Prime grade but the muscling is firmer than described. Conversely, bullocks with lower cutability than normal for this grade are thinly muscled and have a higher degree of fatness than described as minimum for the Prime grade.

(b) **Choice.** (1) Slaughter bullocks possessing minimum qualifications for the Choice grade carry a slightly thick fat covering over the top. The brisket and flanks appear moderately full and the muscling is moderately firm.

(2) Bullocks qualifying for the minimum of the Choice grade will differ considerably in cutability because of varying combinations of muscling and degree of fatness. Bullocks with higher cutability than normal for this grade are thickly muscled and have a lower degree of fatness than described as minimum for the Choice grade but the muscling is firmer than described. Conversely, bullocks with lower cutability than normal for this grade are thinly muscled and have a higher degree of fatness than described as minimum for the Choice grade.

(c) **Good.** (1) Bullocks possessing minimum qualifications for the Good grade have a thin fat covering which is largely restricted to the back and loin. The brisket and flanks are slightly full and the muscling is slightly firm.

(2) Bullocks qualifying for the minimum of the Good grade will differ considerably in cutability because of varying combinations of muscling and degree of fatness. Bullocks with higher cutability than normal for the grade are thickly muscled and have a lower degree of fatness than described as minimum for the Good grade. Such bullocks are less uniform in width than described as typical of the grade but the muscling is firmer than described. Conversely, bullocks with lower cutability than normal for this grade have thinner muscling and a higher degree of fatness than described as minimum for the Good grade.

(d) **Standard.** (1) Slaughter bullocks possessing minimum qualifications for

the Standard grade have only a very thin covering of fat which is largely restricted to the back, loin, and upper rib.

(2) Bullocks qualifying for the minimum of this grade vary relatively little in their degree of fatness. Therefore, the range in cutability among bullocks that qualify for this grade is somewhat less than in the higher grades. Most of the cutability differences among bullocks qualifying for this grade are due to a wide range in muscling. Bullocks with higher cutability than normal for this grade may have a slightly lower degree of fatness than described but will have thick, well-rounded backs, wide loins, and prominent, thickly muscled shoulders. The width through the rounds will be greater than over the back. Bullocks with lower cutability than normal for this grade may have slightly more finish than described and will be upstanding and narrow. The loin, rump, and rounds will appear slightly sunken.

(e) **Utility.** The Utility grade includes only those bullocks that do not meet the minimum requirements specified for the Standard grade.

§ 53.206 Specifications for Official United States Standards for Grades of Slaughter Cattle (Yield).

(a) **Yield Grade 1.** (1) Yield Grade 1 slaughter cattle produce carcasses with very high yields of boneless retail cuts. Cattle with characteristics qualifying them for the lower limits of Yield Grade 1 (near the borderline between Yield Grade 1 and Yield Grade 2) will differ considerably in appearance because of inherent differences in the development of their muscling and skeletal systems and related differences in fatness.

(2) Very thickly muscled cattle typical of the minimum of this grade have a high proportion of lean to bone. They are moderately wide and the width through the shoulders and rounds is greater than through the back. The top is well-rounded with no evidence of flatness, and the back and loin are thick and full. The rounds are deep, thick, and full and the width through the middle part of the rounds is greater than through the back. The shoulders are slightly prominent and the forearms are thick and full. These cattle have only a thin covering of fat over the back and rump. The flanks are slightly shallow and the brisket and cod or udder have little evidence of fullness. Slaughter cattle of this description producing 600-pound carcasses usually have about 0.3 of an inch of fat over the ribeye and about 13.0 square inches of ribeye area.

(3) Because of the relatively low proportion of lean to bone, practically no thinly muscled cattle produce carcasses with an exceptionally high yield of boneless retail cuts. Therefore, it is unlikely that thinly muscled cattle will qualify for Yield Grade 1.

(4) Cattle qualifying for the minimum of Yield Grade 1 will differ widely in quality grade as a result of variations in distribution of finish and firmness of muscling. For example, young cattle which have considerable firmness of

muscling and considerably greater deposits of fat in the brisket, flanks, twist, and cod or udder than described for Yield Grade 1 ordinarily will qualify for the Good or Choice grade. However, such cattle with typical or less than typical deposits of fat in the brisket, flanks, twist, and cod or udder usually will qualify for the Standard or Utility grade.

(b) **Yield Grade 2.** (1) Yield Grade 2 slaughter cattle produce carcasses with high yields of boneless retail cuts. Cattle with characteristics qualifying them for the lower limits of Yield Grade 2 (near the borderline between Yield Grade 2 and Yield Grade 3) will differ considerably in appearance because of differences in the development of their muscling and skeletal systems and related differences in fatness.

(2) Very thickly muscled cattle typical of the minimum of this grade have a high proportion of lean to bone. They are wide through the back and loin and have slightly greater width through the shoulders and rounds than through the back. The top is well-rounded with little evidence of flatness and the back and loin are thick and full. The rounds are thick, full, and deep and the thickness through the middle part of the rounds is greater than that over the top. The shoulders are slightly prominent and the forearms are thick and full. There is a slightly thick covering of fat over the back and rump and the flanks are slightly deep. The brisket and cod or udder are slightly full. Slaughter cattle of this description producing 600-pound carcasses usually have about 0.6 of an inch of fat over the ribeye and about 12.5 square inches of ribeye area.

(3) Thinly muscled cattle typical of the minimum of this grade have a relatively low proportion of lean to bone. They tend to be flat and slightly narrow over the back and have slightly long, flat rounds. They are slightly wider over the back than through the rounds. The shoulders are slightly prominent and the forearms are only slightly thick. These cattle have a thin covering of fat over the back and rump. The flanks are slightly shallow and thin and the brisket and cod or udder have little evidence of fullness. Slaughter cattle of this description producing 600 pound carcasses usually have 0.3 of an inch of fat over the ribeye and about 10.0 square inches of ribeye area.

(4) Cattle qualifying for the minimum of Yield Grade 2 will differ greatly in quality grade as a result of variations in distribution of finish and firmness of muscling. For example, young cattle which have considerable firmness of muscling and typical or greater deposits of fat in the brisket, flanks, twist, and cod or udder than described for Yield Grade 2 ordinarily will qualify for Prime or Choice. Conversely, such cattle with less than typical deposits of fat in the brisket, flanks, twist, and cod or udder usually will qualify for the Good or Standard grade.

(c) **Yield Grade 3.** (1) Yield Grade 3 slaughter cattle produce carcasses with intermediate yields of boneless retail

cuts. Cattle with characteristics qualifying them for the lower limits of Yield Grade 3 (near the borderline between Yield Grade 3 and 4) will differ considerably in appearance because of inherent differences in the development of their muscling and skeletal systems and related differences in fatness.

(2) Very thickly muscled cattle typical of the minimum of this grade have a high proportion of lean to bone. They are very wide through the back and loin and are uniform in width from front to rear. The back or top is nearly flat with only a slight tendency toward roundness and there is a slight break into the sides. The back and loin are very full and thick. The rounds are deep, thick, and full. The shoulders are smooth and the forearms are thick and full. There is a moderately thick covering of fat over the back and rump. The flanks are deep and full and the brisket and cod or udder are full. Slaughter cattle of this description producing 600-pound carcasses usually have about 0.9 of an inch of fat over the ribeye and about 12.0 square inches of ribeye area.

(3) Thinly muscled cattle typical of the minimum of this grade have a relatively low proportion of lean to bone. They are flat and slightly wide over the back and loin and are wider over the back than through the rounds. The shoulders are slightly smooth and the forearms are only slightly thick. These cattle tend to have a slightly thick covering of fat over the back and rump. The flanks are slightly deep and full and the brisket and cod or udder are slightly full. Slaughter cattle of this description producing 600-pound carcasses usually have about 0.6 of an inch of fat over the ribeye and about 9.5 square inches of ribeye area.

(4) Cattle qualifying for the minimum of Yield Grade 3 will differ greatly in quality grade as a result of wide variations in distribution of finish and firmness of muscling. Cattle with higher quality than normal for the minimum of this grade will have very firm muscling and will have greater deposits of fat in the brisket, flanks, twist, and cod or udder than described for Yield Grade 3 and will normally qualify for the Prime or Choice grade. Conversely, cattle with lower quality than normal for the minimum of this grade will have less deposits of fat in the brisket, flanks, twist, and cod or udder than described herein, and may only qualify for the Good grade.

(d) **Yield Grade 4.** (1) Yield Grade 4 slaughter cattle produce carcasses with moderately low yields of boneless retail cuts. Cattle with characteristics qualifying them for the lower limits of Yield Grade 4 (near the borderline between Yield Grades 4 and 5) will differ considerably in appearance because of inherent differences in the development of their muscling and skeletal systems and related differences in fatness.

(2) Very thickly muscled cattle typical of the minimum of this grade have a high proportion of lean to bone. They appear wider over the top than through the shoulders or rounds. The back and loin

are very thick and full, nearly flat, and break sharply into the sides. The rounds are deep, thick, and full. The shoulders are smooth and the forearms are thick and full. These cattle have a thick covering of fat over the back and rump. The flanks are very deep and full and the brisket and cod or udder are very full. Slaughter cattle of this description producing 600-pound carcasses usually have about 1.1 inches of fat over the ribeye and about 11.5 square inches of ribeye area.

(3) Thinly muscled cattle typical of the minimum of this grade have a relatively low ratio of lean to bone. They are flat over the back and loin and much wider through the back than through the shoulders or rounds. The rounds tend to be long and flat. The shoulders are smooth and the forearms are slightly thick. The cattle have a moderately thick covering of fat over the back and rump and the back breaks sharply into the sides. The flanks are deep and full and the brisket and cod or udder are full. Slaughter cattle of this description producing 600-pound carcasses usually have about 0.9 of an inch of fat over the ribeye and about 9.0 square inches of ribeye area.

(4) Cattle qualifying for the minimum of Yield Grade 4 will differ somewhat in quality grade as a result of variations in distribution of the finish and firmness of muscling. Most cattle at the minimum of this grade will qualify for the Prime or Choice grade. However, some cattle at the minimum of Yield Grade 4 with less deposits of fat in the brisket, flanks, twist, and cod or udder than described as typical may only qualify for the Good grade.

(e) **Yield Grade 5.** (1) Yield Grade 5 slaughter cattle produce carcasses with low yields of boneless retail cuts. Cattle of this grade consist of those not meeting the minimum requirements for Yield Grade 4 because of either more fat or less muscle or a combination of these characteristics.

(2) Because of the high degree of finish required for cattle of this grade, the range in quality grades will be somewhat small. Practically all cattle of this grade will qualify for either the Prime or Choice grade.

§ 53.208 Feeder cattle grades.

(a) **Grade factors.** (1) The term "cattle" as used in these standards includes bovines of all ages.

(2) The grade of a feeder animal is determined from a composite evaluation of two general value-determining characteristics—its logical slaughter potential (as beef) and its thriftiness.

(3) The logical slaughter potential of an animal is its slaughter grade at that stage of its development as beef—not as veal or calf—when its carcass quality grade and its carcass conformation grade would be equal.

(4) Animals expected to produce superior slaughter conformation—and therefore have a superior logical slaughter potential—have very thick muscling

in relation to their height and length. They also have wide, deep, rugged frames; short, wide heads; moderately large bones and smooth, refined joints; and practically always have a very high proportion of beef breeding. Animals expected to produce inferior slaughter conformation—and an inferior logical slaughter potential—have very thin muscling in relation to their height and length. They also are lacking in ruggedness; have long, narrow heads; have either very small or large, coarse bones; and practically always have little or no beef breeding.

(5) **Thriftiness** refers to the ability of a feeder animal to gain weight and fatten rapidly and efficiently. Extremely thrifty cattle are healthy, have wide, roomy middles with well-sprung ribs, are large for their age, and have an alert manner.

(b) **General principles.** (1) While the grade of a feeder animal is determined from a composite evaluation of its logical slaughter potential and its thriftiness, the logical slaughter potential is given primary consideration. Thus, conformation, or inherent muscular development, is the most important single factor affecting the grade of a feeder animal.

(2) In these feeder cattle standards conformation is determined by appraising the development of the muscular system in relation to the development of the skeletal system. Degree of fatness is not a factor. However, since the grade standards include detailed descriptions of the various parts of the animal and since this appearance may be influenced to a considerable extent by variations in fatness, the standards for all of the grades describe animals that have a slightly thin covering of fat. When grading animals which have either a greater or lesser degree of fatness than that on which the standards are based, proper allowances must be made for the effect of these differences on the appearance of the various parts.

(3) Cattle deposit fat at a relatively faster rate over the loin and back, and in the flank, cod, twist, and brisket than they do on other parts of their bodies. Therefore, as cattle increase in fatness, these parts appear progressively fuller, thicker, and more distended in relation to the thickness through the rear quarter and to the fullness of the forearm and gaskin. Since relatively little fat is deposited over these latter parts, their appearance is affected relatively little by variations in fatness. In evaluating the conformation of feeder cattle, it is important to properly evaluate the muscling in all parts of the animal. However, since variations in fatness and variations in the spring of the ribs make it especially difficult to precisely evaluate the muscling in the loin and back, major emphasis should be placed on the development of muscling in the rear quarter as an indicator of overall muscling. Unless proper allowance is made for variations in fatness, animals carrying considerable finish may be assumed to have greater thickness of muscling

throughout their loins and backs than actually is the case, whereas those which are very thin may be more muscular in these parts than their appearance might indicate.

(4) Thriftiness is a factor affecting the grade of a feeder animal only when the animal is relatively less thrifty than normally associated with a particular development as described for the various grades. In such a case, the final grade of the feeder animal may be lowered from that indicated by other grade factors. The amount of this reduction in grade will vary from practically none to one full grade, dependent upon the degree of unthriftiness and the grade involved. For example, a feeder animal otherwise eligible for the Utility grade would have its final grade lowered little, if any, due to a lack of thriftiness as compared with that specified for that grade. However, since Prime grade feeders are expected to have a high degree of thriftiness, the final grade of a feeder animal otherwise eligible for that grade might be lowered one full grade if its thriftiness were considerably less than that indicated for Prime. On the other hand, superior thriftiness as compared with that described for each of the grades cannot compensate for a relatively lower slaughter potential, i.e., the final grade of a feeder may be no higher than its logical slaughter potential.

(5) Maturity is not normally a factor in determining the grade of a feeder animal. However, the animal's likely maturity at the time it reaches its logical slaughter potential must be considered in relation to certain approximate maximum and minimum maturity limits for various grades of slaughter cattle. These are as follows: Prime, 36 months maximum; Choice, 42 months maximum; Good and Standard, 48 months maximum; Commercial, 48 months minimum. There are no maturity limits for the Utility, Cutter, and Canner grades.

(6) The standards for grades of feeder cattle—like those for slaughter cattle—are designed to cover the full range of variability in cattle. This being the case, at any stage in their development, cattle may be graded either as feeder or slaughter animals. The slaughter grade of most feeder cattle generally would be lower than their grade as feeders. For example, many Prime or Choice grade feeder cattle would grade only Standard as slaughter cattle. However, this situation does not always prevail. Some feeder cattle, particularly in the lower grades, may have characteristics which indicate that their carcass quality would have a relatively higher degree of development than their conformation. Since the carcass quality of such an animal would be relatively higher than its logical slaughter potential, its grade as a slaughter animal could be higher than its feeder grade. For example, an animal might have had a logical slaughter potential of the upper part of the Utility grade and, therefore, its feeder grade would be Utility. However, if such an animal had a carcass quality equal

to the upper part of the Standard grade, its slaughter grade would be Standard.

(7) Because it is impractical to describe the nearly limitless number of recognizable combinations of characteristics which feeder animals might have and qualify for a particular grade, the standards for each grade describe only animals which have a similar development of the various grade factors which are generally representative of the lower limits of each grade. The following standards for grades of feeder cattle apply only to steers, heifers, and cows. Stags and bulls are used as feeders only infrequently; therefore, standards for grades of those classes are not included herein.

§ 53.209 Specifications for official United States standards for grades of feeder cattle (steers, heifers, and cows).

(a) *Prime.* Feeder cattle which possess typical minimum qualifications for the Prime grade are extremely thrifty and are very large for their age, breed considered. They are very thickly muscled throughout. They are wide through the chest with well sprung ribs and are moderately wide and thick through the crops, back, and loin. The rounds tend to be thick and the twist is moderately deep. They usually have straight top and bottom lines and usually are moderately deep in the fore and rear flanks. The legs tend to be short, are set wide apart, and usually are straight. The head is usually short and wide and the neck usually is short and thick. They have large, rugged frames with moderately large but refined bone. They have a high degree of symmetry and smoothness throughout, and usually show no evidence of nonbeef breeding. They have a logical slaughter potential of Prime. Only steers and heifers are eligible for the Prime grade.

(b) *Choice.* Feeder cattle which possess typical minimum qualifications for the Choice grade are very thrifty and are large for their age, breed considered. They are thickly muscled throughout. They are moderately wide through the chest with a moderate spring of ribs and are slightly wide and thick through the crops, back, and loin. The rounds are slightly thick and the twist is slightly deep. They usually have straight top lines and usually are moderately deep in the fore and rear flanks. The legs are slightly short, and are set moderately wide apart and usually are straight. The head usually is moderately short and wide and the neck usually is slightly short and thick. They have moderately large, rugged frames, and the bone usually is moderately large, but may be slightly fine or slightly large and coarse. They have a moderate degree of symmetry and smoothness throughout and usually show a very high proportion of beef breeding. They have a logical slaughter potential of Choice.

(c) *Good.* Feeder cattle which possess typical minimum qualifications for the Good grade are thrifty but may be

slightly small for their age, breed considered. They are slightly thick muscled throughout. They are slightly narrow through the chest and may be slightly deficient in spring of rib. They are slightly narrow through the crops, back, and loin. The muscles of the rump are slightly sunken and the hips and shoulder joints are slightly prominent. The rounds are slightly thin and the twist is slightly shallow. They usually have moderately straight top lines but may lack depth in the rear flank. The legs tend to be slightly long, are set slightly wide apart, and frequently are crooked. The head is usually slightly short and wide and the neck usually is slightly long and thin. They have a slightly large frame and the bone usually is slightly fine, although it may also be slightly large and coarse. They are slightly irregular and rough in appearance and usually are predominantly of beef breeding. They have a logical slaughter potential of Good.

(d) *Standard.* Feeder cattle which possess typical minimum qualifications for the Standard grade are only moderately thrifty and are moderately small for their age, breed considered. They are slightly thin muscled and are angular, rough, and irregular in appearance throughout. They tend to be narrow through the chest and through the crops, and the muscles of the back, loin, and rump tend to be slightly sunken. Hips and shoulder joints are prominent. The rounds are thin and slightly concave and the twist is shallow. They usually have an uneven top line and may lack depth in the rear flank. The legs are long, set close together, and are usually crooked. The head usually is long and narrow and the neck usually long and thin. They have a slightly small frame and the bone is usually moderately fine, although it also may be moderately large and coarse. They are usually predominantly of nonbeef breeding and have a logical slaughter potential of Standard.

(e) *Commercial.* The Commercial grade for feeder cattle is restricted to cattle that will be too mature for the Good or Standard grade when they reach their logical slaughter potential. These will usually be cows. Cattle possessing typical minimum qualifications for the Commercial grade are moderately thrifty but are slightly thin muscled and are angular, rough, and irregular in appearance throughout. They tend to be narrow through the chest and crops, and the muscles of the back, loin, and rump tend to be slightly sunken. Hips and shoulder joints are prominent. The rounds are thin and slightly concave and the twist is shallow. They usually have an uneven top line and may lack depth in the rear flank. The legs are long and set close together. The head usually is long and narrow and the neck usually long and thin. Although cattle near the lower limits of the grade may be predominantly of nonbeef breeding, the majority of feeder cattle in this grade are predominantly of beef breeding. They have a logical slaughter potential of Commercial.

(f) *Utility.* Feeder cattle which possess typical minimum qualifications for the Utility grade are slightly unthrifty and are small for their age, breed considered. They are thinly muscled throughout and are very angular, rough, and irregular in appearance. They are very narrow through the chest and the crops and the muscles of the back, loin, and rump are sunken. Hips and shoulder joints are very prominent. The rounds are very thin and concave and the twist is very shallow. They usually have an irregular top line and are cut up in the rear flank. The legs are very long, are set very close together, and are usually rooked. The head usually is very long and narrow and the neck usually is decidedly long and thin. They have a very small frame and the bone usually is very fine, although it also may be large and coarse. They usually have little or no evidence of beef breeding and have a logical slaughter potential of Utility.

(g) *Inferior.* Feeder cattle inferior to those described for Utility are graded Inferior.

CHAPTER IX—AGRICULTURAL MARKETING SERVICE (MARKETING AGREEMENTS AND ORDERS; FRUITS, VEGETABLES, NUTS), DEPARTMENT OF AGRICULTURE

[Lemon Reg., 112, Amdt. 1]

PART 910—LEMONS GROWN IN CALIFORNIA AND ARIZONA

Limitation of Handling

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Amendment to Final Rule.

SUMMARY: This amendment increases the quantity of California-Arizona lemons that may be shipped to fresh market during the weekly regulation period September 25–October 1, 1977. The amendment recognizes that demand for lemons has improved, since the regulation was issued. This action will increase the supply of lemons available to consumers.

DATES: Weekly regulation period September 25–October 1, 1977.

FOR FURTHER INFORMATION CONTACT:

Charles R. Brader, Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service, U.S. Department of Agriculture, Washington, D.C. 20250 (202-447-3545).

SUPPLEMENTARY INFORMATION:

(a) *Findings.* (1) Pursuant to the amended marketing agreement and Order No. 910, as amended (7 CFR Part 910), regulating the handling of lemons grown in California and Arizona, effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), and upon the basis of recommendations and information submitted by the Lemon Administrative

Committee, established under the marketing agreement and order, and other available information, it is found that the limitation of handling of lemons, as provided in this amendment will tend to effectuate the declared policy of the act.

(2) Demand in the lemon markets has improved since the regulation was issued. Amendment of the regulation is necessary to permit lemon handlers to ship a larger quantity of lemons to market to supply the increased demand. The amendment will increase the quantity permitted to be shipped by 20,000 cartons, in the interest of producers and consumers.

(3) It is further found that it is impracticable and is contrary to the public interest to give preliminary notice, engage in public rulemaking procedure, and postpone the effective date of this amendment until 30 days after publication in the FEDERAL REGISTER (5 U.S.C. 553), because the time intervening between the date when information upon which this amendment is based became available and the time when this amendment must become effective in order to effectuate the declared policy of the act is insufficient, and this amendment relieves restrictions on the handling of lemons.

§ 910.412 [Amended]

(b) *Order, as amended.* Paragraph (a) (1) of § 910.412 Lemon Regulation 112 (42 FR 48325) is amended to read as follows: "The quantity of lemons grown in California and Arizona which may be handled during the period September 25, 1977, through October 1, 1977, is established at 225,000 cartons."

(Secs. 1–19, 48 Stat. 31, as amended; (7 U.S.C. 601–674).)

Dated: September 28, 1977.

CHARLES R. BRADER,
Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[3410-37]

CHAPTER XXVIII—FOOD SAFETY AND QUALITY SERVICE, DEPARTMENT OF AGRICULTURE

PART 2853—MEATS, PREPARED MEATS, AND MEAT PRODUCTS (GRADING, CERTIFICATION, AND STANDARDS)

AGENCY: Food Safety and Quality Service, USDA.

ACTION: Final Rule.

SUMMARY: The purpose of this rule is to recodify the meat grading regulations and carcass grade standards which were formerly administered by the Livestock Division, Agricultural Marketing Service, USDA, under 7 CFR Part 53, to a new 7 CFR Part 2853, to be administered by the Meat Quality Division, Food Safety and Quality Service, USDA.

EFFECTIVE DATE: October 4, 1977.

FOR FURTHER INFORMATION CONTACT:

David K. Hallett, U.S. Department of Agriculture, Food Safety and Quality Service, Meat Quality Division, Meat Grading Branch, Washington, D.C. 20250 (202-447-2210).

SUPPLEMENTARY INFORMATION: On April 18, 1977, a notice was published in the FEDERAL REGISTER (42 FR 20165) transferring various responsibilities and functions, including meat grading and standardization, from the Agricultural Marketing Service to the new Food Safety and Quality Service. On June 27, 1977, another notice was published in the FEDERAL REGISTER (42 FR 32514) establishing a new Chapter XXVIII in the Code of Federal Regulations for the purpose of recodification of functions assigned to the Food Safety and Quality Service. Accordingly, the meat grading regulations and carcass grade standards which formerly appeared in 7 CFR Part 53 are being transferred to 7 CFR Part 2853 under the new Chapter XXVIII.

Only incidental narrative changes were made in the regulations during the recodification process to (1) alphabetize definitions, (2) renumber various sections, (3) change references from Agricultural Marketing Service, Livestock Division, to Food Safety and Quality Service, Meat Quality Division, (4) eliminate references to livestock in the regulations, and (5) include reference to the Department's Rules of Practice Governing Formal Adjudicatory Administrative Proceedings Instituted by the Secretary (7 CFR Part 1 Subpart H). Inasmuch as no substantive rule or change of rule is involved and these changes do not substantially affect any member of the public, under the administrative procedure provisions of 5 U.S.C. 553, it is found impracticable, unnecessary, and contrary to the public interest to delay the effectiveness of this rule until 30 days after publication in the FEDERAL REGISTER.

Accordingly, the regulations and standards under the Agricultural Marketing Act of 1946 as they relate to meats, prepared meats, and meat products, are codified under 7 CFR Part 2853 as set forth below.

Done at Washington, D.C., on this 26th day of September 1977.

JOSEPH A. POWERS,
Acting Administrator,
Food Safety and Quality Service.

Subpart A—Regulations DEFINITIONS

Sec.	
2853.1	Meaning of words.
2853.2	Designation of official certificates, memoranda, marks, other identifications, and devices for purposes of the Agricultural Marketing Act.
ADMINISTRATION	
2853.3	Authority.

SERVICE		Sec.	
2853.4	Kind of service.	2853.125	Specifications for official United States standards for grades of yearling mutton carcasses (quality).
2853.5	Availability of service.	2853.126	Specifications for official United States standards for grades of mutton carcasses (quality).
2853.6	How to obtain service.	2853.127	Specifications for official United States standards for grades of carcass lamb, yearling mutton, and mutton (yield).
2853.7	Order of furnishing service.		
2853.8	When request for service deemed made.		
2853.9	Withdrawal of application.		
2853.10	Authority of agent.		
2853.11	Denial or withdrawal of service.		
2853.12	Financial interest of official grader.		
2853.13	Accessibility and refrigeration of products; access to establishments.		
2853.14	Official certificates.		
2853.15	Advance information concerning service rendered.		
2853.16	Marking of products.		
2853.17	Official identifications.		
2853.18	Custody of identification devices.		
APPEAL SERVICE			
2853.19	What is appeal service; marking products on appeal; requirements for appeal, certain determinations not appealable.	2853.132	Base for pork carcass standards.
2853.20	Request for appeal service.	2853.133	Pork carcass classes.
2853.21	When request for appeal service may be withdrawn.	2853.134	Application of standards for grades of barrow or gilt carcasses.
2853.22	Denial or withdrawal of appeal service.	2853.135	Specifications for official United States standards for grades of barrow and gilt carcasses.
2853.23	Who shall perform appeal service.	2853.136	Application of standards for grades of sow carcasses.
2853.24	Appeal certificate.	2853.137	Specifications for official United States standards for grades of sow carcasses.
2853.25	Superseded certificates.		
2853.26	Application of other regulations to appeal service.		
CHARGES FOR SERVICE			
2853.27	Fees and other charges for service.		
2853.28	Payment of fees and other charges.		
MISCELLANEOUS			
2853.29	Identification.		
2853.30	Errors in service.		
Subpart B—Standards			
CARCASS BEEF			
2853.102	Scope.		
2853.103	Classes of beef carcasses.		
2853.104	Application of standards for grades of carcass beef.		
2853.105	Specifications for official United States standards for grades of carcass beef (yield).		
2853.106	Specifications for official United States standards for grades of carcass beef (quality—steer, heifer, cow).		
2853.107	Specifications for official U.S. standards for grades of carcass beef (Quality Bullock).		
VEAL AND CALF CARCASSES			
2853.112	Scope.		
2853.113	Differentiation between veal, calf, and beef carcasses.		
2853.114	Classes of veal and calf carcasses.		
2853.115	Application of standards.		
2853.116	Specifications for official United States standards for grades of veal carcasses.		
2853.117	Specifications for official United States standards for grades of calf carcasses.		
LAMB, YEARLING MUTTON, AND MUTTON CARCASSES			
2853.122	Differentiation between lamb, yearling mutton, and mutton carcasses.		
2853.123	Application of standards.		
2853.124	Specifications for official United States standards for grades of lamb carcasses (quality).		

Sec. 2853.125 Specifications for official United States standards for grades of yearling mutton carcasses (quality).

2853.126 Specifications for official United States standards for grades of mutton carcasses (quality).

2853.127 Specifications for official United States standards for grades of carcass lamb, yearling mutton, and mutton (yield).

PORK CARCASSES

2853.132 Base for pork carcass standards.

2853.133 Pork carcass classes.

2853.134 Application of standards for grades of barrow or gilt carcasses.

2853.135 Specifications for official United States standards for grades of barrow and gilt carcasses.

2853.136 Application of standards for grades of sow carcasses.

2853.137 Specifications for official United States standards for grades of sow carcasses.

Authority: Sec. 203, 60 Stat. 1087, as amended; sec. 205, 60 Stat. 1090, as amended (7 U.S.C. 1622 and 1624); 19 FR 74, as amended.

Subpart A—Regulations

DEFINITIONS

§ 2853.1 **Meaning of words.**

Words used in this subpart in the singular form shall be deemed to import the plural, and vice versa, as the case may demand. For the purposes of such regulations, unless the context otherwise requires, the following terms shall be construed, respectively, to mean:

Acceptance service. The service established and conducted under the regulations for the determination and certification or other identification of the compliance of products with specifications.

Administrator. The Administrator of the Food Safety and Quality Service, or any officer or employee of the Food Safety and Quality Service to whom authority has heretofore been delegated or to whom authority may hereafter be delegated, to act in his stead.

Animals. Cattle, sheep, swine, or goats.

Applicant. Any person who has applied for service under the regulations.

Branch. The Meat Grading Branch of the Division.

Carcass. The commercially prepared or dressed body of any animal intended for human food.

Carcass Data Service. The service established and conducted under the regulations to provide producers and other interested persons with data on carcass characteristics.

Chief. The Chief of the Branch, or any officer or employee of the Branch to whom authority has heretofore been delegated, or to whom authority may hereafter be delegated, to act in his stead.

Class. A subdivision of a product based on essential physical characteristics that differentiate between major groups of the same kind of species.

Compliance. Conformity of a product to the specifications under which the

product was purchased or sold, with particular reference to the quality, cleanliness, state of refrigeration, method of processing, and trim of products.

Cooperative agreement. A cooperative agreement between the Food Safety and Quality Service and another Federal agency or a State agency, or other agency, organization or person as specified in the Agricultural Marketing Act of 1946, as amended, for conducting the service.

Department. The United States Department of Agriculture.

Director. The Director of the Division, or any officer or employee of the Division to whom authority has heretofore been delegated, or to whom authority may hereafter be delegated, to act in his stead.

Division. The Meat Quality Division of the Food Safety and Quality Service.

Fabricating. Cutting into wholesale or retail cuts, dicing or grinding.

Federal Meat Inspection. The meat inspection system conducted under the Federal Meat Inspection Act as amended by the Wholesome Meat Act (21 U.S.C. 601 et seq.) and the regulations thereunder (9 CFR Chapter III, Subchapter A).

Financially interested person. Any person having a financial interest in the products involved, including but not limited to the shipper, receiver, producer, seller, buyer, or carrier of the products.

Food Safety and Quality Service. The Food Safety and Quality Service of the Department.

Grade. (1) As a noun, this term means an important commercial subdivision of a product based on certain definite and preference determining factors, such as, but not limited to, conformation, finish, and quality in meats. (2) As a verb, this term means to determine the class, grade, or other quality of a product according to applicable standards for such product in Subpart B of this part.

Grading Service. The service established and conducted under the regulations for the determination and certification or other identification of the class, grade, or other quality of products under standards.

Immediate container. The carton, can, pot, tin, casing, wrapper, or other receptacle or covering constituting the basic unit in which products are directly contained or wrapped when packed in the customary manner for delivery to the meat trade or to consumers.

Legal Holiday. Those days designated as legal public holidays in title 5, United States Code, section 6103(a).

Livestock. Bovine, ovine, porcine.

Meat. The edible part of the muscle of an animal, which is skeletal, or which is found in the tongue, in the diaphragm, in the heart, or in the esophagus, and which is intended for human food, with or without the accompanying and overlying fat, and the portions of bone, skin, sinew, nerve, and blood vessels which normally accompany the muscle tissue and which are not separated from it in the process of dressing. This term does

not include the muscle found in the lips, snout, or ears.

Meat by-products. All edible parts (other than meat and prepared meats) intended for human food, derived from one or more animals, and including but not limited to such organs and parts as livers, kidneys, sweetbreads, brains, lungs, spleens, stomachs, tripe, lips, snouts, and ears.

Meat food products. Any articles intended for human food (other than meat, prepared meats, and meat by-products) which are derived or prepared in whole or in substantial and definite part, from any portion of any animal, except such articles as organotherapeutic substances, meat juice, meat extract, and the like, which are only for medicinal purposes and are advertised only to the medical profession.

Office of grading. The office of an official grader.

Official grader. An employee of the Department or other person authorized by the Department to determine and certify or otherwise identify the class, grade, or other quality, or compliance of products under the regulations.

Person. Any individual, partnership, corporation, or other legal entity, or Government agency.

Prepared meats. The products intended for human food which are obtained by subjecting meat to drying, curing, smoking, cooking, grinding, seasoning, or flavoring, or to any combination of such procedures, and to which no considerable quantity of any substance other than meat or meat byproducts has been added.

Processing. Drying, curing, smoking, cooking, seasoning, or flavoring or any combination of such processes, with or without fabricating.

Products. Meats, prepared meats, meat by-products, or meat food products.

Quality. A combination of the inherent properties of a product which determines its relative degree of excellence.

Quality grade. An important commercial subdivision of meat based on separate evaluations of two general considerations: (1) The quality or the palatability-indicating characteristics of lean and, (2) the conformation of the carcass or primal cut.

Service. Grading service or acceptance service.

Shipping container. The receptacle or covering in which one or more immediate containers of products are packed for transportation.

Specifications. Descriptions with respect to the class, grade, other quality, quantity or condition of products, approved by the Administrator, and available for use by the industry regardless of the origin of the descriptions.

Standards. The standards of the Department contained in Subpart B of this part.

Supervisor of grading. An official grader or other person designated by the Director or Chief to supervise and maintain uniformity and accuracy of service under the regulations.

ADMINISTRATION

§ 2853.3 Authority.

The Chief is charged with the administration, under the general supervision and direction of the Director, of the regulations and the Act insofar as they relate to products.

[30 FR 4157, Mar. 31, 1955]

SERVICE

§ 2853.4 Kind of service.

Grading service under the regulations shall consist of the determination and certification and other identification, upon request by the applicant, of the class, grade, or other quality of products under applicable standards in Subpart B of this part. Class, grade and other quality may be determined under said standards for meat of cattle, sheep, or swine in carcass form or for wholesale cuts of such meat, other than pork wholesale cuts. Acceptance service under the regulations shall consist of the determination of the conformity of products to specifications approved by the Director or Chief and the certification and other identification of such livestock or products in accordance with specifications, upon request by the applicant. Determination as to product compliance with specifications for ingredient content or method of preparation may be based upon information received from the inspection system having jurisdiction over the products involved. The Carcass Data Service, under the regulations, shall consist of the evaluation of carcass characteristics, in accordance with applicable official United States Standards which appear in Subpart B of this part, of carcasses of animals identified with the official cartag as shown in § 2853.17, the recording of such data, and transmittal of the data to, or as directed by, the applicant for the service.

(a) "Official certificate" means any form of certification, either written or printed, used under the regulations to certify with respect to the inspection, class, grade, quality, size, quantity, or condition of products (including the compliance of products with applicable specifications).

(b) "Official memorandum" means any initial record of findings made by an authorized person in the process of grading, determining compliance, inspecting, or sampling pursuant to the regulations, any processing or plant-operation report made by an authorized person in connection with grading, determining compliance, inspecting, or sampling under the regulations, and any report made by an authorized person of services performed pursuant to the regulations.

(c) "Official mark" or "other official identification" means any form of mark or other identification, including those prescribed in § 2853.17; used under the regulations in marking any products, or the immediate or shipping containers thereof, to show inspection, class, grade, quality, size, quantity, or condition of the products (including the compliance of products with applicable specifications), or to maintain the identity of products for which service is provided under the regulations.

(d) "Official device" means any roller, stamp, brand or other device used under the regulations to mark any products, or the immediate or shipping containers, thereof, with any official mark or other official identification.

The Act. The Agricultural Marketing Act of 1946 (Title II of the act of Congress approved August 14, 1946, 60 Stat. 1087, as amended by Pub. L. 272, 84th Cong., 69 Stat. 553, 7 U.S.C. 1621-1627).

The regulations. The regulations in this subpart.

Yield grade. The designation related to the quantity of trimmed, boneless, major retail cuts to be derived from the carcass or wholesale cuts—rounds or legs, loins, ribs, or racks, and chucks or shoulders—referred to as yield grade in Subpart B of this part.

§ 2853.2 Designation of official certificates, memoranda, marks, other identifications, and devices for purposes of the Agricultural Marketing Act.

Subsection 203(h) of the Agricultural Marketing Act of 1946, as amended by Public Law 272, 84th Congress, provides criminal penalties for various specified offenses relating to official certificates, memoranda, marks or other identifications, and devices for making such marks or identifications, issued or authorized under section 203 of said act, and certain misrepresentations concerning the inspection or grading of agricultural products under said section. For the purposes of said subsection and the provisions in this part, the terms listed below shall have the respective meanings specified:

(a) "Official certificate" means any form of certification, either written or printed, used under the regulations to certify with respect to the inspection, class, grade, quality, size, quantity, or condition of products (including the compliance of products with applicable specifications).

(b) "Official memorandum" means any initial record of findings made by an authorized person in the process of grading, determining compliance, inspecting, or sampling pursuant to the regulations, any processing or plant-operation report made by an authorized person in connection with grading, determining compliance, inspecting, or sampling under the regulations, and any report made by an authorized person of services performed pursuant to the regulations.

(c) "Official mark" or "other official identification" means any form of mark or other identification, including those prescribed in § 2853.17; used under the regulations in marking any products, or the immediate or shipping containers thereof, to show inspection, class, grade, quality, size, quantity, or condition of the products (including the compliance of products with applicable specifications), or to maintain the identity of products for which service is provided under the regulations.

(d) "Official device" means any roller, stamp, brand or other device used under the regulations to mark any products, or the immediate or shipping containers, thereof, with any official mark or other official identification.

The mark of foreign origin shall be imprinted by roller brand or handstamp and shall be applied so that the imprint is at least 2 inches from the backbone of lamb, 3 inches from the backbone of veal and calf, and 4 inches from the backbone of beef carcasses. The mark of foreign origin shall be repeated parallel to the backbone of the carcass so as to appear on each round, rump, full loin, rib, and chuck of each bovine and ovine carcass in letters at least one-fourth of an inch high, with no more than three-fourths of an inch space between impressions. Imprints of each such brand shall be submitted to the Chief for the determination of compliance with these regulations prior to use of the brand on meats offered for Federal grading. It shall be the responsibility of the applicant to notify the meat grader performing the service whenever imported meat is offered for grading.

§ 2853.6 How to obtain service.

(a) *Application.* Any person may apply to the Director or Chief for service under the regulations with respect to products in which the applicant is financially interested. The application shall be made on a form approved by the Director. In any case in which the service is intended to be furnished at an establishment not operated by the applicant, the application shall be approved by the operator of such establishment and such approval shall constitute an authorization for any employees of the Department to enter the establishment for the purpose of performing their functions under the regulations. The application shall state: (1) The name and address of the establishment at which service is desired; (2) the name and post office address of the applicant; (3) the financial interest of the applicant in the products, except where application is made by an official of a Government agency in his official capacity; and (4) the signature of the applicant (or the signature and title of his representative). The application shall indicate the legal status of the applicant as an individual, partnership, corporation, or other form of legal entity. Any change in such status, at any time while service is being received, shall be promptly reported to the Director or Chief by the person receiving the service.

(b) *Notice of eligibility for service.* The applicant for service at any establishment will be notified whether his application is approved.

(c) *Request by applicant for service—*

(1) *Noncommitment.* Upon notification of the approval on an application for service, the applicant may, from time to time as desired, make oral or written requests for service under the regulations with respect to specific products for which the service is to be furnished under such application. Such requests shall be made at an office for grading either directly or through any employee of the Food Safety and Quality Service who may be designated for such purposes.

(2) *Commitment.* If desired, the applicant may enter into an agreement with

the Food Safety and Quality Service for the furnishing of service on a weekly commitment basis, whereby the applicant agrees to pay for 8 hours of service per day, 5 days per week, Monday through Friday, as provided in § 2853.27(b), and the Food Safety and Quality Service agrees to make an official grader available to perform such service for the applicant. However, the Food Safety and Quality Service reserves the right to use any grader assigned to a plant under such a commitment to perform service for other applicants, when, in the opinion of the Chief, the grader is not needed to perform service for the applicant. An applicant who terminates a commitment, and within 1 year after cancellation is granted a new commitment at his request, shall pay for the moving costs actually incurred by the Food Safety and Quality Service to cover the transfer of the grader who will service the applicant's new commitment. If more than one applicant is involved in the reapplication for a canceled meat grading commitment requiring the transfer of the grader, the moving costs will be prorated among the applicants according to each applicant's committed portion of the grader's services. However, the moving costs will be charged only to those applicants who were parties to the previously canceled commitment. An applicant may, for periods of 3 months or less, enter into an agreement by memorandum with the Food Safety and Quality Service for the furnishing of service on a weekly basis. In the latter case, transfer of graders would not be involved and charges will be made in accordance with § 2853.27.

§ 2853.7 Order of furnishing service.

Service under the regulations shall be furnished to applicants in the order in which requests therefor are received, insofar as consistent with good management, efficiency and economy. Precedence will be given, when necessary, to requests made by any government agency or any regular user of the service, and to requests for appeal service under § 2853.20.

§ 2853.8 When request for service deemed made.

A request for service under the regulations shall be deemed to be made when received by an office of grading. Records showing the date and time of the request shall be made and kept in such office. However, in the case of the Carcass Data Service, the purchase of official USDA eartags shall constitute a request for such service and the requisition form used to purchase the eartags shall be kept in the designated office of record.

§ 2853.9 Withdrawal of application or request for service.

An application or a request for service under the regulations may be withdrawn by the applicant at any time before the application is approved or prior to performance of service, upon payment, in accordance with §§ 2853.27 and 2853.28, of any expenses already incurred by the

Food Safety and Quality Service in connection therewith.

§ 2853.10 Authority of agent.

Proof of the authority of any person making an application or a request for service under the regulations on behalf of any other person may be required at the discretion of the Director or Chief or the official in charge of the office of grading or other employee receiving the application or request under § 2853.6.

§ 2853.11 Denial or withdrawal of service.

(a) *For misconduct—*(1) *Bases for denial or withdrawal.* An application or a request for service may be rejected, or the benefits of the service may be otherwise denied to, or withdrawn from, any person who, or whose employee or agent in the scope of his employment or agency, (i) has wilfully made any misrepresentation or has committed any other fraudulent or deceptive practice in connection with any application or request for service under the regulations; (ii) has given or attempted to give, as a loan or for any other purpose, any money, favor, or other thing of value, to any employee of the Department authorized to perform any function under the regulations; (iii) has interfered with or obstructed, or attempted to interfere with or to obstruct, any employee of the Department in the performance of his duties under the regulations by intimidation, threats, assaults, abuse, or any other improper means; (iv) has knowingly falsely made, issued, altered, forged, or counterfeited any official certificate, memorandum, mark, or other identification, or device for making any such mark or identification; (v) has knowingly uttered, published, or used as true any such falsely made, issued, altered, forged, or counterfeited certificate, memorandum, mark, identification, or device; (vi) has knowingly obtained or retained possession of any such falsely made, issued, altered, forged, or counterfeited certificate, memorandum, mark, identification, or device, or of any such official device, or of any product bearing any such falsely made, issued, altered, forged, or counterfeited mark or identification, or of any carcass or wholesale or retail cut bearing any designation specified in subdivision (vii) of this subparagraph which has not been federally graded or derived from a carcass graded as being of the indicated grade; (vii) has applied the designation "Prime," "Choice," "Good," "Standard," "Commercial," "Utility," "Cutter," "Canner," "Cull," "Medium," "No. 1," "No. 2," "No. 3," "No. 4," "Yield Grade 1," "Yield Grade 2," "Yield Grade 3," "Yield Grade 4," or "Yield Grade 5" by stamp, or brand directly on any carcass, wholesale cut, or retail cut of any carcass, as part of a grade designation; or (viii) has applied to immediate containers or shipping containers of carcasses, wholesale cuts, or retail cuts, grade designations specified in paragraph (a)(1)(vii) of this section, when such carcasses, wholesale cuts, or

retail cuts contained therein have not been federally graded; or (ix) has in any manner not specified in this paragraph violated subsection 203(h) of the Act: *Provided,* That paragraph (a)(1)(vi) of this section shall not be deemed to be violated if the person in possession of any item mentioned therein notifies the Director or Chief without delay that he has possession of such item and, in the case of an official device, surrenders it to the Chief, and, in the case of any other item, surrenders it to the Director or Chief or destroys it or brings it into compliance with the regulations by obliterating or removing the violative features under supervision of the Director or Chief: *And provided, further,* That paragraph (a)(1)(i) through (viii) of this section shall not be deemed to be violated by any act committed by any person prior to the making of an application for service under the regulations by the principal person. An application or a request for service may be rejected or the benefits of the service may be otherwise denied to, or withdrawn from, any person who operates an establishment for which he has made application for service if, with the knowledge of such operator, any other person conducting any operations in such establishment has committed any of the offenses specified in paragraph (a)(1)(i) through (ix) of this section after such application was made. Moreover, an application or a request for service made in the name of a person otherwise eligible for service under the regulations may be rejected, or the benefits of the service may be otherwise denied to, or withdrawn from, such a person (a) in case the service is or would be performed at an establishment operated (1) by a corporation, partnership, or other person from whom the benefits of the service are currently being withheld under this paragraph, or (2) by a corporation, partnership, or other person having an officer, director, partner, or substantial investor from whom the benefits of the service are currently being withheld and who has any authority with respect to the establishment where service is or would be performed, or (b) in case the service is or would be performed with respect to any product in which any corporation, partnership, or other person within paragraph (a)(1)(ix)(a)(1) of this section has a contract or other financial interest.

(2) *Procedure.* All cases arising under this paragraph shall be conducted in accordance with the rules of practice governing withdrawal of inspection and grading service under the Agricultural Marketing Act of 1946 as contained in Part 2850 of this chapter and/or the Rules of Practice Governing Formal Adjudicatory Administrative Proceedings Instituted by the Secretary as contained in 7 CFR Part 1, Subpart H, as applicable.

(b) *For miscellaneous reasons.* An application or a request for service may be rejected, or the benefits of the service may be otherwise denied to, or withdrawn from, any person, without a hearing by the official in charge of the appro-

priate office of grading, with the concurrence of the Director or Chief (1) for administrative reasons such as the nonavailability of personnel to perform the service; (2) for the failure to pay for service; (3) in case the application or request relates to products which are not eligible for service under § 2853.5 or which are unclean or are in an unclean establishment; (4) for other noncompliance with the conditions on which service is available as provided in the regulations, except matters covered by paragraph (a) of this section; or (5) in case the person is a partnership, corporation, or other person from whom the benefits of the service or currently being withheld under paragraph (a) of this section. Notice of such denial or withdrawal, and the reasons therefor, shall promptly be given to the person involved.

(c) *Filing of records.* The final orders in formal proceedings under paragraph (a) of this section to deny or withdraw the service under the regulations (except orders required for good cause to be held confidential and not cited as precedents) and other records in such proceedings (except those required for good cause to be held confidential) shall be filed with the Hearing Clerk and shall be available for inspection by persons having a proper interest therein.

§ 2853.12 Financial interest of official grader.

No official grader shall grade or determine compliance of any products in which he or any of his relatives by blood or marriage is directly or indirectly financially interested.

§ 2853.13 Accessibility and refrigeration of products; access to establishments.

(a) The applicant shall cause products, with respect to which service is requested, to be made easily accessible for examination and to be so placed, with adequate illuminating facilities, as to disclose their class, grade, other quality, and compliance. Supervisors of grading and other employees of the Department responsible for maintaining uniformity and accuracy of service under the regulations shall have access to all parts of establishments covered by approved applications for service under the regulations, for the purpose of examining all products in the establishments which have been or are to be graded or examined for compliance with specifications or which bear any marks of grade or compliance.

(b) Grading service will be furnished for meat in carcass form or wholesale cuts only if properly chilled. Determination of class, grade, or other quality of carcass meat or wholesale cuts of meat under the standards in Subpart B of this part will not be made if such carcass meat or wholesale cuts are in a frozen state.

§ 2853.14 Official certificates.

(a) *Required; exception.* The official grader shall prepare, sign, and issue either (1) an official Agricultural Prod-

RULES AND REGULATIONS

ucts Grading Certificate for products graded by him, or (2) an official Agricultural Products Acceptance Certificate covering products for which he has determined compliance except in the Beef Carcass Data Service as provided for in

§ 2853.4. In the latter case, complete records of the services shall be furnished to the office of grading.

(b) *Form.* (1) The following forms constitute forms of official certificates for products under the regulations.

[illegible][illegible]

Where weight is certified, the word "Not" shall be deleted from the phrases "Weights Not Verified."

(2) Where determination of ingredient content or method of preparation of products in acceptance service is based on a certification of the facts by the inspection system having jurisdiction of the products, this fact shall be stated on the certificates.

(c) *Distribution.* The original certificate, and not to exceed two copies, shall be delivered or mailed to the applicant or other person designated by him. The remaining copies shall be forwarded as required by agency, division, and branch instructions. Additional copies will be furnished to any person financially interested in the products involved with the

concurrence of the applicant and upon payment of fees, as provided in § 2853.27.

§ 2853.15 Advance information concerning service rendered.

Upon request of any applicant, all or any part of the contents of any certificate issued to him under the regulations, or other notification concerning the determination of class, grade, other quality, or compliance of products for such applicant may be transmitted by telegraph or telephone to him, or to any person designated by him, at his expense.

§ 2853.16 Marking of products.

All products for which class and grade under the standards in Subpart B of this part, or compliance, is determined under

the regulations, or the immediate and shipping containers thereof, shall be stamped, branded, or otherwise marked with an appropriate official identification: *Provided*, That except as otherwise directed by the Chief, such marking will not be required when an applicant only desires official certificates. The marking of products, or their containers, as required by this section shall be done by official graders or under their immediate supervision.

§ 2853.17 Official identifications.

(A) A shield enclosing the letters "USDA" and code identification letters of the grader performing the service, as shown below, constitutes a form of official identification under the regulations for preliminary grade of carcasses and wholesale cuts.

Figure 1

(b) A shield enclosing the letters "USDA" as shown below with the appropriate quality grade designation "Prime," "Choice," "Good," "Standard," "Commercial," "Utility," "Cutter," "Canner," or "Cull," as provided in the standards in Subpart B of this part and accompanied when necessary by the class designation "Bullock," "Veal," "Calf," "Lamb," "Yearling Mutton" or "Mutton," constitutes a form of official identification under the regulations to show the quality grade, and where necessary the class, under said standards, of steer, heifer, and cow beef, bullock beef, veal, calf, lamb, yearling mutton and mutton. The code identification letters of the grader performing the service will appear intermittently outside the shield.

U F

Figure 2.

(c) A shield enclosing the letters "USDA" and the words "Yield Grade," as shown below, with the appropriate yield grade designation ("1," "2," "3," "4," or "5") as provided in the standards in Subpart B of this part constitutes a form of official identification under the regulations to show the yield grade under said standards. When yield graded, bull and bullock carcasses and eligible cuts from bull and bullock carcasses will be identified with the class designation "Bull" and "Bullock," respectively. The code identification letters of the grader performing the service will appear outside the shield.

U F

Figure 1.

(d) The letters "USDA" with the appropriate grade designation "1," "2," "3," "4," "Utility," or "Cull" enclosed in a shield as shown below, as provided in standards in Subpart B of this part, constitutes a form of official identification under the regulations to show the grade under said standards of barrow, gilt, and sow pork carcasses.

Figure 2.

(e) The following constitute forms of official identification under the regulations to show compliance of products:

Figure 1

Figure 2

All identification devices used in marking products or the containers thereof under the regulations, including those indicating compliance with specifications approved by the Chief, shall be kept in the custody of the Branch, and accurate records shall be kept by the Branch of all such devices. Each office of grading shall keep a record of the devices assigned to it. Such devices shall be distributed only to persons authorized by the Department, who shall keep the devices in their possession or control at

Figure 4

Figure 5

The letters "AC," "XE," and "UF" shown in figures 1, 2, 3, and 4 are examples, respectively, of the code identification letters of the official grader performing the service.

(f) A shield-shaped eartag enclosing the letters "USDA," the words "Carcass Data Service," as shown below, and a serial number constitutes a form of official identification under the regulations for livestock and carcasses. Other information may appear on the backside of the eartag at the option of the purchasers.

§ 2853.18 Custody of identification devices.

all times and maintain complete records of such devices.

* Upon request, applicants shall provide a metal cabinet(s) or locker(s) for the secure storage of official meat grading equipment and identification devices for each Federal meat grader assigned to their establishment. Such cabinet(s) or locker(s) shall be capable of being locked with a special Government-owned lock and shall be placed in an easily accessible and reasonably secure location within the applicant's establishment.

APPEAL SERVICE

§ 2853.19 What is appeal service: marking products on appeal; requirements for appeal; certain determinations not appealable.

(a) Appeal service is a redetermination of the class, grade, other quality, or compliance of product when the applicant for the appeal service formally challenges the correctness of the original determination. Only a person who has title to, or is a party to a contract for the sale of, a product may request appeal service with respect to such product and if the original determination of class, grade, other quality or compliance is found on appeal to have been in error all incorrect marks of class, grade, other quality and compliance will be removed from the product, and if the person having title to the product so requests, correct marks as determined on the appeal will be applied to the product. Examination requested to determine the class, grade, other quality, or compliance of a product which has been altered or has undergone a material change since the original service, or examination of product requested for the purpose of obtaining an up-to-date certificate and not involving any question as to the correctness of the original service for the product involved, shall be considered equivalent to original service and not appeal service.

(b) Grade determinations for the following cannot be appealed: any lot of a product consisting of less than ten similar units; wholesale cuts, or other subdivisions of meat originally graded as larger units; and veal and calf carcasses originally graded with hides on. Moreover, appeal service will not be furnished with respect to product that has been altered or has undergone any material change since the original service.

§ 2853.20 Request for appeal service.

Except as otherwise provided in § 2853.19, a request for appeal service with respect to any product under the regulations may be made by any person who is financially interested in the product when he disagrees with the determination as to class, grade, other quality, or compliance of the product as shown by the markings on the product or its containers, or as stated in the applicable certificate. A request for appeal service shall be filed with the Chief, directly or through the official grader who performed the original service or the official in charge of the office of grading to which such grader was assigned at the

time of the service, or through the nearest office of grading. The request shall state the reasons therefor and may be accompanied by a copy of any previous certificate or report, or any other information which the applicant may have received regarding the product at the time of the original service. Such request may be made orally (including by telephone) or in writing (including by telegram). If made orally, the person receiving the request may require that it be confirmed in writing. Requests for appeal service received through an official grader or an office of grading shall be transmitted promptly to the Chief for instructions.

§ 2853.21 When request for appeal service may be withdrawn.

A request for appeal service may be withdrawn by the applicant at any time before the appeal service has been performed, upon payment of any expenses already incurred under the regulations by the Branch in connection therewith.

§ 2853.22 Denial or withdrawal of appeal service.

A request for appeal service may be rejected or such service may be otherwise denied to or withdrawn from any person, without a hearing, in accordance with the procedure set forth in § 2853.11(b), if it shall appear that the person or product involved is not eligible for appeal service under § 2853.19, or that the identity of the product has been lost; or for any of the causes set forth in § 2853.11(b). Appeal service may also be denied to, or withdrawn from, any person in any case under § 2853.11(a), in accordance with the procedure set forth in said section.

§ 2853.23 Who shall perform appeal service.

Appeal service for products shall be performed by official graders designated by the Chief or by the official in charge of an office of grading when so authorized by the Chief, and shall be conducted jointly by two official graders, or more when practicable. No official grader shall perform appeal service for any product for which he previously performed the service.

§ 2853.24 Appeal certificates.

Immediately after appeal service has been performed for any products, a certificate designated as an "appeal certificate" shall be prepared, signed, and issued referring specifically to the original certificate and stating the class, grade, other quality, or compliance of the products as shown by the appeal service.

§ 2853.25 Superseded certificates.

The appeal certificate shall supersede the original certificate which, thereupon, shall become null and void and shall not thereafter be deemed to show the class, grade, other quality, or compliance of the products described therein. However, the fees charged for the original service shall not be remitted. If the original and all copies of the superseded certificate are not delivered to the official

with whom the request for appeal service is filed, the official graders issuing the appeal certificate shall forward notice of such issuance and of the cancellation of the original certificate to such persons as they may deem necessary to prevent fraudulent use of the superseded certificate.

§ 2853.26 Application of other regulations to appeal service.

The regulations in § 2853.1 through § 2853.18 and § 2853.27 through § 2853.30 shall apply to appeal service except insofar as they are manifestly inapplicable.

CHARGES FOR SERVICE

§ 2853.27 Fees and other charges for service.

Fees and other charges equal as nearly as may be to the cost of the services rendered shall be assessed and collected from applicants in accordance with the following provisions unless otherwise provided in the cooperative agreement under which the services are furnished, or as provided in § 2853.6.

(a) Fees based on hourly rates. Except as otherwise provided in this section, fees for service shall be based on the time required to render the service, calculated to the nearest 15-minute period, including the time required for the preparation of certificates and travel of the official grader in connection with the performance of the service. A minimum charge for one-half hour shall be made for service pursuant to each request notwithstanding that the time required to perform the service may be less than 30 minutes. The base hourly rate shall be \$19.00 per hour for work performed between the hours of 6 a.m. and 6 p.m. Monday through Friday, except on legal holidays; \$23.00 per hour for work performed before 6 a.m. or after 6 p.m. Monday through Friday, and anytime Saturday or Sunday except on legal holidays; and \$38.00 per hour for all work performed on legal holidays.

(b) Fees for service on commitment basis. Minimum fees for service performed under a commitment agreement shall be on the basis of 8 hours per day, Monday through Friday, calculated at the hourly rates in accordance with paragraph (a) of this section. Hours worked on Saturdays, Sundays, legal holidays, and in excess of 8 hours per day will be charged at the appropriate hourly rate in accordance with paragraph (a) of this section. The Food Safety and Quality Service reserves the right under such a commitment to use any grader assigned to the plant on a commitment basis to perform service for other applicants as provided in § 2853.6(c), crediting the commitment applicant with the number of hours charged to the other applicants, provided the allowable credit hours, plus hours actually worked for the applicants, do not exceed 8 hours on any day, Monday through Friday.

(c) Travel Charges. When service is requested at a place so distant from an official grader's headquarters, or place of prior assignment on a circuitous route

ing that a total of one-half hour or more is required for the grader to travel to such place and back to the headquarters, or to the next place of assignment on a circuitous route, the charge for such service shall include a mileage charge administratively determined by the Chief, and travel tolls, if applicable, for such travel prorated against all the applicants furnished the service involved on an equitable basis, or where the travel is made by public transportation (including hired vehicles), a fee equal to the actual cost thereof. However, the applicant will not be charged a new mileage rate without notification before the service is rendered.

(d) Per diem charges. When service is requested at a place away from the official grader's headquarters, the fee for such service shall include a per diem charge if the employee performing the service is paid per diem in accordance with existing travel regulations. Per diem charges to applicants will cover the same period of time for which the grader receives per diem reimbursement. The per diem rate will be administratively determined by the Chief. However, the applicant will not be charged a new per diem rate without notification before the service is rendered.

(e) Fees for appeal service. Fees for appeal service shall be determined on the basis of the time, of two official graders, required to render the service, calculated to the nearest fifteen minute period, including the time required for the preparation of certificates and travel of such graders in connection with the performance of the service, at the applicable hourly rate prescribed in paragraph (a) of this section, plus any travel charges and per diem for such graders ordinarily chargeable under paragraphs (c) and (d) of this section: Provided, That when on appeal it is found that there was error in the original determination equal to or exceeding ten percent of the total number of similar units of the products involved, no charge will be made for the appeal service unless a special agreement therefor was made with the applicant in advance.

(f) Fees for extra copies of certificates. In addition to copies of certificates furnished under § 2853.14, any financially interested person may obtain not to exceed three copies of any such certificate within one year from its date of issuance upon payment of a fee of \$1.00, and not to exceed three copies of any such certificate at any time thereafter, while a copy of such certificate is on file in the Department, upon payment of a fee of \$5.00.

(g) Other charges. When costs, other than costs specified in paragraphs (a), (b), (c), (d), (e), and (f) of this section, are involved in providing the services, the applicant will be charged for these costs. The amount of these charges will be determined administratively by the Chief. However, the applicant will not be charged for such cost without notification before the service is rendered of the charge for such item of expense.

§ 2853.28 Payment of fees and other charges.

Fees and other charges for service shall be paid in accordance with the following provisions unless otherwise provided in the cooperative agreement under which the service is furnished. Upon receipt of billing for fees and other charges for service the applicant shall remit by check, draft, or money order, made payable to the Food Safety and Quality Service, U.S.D.A., payment for the service in accordance with directions on the billing, and such fees and charges shall be paid in advance if required by the official grader or other authorized official.

MISCELLANEOUS

§ 2853.29 Identification.

All official graders and supervisors of grading shall have their Food Safety and Quality Service identification cards in their possession at all times while they are performing any function under the regulations and shall identify themselves by such cards upon request.

§ 2853.30 Errors in service.

When an official grader, supervisor of grading, or other responsible employee of the Branch has evidence of misgrading, or of incorrect certification or other incorrect determination or identification as to the class, grade, other quality, or compliance of a product, he shall report the matter to his immediate supervisor. The supervisor of grading will investigate the matter and, if he deems advisable, will report it to the owner or his agent. The supervisor of grading shall take appropriate action to correct errors found in the determination or identification of class, grade or other quality or compliance of products if the products are still owned by the person who owned them when, and are still located at the establishment where, the incorrect service was rendered and if such service was rendered by a grader under the jurisdiction of such supervisor, and the supervisor of grading shall take adequate measures to prevent the recurrence of such errors.

Subpart B—Standards

CARCASS BEEF

§ 2853.102 Scope.

These standards for grades of beef are written primarily in terms of carcasses. However, they also are applicable to the grading of sides, quarters, and certain other parts of carcasses. To simplify phrasing of the standards, the words "carcass" and "carcasses" are used also to mean all parts of carcasses which are eligible for grading.

§ 2853.103 Classes of beef carcasses.

(a) Class determination of beef carcasses is based on evidences of maturity and apparent sex condition at the time of slaughter. The classes of beef carcasses are steers, bullocks, bulls, heifers, and cows. Carcasses from males—steers, bullocks, and bulls—are distinguished from carcasses from females—heifers and cows—as follows:

(1) Steer, bullock, and bull carcasses have a "pizzle muscle" (attachment of the penis) and related "pizzle eye" adjacent to the posterior end of the aitchbone.

(2) Steer, bullock, and bull carcasses have, if present, rather rough, irregular fat in the region of the cod. In heifer and cow carcasses, the fat in this region—if present—is much smoother.

(3) In steer, bullock, and bull carcasses, the area of lean exposed immediately ventral to the aitchbone is much smaller than in heifer and cow carcasses.

(b) Steer, bullock, and bull carcasses are distinguished by the following:

(1) In steer carcasses, the "pizzle muscle" is relatively small, light red in color, and fine in texture and the related "pizzle eye" is relatively small.

(2) In bullock and bull carcasses, the "pizzle muscle" is relatively large, dark red in color, and coarse in texture and the related "pizzle eye" is relatively large.

(3) Bullock and bull carcasses usually have a noticeable crest.

(4) Bullock and bull carcasses also usually have a noticeably developed small round muscle adjacent to the hipbone commonly referred to as the "jump muscle." However, in carcasses with a considerable amount of external fat, the development of this muscle may be obscured.

(5) Although the development of the secondary sex characteristics is given primary consideration in distinguishing steer carcasses from bullock or bull carcasses, this differentiation is also facilitated by consideration of the color and texture of the lean. In bullock and bull carcasses, the lean is frequently at least dark red in color with a dull, "muddy" appearance—and in some cases it may have an iridescent sheen. Also, it frequently has an "open" texture. In distinguishing between these classes when grading wholesale cuts in which the secondary sex characteristics are absent or normally not well developed—especially ribs and loins—consideration of the color and texture of the lean necessarily must receive the major emphasis.

(6) The distinction between bullock and bull carcasses is based solely on their evidences of skeletal maturity. Carcasses with the maximum maturity permitted in the bullock class have slightly red and slightly soft chine bones, and the cartilages on the ends of the thoracic vertebrae have some evidences of ossification; the sacral vertebrae are completely fused; the cartilages on the ends of the lumbar vertebrae are nearly completely ossified; and the rib bones are slightly wide and slightly flat. Bull carcasses have evidences of more advanced maturity.

(c) Heifer and cow carcasses are distinguished by the following:

(1) Heifer carcasses have a relatively small pelvic cavity and a slightly curved aitchbone. In cow carcasses, the pelvic cavity is relatively large and the aitchbone is nearly straight.

(2) In heifer carcasses, the udder usually will be present. In cow carcasses the

udder usually will have been removed. However, neither of these are requirements.

§ 2853.104 Application of Standards for Grades of Carcass Beef.

(a) The grade of a steer, heifer, cow, or bullock carcass consists of separate evaluations of two general considerations: (1) The indicated percent of trimmed, boneless, major retail cuts to be derived from the carcass, herein referred to as the "yield grade," and (2) the palatability-indicating characteristics of the lean herein referred to as the "quality grade." When officially graded, the grade of a steer, heifer, cow, or bullock carcass consists of both the quality grade and the yield grade. Each of the quality and yield grade designations must remain on grade-identified carcasses, sides, quarters, and untrimmed wholesale cuts unless both such designations are removed. However, for subprimal and retail cuts, and for wholesale cuts which have been substantially trimmed of external fat, the yield grade designation may be removed. For labeling and other related purposes, the grade of such items may consist of the quality designation only. The grade of a bull carcass consists of the yield grade only.

(b) The carcass beef grade standards are written so that the quality grade and yield grade standards are contained in separate sections. The quality grade section is divided further into two separate sections applicable to carcasses from (1) steers, heifers, and cows, and (2) bullocks. Eight quality grade designations—Prime, Choice, Good, Standard, Commercial, Utility, Cutter, and Canner—are applicable to steer and heifer carcasses. Except for Prime, the same designations apply to cow carcasses. The quality grade designations for bullock carcasses are Prime, Choice, Good, Standard, and Utility. There are five yield grades applicable to all classes of beef, denoted by numbers 1 through 5, with Yield Grade 1 representing the highest degree of cutability.

(c) When officially graded, bullock and bull beef will be further identified for its sex condition; steer, heifer, and cow beef will not be so identified. The designated grades of bullock beef are not necessarily comparable in quality or cutability with a similarly designated grade of beef from steers, heifers, or cows. Neither is the cutability of a designated yield grade of bull beef necessarily comparable with a similarly designated yield grade of steer, heifer, cow, or bullock beef.

(d) The Department uses photographs and other objective aids in the correct interpretation and application of the standards.

(e) To determine the grade of a carcass, it must be split down the back into two sides and one or both sides must be partially separated into a hindquarter and forequarter by cutting it with a saw and knife insofar as practicable, as follows: A saw cut perpendicular to both the long axis and split surface of the vertebral column is made across the 12th

thoracic vertebra at a point which leaves not more than one-half of this vertebra on the hindquarters. The knife cut across the ribeye muscle starts—or terminates—opposite the above-described saw cut. From that point it extends across the ribeye muscle perpendicular to the outside skin surface of the carcass at an angle toward the hindquarter which is slightly greater (more nearly horizontal) than the angle made by the 13th rib with the vertebral column of the hindquarter posterior to that point. As a result of this cut, the outer end of the cut surface of the ribeye muscle is closer to the 12th rib than is the end next to the chine bone. Beyond the ribeye, the knife cut shall continue between the 12th and 13th ribs to a point which will adequately expose the distribution of fat and lean in this area. The knife cut may be made prior to or following the saw cut but must be smooth and even, such as would result from a single stroke of a very sharp knife.

(f) Other methods of ribbing may prevent an accurate evaluation of the grade determining characteristics. Therefore, carcasses ribbed by other methods will be eligible for grading only if an accurate grade determination can be made by the official grader under the standards.

(g) Beveling of the fat over the ribeye, application of pressure, or any other influences which alter the characteristics of the ribeye or the thickness of fat over the ribeye may prevent an accurate grade determination. Therefore, carcasses subjected to such influences may not be eligible for a grade determination. Also, carcasses with more than minor amounts of lean removed from the major sections of the round, loin, rib, or chuck will not be eligible for a grade determination.

(h) When both sides of a carcass have been ribbed prior to presentation for grading and the characteristics of the two ribeyes (area, marbling, color, texture, and firmness) would justify different quality and/or yield grades, the final grade of the carcass shall reflect the "highest" of each of these grades as determined from either side.

(i) The quality grade and yield grade descriptions are defined primarily in terms of beef carcasses. However, they also apply to the grading of hindquarters, forequarters, and certain individual primal cuts—loins, short loins, and ribs. A portion of these or other primal cuts as well as plates, flanks, shanks, and briskets likewise can be graded if attached by their natural attachments to a rib, loin, or short loin. Since bull carcasses are eligible for yield grade only, they may be graded only as carcasses, sides, or hindquarters. This is because yield grades for forequarters and forequarter cuts and for trimmed hindquarters and trimmed hindquarter cuts include consideration of standard percentages of kidney, pelvic, and heart fat based on the quality grade. Other special major cuts or carcasses ribbed other than between the 12th and 13th ribs may be approved for grading by the Food Safety and Quality Service provided such devi-

ations are necessary to meet either the demand of export trade or changing trade practices. In such cases, grading shall be based on the requirements specified in these standards and shall be consistent with the normal development of grade characteristics in various parts of a carcass of the quality level involved.

(j) Carcasses qualifying for any particular grade may vary with respect to their relative development of the various grade factors. There will be carcasses which qualify for a particular grade, some of whose characteristics may be more nearly typical of another grade. For example, in comparison with the descriptions of maturity contained in the standards, a particular carcass might have a greater relative degree of ossification of the cartilages on the ends of its lumbar vertebrae than its other evidences of maturity. In such instances, the maturity of the carcass is not determined solely by the ossification of the lumbar vertebrae but neither is this ignored. All of the maturity-indicating factors are considered. In making any composite evaluation of two or more factors, it must be remembered that they seldom are developed to the same degree. Because it is impractical to describe the nearly limitless number of recognizable combinations of characteristics, the standards for each quality grade and yield grade describe only beef which has a relatively similar degree of development of the various factors affecting its quality and yield. Also, the quality grade and yield grade standards each describe beef which is representative of the lower limits of each quality grade and yield grade.

(k) For steer, heifer, and cow beef, quality of the lean is evaluated by considering its marbling and firmness as observed in a cut surface in relation to carcass evidences of maturity. The maturity of the carcass is determined by evaluating the size, shape, and ossification of the bones and cartilages—especially the split chine bones—and the color and texture of the lean flesh. In the split chine bones, ossification changes occur at an earlier stage of maturity in the posterior portion of the vertebral column (sacral vertebrae) and at progressively later stages of maturity in the lumbar and thoracic vertebrae. The ossification changes that occur in the cartilages on the ends of the split thoracic vertebrae are especially useful in evaluating maturity and these vertebrae are referred to frequently in the standards. Unless otherwise specified in the standards, whenever reference is made to the ossification of cartilages on the thoracic vertebrae, this shall be construed to refer to the cartilages attached to the thoracic vertebrae at the posterior end of the forequarter. The size and shape of the rib bones also are important considerations in evaluating differences in maturity. In the very youngest carcasses considered as "beef," the cartilages on the ends of the chine bones show no ossification, cartilage is evident on all of the vertebrae of the spinal column, and the sacral vertebrae show distinct

separation. In addition, the split vertebrae usually are soft and porous and very red in color. In such carcasses, the rib bones have only a slight tendency toward flatness. In progressively more mature carcasses, ossification changes become evident first in the bones and cartilages of the sacral vertebrae, then in the lumbar vertebrae, and still later in the thoracic vertebrae. In beef which is very advanced in maturity, all the split vertebrae will be devoid of red color, very hard and flinty, and the cartilages on the ends of all the vertebrae will be entirely ossified. Likewise, with advancing maturity, the rib bones will become progressively wider and flatter until in very mature beef the ribs will be very wide and flat.

(l) In steer, heifer, and cow beef, the color and texture of the lean flesh also undergo progressive changes with advancing maturity. In the very youngest carcasses considered as "beef," the lean flesh will be very fine in texture and light grayish red in color. In progressively more mature carcasses, the texture of the lean will become progressively coarser and the color of the lean will become progressively darker red. In very mature beef, the lean flesh will be very coarse in texture and very dark red in color. Since color of lean also is affected by variations in quality, references to color of lean in the standards for a given degree of maturity vary slightly with different levels of quality. In determining the maturity of a carcass in which the skeletal evidences of maturity are different from those indicated by the color and texture of the lean, slightly more emphasis is placed on the characteristics of the bones and cartilages than on the characteristics of the lean. In no case can the overall maturity of the carcass be considered more than one full maturity group different from that indicated by its bones and cartilages.

(m) The preceding two paragraphs also are applicable to the determination of quality in bullock beef except for carcasses having darker colors of lean than specified in the standards for the quality level for which they would otherwise qualify. In such carcasses, maturity will be evaluated on the basis of skeletal characteristics only, and the final grade will be determined in accordance with the procedures specified in the standards for grading "dark-cutting beef."

(n) In determining compliance with the maximum maturity limits for the Prime, Choice, Good, and Standard grades for steer, heifer, and cow carcasses, color and texture of the lean are considered only when the maturity-indicating factors other than color and texture of the lean indicate only a slightly more advanced degree of maturity than that specified as maximum for these grades, and provided further that the lean is considerably finer in texture and lighter in color than normal for the grade and maturity involved. The same principle, in reverse, is likewise applicable to determining compliance with the minimum maturity limits of the Commercial grade.

(c) These standards are applicable to the grading of beef throughout the full range of maturity within which cattle are marketed. However, in steer, heifer, and cow carcasses, the range of maturity permitted within each of the grades varies considerably. The Prime, Choice, Good, and Standard grades are restricted to beef from young cattle; the Commercial grade is restricted to beef from cattle too mature for Prime, Choice, Good, and Standard, and the Utility, Cutter, and Canner grades may include beef from animals of all ages. By definition, bullock carcasses are restricted to those whose evidences of maturity do not exceed those specified for the juncture of the two youngest maturity groups referenced in the standards for steer, heifer, and cow carcasses. Except for the youngest maturity group, within any specified grade, the requirements for marbling increase progressively with evidences of advancing maturity. In the youngest maturity group, the marbling requirements do not increase progressively with evidences of advancing maturity. For each grade, the firmness requirements are different for each maturity group, but, within each maturity group, the firmness require-

ments do not increase progressively with evidences of advancing maturity. Also, regardless of the extent to which marbling may exceed the minimum of a grade, a carcass must meet the minimum firmness requirements for its maturity to qualify for that grade. To facilitate the application of these principles, the standards recognize five different maturity groups and seven different degrees of marbling. The five maturity groups are identified in Figure 1 as A, B, C, D, and E in order of increasing maturity. The limits of these five maturity groups are specified in the grade descriptions for steer, heifer, and cow carcasses. The A maturity portion of the figure is the only portion applicable to bullock carcasses. The degrees of marbling referenced in the specifications, in order of descending quantity are: Slightly abundant, moderate, modest, small, slight, traces, and practically devoid. However, for carcass evaluation programs and other purposes, three higher degrees are recognized—moderately abundant, abundant, and very abundant. Illustrations of the lower limits of nine of these ten degrees of marbling are available from the Department of Agriculture.

RELATIONSHIP BETWEEN MARBLING, MATURITY, AND CARCASS QUALITY GRADE*

* Assumes that firmness of lean is comparably developed with the degree of marbling and that the carcass is not a "dark cutter."
 ** Maturity increases from left to right (A through E).
 *** The A maturity portion of the figure is the only portion applicable to bullock carcasses.

Figure 1

(p) The relationship between marbling, maturity, and quality grade is shown in Figure 1. This figure assumes that the firmness of lean is comparably developed with the degree of marbling and that the carcass is not a "dark cutter." From this figure it can be seen, for instance, that the minimum marbling requirement for Choice varies from a minimum small amount for carcasses throughout the youngest maturity group to a maximum small amount for carcasses having the maximum maturity permitted in Choice. Likewise, in the Commercial grade the minimum marbling requirement varies from a minimum small amount in beef with the minimum maturity permitted to a maximum moderate amount in beef from very mature animals. The marbling and other lean flesh characteristics specified for the various grades are based on their appearance in the ribeye muscle of properly

chilled carcasses that are ribbed between the 12th and 13th ribs. For carcass evaluation programs and other purposes, in the Prime and Commercial grades, each additional degree of marbling (up to three) greater than specified as minimum for each of these grades is equal to one-third of a grade of higher quality.

(q) References to color of lean in the standards for steer, heifer, and cow beef involve only colors associated with changes in maturity. They are not intended to apply to colors of lean associated with so-called "dark-cutting beef." Dark-cutting beef is believed to be the result of a reduced sugar content of the lean at the time of slaughter. As a result, this condition does not have the same significance in grading as do the darker shades of red associated with advancing maturity. The dark color of the lean associated with "dark-cutting beef" is present in varying degrees from that

which is barely evident to so-called "black cutters" in which the lean is actually nearly black in color and usually has a "gummy" texture. Although there is little or no evidence which indicates that the "dark cutting" condition has any adverse effect on palatability, it is considered in grading because of its effect on acceptability and value. Depending on the degree to which this characteristic is developed, the final grade of carcasses which otherwise would qualify for the Prime, Choice, or Good grades may be reduced as much as one full grade. In beef otherwise eligible for the Standard or Commercial grade, the final grade may be reduced as much as one-half of a grade. In the Utility, Cutter, and Canner grades, this condition is not considered.

(r) The yield grade of a beef carcass is determined by considering four characteristics: (1) The amount of external fat, (2) the amount of kidney, pelvic, and heart fat, (3) the area of the ribeye muscle, and (4) the carcass weight.

(s) The amount of external fat on a carcass is evaluated in terms of the thickness of this fat over the ribeye muscle, measured perpendicular to the outside surface at a point three-fourths of the length of the ribeye from its chine bone end. This measurement may be adjusted, as necessary, to reflect unusual amounts of fat on other parts of the carcass. In determining the amount of this adjustment, if any, particular attention is given to the amount of fat in such areas as the brisket, plate, flank, cod or udder, inside round, rump, and hips in relation to the actual thickness of fat over the ribeye. Thus, in a carcass which is fatter over other areas than is indicated by the fat measurement over the ribeye, the measurement is adjusted upward. Conversely, in a carcass which has less fat over the other areas than is indicated by the fat measurement over the ribeye, the measurement is adjusted downward. In many carcasses no such adjustment is necessary; however, an adjustment in the thickness of fat measurement of one-tenth or two-tenths of an inch is not uncommon. In some carcasses a greater adjustment may be necessary. As the amount of external fat increases, the percent of retail cuts decreases—each one-tenth inch change in adjusted fat thickness over the ribeye changes the yield grade by 25 percent of a yield grade.

(t) The amount of kidney, pelvic, and heart fat considered in determining the yield grade includes the kidney knob (kidney and surrounding fat), the lumbar and pelvic fat in the loin and round, and the heart fat in the chuck and brisket area which are removed in making closely trimmed retail cuts. The amount of these fats is evaluated subjectively and expressed as a percent of the carcass weight. As the amount of kidney, pelvic, and heart fat increases, the percent of retail cuts decreases—a change of 1 percent of the carcass weight in these fats changes the yield grade by 20 percent of a yield grade.

(u) The area of the ribeye is determined where this muscle is exposed by ribbing. This area usually is estimated

subjectively; however, it may be measured. Area of ribeye measurements may be made by means of a grid calibrated in tenths of a square inch or by other devices designated by the Food Safety and Quality Service of the U.S. Department of Agriculture. An increase in the area of ribeye increases the percent of retail cuts—a change of 1 square inch in area of ribeye changes the yield grade by approximately 30 percent of a yield grade.

(v) Hot carcass weight (or chilled carcass weight x 102 percent) is used in determining the yield grade. As carcass weight increases, the percent of retail cuts decreases—a change of 100 pounds in hot carcass weight changes the yield grade by approximately 40 percent of a yield grade.

(w) The standards include a mathematical equation for determining yield grade. This grade is expressed as a whole number; any fractional part of a designation is always dropped. For example, if the computation results in a designation of 3.9, the final grade is 3—it is not rounded to 4.

(x) The yield grade standards for each of the first four yield grades list characteristics of two carcasses of two different weights together with descriptions of the usual fat deposition pattern on various areas of the carcass. These descriptions are not specific requirements—they are included only as illustrations of carcasses which are near the borderlines between groups. For example, the characteristics listed for Yield Grade 1 represent carcasses which are near the borderline of Yield Grades 1 and 2.

These descriptions facilitate the subjective determination of the yield grade without making detailed measurements and computations. The yield grade for most beef carcasses can be determined accurately on the basis of a visual appraisal.

§ 2853.105 Specifications for official United States standards for grades of carcass beef (yield).

(a) The yield grade of a beef carcass is determined on the basis of the following equation: Yield grade = $2.50 + (2.50 \times \text{adjusted fat thickness, inches}) + (0.20 \times \text{percent kidney, pelvic, and heart fat}) + (0.0038 \times \text{hot carcass weight, pounds}) - (0.32 \times \text{area ribeye, square inches})$.

(b) (1). The yield grade of a hindquarter, forequarter, or cut eligible for grading also is determined on the basis of the above equation in which the hot carcass weight is determined by multiplying the chilled weight of the cut by an appropriate factor as applicable to the cut and its style of preparation.

(2) The factors shown below shall be applicable to hindquarters and forequarters produced by ribbing as described herein, and to ribs, trimmed full

¹ Information concerning such devices may be obtained from the Food Safety and Quality Service, Meat Quality Division.

loins, and trimmed short loins which are trimmed as described in Items 103, 172, and 173, respectively, of the Institutional Meat Purchase (IMP) Specifications for Fresh Beef—Series 100, as revised October 1961.

	Factor
Forequarter	3.90
Hindquarter	4.25
Rib	22.50
Loin, full, trimmed	12.75
Short Loin, trimmed	29.10

(3) A slightly larger factor, appropriate to reflect the weight of the cut as a percent of hot carcass weight, shall be used for ribs, full loins, or short loins which are more closely trimmed than described in the referenced IMP Specifications. Similarly, a smaller factor shall be used for determining the yield grade of these cuts when trimmed less closely than specified or when they include portions or all of adjacent cuts.

(4) In addition, for forequarters and forequarter cuts and for trimmed hindquarters and trimmed hindquarter cuts, the following standard percentages of kidney, pelvic, and heart fat, as applicable to the quality grade of the quarter or cut, also shall be used in the equation:

Grade:	Kidney, pelvic, and heart fat percent
Prime	4.5
Choice	8.5
Good	8.0
Standard	2.0
Commercial	4.0
Utility	2.0
Cutter and Canner	1.5

(5) For untrimmed hindquarters and for untrimmed hindquarter cuts, the quantity of kidney and pelvic fat is estimated as a percent of the hot side weight.

(c) The following descriptions provide a guide to the characteristics of carcasses in each yield grade to aid in determining yield grades subjectively.

(1) **Yield Grade 1.** (i) A carcass in yield grade 1 usually has only a thin layer of external fat over the ribs, loins, rumps, and clods and slight deposits of fat in the flanks and cod or udder. There is usually a very thin layer of fat over the outside of the rounds and over the tops of the shoulders and necks. Muscles are usually visible through the fat in many areas of the carcass.

(ii) A 500-pound carcass of this yield grade which is near the borderline of yield grades 1 and 2 might have three-tenths inch of fat over the ribeye, 11.5 square inches of ribeye, and 2.5 percent of its weight in kidney, pelvic, and heart fat.

(iii) An 800-pound carcass of this yield grade which is near the borderline of yield grades 1 and 2 might have four-tenths inch of fat over the ribeye, 16.0 square inches of ribeye, and 2.5 percent of its weight in kidney, pelvic, and heart fat.

(2) **Yield Grade 2.** (i) A carcass in yield grade 2 usually is nearly completely covered with fat but the lean is plainly visible through the fat over

the outside of the rounds, the tops of shoulders, and the necks. There usually is a slightly thin layer of fat over the loins, ribs, and inside rounds and the fat over the rumps, hips, and clods usually is slightly thick. There are usually small deposits of fat in the flanks and cod or udder.

(ii) A 500-pound carcass of this yield grade which is near the borderline of yield grades 2 and 3 might have five-tenths inch of fat over the ribeye, 10.5 square inches of ribeye, and 3.5 percent of its weight in kidney, pelvic, and heart fat.

(iii) An 800-pound carcass of this yield grade which is near the borderline of yield grades 2 and 3 might have six-tenths inch of fat over the ribeye, 15.0 square inches of ribeye, and 3.5 percent of its weight in kidney, pelvic, and heart fat.

(3) **Yield Grade 3.** (i) A carcass in yield grade 3 usually is completely covered with fat and the lean usually is visible through the fat only on the necks and the lower part of the outside of the rounds. There usually is a slightly thick layer of fat over the loins, ribs, and inside rounds and the fat over the rumps, hips, and clods usually is moderately thick. There usually are slightly large deposits of fat in the flanks and cod or udder.

(ii) A 500-pound carcass of this yield grade which is near the borderline of yield grades 3 and 4 might have seven-tenths inch of fat over the ribeye, 9.5 square inches of ribeye, and 4.0 percent of its weight in kidney, pelvic, and heart fat.

(iii) An 800-pound carcass of this yield grade which is near the borderline of yield grades 3 and 4 might have eight-tenths inch of fat over the ribeye, 14.0 square inches of ribeye, and 4.5 percent of its weight in kidney, pelvic, and heart fat.

(4) **Yield Grade 4.** (i) A carcass in yield grade 4 usually is completely covered with fat. The only muscles usually visible are those on the shanks and over the outside of the plates and flanks. There usually is a moderately thick layer of fat over the loins, ribs, and inside rounds and the fat over the rumps, hips, and clods usually is thick. There usually are large deposits of fat in the flanks and cod or udder.

(ii) A 500-pound carcass of this yield grade which is near the borderline of yield grades 4 and 5 might have one inch of fat over the ribeye, 9.0 square inches of ribeye, and 4.5 percent of its carcass weight in kidney, pelvic, and heart fat.

(iii) A 800-pound carcass of this yield grade which is near the borderline of yield grades 4 and 5 might have one and one-tenth inch of fat over the ribeye, 13.5 square inches of ribeye, and 5.0 percent of its weight in kidney, pelvic, and heart fat.

(5) **Yield Grade 5.** A carcass in yield grade 5 usually has more fat on all of the various parts, a smaller area of ribeye, and more kidney, pelvic, and heart fat than a carcass in yield grade 4.

§ 2853.106 Specifications for Official United States Standards for Grades of Carcass Beef (Quality—Steer, Heifer, Cow).

(a) *Prime*. (1) Depending on their degree of maturity, beef carcasses possessing the minimum requirements for the Prime grade vary in their other indications of quality as evidenced in the ribeye muscle. Minimum quality characteristics are described for two maturity groups which cover the entire range of maturity permitted in the Prime grade.

(2) Carcasses in the younger group range from the youngest that are eligible for the beef class to those at the juncture of the two maturity groups, which have slightly red and slightly soft chine bones and cartilages on the ends of the thoracic vertebrae that have some evidence of ossification. In addition, the sacral vertebrae are completely fused and the cartilages on the ends of the lumbar vertebrae are nearly completely ossified. The rib bones are slightly wide and slightly flat and the ribeye muscle is light red in color and is fine in texture. In carcasses throughout the range of maturity included in this group, a minimum slightly abundant amount of marbling is required (see Figure 1) and the ribeye muscle is moderately firm.

(3) Carcasses in the older group range from those described above as representative of the juncture of the two groups to those at the maximum maturity permitted in the Prime grade, which have chine bones tinged with red and cartilages on the ends of the thoracic vertebrae that are partially ossified. In addition, the sacral vertebrae are completely fused, the cartilages on the ends of the lumbar vertebrae are completely ossified, and the cut surface of the lean tends to be fine in texture. The minimum degree of marbling required increases with advancing maturity throughout this group from minimum slightly abundant to maximum slightly abundant (see Figure 1) and the ribeye muscle is firm.

(4) Beef produced from cows is not eligible for the Prime grade.

(b) *Choice*. (1) Depending on their degree of maturity, beef carcasses possessing the minimum requirements for the Choice grade vary in their other indications of quality as evidenced in the ribeye muscle. Minimum quality characteristics are described for two maturity groups which cover the entire range of maturity permitted in the Choice grade.

(2) Carcasses in the younger group range from the youngest that are eligible for the beef class to those at the juncture of the two maturity groups, which have slightly red and slightly soft chine bones and cartilages on the ends of the thoracic vertebrae that have some evidence of ossification. In addition, the sacral vertebrae are completely fused and the cartilages on the ends of the lumbar vertebrae are nearly completely ossified. The rib bones are slightly wide and slightly flat and the ribeye muscle is moderately light red in color and is fine in texture. In carcasses throughout the range of maturity included in this group,

a minimum small amount of marbling is required (see Figure 1) and the ribeye muscle may be slightly soft.

(3) Carcasses in the older group range from those described above as representative of the juncture of the two groups to those at the maximum maturity permitted in the Choice grade, which have chine bones tinged with red and cartilages on the ends of the thoracic vertebrae that have some evidence of ossification. In addition, the sacral vertebrae are completely fused, the cartilages on the ends of the lumbar vertebrae are completely ossified, and the cut surface of the lean tends to be fine in texture. The minimum degree of marbling required increases with advancing maturity throughout this group from a minimum small amount to a maximum small amount (see Figure 1) and the ribeye muscle is slightly firm.

(c) *Good*. (1) Depending on their degree of maturity, beef carcasses possessing the minimum requirements for the Good grade vary in their other indications of quality as evidenced in the ribeye muscle. Minimum quality characteristics are described for two maturity groups which cover the entire range of maturity permitted in the Good grade.

(2) Carcasses in the younger group range from the youngest that are eligible for the beef class to those at the juncture of the two maturity groups, which have slightly red and slightly soft chine bones and cartilages on the ends of the thoracic vertebrae that have some evidence of ossification. In addition, the sacral vertebrae are completely fused and the cartilages on the ends of the lumbar vertebrae are nearly completely ossified. The rib bones are slightly wide and slightly flat and the ribeye muscle is slightly light red in color and is fine in texture. In carcasses throughout the range of maturity included in this group, a minimum slight amount of marbling is required (see Figure 1) and the ribeye may be moderately soft.

(3) Carcasses in the older group range from those described above as representative of the juncture of the two groups to those at the maximum maturity permitted in the Good grade which have chine bones tinged with red and cartilages on the ends of the thoracic vertebrae that are partially ossified. In addition, the sacral vertebrae are completely fused, the cartilages on the ends of the lumbar vertebrae are completely ossified, and the cut surface of the lean tends to be fine in texture. The minimum degree of marbling required increases with advancing maturity throughout this group from a minimum slight amount to a maximum slight amount (see Figure 1) and the ribeye muscle may be slightly soft.

(d) *Standard*. (1) Depending on their degree of maturity, beef carcasses possessing the minimum requirements for the Standard grade vary in their other indications of quality as evidenced in the ribeye muscle. Minimum quality characteristics are described for two maturity groups which cover the entire range of

maturity permitted in the Standard grade.

(2) Carcasses in the younger group range from the youngest that are eligible for the beef class to those at the juncture of the two maturity groups, which have slightly red and slightly soft chine bones and cartilages on the ends of the thoracic vertebrae that have some evidence of ossification. In addition, the sacral vertebrae are completely fused and the cartilages on the ends of the lumbar vertebrae are nearly completely ossified. The rib bones are slightly wide and slightly flat and the ribeye muscle is slightly dark red in color and is fine in texture. In carcasses throughout the range of maturity included in this group, a minimum practically devoid amount of marbling is required (see Figure 1) and the ribeye muscle may be soft.

(3) Carcasses in the older group range from those described above as representative of the juncture of the two groups to those at the maximum maturity permitted in the Standard grade, which have chine bones tinged with red and cartilages on the ends of the thoracic vertebrae that are partially ossified. In addition, the sacral vertebrae are completely fused, the cartilages on the ends of the lumbar vertebrae are completely ossified, and the cut surface of the lean is moderately fine in texture. The minimum degree of marbling required increases with advancing maturity throughout this group from minimum practically devoid to maximum practically devoid (see Figure 1) and the ribeye muscle may be moderately soft.

(e) *Commercial*. (1) Commercial grade beef carcasses and wholesale cuts are restricted to those with evidences of more advanced maturity than permitted in the Standard grade. Depending on their degree of maturity, beef carcasses possessing the minimum requirements for the Commercial grade vary in their other indications of quality as evidenced in the ribeye muscle. Minimum quality characteristics are described for the youngest and the most mature of these groups. The requirements for the intermediate group are determined by interpolation between the requirements indicated for the two groups described.

(2) Carcasses in the youngest group permitted in the Commercial grade range from those with indications of maturity barely more advanced than described as maximum for the Standard grade to those with moderately hard, rather white chine bones and with cartilages on the ends of the thoracic vertebrae that show considerable ossification but the outlines of the cartilages are still plainly visible. In addition, the rib bones are moderately wide and flat and the ribeye muscle is moderately dark red and slightly coarse in texture. The minimum degree of marbling required increases with advancing maturity throughout this group from a minimum small amount to a maximum small amount (see Figure 1) and the ribeye muscle is slightly firm.

(3) The youngest carcasses in the most mature group included in the Commercial grade have hard white chine bones

and the outlines of the cartilages on the ends of the thoracic vertebrae are barely visible, the rib bones are wide and flat, and the ribeye muscle is dark red and coarse in texture. The range in maturity in this group extends to include carcasses from the oldest animals marketed. The minimum degree of marbling required increases with advancing maturity throughout this group from a minimum moderate amount to a maximum moderate amount (see Figure 1) and the ribeye muscle is firm.

(f) *Utility*. (1) Depending on their degree of maturity, beef carcasses possessing the minimum requirements for the Utility grade vary in their other indications of quality as evidenced in the ribeye muscle. Carcasses within the full range of maturity classified as beef are included in the Utility grade. Thus, five maturity groups are recognized. Minimum quality requirements are described for three of these groups—the first or youngest, the third or intermediate, and the fifth or the most mature. The requirements for the second and fourth maturity groups are determined by interpolation between the requirements described for their adjoining groups.

(2) Carcasses in the first or youngest maturity group range from the youngest that are eligible for the beef class to those at the juncture of the first two maturity groups, which have slightly red and slightly soft chine bones and cartilages on the ends of the thoracic vertebrae that have some evidence of ossification. In addition, the sacral vertebrae are completely fused and the cartilages on the ends of the lumbar vertebrae are nearly completely ossified. The rib bones are slightly flat and the ribeye muscle is slightly dark red in color and fine in texture. In carcasses throughout the range of maturity included in this group, the ribeye muscle is devoid of marbling and may be very soft and watery.

(3) Carcasses in the third or intermediate maturity group range from those with indications of maturity barely more advanced than described as maximum for the Standard grade to those with moderately hard, rather white chine bones and with cartilages on the ends of the thoracic vertebrae that show considerable ossification but the outlines of the cartilages are still plainly visible. In addition, the rib bones are moderately wide and flat and the ribeye muscle is dark red in color and slightly coarse in texture. The minimum degree of marbling required increases with advancing maturity throughout this group from minimum practically devoid to maximum practically devoid (see Figure 1) and the ribeye muscle may be moderately soft.

(4) The youngest carcasses in the fifth or oldest maturity group have hard, white chine bones and the outlines of the cartilages on the ends of the thoracic vertebrae are barely visible, the rib bones are wide and flat, and the ribeye muscle is very dark red in color and coarse in texture. The range in maturity in this group extends to include carcasses from the oldest animals produced. The mini-

mum degree of marbling required increases with advancing maturity throughout this group from a minimum slight amount to a maximum slight amount (see Figure 1) and the ribeye muscle is slightly firm.

(g) *Cutter*. (1) Depending on their degree of maturity, beef carcasses possessing the minimum requirements for the Cutter grade vary in their other indications of quality as evidenced in the ribeye muscle. Carcasses within the full range of maturity classified as beef are included in the Cutter grade. Thus, five maturity groups are recognized. Minimum quality requirements are described for three of these groups—the first or youngest, the third or intermediate, and the fifth or the most mature. The requirements for the second and fourth maturity groups are determined by interpolation between the requirements described for their adjoining groups.

(2) Carcasses in the first or youngest maturity group range from the youngest that are eligible for the beef class to those at the juncture of the first two maturity groups, which have slightly red and slightly soft chine bones and cartilages on the ends of the thoracic vertebrae that have some evidence of ossification. In addition, the sacral vertebrae are completely fused and the cartilages on the ends of the lumbar vertebrae are nearly completely ossified. The rib bones are slightly wide and slightly flat and the ribeye muscle is slightly dark red in color and fine in texture. In carcasses throughout the range of maturity included in this group, the ribeye muscle is devoid of marbling and may be very soft and watery.

(3) Carcasses in the third or intermediate maturity group range from those with indications of maturity barely more advanced than described as maximum for the Standard grade to those with moderately hard, rather white chine bones and with cartilages on the ends of the thoracic vertebrae that show considerable ossification but the outlines of the cartilages are still plainly visible. In addition, the rib bones are moderately wide and flat and the ribeye muscle is dark red in color and slightly coarse in texture. In carcasses throughout the range of maturity included in this group, the ribeye muscle is devoid of marbling and may be soft and watery.

(4) Carcasses in the fifth or oldest maturity group have hard white chine bones and the outlines of the cartilages on the ends of the thoracic vertebrae are barely visible, the rib bones are wide and flat, and the ribeye muscle is very dark red in color and coarse in texture. The range in maturity in this group extends to include carcasses from the oldest animals produced. The minimum degree of marbling required increases with advancing maturity throughout this group from minimum practically devoid to maximum practically devoid (see Figure 1) and the ribeye muscle is soft and slightly watery.

(h) *Canner*. The Canner grade includes only those carcasses that are inferior to the minimum requirements specified for the Cutter grade.

§ 2853.107 Specifications for Official United States Standards for Grades of Carcass Beef (Quality—Bullock).

(a) *Prime*. For the Prime grade, the minimum degree of marbling required is a minimum slightly abundant amount for carcasses throughout the range of maturity permitted in the bullock class. The ribeye muscle is moderately firm and, in carcasses having the maximum maturity for this class, the ribeye is light red in color.

(b) *Choice*. For the Choice grade, the minimum degree of marbling required is a minimum small amount for carcasses throughout the range of maturity permitted in the bullock class. The ribeye muscle may be slightly soft and, in carcasses having the maximum maturity for this class, the ribeye is moderately light red in color.

(c) *Good*. For the Good grade, the minimum degree of marbling required is a minimum slight amount for carcasses throughout the range of maturity permitted in the bullock class. The ribeye muscle may be moderately soft and, in carcasses having the maximum maturity for this class, the ribeye is slightly light red in color.

(d) *Standard*. For the Standard grade, the minimum degree of marbling required is a minimum practically devoid amount for carcasses throughout the range of maturity permitted in the bullock class. The ribeye muscle may be soft and, in carcasses having the maximum maturity for this class, the ribeye is slightly dark red in color.

(e) *Utility*. The Utility grade includes only those carcasses that do not meet the minimum requirements specified for the Standard grade.

VEAL AND CALF CARCASSES

§ 2853.112 Scope.

These standards for grades of veal and calf are applicable to the grading of carcasses, sides, hindsaddles, hindquarters, foresaddles, and forequarters, and to the following primal wholesale cuts—legs, loins, racks, and shoulders. However, throughout these standards wherever the words "carcass" or "carcasses" are used these are intended to also mean such parts of carcasses and primal wholesale cuts.

§ 2853.113 Differentiation between veal, calf, and beef carcasses.

Differentiation between veal, calf, and beef carcasses is made primarily on the basis of the color of the lean, although such factors as texture of the lean; character of the fat; color, shape, size, and ossification of the bones and cartilages; and the general contour of the carcass are also given consideration. Typical veal carcasses have a grayish pink color of lean that is very smooth and velvety in texture and they also have a slightly soft, pliable character of fat and marrow, and very red rib bones. By contrast, typical calf carcasses have a grayish red color of lean, a flakier type of fat, and somewhat wider rib bones with less pronounced evidences of red color. Calf carcasses with maximum maturity for their

class have lean flesh that is usually not more than moderately red in color, their rib bones usually have a small amount of red and only a slight tendency toward flatness, and such carcasses are not noticeably "spread" or "barrelly" in contour. Such carcasses, when split, have cartilages on the ends of the chine bones that are entirely cartilaginous, there is cartilage in evidence on all vertebrae of the spinal column, and the sacral vertebrae show distinct separation. Carcasses with evidences of more advanced maturity than described in this paragraph are classified as beef. Carcasses not classified as beef but whose color of lean is not comparable with their other evidences of maturity shall be classed as veal or calf in accordance with the following:

(a) Carcasses whose indications of maturity other than color of lean are within the veal class but whose color of lean is darker than dark grayish pink shall be classed as calf.

(b) Carcasses whose evidences of maturity other than color of lean are within the range included in the calf class shall be classed as veal provided they have a correspondingly lighter color of lean within the darker one-half of the range of color included in the veal class. For example, a carcass whose evidences of maturity other than color of lean are midway within the range of the calf class shall be classed as veal if its color of lean is not darker than midway within the darker one-half of the range of color included in the veal class.

(c) Carcasses with color of lean within the lighter one-half of the veal class shall be classed as veal provided their other evidences of maturity do not exceed that associated with the juncture of the calf and beef classes.

§ 2853.114 Classes of veal and calf carcasses.

Class determination is based on the apparent sex condition of the animal at time of slaughter. Hence, there are three classes of veal and calf carcasses—steers, heifers, and bulls. While recognition may sometimes be given to these different classes on the market, especially calf carcasses from bulls that are approaching beef in maturity, the characteristics of such carcasses are not sufficiently different from those of steers and heifers to warrant the development of separate standards for them. Therefore, the grade standards which follow are equally applicable to all classes of veal and calf carcasses.

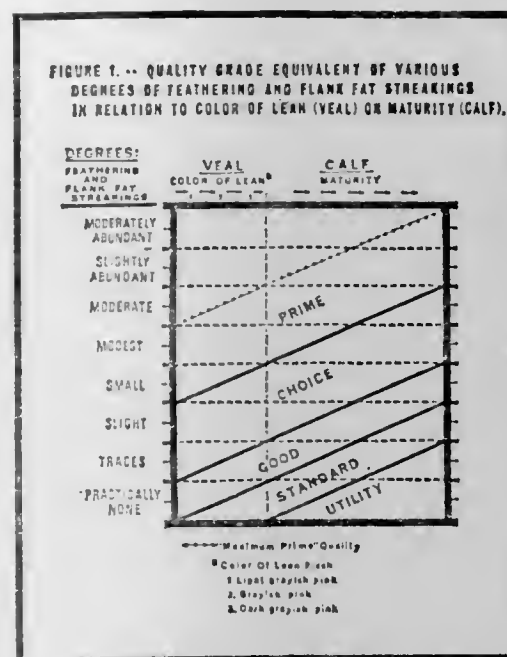

§ 2853.115 Application of standards.

(a) Veal and calf carcasses are graded on a composite evaluation of two general grade factors—conformation and quality. These factors are concerned with the proportions of lean, fat, and bone in the carcass and the quality of the lean.

(b) Conformation is the manner of formation of the carcass. The conformation descriptions included in each of the grade specifications refer to the thickness and fullness of the carcass and its various parts. Conformation is evaluated by averaging the conformation of the various parts of the carcass, considering not only the proportion that each part is of the carcass but also the general value of each part as compared with other parts. Superior conformation implies a high proportion of meat to bone and a high proportion of the weight of the carcass in the more valuable parts. It is reflected in carcasses which are thickly fleshed and full and thick in relation to their length and which have a plump, well-rounded appearance. Inferior conformation implies a low proportion of meat to bone and a low proportion of the weight of the carcass in the more valuable parts. It is reflected in carcasses which are very thinly fleshed, and very narrow in relation to their length, and which have a very angular, thin, sunken appearance.

(c) Quality of lean—in all veal carcasses, all unribbed calf carcasses, and in ribbed calf carcasses in which their degree of marbling is not a consideration—usually can be evaluated with a high degree of accuracy by giving equal consideration to the following factors, as available: (1) The amount of feathering (fat intermingled within the lean between the ribs) and (2) the quantity of fat streakings within and upon the inside flank muscles. (In making these evaluations, the amounts of feathering and flank fat streakings are considered in relation to color (veal) and maturity (calf).) In addition, however, consideration also may be given to other factors if, in the opinion of the grader, this will result in a more accurate quality assessment. Examples of such other factors include firmness of the lean, the distribution of feathering, the amount of fat covering over the diaphragm or "skirt", and the amount and character of the external and kidney and pelvic fat. In making these evaluations, feathering and flank fat streakings are categorized in descending order of quantity as follows: extremely abundant, very abundant, abundant, moderately abundant, slightly abundant, moderate, modest, small, slight, traces, practically none, and none.

Figure 1 depicts the quality grade equivalent of various degrees of feathering and flank fat streakings in relation to color of lean (veal) or maturity (calf). From this figure it can be seen, for example, that the degrees of feathering or fat streakings associated with minimum Choice quality for veal increase from minimum traces for carcasses having the lightest color of lean to maximum traces for carcasses with a dark grayish pink color of lean.

(d) When grading cuts and marbling is not a requirement and when neither feathering nor flank fat streakings are available, quality is based on the firmness of the lean. The requirements relating to firmness of the lean are described in the specifications for each grade and are based on the following degrees in descending order of firmness: extremely firm, very firm, firm, moderately firm, slightly firm, slightly soft, moderately soft, soft, very soft, and extremely soft. However, no credit is given to additional firmness of lean beyond "maximum slightly firm" in veal or beyond "maximum moderately firm" in calf.

(e) When grading ribbed calf carcasses or portions of such carcasses in which their degree of marbling is a consideration, the quality evaluation of the lean is based entirely on the characteristics of the lean as exposed in a cut surface. The official standards for grades of beef recognize nine different degrees of marbling. In descending order of amount these are as follows: Abundant, moderately abundant, slightly abundant, moderate, modest, small, slight, traces, and practically devoid. Illustrations of the lower limits of eight of these nine degrees are available from the Department of Agriculture. These degrees of marbling and their illustrations also are used to describe and evaluate marbling in calf carcasses. Marbling requirements are included in each of the Prime, Choice, and Good grade specifications.

(f) To facilitate the application of the standards, no credit is given to degrees of feathering, flank fat streakings, or marbling beyond those associated with the quality grade equivalent of "Maximum Prime." "Maximum Prime" quality is represented by a development of each of these three factors which is two degrees greater than that specified as minimum for Prime.

(g) The quality indicating requirements referenced in the standards for each grade are based on their development in properly chilled carcasses and, when these relate to a cut surface of the lean, they are based on a cross section of the ribeye muscle between the 12th and 13th ribs. For legs and shoulders, these qualities shall be consistent with their normal development in relation to those specified for the ribeye muscle.

(h) The final grade of a carcass is based on a composite evaluation of its conformation and quality. Conformation and quality often are not developed to the same degree in a carcass and it is obvious that each grade will include various combinations of development of these two characteristics. Examples of how conformation and quality are combined into the final quality grade are included in each of the grade descriptions. However, the principles governing the compensations of variations in development of quality and conformation are as follows: In each of the grades a superior development of quality is permitted to compensate, without limit, for a deficient development of conformation. In this instance the rate of compensation in all grades is on an equal basis—a given degree of superior quality compensates for the same degree of deficient conformation. The reverse type of compensation—a superior development of conformation for an inferior development of quality—is not permitted in the Prime and Choice grades. In all other grades this type of compensation is permitted but only to the extent of one-third of a grade of deficient quality. The rate of this type of compensation is also on an equal basis—a given degree of superior conformation compensates for the same degree of deficient quality.

(i) The colors of lean referenced in the standards reflect only the colors as present in normally developed veal and calf carcasses. They are not intended to apply to colors of lean associated with so-called "dark cutting" veal or calf. This condition does not have the same significance in grading as do the darker shades of pink and red associated with advancing maturity. The dark color of the lean associated with "dark cutting" veal or calf is present in varying degrees from that which is barely evident to so-called "black cutters" in which the lean is actually nearly black in color and usually has a "gummy" texture. Dependent upon the degree to which this characteristic is developed, the final grade of carcasses which otherwise would qualify for the Prime, Choice, or Good grades may be reduced as much as one full grade. In veal or calf otherwise eligible for the Standard grade, the final grade may be reduced as much as one-half grade. In the Utility grade this condition is not considered.

(j) Carcasses qualifying for any particular grade may vary with respect to their relative development of the various grade factors and there will be carcasses which qualify for a particular grade, some of the characteristics of which may

be typical of another grade. Because it is impractical to describe the nearly limitless number of such recognizable combinations of characteristics, the standards for each grade describe only a veal or calf carcass which has a relatively similar development of conformation and quality and which also represents the lower limit of each grade.

§ 2853.116 Specifications for official U.S. standards for grades of veal carcasses.

(a) *Prime.* (1) Veal carcasses with minimum Prime grade conformation tend to be moderately wide and thick in relation to their length. They are slightly thick-fleshed and have a slightly plump appearance. Legs are slightly thick and bulging. Loins and backs tend to be moderately full and plump. Shoulders and breasts tend to be moderately thick.

(2) Figure 1 in § 2853.115 depicts the degree of feathering and flank fat streakings associated with minimum Prime quality for different colors of lean. The lean flesh is slightly firm, regardless of its color.

(3) A development of quality superior to that specified as minimum for the Prime grade may compensate, without limit, for a development of conformation inferior to that specified as minimum for Prime at an equal rate as indicated in the following example: A carcass which has midpoint Prime quality may have conformation equal to the midpoint of the Choice grade and remain eligible for Prime. However, regardless of the extent to which the conformation of a carcass exceeds the minimum of the Prime grade, a carcass must have minimum Prime quality to be eligible for Prime.

(b) *Choice.* (1) Veal carcasses with minimum Choice grade conformation tend to be slightly wide and thick in relation to their length. They tend to be slightly thin-fleshed and have little or no evidence of plumpness. Loins, backs, and legs are slightly thin and nearly flat. Shoulders and breasts tend to be slightly thin.

(2) Figure 1 in § 2853.115 depicts the degree of feathering and flank fat streakings associated with minimum Choice quality for different colors of lean. The lean flesh is slightly soft regardless of its color.

(3) A development of quality superior to that specified as minimum for the Choice grade may compensate, without limit, for a development of conformation inferior to that specified as minimum for Choice at an equal rate as indicated in the following example: A carcass which has midpoint Choice quality may have conformation equal to the midpoint of the Good grade and remain eligible for Choice. However, regardless of the extent to which the conformation of a carcass exceeds the minimum of the Choice grade, a carcass must have minimum Choice quality to be eligible for Choice.

(c) *Good.* (1) Veal carcasses with minimum Good grade conformation are rangy, angular, and narrow in relation

to their length. They are thinly fleshed. Legs are thin and tapering and slightly concave. Loins and back are depressed. Shoulders and breasts are thin.

(2) Figure 1 in § 2853.115 depicts the degree of feathering and flank fat streakings associated with minimum Good quality for different colors of lean. The lean flesh is moderately soft regardless of its color.

(3) A development of quality superior to that specified as minimum for the Good grade may compensate, without limit, for a development of conformation inferior to that specified as minimum for Good at an equal rate as indicated in the following example: A carcass which has midpoint Good grade quality may have conformation equivalent to the midpoint of the Standard grade and remain eligible for Good. Also, a carcass which has conformation at least one-third grade superior to that specified as minimum for the Good grade may qualify for Good with a development of quality equivalent to the lower limit of the upper third of the Standard grade. Compensation of superior conformation for inferior quality is limited to one-third grade of deficient quality.

(d) *Standard.* (1) Veal carcasses with minimum Standard grade conformation are very rangy and angular and very narrow in relation to their length. They are very thinly fleshed. Legs are very thin and moderately concave. Loins and backs are very depressed. Shoulders and breasts are very thin.

(2) Figure 1 in § 2853.115 depicts the degree of feathering and flank fat streakings associated with minimum Standard quality for different colors of lean. The lean flesh is soft regardless of its color.

(3) A development of quality superior to that specified as minimum for the Standard grade may compensate, without limit, for a development of conformation inferior to that specified as minimum for Standard at an equal rate as indicated in the following example: A carcass which has midpoint Standard quality may have conformation equal to the midpoint of the Utility grade and remain eligible for Standard. Also, a carcass which has conformation at least one-third grade superior to that specified as minimum for the Standard grade may qualify for Standard with a development of quality equal to the minimum of the upper third of the Utility grade. Compensation of superior conformation for inferior quality is limited to one-third grade of deficient quality.

(e) *Utility.* The Utility grade includes those veal carcasses whose characteristics are inferior to those specified as minimum for the Standard grade.

§ 2853.117 Specifications for official United States standards for grades of calf carcasses.

(a) *Prime.* (1) Calf carcasses with minimum Prime grade conformation tend to be moderately wide and thick in relation to their length. They are moderately thick-fleshed and have a moderately plump appearance. Legs tend to be moderately thick and bulging. Loins

and backs tend to be moderately full and plump. Shoulders and breasts tend to be moderately thick.

(2) Figure 1 in § 2853.115 depicts the degree of feathering and flank fat streakings associated with minimum Prime quality. The degree of marbling required for minimum Prime quality increases from minimum practically devoid for the very youngest carcasses classified as calf to a maximum moderate amount for carcasses with maturity at the juncture of the calf and beef classes. The lean flesh is moderately firm regardless of maturity.

(3) A development of quality superior to that specified as minimum for the Prime grade may compensate, without limit, for a development of conformation inferior to that specified as minimum for Prime at an equal rate as indicated in the following example: A carcass which has midpoint Prime quality may have conformation equal to the midpoint of the Choice grade and remain eligible for Prime. However, regardless of the extent to which the conformation of a carcass exceeds the minimum of the Prime grade, a carcass must have minimum Prime quality to be eligible for Prime.

(b) *Choice.* (1) Calf carcasses with minimum Choice grade conformation tend to be slightly wide and thick in relation to their length. They tend to be slightly thick-fleshed and have a slightly plump appearance. Legs are slightly thick but have little evidence of plumpness. Loins and backs are very slightly full and plump. Shoulders and breasts are slightly thick.

(2) Figure 1 in § 2853.115 depicts the degree of feathering and flank fat streakings associated with minimum Choice quality. The degree of marbling required for minimum Choice quality increases from minimum practically devoid for carcasses at midpoint calf maturity to a maximum slight amount for carcasses with maturity at the juncture of the calf and beef classes. Marbling is not required for Choice quality in carcasses which are less than midpoint calf in maturity. The lean flesh is slightly firm regardless of maturity.

(3) A development of quality superior to that specified as minimum for the Choice grade may compensate, without limit, for a development of conformation inferior to that specified as minimum for Choice at an equal rate as indicated in the following example: A carcass which has midpoint Choice quality may have conformation equal to the midpoint of the Good grade and remain eligible for Choice. However, regardless of the extent to which the conformation of a carcass exceeds the minimum of the Choice grade, a carcass must have minimum Choice quality to be eligible for Choice.

(c) *Good.* (1) Calf carcasses with minimum Good grade conformation tend to be rangy, angular, and narrow in relation to their length. They tend to be thinly fleshed. Legs are thin and tapering and very slightly concave. Loins and backs are slightly shallow and depressed. Shoulders and breasts are thin.

(2) Figure 1 in § 2853.115 depicts the degree of feathering and flank fat streak-

ings associated with minimum Good quality. The minimum degree of marbling required for Good quality decreases from typical traces for carcasses with maturity at the juncture of the calf and beef classes to minimum practically devoid for carcasses midway in maturity within the more mature half of the range of maturity included in the calf class. In less mature carcasses, marbling is not required for Good quality. The lean flesh is moderately soft regardless of maturity.

(3) A development of quality superior to that specified as minimum for the Good grade may compensate, without limit, for a development of conformation inferior to that specified as minimum for Good at an equal rate as indicated in the following example: A carcass which has midpoint Good grade quality may have conformation equivalent to the midpoint of the Standard grade and remain eligible for Good. Also, a carcass which has conformation at least one-third grade superior to that specified as minimum for the Good grade may qualify for Good with a development of quality equivalent to the lower limit of the upper third of the Standard grade. Compensation of superior conformation for inferior quality is limited to one-third grade of deficient quality.

(d) *Standard.* (1) Calf carcasses with minimum Standard grade conformation are rangy, angular, and very narrow in relation to their length. They are very thinly fleshed. Legs are very shallow and depressed. Shoulders and breasts are very thin.

(2) Figure 1 in § 2853.115 depicts the degree of feathering and flank fat streakings associated with minimum Standard quality. The lean flesh is soft regardless of maturity.

(3) A development of quality which is superior to that specified as minimum for the Standard grade may compensate, without limit, for a development of conformation inferior to that specified as minimum for Standard at an equal rate as indicated in the following example: A carcass which has midpoint Standard quality may have conformation equal to the midpoint of the Utility grade and remain eligible for Standard. Also, a carcass which has conformation at least one-third grade superior to that specified for the minimum of the Standard grade may qualify for Standard with a development of quality equal to the lower limit of the upper third of the Utility grade. Compensation of superior conformation for inferior quality is limited to one-third grade of deficient quality.

(e) *Utility.* The Utility grade includes those calf carcasses whose characteristics are inferior to those specified as minimum for the Standard grade.

LAMB, YEARLING MUTTON, AND MUTTON CARCASSES

§ 2853.122 Differentiation between lamb, yearling mutton, and mutton carcasses.

Differentiation between lamb, yearling mutton, and mutton carcasses is made on the basis of differences that occur in the development of their mus-

cular and skeletal systems. Typical lamb carcasses tend to have slightly wide and moderately flat rib bones and a light red color and fine texture of lean. To be classed as lamb, a carcass must have break joints on both its front shanks. By contrast, typical yearling mutton carcasses have moderately wide rib bones which tend to be flat and a slightly dark red color and slightly coarse texture of lean. Yearling mutton carcasses may have either break joints or "spool" joints on their front shanks. Typical mutton carcasses have wide, flat rib bones and a dark red color and coarse texture of lean. They always have spool joints on their front shanks. Regardless of their other characteristics, carcasses from which the front shanks have been removed will be assumed to have had "spool" joints and will be classed as yearling mutton or mutton on the basis of their other characteristics. In determining the maturity class of ovine carcasses, more consideration is given to the characteristics of the flesh than is given to the characteristics of the skeleton.

§ 2853.123 Application of standards.

(a) *Grade factors.* (1) The grade of an ovine carcass is based on separate evaluations of two general considerations: Palatability-indicating characteristics of the lean and conformation, herein referred to as "quality;" and the estimated percent of closely trimmed, boneless, major retail cuts to be derived from the carcass, herein referred to as "yield." (However, the grade of an ovine carcass when applied by Federal meat graders may consist of an identification for the quality grade, the yield grade, or a combination of both the quality and yield grades.) In previous grade standards for ovine carcasses, the Department used the term "quality" to refer only to the palatability-indicating characteristics of the lean without reference to conformation. Its use herein to include consideration of conformation is not intended to imply that variations in conformation are either directly or indirectly related to differences in palatability.

(2) The grade standards are written so that the quality and yield grade standards are contained in separate sections. The quality section is divided further into three separate sections applicable to carcasses from lambs, yearling mutton, and mutton. There are five quality grades—Prime, Choice, Good, Utility, and Cull—applicable to lamb, yearling mutton, and mutton carcasses, except that mutton carcasses are not eligible for Prime. There are five yield grades applicable to all classes of ovine carcasses, denoted by numbers 1 through 5, with Yield Grade 1 representing the highest degree of cutability.

(3) Carcasses qualifying for any particular grade may vary with respect to the relative development of their individual grade factors, and there will be carcasses which qualify for a particular grade in which the development of some

of these individual grade factors will be typical of other grades. Because it is impractical to describe the nearly limitless numbers of such recognizable combinations of characteristics, the standards for each quality and yield grade describe only carcasses which have a relatively similar development of individual factors and which are also representative of the lower limits of each grade. In the quality grade standards, examples of the extent to which superiority in quality may compensate for deficiencies in conformation, and vice versa, are indicated for each grade. In the Prime and Choice grades certain minimum requirements for external fat covering are also indicated.

(b) *Quality grades.* (1) The quality grade of an ovine carcass is based on separate evaluations of two general considerations: The quality or the palatability-indicating characteristics of the lean and the conformation of the carcass.

(2) Conformation is the manner of formation of the carcass with particular reference to the relative development of the muscular and skeletal systems, although it is also influenced to some extent, by the quantity and distribution of external finish. The conformation of a carcass is evaluated by averaging the conformation of its various component parts, giving consideration not only to the proportion that each cut is of the carcass weight but also to the general desirability of each cut as compared with other cuts. Superior conformation implies a high proportion of edible meat to bone and a high proportion of the weight of the carcass in the more demanded cuts and is reflected in carcasses which are very wide and thick in relation to their length and which have a very plump and full and well-rounded appearance. Inferior conformation implies a low proportion of edible meat to bone and a low proportion of the weight of the carcass in the more demanded cuts and is reflected in carcasses which are very narrow in relation to their length and which have a very angular, thin and sunken appearance. External fat in excess of that normally left on retail cuts is not considered in evaluating conformation.

(3) The quality of the lean flesh is best evaluated by consideration of its texture, firmness, and marbling, as observed in a cut surface, in relation to the apparent maturity of the animal from which the carcass was produced. However, in grading carcasses direct observation of these characteristics is not possible. Therefore, the quality of the lean is evaluated indirectly by giving equal consideration to: The quantity of fat intermingled within the lean between the ribs called "feathering," the streaking of fat within and upon the inside flank muscles, and the firmness of the fat and lean—all in relation to the apparent evidence of maturity.

(4) The ovine quality standards are intended to cover the full range of maturity within which ovines are marketed. The standards for Prime, Choice, and Good grades of lamb specify two general

levels of development of the quality-indicating characteristics described in this section, dependent upon the apparent evidences of maturity attained by the lamb at the time of slaughter. The quality standards for Utility and Cull grades of lamb and for each grade of yearling mutton and mutton specify only one general level of development of the quality-indicating characteristics described, and these characteristics apply only to carcasses which are typical in maturity for their class. In order to qualify for a specific grade, yearling mutton or mutton carcasses with evidence of more advanced maturity than typical for their class are required to have a slightly greater development of these characteristics than described in the standards. Conversely, such carcasses with evidence of less maturity than typical for their class may qualify for a given grade with a slightly lesser development of these characteristics.

(5) The quality standards are intended to apply to all ovine carcasses without regard to the apparent sex condition of the animal at time of slaughter. However, carcasses from males which have thick, heavy necks and shoulders typical of uncastrated males are discounted in quality grade in accord with the extent to which these characteristics are developed. Such discounts may vary from less than one-half grade in carcasses from young lambs in which such characteristics are barely noticeable to as much as two full grades in carcasses from mature rams in which such characteristics are very pronounced.

(6) The quality standards for lamb, yearling mutton, and mutton carcasses contained in this subpart together provide for grading carcasses within the full range of maturity of the ovine species. Although the grade standards for this full range of maturity are contained in three separate standards, it is the intent that the three standards be considered as a continuous series. Therefore, in determining the grade of a carcass which has a degree of maturity that is not typical of that specified in one of the three standards, it is necessary to interpolate between the standard for the kind of carcass (lamb, yearling mutton, or mutton) being graded and the standard for the kind of carcass which is most closely adjacent to it in maturity.

(c) *Yield grades.* (1) The yield grade of an ovine carcass is determined by considering three characteristics: The amount of external fat, the amount of kidney and pelvic fat, and the conformation grade of the legs.

(2) The amount of external fat for carcasses with a normal distribution of this fat is evaluated in terms of its actual thickness over the center of the ribeye muscle and is measured perpendicular to the outside surface between the 12th and 13th ribs. On intact carcasses fat thickness is measured by probing. This measurement may be adjusted, as necessary, to reflect unusual amounts of fat on other parts of the carcass. In determin-

ing the amount of this adjustment, if any, particular attention is given to the amount of external fat on those parts where fat is deposited at a faster-than-average rate, particularly the rump, outside of the shoulders, breast, flank, and cod or udder. Thus, in a carcass which is fatter over these other parts than is normally associated with the actual fat thickness over the ribeye, the measurement is adjusted upward. Conversely, in a carcass which has less fat over these other parts than is normally associated with the actual fat thickness over the ribeye, the measurement is adjusted downward. In many carcasses no such adjustment is necessary; however, an adjustment in the thickness of fat measurement of 0.05 or 0.10 inch is not uncommon. In some carcasses a greater adjustment may be necessary. As a guide in making these adjustments, the standards for each yield grade include an additional related measurement—body wall thickness, which is measured 5 inches laterally from the middle of the backbone between the 12th and 13th ribs. As the amount of external fat increases, the percent of retail cuts decreases—each 0.05 inch change in adjusted fat thickness over the ribeye changes the yield grade by one-third of a grade.

(3) The amount of kidney and pelvic fat considered in determining the yield grade includes the kidney knob (kidney and surrounding fat) and the lumber and pelvic fat in the loin and leg which are removed in making closely trimmed retail cuts. The amount of these fats is evaluated subjectively and expressed as a percent of the carcass weight. As the amount of kidney and pelvic fat increases, the percent of retail cuts decreases—a change of 1 percent of the carcass weight in kidney and pelvic fat changes the yield grade by one-fourth of a grade.

(4) The conformation grade of the legs is evaluated as described in the quality standards. The evaluation is made in terms of thirds of grades and coded using 15 for high Prime and 1 for low Cull. An increase in the conformation grade of the legs increases the percent of retail cuts—a change of one-third of a grade changes the yield grade by 5 percent of a grade.

(5) The yield grade descriptions are defined primarily in terms of carcasses. However, the yield grade standards also are applicable to the grading of sides, foresaddles, hindsaddles, forequarters, and hindquarters, and hotel racks, loins, and combinations of regular or trimmed wholesale cuts which include either a hotel rack or a loin.

(6) The standards include an equation for determining yield grade. The application of this equation usually results in a fractional grade. However, in normal grading operations any fractional part of a yield grade is dropped. For example, if the computation results in a yield grade of 3.9, the final yield grade is 3—it is not rounded to 4.

(7) The yield grade standards for each of the first four yield grades list characteristics of a carcass with descriptions

of the amount of external fat normally present on various parts of the carcass. These descriptions are not specific requirements—they are included only as illustrations of carcasses which are near the borderline between grades. For example, the characteristics listed for Yield Grade 1 represent a carcass which is near the borderline of Yield Grade 1 and Yield Grade 2. These descriptions facilitate the subjective determination of the yield grade without making detailed measurements and computations. The yield grade for most ovine carcasses can be determined accurately on the basis of a visual appraisal.

§ 2853.121 Specifications for official U.S. standards for grades of lamb carcasses (quality).

(a) *Prime*. (1) Lamb carcasses possessing minimum qualifications for the Prime grade are moderately wide and thick in relation to their length and have moderately plump and full legs; moderately wide and thick backs; and moderately thick and full shoulders.

(2) Requirements for quantities of interior fats and for firmness of lean and fat vary with changes in maturity. Carcasses from young lambs have moderately narrow, slightly flat rib bones; moderately red and moist and porous break joints; and a moderately dark pink color of inside flank muscles. Such carcasses have a slight amount of feathering between the ribs and traces of fat streaking within and upon the inside flank muscles. Their lean flesh and exterior finish tend to be moderately firm, and their flanks tend to be moderately full and firm.

(3) Carcasses from more mature lambs have slightly wide, moderately flat rib bones; slightly red but slightly dry and hard break joints; and a light red color of inside flank muscles. Such carcasses have a moderate amount of feathering between the ribs and a modest amount of fat streaking within and upon the inside flank muscles. Their lean flesh and exterior finish are firm, and their flanks are moderately full and firm.

(4) Regardless of the extent to which other grade factors may exceed, the minimum requirements for Prime, to be eligible for Prime a carcass must have at least a very thin covering of external fat over the top of the shoulders and the outsides of the upper parts of the legs, and the back must have at least a thin covering of fat, that is, the muscles of the back may be no more than plainly visible through the fat. In addition, a carcass must have a composite development of quality-indicating factors equivalent to that specified as minimum for Prime to be eligible for that grade. However, a development of quality which is superior to that specified as minimum for the Prime grade may compensate, on an equal basis, for a development of conformation which is inferior to that specified as minimum for Prime as indicated in the following example: A carcass which has evidence of quality equivalent

to the midpoint of the Prime grade may have conformation equivalent to the midpoint of the Choice grade and remain eligible for Prime. However, in no instance may a carcass be graded Prime which has a development of conformation inferior to that specified as minimum for the Choice grade.

(b) *Choice*. (1) Lamb carcasses possessing minimum qualifications for the Choice grade tend to be slightly wide and thick in relation to their length and tend to have slightly plump and full legs; slightly wide and thick backs; and slightly thick and full shoulders.

(2) Requirements for quantities of interior fats and for firmness of lean and fat vary with changes in maturity. Carcasses from young lambs have moderately narrow, slightly flat rib bones; moderately red and moist and porous break joints; and a moderately dark pink color of inside flank muscles. Such carcasses have a slight amount of feathering between the ribs and traces of fat streaking within and upon the inside flank muscles. Their lean flesh and exterior finish tend to be moderately firm, and their flanks tend to be slightly full and firm.

(3) Carcasses from more mature lambs have slightly wide, moderately flat rib bones; slightly red but slightly dry and hard break joints; and a moderately light red color of inside flank muscles. Such carcasses have a small amount of feathering between the ribs and a slight amount of fat streaking within and upon the inside flank muscles. Their lean flesh and exterior finish are moderately firm, and their flanks are slightly full and firm.

(4) Regardless of the extent to which other grade factors may exceed the minimum requirements for Choice, to be eligible for Choice a carcass must have at least a very thin covering of external fat over the top of the shoulders and the outsides of the upper parts of the legs, and the back must have at least a thin covering of fat, that is, the muscles of the back may be no more than plainly visible through the fat.

(5) A carcass which has conformation equivalent to at least the mid-point of the Choice grade may have evidence of quality equivalent to the minimum for the upper one-third of the Good grade and remain eligible for Choice. Also, a development of quality which is superior to that specified as minimum for the Choice grade may compensate, on an equal basis, for a development of conformation which is inferior to that specified as minimum for Choice as indicated in the following example: A carcass which has evidence of quality equivalent to the mid-point of the Choice grade may have conformation equivalent to the mid-point of the Good grade and remain eligible for Choice. However, in no instance may a carcass be graded Choice which has a development of conformation inferior to that specified as minimum for the Good grade.

(c) *Good*. (1) Lamb carcasses possessing minimum qualifications for the Good grade are moderately narrow in

relation to their length and have slightly thin, tapering legs, and slightly narrow and thin backs and shoulders.

(2) Requirements for quantities of interior fats and for firmness of lean and fat vary with changes in maturity. Carcasses from young lambs have moderately narrow, slightly flat rib bones; moderately red and moist and porous break joints; and a dark pink color of inside flank muscles. Such carcasses have traces of feathering between the ribs but practically no fat streaking within and upon the inside flank muscles. Their lean flesh and exterior finish are slightly firm, and their flanks are slightly thin and soft.

(3) Carcasses from more mature lambs have slightly wide, moderately flat rib bones; slightly red but slightly dry and hard break joints; and a slightly dark red color of inside flank muscles. Such carcasses have a slight amount of feathering between the ribs and traces of fat streaking within and upon the inside flank muscles. Their lean flesh and exterior finish tend to be moderately firm, and their flanks tend to be slightly full and firm.

(4) A carcass which has conformation equivalent to at least the mid-point of the Good grade may have evidence of quality equivalent to the minimum for the upper one-third of the Utility grade and remain eligible for Good. Also, a development of quality which is superior to that specified as minimum for the Good grade may compensate for a development of conformation which is inferior to that specified as minimum for Good on the basis of one-half grade of superior quality for one-third grade of deficient conformation as indicated in the following example: A carcass which has evidence of quality equivalent to the mid-point of the Good grade may have conformation equivalent to the minimum for the upper one-third of the Utility grade and remain eligible for Good. However, in no instance may a carcass be graded Good which has a development of conformation inferior to that specified as minimum for the Utility grade.

(d) *Utility*. (1) Lamb carcasses possessing minimum qualifications for the Utility grade are very angular and very narrow in relation to their length and have thin, slightly concave legs; very narrow and sunken backs; and narrow, sharp shoulders. Hips and shoulder joints are plainly visible.

(2) Although evidences of quality vary slightly with changes in maturity the differences are so small as to make their separate descriptions impractical. There is practically no feathering between the ribs and no fat streaking in the inside flank muscles. The lean in the inside flank muscles and between the ribs is a dark red in color. Their lean flesh and exterior finish are soft, and the flanks are soft and slightly watery.

(3) A carcass which has conformation equivalent to at least the mid-point of the Utility grade may have evidence of quality equivalent to the minimum for the upper one-third of the Cull grade

and remain eligible for Utility. Also, a development of quality which is superior to that specified as minimum for the Utility grade may compensate for a development of conformation which is inferior to that specified as minimum for Utility on the basis of one-half grade of superior quality for one-third grade of deficient conformation as indicated in the following example: A carcass which has evidence of quality equivalent to the mid-point of the Utility grade may have conformation equivalent to the minimum for the upper one-third of the Cull grade and remain eligible for Utility.

(e) *Cull*. Typical Cull grade lamb carcasses are extremely angular, extremely narrow in relation to their length, and extremely thin-fleshed throughout. Legs are extremely thin and concave, backs are extremely sunken and thin, and shoulders are very thin and sharp. Hips and shoulder joints, as well as ribs and bones of the spinal column, are clearly outlined, and the flesh is soft and watery and a very dark red in color.

§ 2853.125 Specifications for official U.S. standards for grades of yearling mutton carcasses (quality).

(a) *Prime*. (1) Yearling mutton carcasses possessing minimum qualifications for the Prime grade are moderately wide and thick in relation to their length and have moderately plump and full legs; moderately wide and thick backs; and moderately thick and full shoulders. They have slightly abundant feathering between the ribs, a moderate amount of fat streaking within and upon the inside flank muscles, and a slightly dark red color of inside flank muscles. Their lean flesh and exterior finish tend to be very firm, and their flanks tend to be full and firm.

(2) Regardless of the extent to which other grade factors may exceed the minimum requirements for Prime, to be eligible for Prime a carcass must have at least a very thin covering of external fat over the top of the shoulders and the outsides of the upper parts of the legs, and the back must have at least a thin covering of fat, that is, the muscles of the back may be no more than plainly visible through the fat. In addition, a carcass must have a composite development of quality-indicating factors equivalent to that specified as minimum for Prime to be eligible for that grade. However, a development of quality which is superior to that specified as minimum for the Prime grade may compensate, on an equal basis, for a development of conformation which is inferior to that specified as minimum for Prime as indicated in the following example: A carcass which has evidence of quality equivalent to the mid-point of the Prime grade may have conformation equivalent to the mid-point of the Choice grade and remain eligible for Prime. However, in no instance may a carcass be graded Prime which has a development of conformation inferior to that specified as minimum for the Choice grade.

(b) *Choice*. (1) Yearling mutton carcasses possessing minimum qualifications for the Choice grade are moderately narrow in relation to their length and have slightly thin, tapering legs, and slightly narrow and thin backs and shoulders. They have a small amount of feathering between the ribs, a slight amount of fat streaking within and upon the inside flank muscles, and a moderately dark red color of inside flank muscles. Their lean flesh and exterior finish are moderately firm, and their flanks are slightly full and firm.

(2) A carcass which has conformation equivalent to at least the mid-point of the Good grade may have evidence of quality equivalent to the minimum for the upper one-third of the Utility grade and remain eligible for Good. Also, a

(3) Yearling mutton carcasses which are otherwise eligible for the Prime grade

but which have excessive quantities of combined external and kidney and pelvic fat are not eligible for Prime.

(b) *Choice*. (1) Yearling mutton carcasses possessing minimum qualifications for the Choice grade tend to be slightly wide and thick in relation to their length and tend to have slightly plump and full legs; slightly wide and thick backs; and slightly thick and full shoulders. They have a modest amount of feathering between the ribs, a small amount of fat streaking within and upon the inside flank muscles, and a color of inside flank muscles which tends to be moderately dark red. Their lean flesh and exterior finish tend to be firm, and their flanks tend to be moderately full and firm.

(2) Regardless of the extent to which other grade factors may exceed the minimum requirements for Choice, to be eligible for Choice a carcass must have at least a very thin covering of external fat over the top of the shoulders and the outsides of the upper parts of the legs, and the back must have at least a thin covering of fat, that is, the muscles of the back may be no more than plainly visible through the fat.

(3) A carcass which has conformation equivalent to at least the mid-point of the Choice grade may have evidence of quality equivalent to the minimum of the upper one-third of the Good grade and remain eligible for Choice. Also, a development of quality which is superior to that specified as minimum for the Choice grade may compensate, on an equal basis, for a development of conformation which is inferior to that specified as minimum for Choice as indicated in the following example: A carcass which has evidence of quality equivalent to the mid-point of the Choice grade may have conformation equivalent to the mid-point of the Good grade and remain eligible for Choice. However, in no instance may a carcass be graded Choice which has a development of conformation inferior to that specified as minimum for the Good grade.

(4) Yearling mutton carcasses which are otherwise eligible for the Prime grade but which have excessive quantities of combined external and kidney and pelvic fat are included in the Choice grade.

(c) *Good*. (1) Yearling mutton carcasses possessing minimum qualifications for the Good grade are moderately narrow in relation to their length and have slightly thin, tapering legs, and slightly narrow and thin backs and shoulders. They have a small amount of feathering between the ribs, a slight amount of fat streaking within and upon the inside flank muscles, and a moderately dark red color of inside flank muscles. Their lean flesh and exterior finish are moderately firm, and their flanks are slightly full and firm.

(2) A carcass which has conformation equivalent to at least the mid-point of the Good grade may have evidence of quality equivalent to the minimum for the upper one-third of the Utility grade and remain eligible for Good. Also, a

development of quality which is superior to that specified as minimum for the Good grade may compensate for a development of conformation which is inferior to that specified as minimum for Good on the basis of one-half grade of superior quality for one-third grade of deficient conformation as indicated in the following example: A carcass which has evidence of quality equivalent to the mid-point of the Good grade may have conformation equivalent to the minimum for the upper one-third of the Utility grade and remain eligible for Good. However, in no instance may a carcass be graded Good which has a development of conformation inferior to that specified as minimum for the Utility grade.

(d) *Utility*. (1) Yearling mutton carcasses possessing minimum qualifications for the Utility grade are very angular and very narrow in relation to their length and have thin, slightly concave legs, very narrow and sunken backs; and narrow, sharp shoulders. Hips and shoulder joints are plainly visible. They have practically no feathering between the ribs, no fat streaking in the inside flank muscles, and a dark red color of inside flank muscles. Their lean flesh and exterior finish are moderately soft, and the flanks are soft and slightly watery.

(2) A carcass which has conformation equivalent to at least the mid-point of the Utility grade may have evidence of quality equivalent to the minimum for the upper one-third of the Cull grade and remain eligible for Utility. Also, a development of quality which is superior to that specified as minimum for the Utility grade may compensate for a development of conformation which is inferior to that specified as minimum for Utility on the basis of one-half grade of superior quality for one-third grade of deficient conformation as indicated in the following example: A carcass which has evidence of quality equivalent to the mid-point of the Utility grade may have conformation equivalent to the minimum for the upper one-third of the Cull grade and remain eligible for Utility.

(e) *Cull*. Typical Cull grade yearling mutton carcasses are extremely angular, extremely narrow in relation to their length, and extremely thin-fleshed throughout. Legs are extremely thin and concave, backs are extremely sunken and thin, and shoulders are very thin and sharp. Hips and shoulder joints, as well as ribs and bones of the spinal column, are clearly outlined, and the flesh is soft and watery and a very dark red in color.

§ 2853.126 Specifications for official U.S. standards for grades of mutton carcasses (quality).

(a) *Choice*. (1) Mutton carcasses possessing minimum qualifications for the Choice grade tend to be slightly wide and thick in relation to their length and tend to have slightly plump and full legs; slightly wide and thick backs; and slightly thick and full shoulders. They have a moderate amount of feathering between the ribs, a modest amount of

fat streaking within and upon the inside flank muscles, and a dark red color of inside flank muscles. Their lean flesh and external finish tend to be firm, and their flanks tend to be moderately full and firm.

(2) Regardless of the extent to which other grade factors may exceed the minimum requirements for Choice, to be eligible for Choice a carcass must have at least a very thin covering of external fat over the top of the shoulders and the outside of the upper parts of the legs, and the back must have at least a thin covering of fat, that is, the muscles of the back may be no more than plainly visible through the fat.

(3) A carcass which has conformation equivalent to at least the mid-point of the Choice grade may have evidence of quality equivalent to the minimum of the upper one-third of the Good grade and remain eligible for Choice. Also, a development of quality which is superior to that specified as minimum for the Choice grade may compensate, on an equal basis, for a development of conformation which is inferior to that specified as minimum for Choice as indicated in the following example: A carcass which has evidence of quality equivalent to the mid-point of the Choice grade may have conformation equivalent to the mid-point of the Good grade and remain eligible for Choice. However, in no instance may a carcass be graded Choice which has a development of conformation inferior to that specified as minimum for the Good grade.

(4) Mutton carcasses which are otherwise eligible for the Choice grade but which have excessive quantities of combined external and kidney and pelvic fat are not eligible for Choice.

(b) *Good.* (1) Mutton carcasses possessing minimum qualifications for the Good grade are moderately narrow in relation to their length and have slightly thin, tapering legs, and slightly narrow and thin backs and shoulders. They have a modest amount of feathering between the ribs, a slight amount of fat streaking within and upon the inside flank muscles, and a dark red color of inside flank muscles. Their lean flesh and external finish are moderately firm, and their flanks are slightly full and firm.

(2) A carcass which has conformation equivalent to at least the mid-point of the Good grade may have evidence of quality equivalent to the minimum for the upper one-third of the Utility grade and remain eligible for Good. Also, a development of quality which is superior to that specified as minimum for the Good grade may compensate for a development of conformation which is inferior to that specified as minimum for Good on the basis of one-half grade of deficient conformation as indicated in the following example: A carcass which has evidence of quality equivalent to the mid-point of the Good grade may have conformation equivalent to the minimum for the upper one-third of the Utility grade and remain eligible for

Good. However, in no instance may a carcass be graded Good which has a development of conformation inferior to that specified as minimum for the Utility grade.

(3) Mutton carcasses which are otherwise eligible for the Choice grade but which have excessive quantities of combined external and kidney and pelvic fat are included in the Good grade.

(c) *Utility.* (1) Mutton carcasses possessing minimum qualifications for the Utility grade are very angular and very narrow in relation to their length and have thin, slightly concave legs; very narrow and sunken backs; and narrow, sharp shoulders. Hips and shoulder joints are plainly visible. They have traces of feathering between the ribs but practically no fat streaking in the inside flank muscles, and a very dark red color of inside flank muscles. Their lean flesh and external finish are slightly soft, and the flanks are soft and slightly watery.

(2) A carcass which has conformation equivalent to at least the mid-point of the Utility grade may have evidence of quality equivalent to the minimum for the upper one-third of the Cull grade and remain eligible for Utility. Also, a development of quality which is superior to that specified as minimum for the Utility grade may compensate for a development of conformation which is inferior to that specified as minimum for Utility on the basis of one-half grade of superior quality for one-third grade of deficient conformation as indicated in the following example: A carcass which has evidence of quality equivalent to the mid-point of the Utility grade may have conformation equivalent to the minimum for the upper one-third of the Cull grade and remain eligible for Utility.

(d) *Cull.* Typical Cull grade mutton carcasses are extremely angular, extremely narrow in relation to their length, and extremely thin-fleshed throughout. Legs are extremely thin and concave, backs are extremely sunken and thin, and shoulders are very thin and sharp. Hips and shoulder joints, as well as ribs and bones of the spinal column, are clearly outlined, and the flesh is soft and watery and very dark red in color.

§ 2853.127 Specifications for official U.S. standards for grades of carcass lamb, yearling mutton, and mutton (yield).

(a) The yield grade of an ovine carcass or side is determined on the basis of the following equation: Yield Grade = $1.66 - (0.05 \times \text{leg conformation grade code}) + (0.25 \times \text{percent kidney and pelvic fat}) + (6.66 \times \text{adjusted fat thickness over the ribeye inches})$.

(b) (1) The yield grade of a hind-saddle, hindquarter, foresaddle, forequarter, or a cut eligible for grading also is determined on the basis of the above equation except that if the portion being graded does not include the leg, the conformation grade of the portion being graded shall be substituted for leg conformation grade. In addition, if the portion being graded does not include kid-

ney and pelvic fat or if the portion is a trimmed cut (cut from which most of the kidney and pelvic fat has been removed), the following standard percentages of kidney and pelvic fat, as applicable to the quality grade of the portion also shall be used in the equation:

Grade	Kidney and pelvic fat, percent
Prime	4.5
Choice	3.5
Good	3.0
Utility	2.0
Cull	1.5

(2) For untrimmed hindsaddles and for untrimmed hindquarter cuts, the quantity of kidney and pelvic fat is estimated as a percent of the carcass weight.

(3) For untrimmed hindquarters and for untrimmed hindquarter cuts, the quantity of kidney and pelvic fat is estimated as a percent of the side weight.

(c) The following descriptions provide a guide to the characteristics of carcasses in each yield grade to aid in determining yield grades subjectively.

(1) *Yield Grade 1.* (1) A carcass in Yield Grade 1 usually has only a thin layer of external fat over the back and loin and slight deposits of fat in the flanks and cod or udder. There is usually a very thin layer of fat over the top of the shoulders and the outside of the legs. Muscles are usually plainly visible on most areas of the carcass.

(2) A carcass of this yield grade which is near the borderline of Yield Grade 1 and Yield Grade 2 might have 0.1 inch of fat over the ribeye, 1.5 percent of its weight in kidney and pelvic fat, and an average Prime leg conformation grade. Such a carcass with normal fat distribution would also have a body wall thickness of 0.5 inch.

(2) *Yield Grade 2.* (1) A carcass in Yield Grade 2 usually has a slightly thin layer of fat over the back and loin and the muscles of the back are not visible. The top of the shoulders and the outside of the legs have a thin covering of fat and the muscles are slightly visible. There are usually small deposits of fat in the flanks and cod or udder.

(2) A carcass of this yield grade which is near the borderline of Yield Grade 2 and Yield Grade 3 might have 0.2 inch of fat over the ribeye, 2.5 percent of its weight in kidney and pelvic fat, and a low Prime leg conformation grade. Such a carcass with normal fat distribution would also have a body wall thickness of 0.7 inch.

(3) *Yield Grade 3.* (1) A carcass in Yield Grade 3 usually has a slightly thick covering of fat over the back. The top of the shoulders are completely covered with fat, although the muscles are still barely visible. The legs are nearly completely covered, although the muscles on the outside of the lower legs are visible. There usually are slightly large deposits of fat in the flanks and cod or udder.

(2) A carcass of this yield grade which is near the borderline of Yield Grade 3 and Yield Grade 4 might have 0.3 inch of fat over the ribeye, 3.5 percent of its

weight in kidney and pelvic fat, and a high Choice leg conformation grade. Such a carcass with normal fat distribution would also have a body wall thickness of 0.9 inch.

(4) *Yield Grade 4.* (1) A carcass in Yield Grade 4 usually is completely covered with fat. There usually is a moderately thick covering of fat over the back and a slightly thick covering over the shoulder and legs. There usually are large deposits of fat in the flanks and cod or udder.

(2) A carcass in this yield grade which is near the borderline of Yield Grade 4 and Yield Grade 5 might have 0.4 inch of fat over the ribeye, 4.5 percent of its weight in kidney and pelvic fat, and an average Choice leg conformation grade. Such a carcass with normal fat distribution would also have a body wall thickness of 1.1 inches.

(5) *Yield Grade 5.* A carcass in Yield Grade 5 usually has more external and kidney and pelvic fat and a lower conformation grade of leg than a carcass in Yield Grade 4.

PORK CARCASSES

§ 2853.132 Bases for pork carcass standards.

The standards for pork carcasses developed by the United States Department of Agriculture, provide for segregation according to (a) class, as determined by the apparent sex condition of the animal at the time of slaughter, and (b) grade, which reflects quality of pork and the relative proportion of lean cuts to fat cuts in the carcass.

§ 2853.133 Pork carcass classes.

The five classes of pork carcasses, comparable to the same five classes of slaughter hogs, are barrow, gilt, sow, stag, and boar carcasses.

§ 2853.134 Application of standards for grades of barrow and gilt carcasses.

(a) Grades for barrow and gilt carcasses are based on two general considerations: (1) Quality-indicating characteristics of the lean, and (2) expected combined yields of the four lean cuts (ham, loin, picnic shoulder, and Boston butt).

(b) With respect to quality, two general levels are considered: One for carcasses with characteristics which indicate that the lean in the four lean cuts will have an acceptable quality and one for carcasses with characteristics which indicate that the lean will have an unacceptable quality. The quality of the lean is best evaluated by a direct observation of its characteristics in a cut surface and when a cut surface of major muscles is available, this shall be used as the basis for the quality determination. The standards describe the characteristics of the loin eye muscle at the 10th rib. However, when this surface is not available, other exposed major muscle surfaces can be used for the quality determination based on the normal development of the characteristics in relation to those described for the loin eye muscle at the 10th rib. When a major muscle cut

surface is not available, the quality of the lean shall be evaluated indirectly based on quality-indicating characteristics that are evident in carcasses. These include firmness of the fat and lean, amount of feathering between the ribs, and color of the lean. The standards describe a development of each of these factors that is normally associated with the lower limit of acceptable lean quality. The degree of external fatness, as such, is not considered in evaluating the quality of the lean.

(c) Carcasses which have characteristics indicating that the lean in the four lean cuts will not have an acceptable quality or bellies too thin to be suitable for bacon production are graded U.S. Utility. Also graded U.S. Utility—regardless of their development of other quality-indicating characteristics—are carcasses which are soft and oily. Belly thickness is determined by an overall evaluation of its thickness with primary consideration being given to the thickness along the navel edge and thickness of the belly pocket.

(d) Four grades—U.S. No. 1, U.S. No. 2, U.S. No. 3, and U.S. No. 4—are provided for carcasses which have indications of an acceptable lean quality and acceptable belly thickness. These grades are based entirely on the expected carcass yields of the four lean cuts and no consideration is given to a development of quality superior to that described as minimum for these grades. The expected yields of the four lean cuts for each of these four grades are shown in Table I:

TABLE I

Expected Yields of the Four Lean Cuts Based on Chilled Carcass Weight, by Grade¹

Grade	Yield
U.S. No. 1	53 percent and over.
U.S. No. 2	50 to 52.9 percent.
U.S. No. 3	47 to 49.9 percent.
U.S. No. 4	Less than 47 percent.

¹ These yields will be approximately 1 percent lower if based on hot carcass weight.

The yields shown in Table I are based on cutting and trimming methods used by the U.S. Department of Agriculture in developing the standards. (These cutting and trimming methods may be obtained from the Meat Quality Division, Food Safety and Quality Service, U.S. Department of Agriculture, Washington, D.C. 20250.) Other cutting and trimming methods may result in different yields. For example, if more fat is left on the four lean cuts than prescribed in the USDA cutting and trimming methods, the yield for each grade will be higher than indicated. However, such a method of trimming, if applied uniformly, should result in similar differences in yields between grades.

(e) Carcasses vary in their yields of the four lean cuts because of variations in their degree of fatness and in their degree of muscling (thickness of muscling in relation to skeletal size). Since many carcasses have a normal distribution of fat and a normal development of muscling for their degree of fatness, in determining their grade the actual average thickness of backfat and

the carcass length or weight are the only factors considered. These relationships are illustrated in Figure 1 for carcasses either 27 to 36 inches long or weighing 120 to 255 pounds. For carcasses of other lengths or weights, average backfat thickness requirements for the various grades can be determined by an extension of the lines in this figure (Note: In cases where length and backfat thickness indicate a different grade than weight and backfat, the grade shall be determined by using length.) In these standards the actual average thickness of backfat is an average of three measurements including the skin made opposite

RELATIONSHIP BETWEEN AVERAGE THICKNESS OF BACKFAT, CARCASS LENGTH OR WEIGHT, AND GRADE FOR CARCASSES WITH MUSCLING TYPICAL OF THEIR DEGREE OF FATNESS.

- 1/ An average of three measurements including the skin made opposite the first and last ribs and the last lumbar vertebra. It also reflects adjustment, as appropriate, to compensate for variations from normal fat distribution.
 2/ Carcass weight is based on a hot packer style carcass.
 3/ Carcass length is measured from the anterior point of the aitch bone to the anterior edge of the first rib.

Figure 1

(f) In some carcasses the actual average thickness of backfat is not representative of their degree of fatness. In such cases, an appropriate adjustment is made in the average thickness of backfat and the grade is then determined as illustrated in Figure 1. In evaluating the degree of fatness to determine whether it is representative of the actual average thickness of backfat, particular attention is given to the backfat thickness at points other than those used in determining the average and to the amount of fat in such areas as over the outside of the ham, at the juncture of the belly with the shoulder, directly anterior to the hipbone, and over the edge of the loin. For a carcass having a fat distribution indicative of a greater degree of overall fatness than that normally associated with its actual average thickness of backfat, the average thickness of backfat is adjusted upward. Likewise, for a carcass having a fat distribution indicative of a lesser degree of overall fatness than that normally

associated with its actual average thickness of backfat, the average thickness of backfat is adjusted downward. In many carcasses, no adjustment is necessary. Although an adjustment in the average thickness of backfat of one-tenth of an inch is not uncommon, seldom should it exceed two-tenths of an inch.

(g) The degree of muscling specified for each of the four grades decreases progressively from the U.S. No. 1 grade through the U.S. No. 4 grade. This reflects the fact that among carcasses of the same weight, fatter carcasses normally have a lesser degree of muscling. For purposes of these standards, six degrees of muscling are recognized: Very thick, thick, moderately thick, slightly thin, thin, and very thin. These are intended to cover the entire range of muscling present among pork carcasses currently being produced. The degrees which are typical for carcasses at the minimum of the U.S. No. 1, U.S. No. 2, U.S. No. 3, and U.S. No. 4 grades are,

respectively: Thick, moderately thick, slightly thin, and thin. For carcasses having a development of muscling which is different from that normally associated with their degree of fatness, the average backfat thickness-carcass length on carcass weight relationships for the various grades are different than shown in Figure 1. Consideration is given such unusual developments of muscling as follows: In each grade, a superior development of muscling is permitted to compensate for a greater average backfat thickness at the rate of one-tenth inch greater backfat thickness for a full degree of superior muscling. Except for the U.S. No. 1 grade, the reverse type of compensation is also permitted at the same rate. In the U.S. No. 1 grade, this type of compensation is limited to one full degree of inferior muscling; carcasses which have less than moderately thick muscling but which would otherwise qualify for the U.S. No. 1 grade are graded U.S. No. 2.

(h) In no case, however, may the combined effect of variations from normal fat distribution and muscling alter the final grade more than one full grade from that indicated by the actual average backfat thickness and carcass length or weight.

(i) Since carcasses qualifying for the U.S. No. 1, U.S. No. 2, U.S. No. 3, and U.S. No. 4 grades may vary with respect to their average thickness of backfat, their length or weight, their development of muscling, and their distribution of fat, there will be carcasses which qualify for each of these grades in which the development of one or more of these factors is more nearly typical of another grade. Because it is impractical to describe the nearly limitless numbers of such recognizable combinations of these factors, the standards for each grade describe only carcasses whose expected yield of the four lean cuts is at the lower limit of each grade and which have a development of muscling and distribution of fat which is normal for such carcasses.

(j) The standards describe the development of the various grade factors as they appear in thoroughly chilled carcasses. However, carcasses with a lesser degree of chilling may be graded if there is reasonable assurance that after thorough chilling they will have indications of either acceptable or unacceptable quality of lean.

§ 2853.135 Specifications for official United States standards for grades of barrow and gilt carcasses.

(a) U.S. No. 1. Carcasses in this grade have an acceptable quality of lean, a high yield of lean cuts, and a low yield of fat cuts. For carcasses with minimum acceptable lean quality, the cut surface of the loin eye muscle at the 10th rib will be slightly firm, have a slight amount of marbling and be grayish pink to moderately dark red in color. However, for intact carcasses, minimum acceptable quality of lean is indicated by a slight amount of feathering, fat that is slightly firm, and lean that is slightly firm and grayish pink to moderately dark red in color.

erately dark red in color. The belly is at least slightly thick. Carcasses near the borderline between the U.S. No. 1 and U.S. No. 2 grades are thickly muscled in the hams, loins, and shoulders. The lower portion of the ham toward the hock is covered with a thin layer of fat, the back is well-rounded, the area at the juncture of the lower part of the shoulder and the belly is depressed in relation to the shoulder and the belly, and the area directly anterior to the hipbone is depressed in relation to the loin and ham. The maximum actual average thickness of backfat for carcasses in this grade will vary depending upon the distribution of fat, the development of muscling, and the carcass length or weight. For carcasses with a distribution of fat and development of muscling as described herein, the maximum average thickness of backfat increases from 1.3 to 1.6 inches with increases in either carcass length from 27 to 36 inches or carcass weight from 120 to 255 pounds (see Figure 1). A development of muscling superior to that specified as minimum for the U.S. No. 1 grade may compensate for a development of fatness which is greater than that indicated in Figure 1 as maximum for the U.S. No. 1 grade at the rate of one full degree of muscling for one-tenth of an inch increase in thickness of backfat. For example, a carcass which is 30 inches long and which has very thick muscling may have an average thickness of backfat of 1.5 inches and remain eligible for the U.S. No. 1 grade. The reverse type of compensation is also permitted—at the same rate—except that in no case may a carcass be graded U.S. No. 1 with less than moderately thick muscling. Also, in no case may the combined effect of variations in muscling and fat distribution from those described herein alter the final grade more than one full grade from that indicated by the actual average backfat thickness and either carcass length or weight.

(b) U.S. No. 2. Carcasses in this grade have an acceptable quality of lean, a slightly high yield of lean cuts, and a slightly low yield of fat cuts. For carcasses with minimum acceptable lean quality the cut surface of the loin eye muscle at the 10th rib will be slightly firm, have a slight amount of marbling and be grayish pink to moderately dark red in color. However, for intact carcasses, minimum acceptable quality of lean is indicated by a slight amount of feathering, fat that is slightly firm, and lean that is slightly firm and grayish pink to moderately dark red in color. The belly is at least slightly thick. Carcasses near the borderline between the U.S. No. 2 and U.S. No. 3 grades are moderately thickly muscled in the hams, loins, and shoulders. The lower portion of the ham toward the hock is covered with a slightly thin layer of fat and the back is slightly well-rounded. The area at the juncture of the lower part of the shoulder and belly is slightly depressed in relation to the shoulder and the belly and the area directly anterior to the hipbone is slightly depressed in relation to the loin and ham.

The maximum actual average thickness of backfat for carcasses in this grade will vary depending upon the distribution of fat, the development of muscling, and the carcass length or weight. For carcasses with a distribution of fat and development of muscling as described herein, the maximum average thickness of backfat increases from 1.6 to 1.9 inches with increases in either carcass length from 27 to 36 inches or carcass weight from 120 to 255 pounds (see Figure 1). A development of muscling superior to that specified as minimum for the U.S. No. 2 grade may compensate for a development of fatness which is greater than that specified as maximum for the U.S. No. 2 grade at the rate of one full degree of muscling for one-tenth of an inch increase in thickness of backfat. For example, a carcass which is 30 inches long and which has thick muscling may have an average thickness of backfat of 1.8 inches and remain eligible for the U.S. No. 2 grade. The reverse type of compensation is also permitted at the same rate. For example, a carcass which is 30 inches long and which has an average thickness of backfat of 1.6 inches may have slightly thin muscling and remain eligible for the U.S. No. 2 grade. In no case may the combined effect of variations in muscling and fat distribution from those described herein alter the final grade more than one full grade from that indicated by the actual average backfat thickness and either carcass length or weight.

(c) U.S. No. 3. Carcasses in this grade have an acceptable quality of lean, a slightly low yield of lean cuts, and a slightly high yield of fat cuts. For carcasses with minimum acceptable lean quality, the cut surface of the loin eye muscle at the 10th rib will be at least slightly firm, have a slight amount of marbling, and be grayish pink to moderately dark red in color. However, for intact carcasses, minimum acceptable quality of lean is indicated by a slight amount of feathering, fat that is slightly firm, and lean that is slightly firm and grayish pink to moderately dark red in color. The belly is at least slightly thick. Carcasses near the borderline between the U.S. No. 3 and U.S. No. 4 grades are slightly thinly muscled in the hams, loins, and shoulders. The lower portion of the ham toward the hock is covered with a slightly thick layer of fat. The back is slightly flat and the edge of the loin is slightly full resulting in a slight break from the back into the side. In the area at the juncture of the lower part of the shoulder and the belly there is only a very slight depression in relation to the shoulder and the belly. In the area directly anterior to the hipbone there is only a very slight depression in relation to the loin and the ham. The maximum actual average thickness of backfat for carcasses in this grade will vary depending upon the distribution of fat, the development of muscling, and the carcass length or weight. For carcasses with a distribution of fat and development of muscling as described herein, the maximum average thickness of backfat increases from 1.9 to 2.2 inches with in-

creases in either carcass length from 27 to 36 inches or carcass weight from 120 to 255 pounds (see Figure 1). A development of muscling superior to that specified as minimum for the U.S. No. 3 grade may compensate for a development of fatness which is greater than that specified as maximum for the U.S. No. 3 grade at the rate of one full degree of muscling for one-tenth of an inch increase in thickness of backfat. For example, a carcass which is 30 inches long and which has moderately thick muscling may have an average thickness of backfat of 2.1 inches and remain eligible for the U.S. No. 3 grade. The reverse type of compensation is also permitted at the same rate. For example, a carcass which is 30 inches long and which has an average thickness of backfat of 1.9 inches may have thin muscling and remain eligible for the U.S. No. 3 grade. In no case may the combined effect of variations in muscling and fat distribution from those described herein alter the final grade more than one full grade from that indicated by the actual average backfat thickness and either carcass length or weight.

(d) U.S. No. 4. Carcasses in this grade have an acceptable quality of lean but a lower expected yield of lean cuts than carcasses in the U.S. No. 3 grade.

(e) U.S. Utility. Included in this grade are all carcasses which have characteristics that indicate they will have a lesser development of lean quality than described as minimum for the U.S. No. 1, U.S. No. 2, U.S. No. 3, and U.S. No. 4 grades. Also included are all carcasses which do not have acceptable belly thickness and all carcasses—regardless of their development of other quality-indicating characteristics—which are soft and oily.

§ 2853.136 Application of standards for grades of sow carcasses.

(a) The standards for grades of sow carcasses are based on (1) differences in yields of lean cuts and of fat cuts and (2) differences in quality of cuts. There are rather uniform differences in these characteristics from one grade to another. The U.S. No. 1 grade has about the minimum degree of finish required to produce cuts of acceptable palatability. The four major trimmed lean cuts—hams, loins, picnic, and butts—normally make up more than 46 percent of carcass weight. The U.S. No. 2 and U.S. No. 3 grades have successively higher degrees of finish resulting in lower yields of lean cuts and higher yields of fat cuts than U.S. No. 1 grade. Yields of lean cuts average 45 to 48 percent and under 45 percent of carcass weight, respectively, for U.S. No. 2 and U.S. No. 3 grades. In addition, the cuts from these grades have more fat remaining after trimming of external fat than do the cuts from U.S. No. 1 grade carcasses. Medium grade carcasses are underfinished and exhibit the lack of firmness and indications of little or no marbling (fat interspersed within the lean) associated with low palatability. Cull grade carcasses are decidedly under-

finished and the pork is soft with very little evidence of marbling and is of low palatability.

(b) The standards for grades of sow carcasses apply only to carcasses with the firmness appropriate to their degree of finish. However, carcasses which are typically soft or oily as a result of feeds producing soft or oily fat may be graded in accordance with the standards provided they are identified as soft or oily along with the grade.

(c) There are differences in the bellies of sow carcasses which are peculiar to the class. Increasing numbers of litters farrowed and raised by a sow result in greater development of mammary tissue and increasing roughness of the belly along the teat line with accompanying seediness. In addition, when pigs were weaned only a short time before the sow was slaughtered the mammary tissue still contains milk and the bellies are commonly termed "wet". However, the smoothness or dryness of bellies has little appreciable effect on the basic grade determining factors and the standards contain no provision for altering the grade of a sow carcass due to these belly characteristics. Rather than forming a part of the basis for grade, it is the intent of the standards that smoothness and dryness of bellies should be a separate consideration used in conjunction with grade, weight, and other factors in evaluating sow carcasses.

(d) Average back fat thickness measurements provide a reliable indication of the yields of cuts and the quality of cuts which determine the grade of sow carcasses. Therefore, indication of a specific range in back fat thickness for each grade forms a part of the standards for grade. Analysis of measurement and cutting data for sow carcasses reveals that yields of cuts are approximately equal in carcasses which are equal in fat thickness but widely different in weight. Thus, to maintain comparable yields in a grade at all weights, back fat thickness requirements for a grade are the same at all weights. This is in contrast to the standards for barrows and gilts, in which the fat thickness for a grade increases for heavier or longer carcasses in order to maintain yields of cuts. With practice in the grading operation, visual estimates of fat thickness may often replace actual measurements with satisfactory accuracy. The following table of measurements provides an objective guide in determining the grade of sow carcasses.

Grade:	Average back fat thickness ¹
U. S. No. 1.....	1.5 to 1.9 inches.
U. S. No. 2.....	1.9 to 2.3 inches.
U. S. No. 3.....	2.3 or more inches.
Medium.....	1.1 to 1.5 inches.
Cull.....	Less than 1.1 inches.

¹ Average of three measurements, skin included, made opposite first and last ribs and the last lumbar vertebra.

(e) In addition to the measurement guides to grade, the standards also include descriptive specifications outlining the characteristics of sow carcasses typical of the minimum degree of finish for each grade. Average back fat thickness is a major factor in grading, but more accurate appraisal of yields of cuts and quality of cuts is achieved in borderline cases by consideration of thickness of muscling, conformation of the major cuts, uniformity of fleshing and finish, firmness, and indications of marbling. However, in no case may the final grade of a carcass be more than one-half the width of a grade different from that indicated by average back fat thickness.

(f) The standards describe rather typical carcasses of each grade, and no attempt is made to describe the numerous combinations of characteristics that may qualify a carcass for a particular grade.

§ 2853.137 Specifications for official United States standards for grades of sow carcasses.

(a) *U. S. No. 1 grade.* U. S. No. 1 grade sow carcasses have about the minimum degree of finish required to produce pork cuts of acceptable palatability. Meatiness and yield of lean cuts from carcass weight are slightly high. Yield of fat cuts is slightly low. The ratio of total lean and fat to bone is slightly high. Carcasses with the minimum finish required for U. S. No. 1 grade are moderately long and slightly wide in relation to weight. The back and loins are moderately full and thick with a well-rounded appearance. Hams are usually moderately thick and plump and are slightly full in the lower part toward the hock. Bellies are moderately long, slightly thick, and moderately uniform in thickness with a slightly thick belly pocket. Shoulders are slightly thick and full. Carcasses are usually moderately well-balanced and moderately uniform in fleshing and finish. There are moderate quantities of interior fat in the pelvic area, a slightly thin but moderately extensive layer of fat lining the inside surface of the ribs, and a slightly small quantity of feathering, or fat intermingled with the lean between the ribs. The lean is firm. Both exterior and interior fats are firm, white, and of excellent quality. Carcasses with back fat thickness qualifying them for the fatter one-half of the U. S. No. 1 grade but with thin muscling in the major cuts, uneven fleshing and finish, or thick and uneven bellies shall be graded U. S. No. 2. Carcasses with back fat thickness qualifying them for the thinner one-half of the U. S. No. 1 grade but with only a moderately thin and incomplete rib lining, a moderately small quantity of feathering, slightly thin bellies with moderately thin belly pockets, and moderately soft lean and fat shall be graded Medium.

(b) *U. S. No. 2 grade.* U. S. No. 2 grade sow carcasses have a higher de-

gree of finish than the minimum required to produce pork cuts of acceptable palatability. Meatiness and yield of lean cuts from carcass weight are slightly low. Yield of fat cuts is slightly high. The ratio of total lean and fat to bone is moderately high. Carcasses with the minimum finish required for U. S. No. 2 grade are slightly short and moderately wide in relation to weight. The back and loins are full and thick and are especially full near the edges. Hams are usually thick and plump and are moderately full in the lower part toward the hock. Bellies are slightly short, moderately thick, and rather uniform in thickness with a moderately thick belly pocket. Shoulders are moderately thick and full. Carcasses are usually well-balanced and uniform in fleshing and finish. There are slightly large quantities of interior fat in the pelvic area, a slightly thick and rather extensive layer of fat lining the inside surface of the ribs, and moderate feathering. The lean is firm. Both exterior and interior fats are firm, white, and of excellent quality. Carcasses with back fat thickness qualifying them for the fatter one-half of the U. S. No. 2 grade but with thin muscling in the major cuts, uneven fleshing and finish, or very thick and uneven bellies shall be graded U. S. No. 3. Carcasses with back fat thickness qualifying them for the thinner one-half of the U. S. No. 2 grade but with thick muscling in the major cuts, well-balanced fleshing and uniform finish, and slightly thick bellies shall be graded U. S. No. 1.

(c) *U. S. No. 3 grade.* U. S. No. 3 grade sow carcasses have a decidedly higher degree of finish than the minimum required to produce pork cuts of acceptable palatability. Meatiness and yield of lean cuts from carcass weight are low. Yield of fat cuts is high. The ratio of total lean and fat to bone is high. Carcasses with the minimum finish required for U. S. No. 3 grade are short and wide in relation to weight. The back and loins are very full and thick and are decidedly full at the edges. Hams are usually very thick and plump and are full in the lower part toward the hock due to a thick fat covering. Bellies are short and thick and uniform in thickness with a thick belly pocket. Shoulders are thick and full. Carcasses are usually well-balanced and uniform in fleshing and finish. There are large quantities of interior fat in the pelvic area, a moderately thick and extensive layer of fat lining the inside surface of the ribs, and slightly abundant feathering. The lean is firm. Both exterior and interior fats are firm, white, and of excellent quality. Carcasses with back fat thickness indicative of nearly minimum finish for the U. S. No. 3 grade but with thick muscling in the major cuts, well-balanced fleshing and uniform finish, and moderately thick bellies shall be graded U. S. No. 2.

(d) *Medium grade.* Medium grade sow carcasses have a lower degree of finish than the minimum required to

produce pork cuts of acceptable palatability. Yield of lean cuts from carcass weight is moderately high. Yield of fat cuts is moderately low. The ratio of total lean and fat to bone is moderately low. Carcasses with the minimum finish required for Medium grade are long and rather narrow in relation to weight. The back and loins are rather thin, lack fullness, and slope away from the center. Hams are usually slightly thin, lack plumpness, and taper toward the hock. Bellies are long and moderately thin and are somewhat uneven in thickness with a thin belly pocket. Shoulders are moderately thin and flat. Carcasses tend to be uneven and lack uniformity of fleshing and finish. There are slightly small quantities of interior fat in the pelvic area, a thin and incomplete layer of fat lining the inside surface of the ribs, and only a small quantity of feathering. The lean is moderately soft with little evidence of marbling. Both exterior and interior fats are moderately soft, white to creamy white, and of moderately low quality. Carcasses with back fat thickness qualifying them for the fatter one-half of the Medium grade that are firm and have slightly thick bellies and belly pockets, a slightly thin but moderately extensive rib lining, and a slightly small quantity of feathering shall be graded U. S. No. 1. Carcasses with back fat thickness qualifying them for the thinner one-half of the Medium grade but with little or no rib lining and feathering, thin bellies and very thin belly pockets, and soft lean and fat shall be graded Cull.

(e) *Cull grade.* Cull grade sow carcasses have a decidedly lower degree of finish than the minimum required to produce pork cuts of acceptable palatability. Yield of lean cuts from carcass weight is high. Yield of fat cuts is low. The ratio of total lean and fat to bone is low. Carcasses with the degree of finish typical of the Cull grade are long and narrow in relation to weight. The back and loins are thin and decidedly lacking in fullness with a definite slope toward the sides. Hams are usually thin and flat and taper toward the hock. Bellies are very long and thin and are uneven in thickness with a very thin belly pocket. Shoulders are thin and flat. Carcasses tend to be uneven and lack uniformity of fleshing and finish. There are only small quantities of interior fat in the pelvic area, little or no fat lining the inside surface of the ribs, and scant feathering. The lean is soft and watery with very little evidence of marbling. Both exterior and interior fats are soft, creamy white to white, and of low quality. Carcasses with back fat thickness indicative of nearly maximum finish for the Cull grade that are only moderately soft and have moderately thin bellies and belly pockets, a thin and incomplete rib lining, and a small quantity of feathering shall be graded Medium.

Title 9—Animals and Animal Products

CHAPTER I—ANIMAL AND PLANT HEALTH INSPECTION SERVICE, DEPARTMENT OF AGRICULTURE

SUBCHAPTER C—INTERSTATE TRANSPORTATION OF ANIMALS (INCLUDING POULTRY) AND ANIMAL PRODUCTS

PART 73—SCABIES IN CATTLE

Release of Areas Quarantined

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Final rule.

SUMMARY: The purpose of this amendment is to release portions of Monterey and San Benito Counties in California from areas quarantined because of cattle scabies. Surveillance activity indicates that cattle scabies no longer exists in the areas quarantined. No areas in the State of California remain under quarantine.

EFFECTIVE DATE: September 30, 1977.

FOR FURTHER INFORMATION CONTACT:

Dr. Glen O. Schubert, Chief Staff Veterinarian, Sheep, Goats, Equine, and Ectoparasites Staff, USDA, APHIS, VS, Room 737, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782 (301-436-8322).

SUPPLEMENTARY INFORMATION: This amendment releases portions of Monterey and San Benito Counties in California from the areas quarantined because of cattle scabies. Therefore, the restrictions pertaining to the interstate movement of cattle from quarantined areas contained in 9 CFR Part 73, as amended, will not apply to the excluded areas, but the restrictions pertaining to the interstate movement of cattle from nonquarantined areas contained in said Part 73 will apply to the excluded areas. Accordingly, Part 73, Title 9, Code of Federal Regulations, as amended, restricting the interstate movement of cattle because of scabies, is hereby amended in the following respect:

§ 73.1a [Amended]

In § 73.1a, paragraph (d) relating to the State of California is deleted.

(Secs. 4-7, 23 Stat. 32, as amended; secs. 1 and 2, 32 Stat. 791-792, as amended; secs. 1-4, 33 Stat. 1264, 1265, as amended; secs. 3 and 11, 76 Stat. 130, 132; 21 U.S.C. 111-113, 115, 117, 120, 121, 123-126, 134b, 134c; 37 FR 28464, 28477; 38 FR 19141.)

The amendment relieves restrictions no longer deemed necessary to prevent the spread of cattle scabies and should be made effective promptly in order to be of maximum benefit to affected persons. It does not appear that public participation in this rulemaking proceeding would make additional relevant information available to the Department.

Accordingly, under the administrative procedure provisions in 5 U.S.C. 553, it is found upon good cause that notice and

other public procedure with respect to the amendment are impracticable and unnecessary, and good cause is found for making the amendment effective less than 30 days after publication in the Federal Register.

Done at Washington, D.C., this 31th day of September 1977.

NOTE.—The Animal and Plant Health Inspection Service has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A-107.

PIERRE A. CHALOUX,
Deputy Administrator,
Veterinary Services.

Title 12—Banks and Banking

CHAPTER II—FEDERAL RESERVE SYSTEM

SUBCHAPTER A—BOARD OF GOVERNORS OF THE FEDERAL RESERVE SYSTEM

[Reg. Z; FC-0110 through FC-0114]

PART 226—TRUTH IN LENDING

Official Staff Interpretations

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Official staff interpretation(s).

SUMMARY: The Board is publishing the following official staff interpretations of Regulation Z, issued by a duly authorized official of the Division of Consumer Affairs.

EFFECTIVE DATE: October 4, 1977.

FOR FURTHER INFORMATION CONTACT:

Glenn E. Loney, Attorney, Fair Credit Practices Section, Division of Consumer Affairs, Board of Governors of the Federal Reserve System, Washington, D.C. 20551 (202-452-2412).

SUPPLEMENTARY INFORMATION.

(1) Identifying details have been deleted to the extent required to prevent a clearly unwarranted invasion of personal privacy. The Board maintains and makes available for public inspection and copying a current index providing identifying information for the public subject to certain limitations stated in 12 CFR Part 261.6.

(2) Official staff interpretations may be reconsidered upon request of interested parties and in accordance with 12 CFR Part 226.1(d)(2). Every request for reconsideration should clearly identify the number of the official staff interpretation in question, and should be addressed to the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551.

(3) 15 U.S.C. 1640(f).

FC-0110

§ 226.6(c) Principal amount of mortgage loan (encompassing both prepaid finance

charges and amount financed) may be disclosed consistent with § 226.6(c) and 8(d), but no specific terminology required. Use of this figure to identify the transaction is also permissible but should be done carefully. (See FC-0040)

SEPTEMBER 6, 1977.

This is in response to your letter of . . . in which you requested an official staff interpretation of Regulation Z with respect to disclosure of the principal amount of the loan in a residential mortgage transaction.

You indicate that your client makes mortgage loans in which certain prepaid finance charges are imposed. Your client desires to disclose the aggregate amount of the loan, consisting of the sum of the amount financed and the prepaid finance charges, in order to give customers a more complete picture of the loan transaction. Your letter indicates you would refer to the principal amount of the loan in two places: first, as part of the disclosure which identifies the transaction, and second, as a disclosure item following the disclosures of the "amount financed" and the "prepaid finance charge."

The staff believes the second of the disclosures you suggest is consistent with the provisions of § 226.8(d), and is permissible additional information under § 226.6(c) so long as it does not confuse or detract attention from required disclosures. While § 226.8(d)(1) contemplates the existence of some total loan figure (which encompasses both prepaid finance charges and the amount financed), the regulation requires no specific terminology to be used for that figure, and we cannot prescribe any particular phrasing that your client must use.

With regard to the use of the aggregate amount of the loan as a part of the textual disclosure that identifies the transaction or relates the disclosure statement to the appropriate transaction document(s), the staff believes that this also is permissible additional information under § 226.6(c). We would call your attention, however, to Official Staff Interpretation FC-0040 and to a staff letter dated June 23, 1977, both of which suggest the need for care in the placement of such nonrequired disclosures lest they be found to "contradict, obscure or detract attention from" required disclosures. Copies of both letters are enclosed for your reference.

This is an official staff interpretation of Regulation Z, issued under § 226.1(d)(3) of the regulation and limited in its application to the facts outlined herein. We note that you represent a creditor subject to the laws of the State of Connecticut. Since Connecticut has been granted an exemption from the relevant portion of the Federal law, you may wish to contact the Bank Commissioner of the State of Connecticut for the views of that office. We trust this is responsive to your inquiry.

Sincerely,

JERALD C. KLUCKMAN,
Associate Director.
FC-0111

§ 226.2(h) and § 226.2(s) Where bank and credit card issuer agree to permit bank's checking account customers who have open end credit accounts with card issuer to use credit line to cover overdrafts under separate agreement between bank and customer, and bank neither assists customers in applying for credit card nor receives any fee in connection with overdrafts that are covered, bank is not a creditor for purposes of Regulation Z.

SEPTEMBER 16, 1977.

This is in response to your letter of . . . in which you request an official staff interpretation of Regulation Z.

Your inquiry relates to whether your client, a bank, would be a creditor for purposes of Regulation Z based on the follow-

ing facts. The bank and a credit card issuer enter into an agreement that will permit checking account customers of the bank who have an open end credit account with the card issuer to use the credit line to cover checking account overdrafts. Under a separate agreement with its customers, the bank will agree to request advances from the card issuer in \$50 increments to cover any overdrafts. When an overdraft occurs, the bank will contact the card issuer to determine whether credit is available to the customer and to request an advance. If credit is available, the bank will honor the overdraft and collect a cash advance from the card issuer. If the bank receives a negative response from the card issuer, the bank will return the customer's check because of insufficient funds.

Under this plan, the bank will neither assist the customer in completing an application for a credit card nor participate in any way in the card issuer's initial decision to issue a credit card to a bank customer. The bank will receive no fee from either the customer or the card issuer for requesting an advance to cover an overdraft. Customers will pay no additional charge to the card issuer with regard to cash advances requested by the bank, other than the finance charge normally imposed by the card issuer pursuant to its open end credit agreement with the customer. The bank will impose its normal charge for checks that are returned because of insufficient funds, but will not impose any charge in connection with an overdraft check that is honored under the overdraft plan. The monthly checking account service charge will be the same whether or not a customer has the overdraft feature on the checking account, and whether or not any overdraft has been covered in any given month.

You ask whether the bank is an "arranger of credit" for purposes of § 226.2(h) of Regulation Z and, thus, subject to the disclosure requirements of the regulation. It is staff's opinion that the bank is neither extending credit nor arranging for an extension of credit as defined in § 226.2(h). Consequently, the bank is not subject to any disclosure requirements imposed by the regulation.

I understand that one of our staff members discussed the other issues raised in your letter with you by telephone, and that an answer in this letter is no longer necessary.

This is an official staff interpretation of Regulation Z, issued in accordance with § 226.1(d)(3) of the regulation and limited in its application to the facts and issues stated herein. I trust it is responsive to your inquiry.

Sincerely,

JERALD C. KLUCKMAN,
Associate Director.
FC-0112

§ 226.15(b) Lessee's right to submit a bid for purchase of vehicle at termination of lease is not an "option to purchase" where lessor need not accept it and lessee's bid is treated like all other bids.

Lessor may require that lessee obtain the § 226.15(b)(14) professional appraisal within a reasonable time after termination of lease, but staff cannot state what is a reasonable time in all circumstances.

§ 226.15(c) Assumption of consumer lease is not a renegotiation; although no new disclosures are required, lessor may provide assuming party with restatement and update of original disclosures.

SEPTEMBER 13, 1977.

This is in reply to your letter of . . . requesting an official staff interpretation concerning several provisions of Regulation Z which implement the Consumer Leasing Act.

Your first question concerns the meaning of the term "option to purchase" as it is used in § 226.15(b)(11). Your client's vehicle lease agreement provides that upon termination of the lease, the realized value of the lease property shall be ascertained by a professional appraisal or by a bid procedure whereby the lessor procures several cash bids for the purchase of the vehicle, with the highest bid being deemed the realized value. The lease agreement provides that the lessee has a right to submit a cash bid for the purchase of the vehicle and that such bid shall receive the same consideration as any other bid. This right to bid is also provided by statute in your State. You note that the lessee's right to bid does not place the lessee in a position in any way superior to that of other bidders, that none of the bids submitted by persons other than the lessee are subordinate to the lessee's bid, and that the lessee has no right to and does not receive any information from the lessor regarding the amounts of other bids submitted. You ask whether the lessee's right to bid as described is an "option to purchase" within the meaning of § 226.15(b)(11).

It is staff's opinion that the lessee's right to submit a bid as described above does not constitute an "option to purchase" within the meaning of § 226.15(b)(11). This opinion is based on the fact that the lessor is not required to accept the lessee's bid and the lessee is in no better position than the other bidders.

Your second question concerns the lessee's right to a professional appraisal, which is provided in § 226.15(b)(14). You ask whether a lessor can require a lessee who chooses to exercise this right to complete the appraisal within a reasonable time after termination or expiration of the lease. In other words, you ask whether a "reasonable time" standard can be read into the provisions of § 226.15(b)(14). You ask further whether ten days would constitute a reasonable time.

Section 226.15(b)(14) requires a statement that the lessee may obtain a professional appraisal "at the end of the lease term or at early termination." Neither the Act nor the regulation specifies any time period in which such appraisal must be completed. In staff's opinion, a creditor may require that a customer obtain the appraisal within a reasonable time after the termination of the lease. Since the issue of what constitutes a reasonable time will vary depending on the facts of each situation, however, staff does not believe it can state whether any particular time period is reasonable in all circumstances.

Your final question concerns a situation in which, subsequent to the execution of a consumer lease, the lessee's obligations are assumed by a third party consumer pursuant to a written agreement between the lessor and the assuming party. You ask whether the lessor has any disclosure obligations to the assuming party. As you have noted, the only provision of Regulation Z which specifically deals with assumptions is found in § 226.8(k), which applies solely to other than open end credit. You ask whether the described lease assumption would constitute a renegotiation within the meaning of § 226.15(c), and thus be considered "a new lease subject to the disclosure requirements of this Part." You point out that treating the transaction as a new lease would be awkward, since re-estimating the residual value may effect a change in all the terms of the lease and thus produce a transaction which neither the lessee, the lessor, nor the assuming party anticipated or desired. You suggest that the lessor's disclosure obligations in this case could be fulfilled by providing a restatement of the disclosures made to the original lessee and a statement of the amounts credited to the original lessee's fixed obligations as of the date of the assumption.

Neither the Act nor the regulation provides for new disclosures to be made upon the assumption of a consumer lease when there are no changes in the original terms, and it is staff's opinion that no disclosures are required in these circumstances. Staff believes that if your client wishes to provide the assuming party with a restatement of the original disclosures as well as any updating information, this would certainly help the new party understand the obligation being assumed, and it would not violate the regulation.

This is an official staff interpretation of Regulation Z, issued in accordance with § 226.1(d)(3) of the regulation and limited in its application to the facts and issues addressed herein. I trust that it proves helpful to you.

Sincerely,

JERALD C. KLUCKMAN,
Associate Director.
FC-0113

§ 226.8(b) When an obligation is to be repaid in payments of varying amounts, § 226.8(b)(3) requirement that number and amount of payments be disclosed is satisfied if number of payments of each varying amount is disclosed. Total number of payments of all amounts need not be stated.

SEPTEMBER 13, 1977.

This is in response to your letter of . . . requesting clarification of the requirements of § 226.8(b)(3) of Regulation Z.

Specifically, you ask whether certain language, which you indicate appears on loan and installment sale forms used and/or purchased by your clients, complies with the requirement of § 226.8(b)(3) of Regulation Z and the identical requirements of § 128(a)(8) and 129(a)(6) of the Truth in Lending Act that a creditor disclose "[t]he number, amount, and due dates or period of payments scheduled to repay the indebtedness." It is staff's policy not to review particular creditor's disclosures to determine whether they comply with Truth in Lending requirements, and, in fact, § 226.1(d)(3) specifically provides that staff is without authority to approve particular creditors' forms in any manner. However, staff does feel that your letter raises a technical question of general applicability and significance which should be addressed.

In essence, you ask whether a creditor must, pursuant to the Act and Regulation Z, disclose in a single figure or amount the total number of payments scheduled to repay an obligation. For example, if a loan is scheduled to be repaid in 35 equal monthly installments plus one final installment of a differing amount, must the creditor state that there are 36 payments scheduled to repay the loan? Staff is of the opinion that if the creditor in our example discloses that the loan is to be repaid in 35 installments of a stated amount and one final installment of a differing stated amount, the creditor has complied with the requirement that the number of payments scheduled to repay the indebtedness be disclosed. When an obligation is to be repaid in payments of varying amounts, staff believes that the requirement of § 226.8(b)(3) that the number and amount of payments be disclosed is satisfied if the number of payments of each varying amount is disclosed. Staff does not feel that a creditor must also disclose the total number of payments of all amounts in such a situation, although the creditor may do so if it wishes.

In your letter you note that a conclusion opposite to that reached by staff was expressed by the Court in *Powers v. Sims and Levin Realtors*, 396 F. Supp. 12, 20 (E.D. Va. 1975), affirmed in part, reversed in part, and remanded on other grounds, 542 F.2d 1216

(4th Cir. 1976). There the Court held that a creditor must disclose the total number of all payments scheduled to repay an obligation, rather than provide the type of disclosure approved by staff in this letter, in order to comply with § 226.8(b)(3). And see *Louery v. Finance America Corporation*, 32 N.C. App. 174, 231 S.E.2d 904, 911 (1977), relying in part on *Powers*. Nonetheless, staff believes that its interpretation, as contained in this letter, properly construes the requirements of § 226.8(b)(3) with regard to the type of payment schedule discussed in our example. However, staff feels that it would not be appropriate to suggest what course of action should be followed by creditors in jurisdictions where courts have taken a position contrary to ours.

This is an official staff interpretation of Regulation Z, issued in accordance with § 226.1(d)(3) of the regulation and limited in its application to the facts and issues discussed herein.

I trust that this interpretation is responsive to your inquiry.

Sincerely,

JERALD C. KLUCKMAN,
Associate Director.
FC-0114

§ 226.8(d) Component parts of loan proceeds need not be itemized.

SEPTEMBER 13, 1977.

This is in response to your letter of . . . requesting an official staff interpretation of Regulation Z with respect to the requirements of § 129(a) of the Truth in Lending Act and 226.8(d)(1) of the regulation.

You refer to the recent decision of *McGowan v. Credit Center of North Jackson, Inc.*, 546 F.2d 73 (5th Cir. 1977), which addressed the issue of whether the Act and regulation require individual disclosure of each separate disbursement to be made from the net amount generated by the loan for the borrower's use or benefit. In *McGowan*, the Court held that the lender was not required to itemize the amount of prior loans to be repaid from the loan proceeds. On the basis of the *McGowan* decision, creditors within the Fifth Circuit's jurisdiction may disclose in the manner sanctioned by the Court with some degree of certainty that they are in compliance with the Act and regulation. You request an official staff interpretation, on which creditors in other States could rely, to the effect that components of the loan proceeds need not be itemized.

It is staff's opinion that § 129(a) of the Act and § 226.8(d)(1) of the regulation do not require a creditor to itemize component parts of the amount remaining after excluding all charges that are not part of the finance charge from the amount financed. It should be noted that this interpretation is limited to the question of the need to itemize components of the loan proceeds and expresses no opinion with regard to the separate disclosure of the loan proceeds.

This letter is an official staff interpretation of Regulation Z, issued in accordance with § 226.1(d)(3) of the regulation and limited in its application to the facts and issues outlined herein. I trust it is responsive to your request.

Sincerely,

JERALD C. KLUCKMAN,
Associate Director.

Board of Governors of the Federal Reserve System, September 29, 1977.

THEODORE E. ALLISON,
Secretary of the Board.

[Docket No. R-0110.]

PART 265—RULES REGARDING DELEGATION OF AUTHORITY

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Final rule.

SUMMARY: In order to expedite and facilitate the performance of certain of its functions, the Board of Governors has delegated to the Secretary of the Board authority to permit member banks to waive the penalty for early withdrawal of a time deposit in § 217.4(d) of Regulation Q for depositors suffering disaster-related losses in areas declared a major disaster area by the President.

EFFECTIVE DATE: September 27, 1977.

FOR FURTHER INFORMATION CONTACT:

Theodore E. Allison, Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551 (202-452-3257).

SUPPLEMENTARY INFORMATION: Section 217.4(d) of Regulation Q (12 CFR § 217.4(d)) provides that where a time deposit, or any portion thereof, is paid before maturity, a member bank may pay interest on the amount withdrawn at a rate not to exceed that currently prescribed for a savings deposit and that the depositor shall forfeit three months of interest payable at such rate. The Board of Governors has amended its Rules Regarding Delegation of Authority to authorize the Secretary of the Board to permit member banks to waive the early withdrawal penalty in those situations in which the President of the United States, pursuant to section 301 of the Disaster Relief Act of 1974 (42 U.S.C. 5141) and Executive Order No. 11795 of July 11, 1974, has designated an area a major disaster area. The Board regards a Presidential declaration of a major disaster area as recognition by the Federal government that a disaster of major proportions has occurred and under such circumstances believes it appropriate to provide an additional measure of assistance to disaster victims by temporarily suspending the Regulation Q early withdrawal penalty. Pursuant to this delegation, a waiver of the early withdrawal penalty will be limited in effectiveness to depositors suffering disaster-related losses in a geographical area designated a major disaster area by a Presidential declaration.

The provisions of section 553 of Title 5, United States Code relating to notice and public participation and deferred effective date are not followed in connection with this amendment because the change involved therein is procedural in nature and does not constitute a substantive rule subject to the requirements of such section.

Effective September 27, 1977, a new paragraph 265.2(a)(18) is added to read as follows:

§ 263.2 Specific functions delegated to Board employees and to Federal Reserve Banks.

(a) The Secretary of the Board (or, in the Secretary's absence, the Acting Secretary) is authorized:

(18) Under the provisions of section 19(j) of the Federal Reserve Act (12 U.S.C. 371b) and §§ 217.4(a) and (d) of Regulation Q (12 CFR 277.4(a) and (d)) to permit member banks to waive the penalty for early withdrawal of a time deposit in § 217.4(d) if all of the following conditions are met:

(i) The President of the United States declares an area a major disaster area pursuant to section 301 of the Disaster Relief Act of 1974 (42 U.S.C. 5141) and Executive Order No. 11795 of July 11, 1974.

(ii) A waiver is limited in effectiveness to depositors suffering disaster-related losses in the officially designated disaster area.

(iii) The appropriate Reserve Bank recommends approval.

(iv) All relevant divisions of the Board's staff recommend approval.

Board of Governors of the Federal Reserve System, September 27, 1977.

THEODORE E. ALLISON,
Secretary of the Board.

Title 16—Commercial Practices CHAPTER II—CONSUMER PRODUCT SAFETY COMMISSION SUBCHAPTER A—GENERAL PART 1009—GENERAL STATEMENTS OF POLICY OR INTERPRETATION Amendment of Policy on Establishing Priorities for Commission Action

AGENCY: Consumer Product Safety Commission.

ACTION: Final rule.

SUMMARY: In this notice the Commission amends its policy on establishing priorities for action under the five acts the Commission administers. This policy, has been effective since July 1, 1976. Some of the amendments to the priorities policy were suggested in written comments received from members of the public, and others were initiated within the Commission. The amendments include the addition of new criteria and the clarification and modification of existing criteria which the Commission considers in setting its priorities.

EFFECTIVE DATE: October 4, 1977.

FOR FURTHER INFORMATION CONTACT:

Edward J. Heiden, Director, Office of Strategic Planning, Consumer Product Safety Commission, Washington, D.C. 20207 (202-634-4350).

SUPPLEMENTARY INFORMATION: The Commission's priorities policy (16

CFR 1009.8), published in the FEDERAL REGISTER on July 8, 1976 (41 FR 27960), is a general statement of policy that is exempt from the notice and public procedure provisions of the Administrative Procedure Act (5 U.S.C. 553). Nevertheless, the Commission solicited public comment on the policy because of its importance, and stated that it may amend the policy as a result of the comments received. This notice summarizes the significant comments received, discusses the Commission's responses to them, and amends the policy wherever the Commission found changes to be appropriate and desirable.

The following individuals and groups submitted comments on the Commission's priorities policy: One consumer organization—Consumers Union; eight interested persons—James J. Frankman, Lawrence Feldman, Renee Mizell, Beverly J. Hardin, Amy R. Walker, Lynn Jordan, Theodora Sweeney, and Gayna L. Aude; three companies—AMF Incorporated, Monsanto Textiles Company (comment signed by John Lomartire, a member of the Commission's National Advisory Commission for the Flammable Fabrics Act), and Texize Chemicals Company; three trade associations—Toy Manufacturers of America, Inc., National Electrical Manufacturers Association, and the Soap and Detergent Association; one county official—Janice Redford, the Dane County (Wisconsin) Supervisor, District 37; two federal government entities—the Council on Wage and Price Stability and the Office of Consumer Affairs of the Department of Health, Education, and Welfare; one consulting firm—Walker Associates; one company president who is a former technical advisory committee member—Charles B. Sanders; one professor—Stewart Lee; and one employee of the Commission—Georg Maisel, Director of the Division of Poison Packaging of the Bureau of Biomedical Science.

Some of the comments suggested changes in the Commission's priorities policy, some expressed general support for the policy, and some raised relevant points and issues. The discussion below is organized according to issues rather than according to particular comments. All comments received by the Commission are on file at the Office of the Secretary, 1111 18th Street NW., 3rd floor, Washington, D.C. 20207 and are available for review by any interested member of the public.

The priorities policy, as published on July 8, 1976, included eight criteria that the Commission uses to establish priorities for action under the five acts it administers: the Consumer Product Safety Act (CPSA), the Federal Hazardous Substances Act (FHSA), the Flammable Fabrics Act (FFA), the Poison Prevention Packaging Act of 1970 (PPPA), and the Refrigerator Safety Act (RSA). According to the policy, priorities are established by a majority vote of the Commission members, and "will be reflected by votes on all requests for appropriations, and annual operating plan, and any revisions thereof" (§ 1009.8(b)).

The criteria are: (1) Frequency and severity of injuries, (2) causality of injuries, (3) chronic illness and future injuries, (4) cost and benefit of CPSC action, (5) unforeseen nature of the risk, (6) vulnerability of the population at risk, (7) probability of exposure to hazard, and (8) additional criteria.

The following discussion includes the significant issues raised by the comments:

I. COMMENTS ON EXISTING CRITERIA FOR ESTABLISHING PRIORITIES

A. CHRONIC ILLNESS AND FUTURE INJURIES

Certain products will receive priority attention under criterion (3) if there is reason to believe that they will be associated with many injuries in the future, even if current injuries associated with such products are neither frequent nor severe.

The National Electrical Manufacturers Association has commented that this criterion is based upon an obscure rationale, and should be carefully reconsidered and possibly withdrawn in favor of a more precise instruction—for example, that published research or findings of the National Institutes of Health must be used for anticipatory judgments concerning illnesses.

The Commission will use the best available data, including any available from the National Institutes of Health, for making judgments on chronic illness and future injuries. However, the scope of this criterion should remain broad enough to include all potential sources of data, and the Commission has accordingly decided not to make any change in this criterion.

B. COST AND BENEFIT OF CPSC ACTION

Under criterion (4) the Commission gives consideration to the cost of its action to producers and consumers. These costs and effects of its action on the utility, convenience and supply of the product and the movement toward substitutes, etc. are to be weighed on a preliminary basis against resulting benefits to society from reduced injuries. Numerous comments, including an in-depth statement submitted by an economist at the Council on Wage and Price Stability, have addressed this criterion. Two commenters have urged that, in determining costs and benefits, the Commission consider the expected effectiveness of regulatory options—either as a separate criterion or as an explicit component of the cost/benefit criterion. Two commenters have stated that specific injury and death cost assumptions used in estimating the benefits of an action should be an explicit part of the cost/benefit analysis.

In addition, two commenters have questioned the implications of the statement in criterion (4) that as among "risks of relatively equal priority, . . . those that are capable of being reduced at small cost should be given priority over those that would require producers to incur large costs" and hence would result in large price increases. Both of these commenters are concerned that

benefits will not receive appropriate consideration; one of them avers that only net benefits (benefits minus costs) represent the proper guide to priority.

Finally, two commenters addressing criterion (4) have expressed concern that attention to product cost increases may result in overprotection of producers or insufficient aggressiveness in correcting hazards.

The Commission believes that the comments asking that the Commission consider expected effectiveness of regulatory options and specific injury cost assumptions as components of the cost/benefit criterion indicate the need to be more specific as to the fact that benefit calculations already contain these factors as a component. Similarly, the example originally provided in criterion (4), of cost comparisons between products addressing relatively equal product risks, has apparently, and if so mistakenly, been interpreted as implying inadequate use of benefit estimates.

To correct these misapprehensions, the language of criterion (4) has been changed to provide a more explicit statement regarding the way the Commission considers benefits and costs.

The Commission must reject the argument that consideration of impact of product cost in the light of benefits results in undue protection of the manufacturer at the expense of the consumer. Under section 9(c) of the CPSCA, the Commission is instructed to consider cost impacts.

C. VULNERABILITY OF THE POPULATION AT RISK

Criterion (6) focuses on consumer products that are especially or frequently used by children, the elderly, and the handicapped. If all other factors are equal, the Commission will usually place a higher priority on preventing product related injury to people in these categories, based on their relatively lesser ability to judge or escape certain dangers.

The Toy Manufacturers of America, Inc. (TMA) has objected to the assignment of extra weighting for children's injuries. In support of its position, TMA has cited a study performed under contract to the Commission by Mueller Associates, Inc. entitled "Risk and Priority Determination Approaches: A Panel Study for the CPSC." This study concerns the injury evaluation used for the CPSC Hazard Index (which relies on statistics collected by the Commission's National Electronic Injury Surveillance System (NEISS)) and concludes that "the present practice of essentially counting injuries to children twice [is] not proper and could lead to erroneous conclusions as to which products are most hazardous" (page 21 of study).

The Commission agrees with the Mueller Report that the practice of extra-weighting children's injuries reported in the NEISS system shifts upward on the Hazard Index those products which are used extensively by children. Thus the Hazard Index is not an absolute ranking of products on a totally objective scale of hazard. The Commission hopes that

users of the Index will understand this. The practice of extra-weighting children's injuries merely reflects the Commission's long held belief that children are a particularly vulnerable population group. It is difficult to reach any other conclusion based on available injury statistics. The Commission recognizes, however, that children are not the only population group especially vulnerable to injuries and it believes that when such special vulnerability situations are recognized, the Commission should give them explicit, but not necessarily overriding, consideration.

Another commenter who expressed some doubts about the criterion concerning vulnerability of the population at risk, Renee Mizell, has cited the example of requirements for child-resistant packaging for drugs. She has stated that these requirements do protect children but at the same time hinder elderly people who live alone. Criterion (6) is intended to focus the Commission's attention, in appropriate cases, on the special hazards affecting certain subgroups in the general population. If and when the Commission regulates products to address such hazards, it will make every effort to avoid action that might endanger one subgroup while reducing risks for another subgroup. (It should be noted that, under the provisions of the PPPA, drugs not packaged in child-resistant containers are available to all consumers, including the elderly, upon request.)

D. PROBABILITY OF EXPOSURE TO HAZARD

County official Janice Redford has questioned, with regard to criterion (7), the reliability of future projections and the statistics of probability. The Commission recognizes that probability of exposure to hazards in the future must be based on projections from current statistics. No statistics are perfect, but the Commission nevertheless anticipates that it will be able to evaluate the probability of future consumer exposure to a particular hazard in some situations. This criterion is intended to express nothing more than such an evaluation.

Another commenter, Theodora Sweeney, has objected that criterion (7), "seems to tolerate some degree of probability of even fatal injury." The Commission disagrees with this objection because its responsibility is not to eliminate all risk of serious injury or death, and any attempt to do so would be unrealistic.

II. SUGGESTED ADDITIONAL CRITERIA FOR ESTABLISHING PRIORITIES

A. Consumers Union has suggested as an additional criterion the extent to which tort actions (private lawsuits for damages) might create adequate market incentives for safety. Consumers Union maintains that certain products may be associated with a large number of injuries, but it may be difficult for the injured consumer to prove negligence in the manufacture or distribution of these products. According to Consumers Union, "such products should be regulated before products whose negligent manufac-

ture or distribution is relatively easy to prove," if other factors are equal. Although this may be an interesting factor to consider, the Commission does not believe it is significant enough to be included as one of the criteria in the policy statement.

B. The Commission has similarly denied a second suggestion made by Consumers Union for an additional criterion. That suggestion was that the Commission should be less inclined to regulate products for which safer versions are available on the market than products for which consumers cannot purchase a safer version. The Commission believes that such a criterion would be inappropriate whenever consumers are unaware of the safer versions or fail to recognize that greater risks may be associated with the less safe versions. Therefore, the policy has not been amended to include "availability of safer versions of products" as a new criterion.

C. A third suggested additional factor, also submitted for consideration by Consumers Union, is whether a safety requirement could be easily defeated or could be made undefeatable only at great cost. The Commission believes that this criterion could not be applied to its decision-making involving the setting of priorities. At the time that the Commission considers what products to regulate, there is no particular safety requirement at issue. Only after regulation is underway would the Commission have a particular safety device, design, or requirement to evaluate. Accordingly, this factor appears to be unworkable and the Commission has not adopted it as an additional criterion.

D. The last paragraph of the policy on priorities stated that the Commission may not require extensive documentation on each criterion before making a decision because such data may be difficult to locate or develop on a timely basis. Walker Associates has suggested that this paragraph be labeled "Exceptional Conditions" and be added as an additional criterion. The Commission, however, believes that this paragraph explains how the criteria will be used rather than adds a new factor and has not adopted the suggestion.

E. Monsanto has suggested the addition of a criterion that "would request definition of a suitable means for establishing the effectiveness of the regulation in question." This would normally require "specifying a method for establishing the 'degree of injury' before and after implementation of a rule." If this suggestion involves an estimate of the decrease in the "degree of injury" that would stem from implementation of a rule, it seems to the Commission that this consideration is already included under the policy's fourth criterion on "cost and benefit of CPSC action" (although Monsanto states that its suggestion is not inherent in that criterion). If an actual analysis of "degree of injury" following implementation of a rule is involved, this is inconsistent with the timing of Commission priority determinations, for the same reasons explained in (C), above. (This comment by Monsanto is

also discussed under section I (B) of this preamble.

III. GENERAL ISSUES CONCERNING CRITERIA FOR ESTABLISHING PRIORITIES

A. RANKING/WEIGHTING OF CRITERIA

A number of commenters have expressed concern that the relative weights the Commission attaches to the various criteria, and/or the order in which the criteria are considered, could affect the outcome of the priority-related decisions and should therefore be made explicit in the policy. In particular, AMF Inc. has indicated that language in criterion (2) suggests that consideration of causality of injuries will follow consideration of criterion (1) regarding injury frequency and severity, and that this could result in misdirected decisions concerning priorities. In addition, the Soap and Detergent Association has recommended that criterion (7), "probability of exposure to hazard," be moved to the criterion (2) position to reflect more accurately its importance.

The Commission has never intended its priorities policy to require that causality or any of the other criteria will be considered only for products that first receive priority under criterion (1). More generally, the order of listing of the criteria is intended to indicate neither the order in which they are to be considered nor their relative importance. The Commission will consider all the criteria to the extent feasible in each case, and as interactively or jointly as possible. The Commission will not, however, rely on fixed procedures for applying or weighting the criteria, because that would represent an excessively mechanical approach to complex decisions that will unavoidably be based on evidence of variable quality and subject to varying interpretations. Although weighting criteria and numerical project ratings may be useful for planning and budgeting, the Commission will establish priorities by applying the criteria listed in the policy, relying on its collegial judgment rather than on any set formulas.

To clarify that the priorities policy does not involve any set ranking or weighting of the criteria, the Commission has added an explanatory paragraph at the end of the policy. In addition, the potentially misleading language in criterion (1) and criterion (2) has been omitted, as well as some potentially misleading language in criterion (5).

B. NATIONAL ELECTRONIC INJURY SURVEILLANCE SYSTEM (NEISS) INJURY DATA

The first criterion, concerning the frequency and severity of injuries, references the "NEISS hazard index" and notes that the Commission will give consideration to the probable frequency and severity of injuries in areas known to be undercounted by NEISS. A number of commenters have criticized the inadequacy of the Commission's NEISS injury data.

AMF Inc. has commented that NEISS, upon which the Commission is necessarily highly dependent, does not adequately evaluate the extent to which a

product and consumer behavior are causally related to the injury pattern. The National Electrical Manufacturers Association has stated that the NEISS system should be improved and a properly designed sampling plan should be developed to avoid the presence of "personal judgment" in evaluation of "areas known to be undercounted by NEISS." The Soap and Detergent Association has noted that areas of the NEISS system are overcounted, and has favored a separate breakdown of statistics related to products causing injuries and those that are associated with injuries.

The Commission certainly recognizes the limitations of NEISS injury data and is particularly aware that information on causality of product-related injuries cannot be obtained through NEISS. Accordingly, the Commission referenced NEISS only under its first criterion which involves the frequency and severity of injuries. Information on the causality of injuries, the second criterion in the priorities policy, must come from other sources. A principal such source is the in-depth investigations of individual injury reports. The Commission is pursuing improvements in NEISS and other data bases the Commission uses, as part of an overall evaluation of its total injury data system. However, NEISS is currently the best injury information collection system available and provides valuable information to the Commission regarding product related injuries. In addition, as indicated in criterion (1), the Commission supplements NEISS information with other data such as fire surveys and death certificate collection. The Commission evaluates all of its injury information with awareness of possible shortcomings.

In any case, the first two criteria in the priorities policy merely indicate that the frequency, severity, and causality of product-related injuries will be evaluated to the extent that reliable information is available. None of the criticisms of NEISS received by the Commission undercuts this approach, and no change in either criterion (1) or (2) is necessary in this regard.

C. OPPORTUNITY FOR PUBLIC COMMENT ON PRIORITIES ISSUES

The Office of Consumer Affairs has recommended that the priorities policy state that the public will be advised of and participate in significant changes involving the criteria. Although the Commission is not required under the Administrative Procedure Act to solicit or consider public comment on this general statement of policy concerning priorities, it has done so because of the importance of the policy. For the same reason, the Commission currently intends that any major changes to the policy will receive the same public scrutiny that the original provisions received. However, the Commission does not believe that this intention need be included as part of the policy.

In addition, the Office of Consumer Affairs has suggested that the Commission provide lead time and advance no-

tice for major priorities issues so that the public can be involved, absent crises or emergencies. This suggestion is based on the belief that the public is as well qualified as experts to make the social, political, and ethical judgments that are usually involved.

The Commission agrees with the concept of public participation in decision-making involving priorities, but believes that institutionalizing this concept within its priorities policy would present difficult problems of timing and inflexibility.

In some cases, such as when the Commission is considering rulemaking, public notice and comment at an early stage might be feasible and desirable. For example, the Commission could publish in the Federal Register an advance notice of proposed rulemaking to obtain public comment on the advisability of rulemaking in a particular area. Alternatively, the Commission could hold public meetings with interested persons before deciding to take actions that involve priorities issues. An example of such a meeting was the Commission meeting with consumer representatives on the question of Commission-funded financial assistance to participants in CPSC proceedings. At the time of the meeting, a petition under the Administrative Procedure Act on this issue was pending before the Commission.

The Commission will continue to involve the public in its decision-making concerning priorities whenever possible and in the manner most appropriate for particular matters. However, the policy on priorities cannot and should not reflect such efforts in any formal or institutionally rigid manner.

D. USE OF PRIORITIES POLICY IN DRAFT OPERATING PLANS AND BUDGET

The Office of Consumer Affairs has stressed the importance of insuring that the criteria be uniformly applied at all levels of the Commission so that operating plans and budgets will emphasize the same set of products as the overall action priorities. Based on its experience, the Commission agrees with the importance of this point. Accordingly, the Commission will install monitoring and control mechanisms to guarantee maximum consistency among all phases of Commission activities involving priorities. Development and implementation of these procedures is a major function of the Commission's new Office of Strategic Planning.

Since § 1009.8(b) already reflects the applicability of the policy to operating plans and budgets, no changes are necessary.

E. OTHER POINTS RAISED IN THE COMMENTS

1. Georg Maisel of the Commission staff has recommended that "poison control centers" be added to the policy as another example of the "supplementary data collection systems" mentioned under criterion (1). The Commission agrees and has amended the policy accordingly.

2. Walker Associates has suggested that the policy be used as a guide by "initiators of consumer product safety-action requests." The Commission believes that this phrase is intended to refer to petitioners. If so, the policy is available for use by petitioners, but a priorities policy is meaningful only if two or more potential Commission actions are to be compared. An individual petitioner suggesting one course of action cannot be expected to perform such comparison.

While the Commission has set certain requirements for petitions (see § 1110.7 (a) of the "Procedures for Petitioning for Rulemaking under Section 10 of the Consumer Product Safety Act" 16 CFR 1110.7(a); 41 FR 43128, September 29, 1976), these do not include a requirement that petitions address priority considerations. Section 10 of the CPSC (15 U.S.C. 2059) similarly does not impose such a requirement. Nevertheless, the Commission would evaluate any priority information that is submitted as part of a petition for rulemaking.

3. James J. Frankman has suggested that the Commission give priority to actions under the PPPA and FHSA. However, a major intent underlying the policy is that the Commission evaluate particular products and risks of injury within its jurisdiction without regard to the particular act that would eventually govern Commission action. Sometimes, in fact, the Commission cannot determine at the outset what particular act will be used.

4. Lawrence Feldman has recommended that the Commission establish a unit to do and/or support research on the safety of consumer products. Although this recommendation may have merit (in fact, the Commission's technical staff performs such research and the Commission contracts with private parties for additional such research), it concerns Commission action that is not covered by the priorities policy. The recommendation involves the question of how the Commission should find unsafe consumer products and hazards, while the policy involves the question of how to set priorities among them once they are known.

The Consumer Product Safety Commission amends its priorities policy, effective October 4, 1977, in accordance with the above discussion and under the provisions of the Consumer Product Safety Act (15 U.S.C. 2051), the Federal Hazardous Substances Act (15 U.S.C. 1261), the Flammable Fabrics Act (15 U.S.C. 1191), the Poison Prevention Packaging Act of 1970 (15 U.S.C. 1471), and the Refrigerator Safety Act (15 U.S.C. 1211). The Commission amends Title 16 of the Code of Federal Regulations by revising § 1009.8 of Chapter II, Part 1009 to read as follows:

§ 1009.8 Policy on establishing priorities for Commission action.

(a) This document states the Consumer Product Safety Commission's policy on establishing priorities for action under the five acts the Commission administers. The policy is issued pursuant

to sections 4(f)(2) and 4(f)(3) of the Consumer Product Safety Act, as amended, and in further implementation of the Commission's statement of policy dated September 21, 1973.

(b) It is the general policy of the Commission that priorities for Commission action will be established by a majority of its members. The policy will be reflected by votes on all requests for appropriations, an annual operating plan, and any revisions thereof. Recognizing that these documents are the result of a lengthy planning process during which many decisions are made that substantially determine the content of the final documents, the Chairman shall continually keep the Commission apprised of, and seek its guidance concerning, significant problems, policy questions and alternative solutions throughout the planning cycle leading to the development of budget requests and operating plans.

(1) *Requests for appropriations.* Requests for appropriations are submitted concurrently to the President or the Office of Management and Budget and to the Congress pursuant to section 27(k) of the Consumer Product Safety Act.

(2) *Annual operating plan.* The operating plan shall be as specific as possible with regard to products, groups of products, or generic hazards to be addressed. It shall be submitted to the Commission for approval at least 30 days prior to the beginning of the fiscal year.

(c) In establishing and revising its priorities, the Commission will endeavor to fulfill each of its purposes as set forth in section 2(b) of the Consumer Product Safety Act. In so doing, it will apply the following general criteria:

(1) *Frequency and severity of injuries.* Two criteria in determining priorities are the frequency and severity of injuries associated with consumer products. All available data including the NEISS hazard index and supplementary data collection systems, such as fire surveys, death certificate collection, and poison control centers shall be used to attempt to identify the frequency and severity of injuries. Consideration shall also be given to areas known to be undercounted by NEISS and a judgment reached as to the probable frequency and severity of injuries in such areas. The judgment as to severity shall include an evaluation of the seriousness of the injury.

(2) *Causality of injuries.* Consideration shall be given to the amenability of a product hazard to injury reduction through standard setting, information and education, or other Commission action. This step involves an analysis of the extent to which the product and other factors such as consumer behavior are causally related to the injury pattern. Priority shall be assigned to products according to the extent of product causality involvement and the extent of injuries that can reasonably be expected to be reduced or eliminated through Commission action.

(3) *Chronic illness and future injuries.* Certain products, although not presently associated with large numbers of

frequent or severe injuries, deserve priority attention if there is reason to believe that the products will in the future be associated with many such injuries. Although not as susceptible to measurements as other product related injuries and illnesses, these risks shall be evaluated on the basis of the best information available and given priority on the basis of predicted future illnesses and injuries and the effectiveness of Commission action in reducing or eliminating them.

(4) *Cost and benefit of CPSC action.* Consideration shall be given on a preliminary basis to the prospective cost of Commission action to consumers and producers, and to the benefits expected to accrue to society from the resulting reduction of injuries. Consideration of product cost increases will be supplemented to the extent feasible and necessary by assessments of effects on utility or convenience of the product; product sales and shifts to substitutes; and industry supply factors, competitive structure, or employment. While all these facets of potential social "cost" cannot be subsumed in a single, quantitative cost measure, they will be weighed, to the extent they are available, against injury reduction benefits. The benefit estimates will be based on (i) explicitly stated expectations as to the effectiveness of regulatory options (derived from criterion (2), "causality of injuries"); (ii) costs of injuries and deaths based on the latest injury cost data and analyses available to the Commission; (iii) explicit estimates or assumptions as to average product lives; and (iv) such other factors as may be relevant in particular cases. The Commission recognizes that in analyzing benefits as well as costs there will frequently be modifying factors—e.g., criteria (5) and (6)—or analytical uncertainties that complicate matters and militate against reliance on single numerical expressions. Hence the Commission cannot commit itself to priorities based solely on the preliminary cost-benefit comparisons that will be available at the stage of priority setting, nor to any one form of comparison such as net benefits or cost-benefit ratios. Commission costs will also be considered. The Commission has a responsibility to insure that its resources are utilized efficiently. Assuming other factors to be equal, a higher priority will be assigned to those products which can be addressed using fewer Commission resources.

(5) *Unforeseen nature of the risk.* Consideration should be given to the degree of consumer awareness both of the hazard and of its consequences. Priority could then be given to unforeseen and unforeseeable risks arising from the ordinary use of a product.

(6) *Vulnerability of the population at risk.* Children, the elderly, and the handicapped are often less able to judge or escape certain dangers in a consumer product or in the home environment. Because these consumers are, therefore, more vulnerable to danger in products designed for their special use of frequently used by them, the Commission will usually place a higher priority, assuming other factors are equal, on pre-

venting product related injury to children, the handicapped, and senior citizens.

(7) *Probability of exposure to hazard.* The Commission may also consider several other things which can help to determine the likelihood that a consumer would be injured by a product thought to be hazardous. These are the number of units of the product that are being used by consumers, the frequency with which such use occurs, and the likelihood that in the course of typical use the consumer would be exposed to the identified risk of injury.

(8) *Additional criteria.* Additional criteria may arise that the staff believes warrant the Commission's attention. The Commission encourages the inclusion of such criteria for its consideration in establishing priorities. The Commission recognizes that incontrovertible data related to the criteria identified in this policy statement may be difficult to locate or develop on a timely basis. Therefore, the Commission may not require extensive documentation on each and every criterion before making a decision. In addition, the Commission emphasizes that the order of listing of the criteria in this policy is not intended to indicate either the order in which they are to be considered or their relative importance. The Commission will consider all the criteria to the extent feasible in each case, and as interactively or jointly as possible.

(Sec. 4, (15 U.S.C. 2053), 86 Stat. 1210, as amended by sec. 4, Pub. L. 94-284)

Effective date: October 4, 1977

Dated: September 28, 1977.

RICHARD E. RAPP,
Secretary, Consumer Product
Safety Commission.

Title 21—Food and Drugs

CHAPTER I—FOOD AND DRUG ADMINISTRATION, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

SUBCHAPTER C—DRUGS: GENERAL

[Docket No. 76N-0311]

PART 201—LABELING

Revocation of Requirements for Aminopyrine and Dipyrone

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: This rule revokes the regulation describing the conditions that must be met for the continued marketing of aminopyrine and dipyrone. This is being done because there are no approved new drug applications (NDA's) for either of these drug products.

DATES: Effective November 3, 1977. Comments by November 3, 1977.

ADDRESS: Written comments to the Hearing Clerk (HFC-20), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, Md. 20857.

FOR FURTHER INFORMATION CONTACT:

Nathan M. Kight, Bureau of Drugs (HFD-30), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, Md. 20857. (301-443-3640).

SUPPLEMENTARY INFORMATION: In a statement of policy published in the FEDERAL REGISTER of November 17, 1964 (29 FR 15364) under 21 CFR 3.44 (now 21 CFR 201.311), and amended in the FEDERAL REGISTER of October 11, 1967 (32 FR 14101), the Commissioner of Food and Drugs declared aminopyrine and dipyrone to be new drugs approvable for use only for their antipyretic effect in serious or life-threatening situations where either salicylates or similar drugs are known to be ineffective, or where the benefit-to-risk considerations for dipyrone are acceptable. Applications were approved for dipyrone, but none were received for aminopyrine, which is not known to be marketed in the United States.

Dipyrone is an analgesic antipyretic drug produced in both oral and parenteral forms. It is a sodium sulfonate derivative of aminopyrine and has similar properties.

The Director of the Bureau of Drugs issued a notice of opportunity for hearing in the FEDERAL REGISTER of September 3, 1976 (41 FR 37386) proposing to withdraw approval of NDA's for drug products containing dipyrone on grounds of lack of evidence of safety. In response to the notice, two firms submitted requests for hearing and requests for extension of time to file supporting data. The Food and Drug Administration denied both requests for an extension of time. One of the firms later withdrew its request for hearing. The other elected not to submit the supporting data and analysis that are required by 21 CFR 314.200 and, therefore, its request for hearing was denied. A third firm, though not electing to request a hearing for its products, did request an extension of time to file a hearing request and submitted a published study to demonstrate the safety of dipyrone. The study was reviewed and found not to be relevant to the safety issue on the basis of which the drug products containing dipyrone were being withdrawn. The request for an extension of time was denied. A notice was published in the FEDERAL REGISTER of June 17, 1977 (42 FR 30893) withdrawing approval effective June 27, 1977, of all NDA's for drug products containing dipyrone. Inasmuch as there are no approved NDA's for drugs to which § 201.311 applies, the Commissioner concludes that this regulation should be revoked.

In consideration of the foregoing, the Commissioner finds for good cause that notice and public procedure are impracticable, unnecessary, and contrary to the public interest. Interested persons may, on or before November 3, 1977, file with the Hearing Clerk, Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, Md. 20857, four copies of

written comments, identified with the docket number found in brackets in the heading of this document. Comments received may be seen in the office of the Hearing Clerk between the hours of 9 a.m. and 4 p.m., Monday through Friday. Any changes in this regulation justified by such comments will be the subject of a further amendment.

§ 201.311 [Reserved]

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 502 (f) and (l) and 701(a), 52 Stat. 1051 as amended, 1055 (21 U.S.C. 352 (f) and (i) and 371(a)) and under authority delegated to the Commissioner (21 CFR 5.1), Part 201 is amended by revoking

§ 201.311 *Aminopyrine or dipyrone drug preparations for human use; directions and warnings.*

Effective date. This revocation shall be effective on November 3, 1977.

(Secs. 502 (f), (l), 701(a), 52 Stat. 1051 as amended, 1055 (21 U.S.C. 352 (f), (i), 371(a)).)

Dated: September 28, 1977.

WILLIAM F. RANDOLPH,
Acting Associate Commissioner
for Compliance.

[FR Doc. 77-29076 Filed 10-3-77; 8:45 am]

[4110-03]

SUBCHAPTER E—ANIMAL DRUGS, FEEDS, AND RELATED PRODUCTS

PART 522—IMPLANTATION OR INJECTABLE DOSAGE FORM NEW ANIMAL DRUGS NOT SUBJECT TO CERTIFICATION

Iron Hydrogenated Dextran Injection

AGENCY: Food and Drug Administration.

ACTION: Final Rule.

SUMMARY: The animal drug regulations are amended to reflect approval of a new animal drug application filed by Medico Industries, Inc., providing for use of iron hydrogenated dextran injection for the prevention and treatment of iron deficiency anemia in baby pigs.

EFFECTIVE DATE: October 4, 1977.

FOR FURTHER INFORMATION CONTACT:

Jack C. Taylor, Bureau of Veterinary Medicine (HFV-136), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, Md. 20857 (301-443-5247).

SUPPLEMENTARY INFORMATION: In accordance with section 512(l) of the Federal Food, Drug, and Cosmetic Act, Part 522 (21 CFR 522) is amended to reflect approval of a new animal drug application (NADA 106-772V) filed by Medico Industries, Inc., Elwood, Kans. 66024. In addition, the section is editorially revised.

In compliance with the freedom of information regulations and § 514.11(e) (2)(ii) of the animal drug regulations

(21 CFR 514.11(e) (2)(ii)), a summary of the safety and efficacy data and information submitted to support the approval of this application is released publicly. The summary is available for public examination at the office of the Hearing Clerk (HFC-20), Rm. 4-65, 5600 Fishers Lane, Rockville, Md. 20857, between 9 a.m. and 4 p.m., Monday through Friday.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 512(l), 82 Stat. 347 (21 U.S.C. 360b(l))) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.1), § 522-1133 is revised to read as follows:

§ 522.1133 *Iron hydrogenated dextran injection.*

(a) *Specifications.* Each milliliter contains 100 milligrams of elemental iron stabilized with a low molecular weight hydrogenated dextran and 0.5 percent phenol as a preservative.

(b) (1) *Sponsor.* See No. 000986 in § 510.600(c) of this chapter.

(2) *Conditions of use.* It is used in baby pigs as follows:

(i) For the prevention of anemia due to iron deficiency, administer an initial intramuscular injection of 100 milligrams of elemental iron to each animal at 2 to 5 days of age. Dosage may be repeated at 2 weeks of age.

(ii) For the treatment of anemia due to iron deficiency, administer an intramuscular injection of 100 milligrams of elemental iron to each animal when indicated between 5 and 28 days of age.

(c) (1) *Sponsor.* See No. 000003 in § 510.600(c) of this chapter.

(2) *Conditions of use.* It is used in baby pigs as follows:

(i) For the prevention of anemia due to iron deficiency, administer by intramuscular or subcutaneous injection of 100 milligrams of elemental iron to each animal at 2 to 4 days of age.

(ii) For the treatment of anemia due to iron deficiency, administer by intramuscular or subcutaneous injection of 100 milligrams of elemental iron in baby pigs up to 4 weeks of age.

(d) (1) *Sponsor.* See No. 015562 in § 510.600(c) of this chapter.

(2) *Conditions of use.* It is used in baby pigs as follows:

(i) For the prevention of iron deficiency anemia, administer intramuscularly 100 milligrams at 2 to 4 days of age.

(ii) For the treatment of iron deficiency anemia, administer intramuscularly 100 milligrams. Treatment may be repeated in 10 days.

Effective date: October 4, 1977.

(Sec. 512(l), 82 Stat. 347 (21 U.S.C. 360b(l))).

Dated: September 27, 1977.

FRED J. KINGMA,
Acting Director, Bureau of
Veterinary Medicine.

[FR Doc. 77-29077 Filed 10-3-77; 8:45 am]

[FRL 801-2; FAP 6H5135/T29]

PART 561—TOLERANCES FOR PESTICIDE IN ANIMAL FEEDS ADMINISTERED BY THE ENVIRONMENTAL PROTECTION AGENCY

Linuron

AGENCY: Office of Pesticide Programs, Environmental Protection Agency.

ACTION: Final rule.

SUMMARY: This rule establishes a feed additive regulation permitting the use of the herbicide linuron in an experimental program. The regulation was requested by E. I. du Pont de Nemours & Co. This rule will permit the marketing of dried sugar beet pulp while further data is collected on the subject pesticide.

EFFECTIVE DATE: October 4, 1977.

FOR FURTHER INFORMATION CONTACT:

Mr. James G. Touhey, Registration Division (WH-567), Office of Pesticide Programs, EPA, 401 M Street SW., Washington, D.C. 20460 (202-755-4851).

SUPPLEMENTARY INFORMATION: On July 1, 1976, the EPA announced (41 FR 27112) that E. I. du Pont de Nemours & Co., Inc., Wilmington, Del. 19898, had filed a food additive petition (FAP 6H5135). This petition proposed that 21 CFR Part 561 be amended by establishing a feed additive regulation permitting the use of the herbicide linuron (3-(3,4-dichlorophenyl)-1-methoxy-1-methylurea) in a proposed experimental program involving application of the herbicide to growing sugar beets with a tolerance for residues of the herbicide in dried sugar beet pulp at 1 part per million (ppm). This petition was submitted in accordance with an experimental use permit that is being issued concurrently under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended (86 Stat.-973, 89 Stat. 751; 7 U.S.C. 136(a) et seq.). No comments were received by the Agency in response to this notice of filing. (A related document establishing temporary tolerances for residues of linuron on sugar beet roots and tops appears elsewhere in today's FEDERAL REGISTER.)

The toxicological data submitted in support of the 1 ppm tolerance were two-year rat and dog feeding studies, a three-generation rat reproduction study, a poultry-feeding study, and two cattle-feeding studies. An adequate analytical method (gas chromatography using electron capture detection) is available for enforcement purposes. The data or actions required before any permanent linuron tolerance will be established are (1) all the additional data required by FIFRA in Section 3, including a second oncogenicity study, a teratology study, and a mammalian mutagenicity study; (2) complete copies of all analytical methods; (3) residue data for sugar

beet molasses and sugar showing the presence or absence of linuron residues; (4) additional residue data for sugar beet roots, tops, and dried pulp; (5) proposal of an appropriate milk tolerance; and (6) resolution of crop rotation restrictions.

Tolerances have previously been established (40 CFR 180.184) for linuron residues on a variety of raw agricultural commodities at levels ranging from 1 ppm to 0.25 ppm. There is no reasonable expectation of residues in eggs or poultry as delineated in 40 CFR 180.6(a)(3). Existing tolerances for residues in meat and milk are adequate to cover any residues as delineated 40 CFR 180.6(a)(2).

Therefore, it has been determined that the pesticide may be safely used in accordance with the provisions of the experimental use permit which is being issued concurrently under FIFRA. It has further been determined that since residues of the pesticide may result in dried sugar beet pulp from the agricultural use provided for in the experimental use permit, the feed additive regulation should be established and should include a tolerance limitation. Accordingly, a feed additive regulation is established as set forth below.

Any person adversely affected by this regulation may, on or before November 3, 1977, file written objections with the Hearing Clerk, EPA, Rm. 1019, East Tower, 401 M St. SW., Washington, D.C. 20460. Such objections should be submitted in quintuplicate and specify the provisions of the regulation deemed to be objectionable and the grounds for the objections. If a hearing is requested, the objections must state the issues for the hearing. A hearing will be granted if the objections are supported by the grounds legally sufficient to justify the relief sought.

Effective on October 4, 1977, 21 CFR Part 561 is amended as set forth below.

Dated: September 28, 1977.

EDWIN L. THOMPSON,
Deputy Assistant Administrator,
for Pesticide Programs.

(Sec. 409(c)(1), Federal Food, Drug, and Cosmetic Act (21 U.S.C. 348(c)(1)).)

21 CFR Part 561 is amended by adding a new § 561.265 to read as follows:

§ 561.265 *Linuron.*

(a) A tolerance of a 1 part per million is established for residues of the herbicide linuron (3-(3,4-dichlorophenyl)-1-methoxy-1-methylurea) in dried sugar beet pulp resulting from application of the herbicide in accordance with the provisions of an experimental use permit that expires September 28, 1978.

(b) Residues in dried sugar beet pulp not in excess of 1 part per million resulting from the use described in paragraph (a) of this section remaining after expiration of the experimental use program will not be considered actionable if the pesticide is legally applied

during the term of and in accordance with the provisions of the experimental use permit and feed additive tolerance.

(c) E. I. du Pont de Nemours & Co., Inc., shall immediately notify the Environmental Protection Agency of any findings from the experimental use that have a bearing on safety. The firm shall also keep records of production, distribution, and performance and on request make the records available to any authorized officer or employee of the Environmental Protection Agency or the Food and Drug Administration.

[FR Doc. 77-29079 Filed 10-3-77; 8:45 am]

[4830-01]

Title 26—Internal Revenue

CHAPTER I—INTERNAL REVENUE SERVICE, DEPARTMENT OF THE TREASURY

SUBCHAPTER A—INCOME TAX

[T.D. 7510]

PART 1—INCOME TAX; TAXABLE YEARS BEGINNING AFTER DECEMBER 31, 1953

Qualified Joint and Survivor Annuities

AGENCY: Internal Revenue Service, Treasury.

ACTION: Final regulations.

SUMMARY: This document amends a special effective date rule contained in regulations relating to qualified joint and survivor annuities. This amendment has been prepared in response to requests by the public. This amendment affects some qualified plans which provide benefits by distributing individual annuity contracts to participants and postpones from July 1, 1977, to January 1, 1978, the date by which some participants must be given an opportunity to have amendments made to their contracts.

DATE: The regulations are generally effective for plan years beginning after December 31, 1975.

FOR FURTHER INFORMATION CONTACT:

William D. Gibbs of the Legislation and Regulations Division, Office of the Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue NW., Washington, D.C. 20224 (Attention: CC:LR:T) (202-566-3293) (not a toll-free number).

SUPPLEMENTARY INFORMATION:

BACKGROUND

On January 7, 1977, the FEDERAL REGISTER published final regulations under section 401(a)(11) of the Internal Revenue Code of 1954 as Treasury Decision 7458, 42 FR 1463. These regulations were adopted in order to conform the Income Tax Regulations to section 1021(a) of the Employee Retirement Income Security Act of 1974.

Since the publication of these regulations, it has become apparent that some plans which provide benefits by the distribution of individual annuity contracts will not be able to meet the special effective date provision adopted in the regulations for such plans. Accordingly, that effective date rule is extended an additional six months.

DRAFTING INFORMATION

The principal author of this regulation was William D. Gibbs of the Legislation and Regulations Division of the Office of Chief Counsel, Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service and Treasury Department participated in developing the regulation, both on matters of substance and style.

ADOPTION OF AMENDMENTS TO THE REGULATIONS

Accordingly, 26 CFR Part 1 is amended as follows:

§ 1.401(a)-11 [Amended]

Paragraph (f) of § 1.401(a)-11 is amended (1) by striking out "July 1, 1977," each place it appears and inserting in lieu thereof "January 1, 1978," and (2) by striking out "June 30, 1977" from the last sentence and inserting in lieu thereof "December 31, 1977".

This Treasury decision merely postpones the effective date of a rule, and there is a need for immediate guidance with respect to the postponement. For these reasons, it is found unnecessary and impracticable to issue this Treasury decision with notice and public procedure thereon under subsection (b) of section 553 of Title 5 of the United States Code or subject to the effective date limitation of subsection (d) of that section.

(Sec. 7805, Internal Revenue Code of 1954, (68A Stat. 917 (26 U.S.C. 7805) .)

JEROME KURTZ,
Commissioner of Internal Revenue.

Approved: September 26, 1977.

LAURENCE N. WOODWORTH,
Assistant Secretary of the
Treasury.

[FR Doc. 77-29015 Filed 10-3-77; 8:45 am]

[4310-31]

Title 30—Mineral Resources

CHAPTER II—GEOLOGICAL SURVEY, DEPARTMENT OF THE INTERIOR

PART 250—OUTER CONTINENTAL SHELF OIL AND GAS OPERATIONS

Emergency Suspension Procedures

AGENCY: Geological Survey, U.S. Department of the Interior.

ACTION: Final rule.

SUMMARY: This rule supplements the existing OCS oil and gas operations emergency suspension provision in three particulars: (1) It specifies the manner in which threats of significant irreparable damages will be studied; (2) it expressly treats the procedure for establishing necessary mitigating measures; and (3) it redefines the property rights granted with the lease to provide that,

if adequate mitigating measures cannot be designed, the Secretary may, as a last resort and under stated limitations, terminate an emergency suspension and allow the lease term to run without renewal of operations of the lease.

EFFECTIVE DATE: This rule applies to all OCS oil and gas leases issued subsequent to this publication.

SUPPLEMENTARY INFORMATION: The proposal (42 FR 36273, July 14, 1977) received twenty-eight comments from industry, state and local government bodies, and interested groups.

We respond to the chief comments in the order in which the material appeared in the proposal.

1. *Leases to which amendment applies.* Several commenters wondered if Sale No. 47 leases were subject to the amendment, as the sale followed publication of this proposal. The answer is no. This rule applies only to leases issued subsequent to the date of this final rule-making. The July 14 publication did not "promulgate" this rule; it was only a proposal.

2. *"Termination of suspension."* The preamble to the proposal and the proposal did not clearly distinguish between suspension of operations and suspension of the running of the lease term. The rule has been revised with elimination of this confusion in mind. In this regard, subsection (c) (2) (iii) (D) has been deleted. The accompanying lease term amendments to Title 43 CFR Part 3300 are the appropriate place for such a provision, not the Geological Survey operations regulations. The Part 3300 amendments accomplish what (iii) (D) stated about the manner in which the running of the lease term is affected by this rule. Termination of a suspension under (c) (2) (iii) does not imply approval of operations on the lease.

3. *Inflationary Impact Statement.* Several commenters questioned our negative declaration under E.O. 11,821. The Executive Order and the OMB Circular implementing it do not require the preparation of statements where the situations in which the rule might be applied, and therefore the impact of the rule on OCS production, and inflation, are presently unknown and purely speculative. That is the case here. We do not predict effects greater than the prescribed threshold.

4. *250.12(c)(1).* This provision, substantially the existing provision, is designed to have a lower threshold for invocation, namely, those cases in which full study and formal imposition of mitigating measures are unnecessary. Sections (c) (1) and (c) (2) are not redundant. For this reason, we retain the "significant irreparable damage" threshold in (c) (2). The absence of formal procedures under (c) (1) does not, of course, deprive the Supervisor in such cases of his authority to issue orders and otherwise regulate operations. See 30 CFR 250.12(a).

5. *Transportation.* Several commenters requested that transportation

operations be explicitly covered in subsection (c) (2) (i). Part 250 of Title 30, however, applies only to lease operations, not to operations under a right-of-way granted under section 5(c) of the OCS Lands Act.

6. *Cost and conduct of study.* A few commenters asked that lessees not be allowed to conduct the studies. We believe the Supervisor's duty to approve study plans protects the federal interest here. Several companies felt the Department should bear the cost of these studies. We have considered this point and concluded that the lessee should bear the costs.

7. *Consultation.* The Department of Commerce was added to the list to allow the National Marine Fisheries Service and the National Oceanic and Atmospheric Administration to participate.

8. *Balancing.* The Department was criticized by some commenters for balancing the lost resource against the environmental benefits in the last lines of subsection (c) (2) (ii) and in (c) (2) (iii) (B). While recognizing the inherent problems with such balancing, we believe sound public policy requires consideration of the foreclosed resource in these decisions.

9. *Unconstitutional "taking" under subsection (c) (2) (iii).* The Department does not "take" property rights in the constitutional sense if it exercises rights it reserves at the time the lease is issued.

10. *In excess of statutory authority.* None of the many comments directed to this question have convinced us we lack authority to enact this rule. We reiterate our view that this rule is consistent with "Union Oil Co. of California v. Morton," 512 F.2d 743, 748-49 (9th Cir. 1975), and its view of the OCS Lands Act construed in light of the National Environmental Policy Act. See 42 FR 36274 (July 14, 1977).

11. *Compensation.* The Department lacks the authority to exercise the power of eminent domain and pay compensation therefor on the Outer Continental Shelf. The Bureau of Land Management was granted eminent domain authority in the Federal Land Policy and Management Act, 90 Stat. 2755, but that Act explicitly does not apply to the OCS, 90 Stat. 2746. This limitation has governed the prospective-only nature of this rule. Rights previously granted are not subject to taking without legislation. Thus we are conditioning the rights granted under future leases in advance of lease issuance.

12. *Need for (c) (2) (iii).* Many commenters felt the subsection was simply unnecessary. The Department believes OCS operations currently meet a high standard of environmental protection, and it hopes the provision need never be applied. The provision is designed as a failsafe, a need we feel must be met. We are aware that the pending OCS Lands Act Amendments contain provisions that would supersede this rule. If the new statutory provisions do not apply to existing leases, however, we will apply this rule to leases which may be issued

between the date of promulgation and enactment of the statutory amendments. We are also aware of the potential disincentive to full participation in OCS sales the regulation poses. It has been specially drafted, however, to limit its application to extreme cases to minimize this possibility. In this regard, we point out that the termination of suspension authority in (c) (2) (iii) is discretionary, not mandatory, and the Secretary may keep the suspension in effect pending any technological development that might mitigate the hazard, or for any other persuasive reason.

13. *Time for compliance.* Subsection (c) (2) (iii) (A) has had the limitation for compliance within "the remaining portion of the lease term," eliminated to avoid what might in some cases be an unreasonably short period, and so that the provision will apply to leases in their extended period.

PRINCIPAL AUTHOR

Lawrence G. McBride, Office of the Solicitor, U.S. Department of the Interior, Washington, D.C. 20240 (202-343-4803).

NOTE.—The Geological Survey has determined that this rule does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11,821 and OMB Circular A-107.

NOTE.—The Department has determined that publication of this rule is not a major federal action significantly affecting the quality of the human environment, and that no detailed statement pursuant to section 102(2)(c) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(2)(c)) is required.

Dated: September 28, 1977.

CECIL D. ANDRUS,
Secretary.

Accordingly, the following amendments to 30 CFR Part 250 are hereby made:

1. In § 250.12, paragraph (c) is amended as follows:

§ 250.12 Regulation of operations.

(c) *Emergency suspensions.* (1) The Supervisor is authorized either in writing or orally with written confirmation, to suspend any operation, including production, which in his judgment threatens immediate, serious, or significant damage to life, including aquatic life, to property, to the leased deposits, to other valuable mineral deposits, or to the environment. Such an emergency suspension shall continue until, in his judgment, threat or danger has terminated, unless the provisions of subparagraph (2) of this paragraph apply.

(2) (i) When the Supervisor orders, with respect to any lease issued after October 1, 1977, a suspension of operations, including production, because of the threat of significant irreparable damage to life, including aquatic life, to property, to the leased deposits, to other valuable mineral deposits, or to the environment, from a hazard not known to the Secretary or not fully anticipated by

him as to nature and degree when the lease was issued, or not known to the Supervisor when an operating plan was approved, the Supervisor may direct the lessee to conduct site specific studies, including lease- or unit-wide studies as necessary, approved or prescribed by the Supervisor, on the cause of the hazard generating the suspension, the potential damage from that hazard, and the mitigating measures for the hazard. Prior to approval of a study program, notwithstanding the provisions of paragraph (a) of this section, the Supervisor shall consult with interested Departments and agencies including, but not limited to, the Fish and Wildlife Service, Bureau of Land Management, Coast Guard, Department of Defense, Department of Commerce, and Environmental Protection Agency, and with affected state and local governments. All results of such studies will be furnished to the Supervisor by the lessee at no cost to lessee. The Supervisor shall make such results available to interested Departments and agencies and to the public.

(ii) On the basis of the results of the lessee's study and other information available to him, the Supervisor will submit a report with recommendations to the Secretary on the extent of the damage or threat thereof, and on the mitigating measures, if any, that may successfully ameliorate such damage or threat thereof. On the basis of the Supervisor's report and recommendations, and such other advice and information as he deems relevant, the Secretary will require the lessee to take all appropriate measures to mitigate the damage or potential damage of continued operations as a condition for the resumption of exploration, development, or production activity on the lease. The lessee will submit, where deemed appropriate by the Secretary, new or amended exploration, development, or production plans, in accordance with § 250.34, which incorporate the mitigating measures required by the Secretary. In establishing appropriate mitigating measures which must be taken prior to the resumption of operations, the Secretary will balance the costs of mitigation and the reduction in damage to aquatic life, to property, to the leased deposits, to other valuable mineral deposits and to the environment.

(iii) If the lessee indicates that he cannot or will not comply with the conditions established by the Secretary for ending the suspension of operations on the lease, or if the Secretary determines that appropriate mitigating measures will not provide adequate protection from significant irreparable damage to aquatic life, property, the leased deposits, other valuable mineral deposits, or to the environment, the Secretary may leave the suspension in effect, in expectation of technological developments or for other reasons. In the alternative, the Secretary may terminate the suspension of the running of the lease term: *Provided, That:*

(A) The suspension shall not be terminated until the lessee has had a rea-

sonable length of time, which shall be not less than six months, to comply with the conditions established by the Secretary for the approval of resumption of operations on the lease, to be determined by the Secretary.

(B) In determining "adequate protection" the Secretary will weigh the value of the loss of the deposit to the Nation's economy against the probable damage from the hazard after appropriate mitigating measures have been imposed;

(C) Termination of a suspension of the running of the lease term will not be made effective until after the affected lessee has been given notice and an opportunity for a hearing, including the opportunity for the lessee to submit his own proposed mitigation measures; and

(D) Such a termination shall constitute a revocation of the previous approval of any exploration, development, or production plan, but shall not preclude consideration by the Supervisor of a new or amended exploration, development, or production plan, and the issuance of another suspension while that plan is reviewed.

2. Section 250.30 is revised to read as follows:

§ 250.30 Lease terms, regulations, waste, damage, and safety.

(a) The lessee shall comply with the terms of applicable laws and regulations, the lease terms, OCS Orders and other written orders and rules of the Supervisor, and oral orders of the Supervisor. All such oral orders shall be effective when issued and are to be confirmed in writing as provided in § 250.11.

(b) The lessee shall conduct operations on the lease in a manner which does not, in the opinion of the Supervisor, threaten significant irreparable harm or damage to life, including aquatic life, to property, to the leased deposits, to other valuable mineral deposits, or to the environment.

Title 32—National Defense

CHAPTER VII—DEPARTMENT OF THE AIR FORCE

SUBCHAPTER C—PUBLIC RELATIONS

PART 819b—LICENSING GOVERNMENT-OWNED INVENTIONS IN THE CUSTODY OF THE DEPARTMENT OF THE AIR FORCE

AGENCY: Department of the Air Force, DOD.

ACTION: Final rule.

SUMMARY: The Department of the Air Force is adding a new Part 819b to 32 CFR. These rules were written as the Air Force implementation of DOD Directive 5535.3 and are consistent with GSA Licensing of Government-Owned Inventions, 41 CFR 101-4.1. They are intended to inform the public of the policies, procedures, terms and conditions for licensing of rights in Government-owned domestic patents and patent ap-

plications vested in the United States of America as represented by the Secretary of the Department of the Air Force.

EFFECTIVE DATE, July 22, 1977.

FOR FURTHER INFORMATION CONTACT:

Mr. Peterson, Judge Advocate Civil Division, Patent Office, Forrestal Building, Washington, D.C. 20314. Phone: (202-693-5715).

SUPPLEMENTARY INFORMATION: This rule is issued under the authority of 10 U.S.C. 8012. On November 23, 1976, the Department of the Air Force, DOD, published a proposed rule (41 FR 51615) to amend Title 32 of the Code of Federal Regulations by adding a new Part 819b to Subchapter C. No suggestions or objections were received. Accordingly, 32 CFR is amended by adding the new part to read as follows:

Subpart A—General

Sec.
819b.1 Purpose.
819b.2 Air Force policy.
819b.3 Execution of licenses.
819b.4 Delegation of authority.
819b.5 Definitions.

Subpart B—Types of Licenses and Conditions for Licensing

819b.6 Inventions available for licensing.
819b.7 Nonexclusive license.
819b.8 Limited exclusive license.
819b.9 Additional licenses.
819b.10 Royalties.
819b.11 Reports.

Subpart C—Procedures

819b.12 Publication requirements.
819b.13 Requests for a nonexclusive or a limited exclusive license.
819b.14 Contents of a nonexclusive license application.
819b.14 Contents of a limited exclusive license application.
819b.16 Published notices.
819b.17 Modification or revocation.
819b.18 License requests received by Air Force field activities.
819b.19 Appeals.

Subpart D—Litigation

819b.20 Government policy.

Subpart E—Transfer of Custody of Government Inventions

819b.21 Procedures.

*Authority: 10 U.S.C. 8012.

Subpart A—General

§ 819b.1 Purpose.

This part describes the policies, administrative requirements, procedures, terms, and conditions for licensing of rights in Government-owned domestic patents and patent applications vested in the United States of America as represented by the Secretary of the Department of the Air Force. It implements DOD Directive 5535.3, November 2, 1973 and is consistent with GSA Licensing of Government-Owned Inventions, 41 CFR 101-4.1.

§ 819b.2 Air Force policy.

(a) A major premise of the Presidential Statement of Government Patent Policy, August 23, 1971 (36 FR 16887, August 26, 1971), is that Government-owned inven-

tions normally will best serve the public interest when they are developed to the point of practical application and made available to the public in the shortest possible time. The granting of express nonexclusive or exclusive licenses for the practice of these inventions may assist in the accomplishment of the national objective to achieve a dynamic and efficient economy.

(b) The granting of nonexclusive licenses generally is preferable since the invention is thereby laid open to all interested parties and serves to promote competition in industry. If the invention is in fact promoted commercially. However, to obtain commercial utilization of the invention, it may be necessary to grant an exclusive license for a limited period of time as an incentive for the investment of risk capital to achieve practical application of an invention.

(c) Whenever the grant of an exclusive license is deemed appropriate, it will be negotiated on terms and conditions most favorable to the public interest. In selecting an exclusive licensee, consideration shall be given to the capabilities of the prospective licensee to further the technical and market development of the invention, his plan to undertake the development, the projected impact on competition, and the benefit to the Government and the public. Consideration will be given also to assisting small business and minority business enterprises, as well as economically depressed, low income, and labor surplus areas, and whether each or any applicant is a U.S. citizen or corporation. Where there is more than one applicant for an exclusive license, that applicant will be selected who is determined to be most capable of satisfying the criteria and achieving the goals set forth in this part.

(d) No license will be granted or implied in any invention under the custody of the Department of the Air Force other than as provided for in this part except under:

(1) Any existing or future treaty or agreement between the United States and any foreign government or intergovernmental organization, or

(2) Licenses under or other rights to inventions made or conceived in the course of or under Department of the Air Force research and development contracts where such licenses or other rights to such inventions are granted to or provided for in the contract and retained by the party contracting with the Department of the Air Force.

(e) No grant of a license under this part will be construed to confer upon any licensee any immunity from the antitrust laws or from a charge of patent misuse, and the acquisition and use of rights pursuant to this part will not be immunized from the operation of State or Federal law by reason of the source of the grant.

§ 819b.3 Execution of licenses.

Nonexclusive and exclusive licenses will be executed on behalf of the Department of the Air Force by the Secretary.

§ 819b.4 Delegation of authority.

The administration of this part is delegated to the Judge Advocate General and, while he is so acting, to any individual who is Acting The Judge Advocate General. The Judge Advocate General may redelegate, without the power of redelegation, to the Chief, Patents Division, Office of the Judge Advocate General, the administration of this part.

§ 819b.5 Definitions.

(a) "Government invention" means an invention covered by a domestic patent application that is vested in the United States and in the custody of the Department of the Air Force, and is designated by the Air Force as appropriate for the grant of an express nonexclusive or exclusive license.

(b) "To the point of practical application" means to manufacture in the case of a composition or product, to practice in the case of a process, or to operate in the case of a machine under such conditions as to establish that the invention is being worked and that its benefits are reasonably accessible to the public.

Subpart B—Types of Licenses and Conditions for Licensing

§ 819b.6 Inventions available for licensing.

Government inventions normally will be made available for the granting of express nonexclusive or limited exclusive licenses to responsible applicants according to the factors and conditions set forth in §§ 819b.7 and 819b.8, subject to the applicable procedures of Subpart C of this part.

§ 819b.7 Nonexclusive license.

(a) *Availability of licenses.* Each Government invention normally will be made available for the granting of nonexclusive revocable licenses, subject to the provisions of any other licenses, including those under § 819b.9.

(b) *Terms of grant.* (1) The duration of the license will be for a period as specified in the license agreement, provided that the licensee complies with all the terms of the license.

(2) The licensee will require the licensee to bring the invention to the point of practical application within a period specified in the license, or such extended period as may be agreed upon, and to continue to make the benefits of the invention reasonably accessible to the public.

(3) The license may be granted for all or less than all fields of use of the invention, and throughout the United States of America, its territories and possessions, the Commonwealth of Puerto Rico, and the District of Columbia, or in any lesser geographic portion thereof.

(4) After termination of a period specified in the license agreement, the Air Force may restrict the license to the fields of use and/or geographic areas in which the licensee has brought the invention to the point of practical application and continues to make the bene-

fits of the invention reasonably accessible to the public.

(5) The license may extend to subsidiaries and affiliates of the licensee but will be nonassignable without approval of the Air Force, except to the successor of that part of the licensee's business to which the invention pertains.

(6) The Government makes no representation or warranty as to the validity of any licensed patent or patent application, or of the scope of any of the claims contained therein, or that the exercise of the license will not result in the infringement of any other patent. Moreover, the Government assumes no liability whatsoever resulting from the exercise of the license.

§ 819b.8 Limited exclusive license.

(a) *Availability of licenses.* Each Government invention may be made available for the granting of a limited exclusive license provided that:

(1) The invention has been published as available for licensing pursuant to § 819b.12 for a period of at least 6 months;

(2) It has been determined that (i) the invention may be brought to the point of practical application in certain fields of use and/or in certain geographical locations by exclusive licensing, (ii) the desired practical application has not been achieved under any nonexclusive license granted on the invention, and (iii) the desired practical application is not likely to be achieved expeditiously in the public interest under a nonexclusive license or as a result of further Government-funded research or development;

(3) The notice of the prospective licensee has been published, pursuant to § 819b.6 for at least 60 days; and

(4) After termination of the period set forth in § 819b.8 (a) (3), the Air Force has determined that no applicant for a nonexclusive license has brought or will bring, within a reasonable period, the invention to the point of practical application as specified in the exclusive license, and that to grant the exclusive license would be in the public interest.

(b) *Selection of exclusive licensee.* An exclusive licensee will be selected on bases consistent with the policy set forth in § 819b.2 and in accordance with the procedures set forth in Subpart C of this part.

(c) *Terms of grant.* (1) The license may be granted for all or less than all fields of use of the Government invention and throughout the United States of America, its territories and possessions, the Commonwealth of Puerto Rico, and the District of Columbia, or in any lesser geographic portion thereof.

(2) Subject to the rights reserved to the Government in § 819b.8 (c) (6) and (c) (7), the licensee will be granted the exclusive right to practice the invention in accordance with the terms and conditions specified in the license.

(3) The duration of the license will be negotiated but will be for a period less than the terminal portion of the patent,

the period remaining being sufficient to make the invention reasonably available for the grant of a nonexclusive license; and such period of exclusivity will not exceed 5 years unless it has been determined on the basis of a written submission supported by a factual showing that a longer period is reasonably necessary to permit the licensee to enter the market and recoup his reasonable costs in so doing.

(4) The license will require the licensee to bring the invention to the point of practical application within a period specified in the license, or within a longer period as approved by the Air Force, and to continue to make the benefits of the invention reasonably accessible to the public.

(5) The license will require the licensee to expend a specified minimum amount of money and/or to take other specified actions, within a specified period of time after the effective date of the license, in an effort to bring the invention to the point of practical application.

(6) The license will be subject to the irrevocable royalty-free right of the Government of the United States to practice and have practiced the invention by or on behalf of the Government of the United States and on behalf of any foreign government or intergovernmental organization pursuant to any existing or future treaty or agreement with the United States.

(7) The license will reserve to the Air Force the right to require the licensee to grant sublicenses to responsible applicants on terms that are reasonable in the circumstances (i) To the extent that the invention is required for public use by Government regulations, or (ii) as may be necessary to fulfill health or safety needs, or (iii) for other public purposes stipulated in the license.

(8) The license may extend to subsidiaries and affiliates of the licensee but will be nonassignable without approval of the Air Force, except to successors of that part of the licensee's business to which the invention pertains.

(9) An exclusive licensee may grant sublicenses under his license, subject to the approval of the Air Force. Each sublicense granted by an exclusive licensee will make reference to the exclusive license, including the rights retained by the Government under the exclusive license, and a copy of such sublicense will be furnished to the Air Force.

(10) The license may be subject to such other terms as may be in the public interest.

(11) The Government makes no representation or warranty as to the validity of any licensed patent or patent application, or of the scope of any of the claims contained therein, or that the exercise of the license will not result in the infringement of any other patent. Moreover, the Government assumes no liability whatsoever resulting from the exercise of the license.

§ 819b.9 Additional licenses.

Subject to any outstanding licenses, nothing in this part will preclude the Air

Force from granting additional nonexclusive or limited exclusive licenses for Government-owned inventions when the Air Force determines that to do so would provide for an equitable exchange of patent rights. The following exemplify circumstances wherein such licenses may be granted:

- (a) In consideration of the settlement of an interference;
- (b) In consideration of a release of a claim of infringement; or
- (c) In exchange for or as part of the consideration for a license under adversely held patents.

§ 819b.10 Royalties.

(a) Normally, royalties will not be charged under nonexclusive licenses granted to U.S. citizens and U.S. corporations on Government inventions; however, the Air Force may require other considerations.

(b) A limited exclusive license on a Government invention will contain a royalty provision and/or other consideration flowing to the Government.

§ 819b.11 Reports.

A license will require the licensee to submit periodic reports to the Air Force on his efforts to achieve practical application of the invention. The reports will contain information within his knowledge, or which he may acquire under normal business practices, pertaining to the commercial use being made of the invention and other information which the Air Force may determine is pertinent to its licensing activities and is specified in the license.

Subpart C—Procedures

§ 819b.12 Publication requirements.

The Department of the Air Force will cause to be published in the FEDERAL REGISTER, the Official Gazette of the U.S. Patent and Trademark Office, and at least one other publication that the Air Force deems would best serve the public interest, a list of the Government inventions in custody of the Department of the Air Force available for licensing under the conditions specified in Subpart B of this part. The list will be revised periodically to include directly, or by reference to a previously published list, all inventions currently available for licensing. Other publications on inventions available for licensing may be made and may include abstracts of the inventions, when appropriate, as well as information on the design, construction, use, and potential market for the inventions.

§ 819b.13 Requests for a nonexclusive or a limited exclusive license.

Requests for licenses under a Government invention in the custody of the Department of the Air Force should be addressed to the Chief, Patents Division, HQ USAF/JACP, Washington, D.C. 20314.

§ 819b.14 Contents of a nonexclusive license application.

An application for a nonexclusive license will include:

(a) Identification of the invention for which a license is desired, including the patent application serial number or patent number, title and date, if known, and any other identification of the invention;

(b) Name and address of the person, company, or organization applying for license and whether the applicant is a U.S. citizen or a U.S. corporation;

(c) Name and address of representative of applicant to whom correspondence should be sent;

(d) Nature and type of applicant's business;

(e) Source of information concerning the availability of a license on this invention;

(f) Purpose for which license is desired and a brief description of applicant's plan to achieve that purpose;

(g) A statement of the fields of use for which applicant intends to practice the invention; and

(h) A statement as to the geographic areas in which the applicant would practice the invention.

§ 819b.15 Contents of a limited exclusive license application.

In addition to the information indicated in § 819b.14, an application for a limited exclusive license will include:

(a) Applicant's status, if any, in any one or more of the following categories:

- (1) Small business firm,
- (2) Minority business enterprise,
- (3) Location in a surplus labor area,
- (4) Location in a low-income area, and
- (5) Location in an economically depressed area;

(b) A statement of applicant's capability to undertake the development and marketing required to achieve the practical application of the invention;

(c) A statement describing the time, expenditure, and other acts which the applicant considers necessary to achieve practical application of the invention and the applicant's offer to invest the facilities and funds to perform such acts if the license is granted;

(d) A statement that contains the applicant's best knowledge of the extent to which the Government invention is being practiced by private industry and the Government; and

(e) Any other facts which the applicant believes are evidence that it is in the public interest for the Air Force to grant a limited exclusive license rather than a nonexclusive license and that such limited exclusive license should be granted to the applicant.

§ 819b.16 Published notices.

(a) A notice that a prospective limited exclusive licensee has been selected will be published by the Air Force in the FEDERAL REGISTER, and a copy of the notice will be sent to the Attorney General. The notice will include:

- (1) Identification of the invention;
- (2) Identification of the selected licensee;
- (3) Duration and scope of the contemplated license;

(4) A statement to the effect that the license will be granted unless;

(i) An application for a nonexclusive license, submitted by a responsible applicant pursuant to § 819b.4, is received by the Air Force within 60 days from the publication of the notice in the FEDERAL REGISTER; and the Air Force determines in accordance with its prescribed procedures, under which procedures the Air Force will record and make available for public inspection all decisions made pursuant thereto and the basis therefor, that the applicant has established that he has already achieved or is likely to bring the invention to the point of practical application within a reasonable period under a nonexclusive license; or

(ii) The Air Force determines that a third party has presented evidence and argument which has established that it would not be in the public interest to grant the exclusive license.

(b) If a limited exclusive license has been granted pursuant to this part, notice thereof will be published in the FEDERAL REGISTER. Such notice will include:

- (1) Identification of the invention;
 - (2) Identification of the licensee; and
 - (3) Duration and scope of the license.
- (c) If a limited exclusive license has been modified or revoked pursuant to § 819b.17, notice thereof will be published in the FEDERAL REGISTER. Such notice will include:

(1) Identification of the invention;

(2) Identification of the licensee; and

(3) Effective date of modification or revocation.

§ 819b.17 Modification or revocation.

(a) Any license granted pursuant to this part may be modified or revoked by the Air Force if the licensee at any time defaults in making any report required by the license or commits any breach of any covenant or agreement therein contained.

(b) A license may also be revoked by the Air Force if the licensee willfully makes a false statement of a material fact or willfully omits a material fact in the license application or any report required in the license agreement.

(c) Before modifying or revoking any license granted pursuant to this regulation for any cause, the Air Force will furnish the licensee and any sublicensee of record a written notice of intention to modify or revoke the license; and the licensee and any sublicensee will be allowed 30 days after such notice to remedy any breach of any covenant or agreement as referred to in § 819b.7(a) or to show cause why the license should not be modified or revoked.

§ 819b.18 License requests received by Air Force field activities.

All communications received in any Air Force activity requesting information regarding the licensing of a Government invention will be acknowledged and forwarded without further action directly to HQ USAF/JACP, Washington, D.C. 20314.

§ 819b.19 Appeals.

An applicant for a license, a licensee, or such other third party who has participated under § 819b.6 (a) (4) (ii) shall have the right to appeal to the Judge Advocate General, or in his absence, to the Acting Judge Advocate General, any decision concerning the granting, denial, interpretation, or modification, or revocation of a license. Such appeal must be made in writing and within 60 days from the date the decision was mailed.

Subpart D—Litigation

§ 819b.20 Government policy.

The property interest in a patent is the right to exclude. It is not the intent of the Government to transfer the property right in a patent when a license is issued pursuant to this part. Accordingly, the right to sue for infringement will be retained with respect to all licenses so issued by the Government.

Subpart E—Transfer of Custody of Government Inventions

§ 819b.21 Procedure.

Under certain circumstances it may be in the best interest of the Air Force to enter into an agreement to transfer its custody of an invention to another Government agency for purposes of administration including the granting of licenses pursuant to this part. Such transfers will be made on a case-by-case basis.

FRANKIE S. ESTEP,
Air Force Federal Register
Liaison Officer, Directorate of
Administration.

Title 37—Patents, Trademarks, and Copyrights

CHAPTER II—COPYRIGHT OFFICE, LIBRARY OF CONGRESS

[Docket RM 77-8]

PART 201—GENERAL PROVISIONS

Filing of Copies of Certain Contracts by Cable Systems

AGENCY: Library of Congress, Copyright Office.

ACTION: Final regulation.

SUMMARY: This notice is issued to advise the public that the Copyright Office of the Library of Congress is adopting a new regulation to implement section 111 (e) (2) of the Act for General Revision of the Copyright Law. That section requires the filing, in particular cases, of certain contracts entered into by cable television systems located outside of the forty-eight contiguous states. The new regulation establishes formal requirements governing the nature of the document to be filed for recordation.

EFFECTIVE DATE: January 1, 1978.

FOR FURTHER INFORMATION CONTACT:

Jon Baumgarten, General Counsel,
Copyright Office, Library of Congress,
Washington, D.C. 20559 (703-557-8731).

SUPPLEMENTARY INFORMATION:

Section 111 of the first section of Pub. L. 94-553 (90 Stat. 2541) establishes a compulsory licensing system under which cable systems may make secondary transmissions of copyrighted works. As a general rule, secondary transmissions must occur simultaneously with the primary transmission in order to be eligible for the compulsory license. However, section 111 provides for an exception to this general requirement for simultaneous retransmission. Because of the limited availability of over-the-air signals in certain areas outside of the forty-eight contiguous States, cable systems located in these areas are eligible for the compulsory license even if their secondary transmissions are "non-simultaneous"—that is, even if they use videotapes or the like to record a broadcast program off-air and later retransmit the program from the recording.

Section 111(e) (2) of the Act deals with exchanges of videotapes and similar recordings of programs between cable systems located in these areas. It provides that recordings embodying a program nonsimultaneously transmitted by a system may, under certain circumstances, be transferred to another system, but only "pursuant to a written nonprofit contract providing for the equitable sharing of the costs of such videotape and its transfer." Among other conditions it also requires that "a copy of such contract [be] filed, within thirty days after such contract is entered into, with the Copyright Office (which Office shall make such contract available for public inspection)"

On August 17, 1977, we published in the FEDERAL REGISTER (42 FR 41438; corrected 42 FR 42362) a proposal that the filing and recordation of these documents be covered by the addition of a new § 201.12 to the regulations of the Copyright Office. Interested parties were given until September 16, 1977, to submit comments.

No comments have been received. The proposed regulation is adopted without change and is set forth below.

(17 U.S.C. 207, and under the following sections of Title 17 of the U.S.C. as amended by Pub. L. 94-553: §§ 111; 702; 708(11).)

Dated: September 23, 1977.

BARBARA RINGER,
Register of Copyrights.

Approved:

DANIEL J. BOORSTEIN,
Librarian of Congress.

Part 201 of 37 CFR chapter II is amended by adding a new § 201.12 to read as follows:

§ 201.12 Recordation of certain contracts by cable systems located outside of the forty-eight contiguous states.

(a) Written, nonprofit contracts providing for the equitable sharing of costs

of videotapes and their transfer, as identified in section 111(e) (2) of Title 17 of the United States Code as amended by Pub. L. 94-553, will be filed in the Copyright Office by recordation upon payment of the fee prescribed by this section. The document submitted for recordation shall meet the following requirements:

(1) It shall be an original instrument of contract; or it shall be a legible photocopy or other full-size facsimile reproduction of an original, accompanied by a certification signed by at least one of the parties to the contract, or an authorized representative of that party, that the reproduction is a true copy;

(2) It shall bear the signatures of all persons identified as parties to the contract, or of their authorized agents or representatives;

(3) It shall be complete on its face and shall include any schedules, appendices, or other attachments referred to in the instrument as being part of it; and

(4) It shall be clearly identified, in its body or a covering transmittal letter, as being submitted for recordation under 17 U.S.C. 111(e).

(b) For a document consisting of six pages or less the recordation fee is \$10; an additional charge of 50 cents is made for each page over six. If titles of works are specified in the contract, an additional charge of 50 cents is made for each title over one.

(c) The date of recordation is the date when all of the elements required for recordation, including the prescribed fee, have been received in the Copyright Office. A document is filed in the Copyright Office and a filing in the Copyright Office takes place on the date of recordation. After recordation the document is returned to the sender with a certificate of record.

Title 40—Protection of Environment

CHAPTER I—ENVIRONMENTAL PROTECTION AGENCY

SUBCHAPTER C—AIR PROGRAMS

[FRL 783-8]

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

California Plan Revisions: San Joaquin County Air Pollution Control District (APCD)

AGENCY: Environmental Protection Agency.

ACTION: Final rulemaking.

SUMMARY: The Environmental Protection Agency (EPA) takes final action to approve and, where appropriate, disapprove or take no action on changes to the San Joaquin County portion of the California State Implementation Plan (SIP) submitted by the Governor's designee. The intended effect of this action is to update rules and regulations and to correct certain deficiencies in the SIP.

EFFECTIVE DATE: November 3, 1977.
FOR FURTHER INFORMATION CONTACT:

Frank M. Covington, Director, Air and Hazardous Materials Division, Environmental Protection Agency, 100 California Street, San Francisco, Calif. 94111. Attn: David R. Souten, (415-556-7288).

SUPPLEMENTARY INFORMATION: On May 26, 1977, in 42 FR 26999, EPA published a Notice of Proposed Rulemaking for revisions to the San Joaquin County Air Pollution Control District's Rules and Regulations submitted on November 10, 1976 by the California Air Resources Board for inclusion in the California SIP.

Rules concerning new source review and gasoline vapor recovery have been submitted; however, no action is being taken at this time, and these rules will be acted upon in separate FEDERAL REGISTER notices.

The changes contained in this submittal and being acted on by this notice, include the following: changes are made to a number of rules to reflect the recodification numbering changes that have been made to the State of California Health and Safety Code; wording changes are made to certain definitions; requests for a "trade secret" designation are required to be made in writing; a time period is specified for making public records available to requesting parties; wording changes are made to the agricultural operations exemptions to visible emissions limitations; and certain burning operations are added to the list of agricultural burning operations. A list of the rule numbers and titles initially considered for this notice, was published as part of the notice of proposed rulemaking and can be found in 42 FR 26999 (May 26, 1977). The proposed rulemaking provided 30 days for public comments. No comments were received.

It is the purpose of this notice to approve all of the changes contained in the November 10, 1976, submittal for San Joaquin County and to incorporate them into the California SIP, with the exception of those rules not being acted upon and the rule discussed below.

Paragraph e. of Rule 402 *Exceptions*, is disapproved because it exempts "other equipment in agricultural operations" from the visible emission prohibitions imposed by Rule 401. "Other equipment" is not defined, and it is therefore not clear what operations this exemption is intended to cover. Since this provision might permit sources otherwise regulated to violate applicable emission limitations, it should be disapproved. In addition, this exemption is not justified by a control strategy analysis which demonstrates that it will not violate section 110 of the Clean Air Act by interfering with the attainment or maintenance of National Ambient Air Quality Standards.

The California Air Resources Board has certified that the public hearing requirements of 40 CFR 51.4 have been satisfied.

Pursuant to section 110 of the Clean Air Act, as amended, and 40 CFR Part 51, the Administrator is required to approve or disapprove the rules and regulations as State Implementation Plan revisions.

(Secs. 110, 301(a), Clean Air Act, as amended, (42 U.S.C. 1857c-5, 1857g(a)))

Dated: September 27, 1977.

DOUGLAS M. COSTLE,
Administrator.

Subpart F of Part 52 of Chapter I, Title 40 of the Code of Federal Regulations is amended as follows:

Subpart F—California

1. Section 52.220, paragraph (c) (35) (v) (A) is added as follows:

§ 52.220 Identification of plan.

(c)

(35)

(v) San Joaquin County APCD.

(A) Rules 102, 103, 103.1, 104, 105, 111, 112, 301, 305, 402, 416.1, 501, 504, 511.

2. Section 52.273 paragraph (a) (3) (i) (A) is added as follows:

§ 52.273 Open burning.

(a)

(3) San Joaquin Valley Intrastate Region:

(i) San Joaquin County APCD.

(A) Paragraph e. of Rule 402.

[FR Doc. 77-29122 Filed 10-3-77; 8:45 am]

[6560-01]

[FRL 784-1]

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

California Plan Revision: Sacramento County Air Pollution Control District (APCD)

AGENCY: Environmental Protection Agency.

ACTION: Final rulemaking.

SUMMARY: The Environmental Protection Agency (EPA) takes final action to approve and, where appropriate, disapprove or take no action on changes to the Sacramento County portion of the California State Implementation Plan (SIP) submitted by the Governor's designee. The intended effect of this action is to update rules and regulations and to correct certain deficiencies in the SIP.

EFFECTIVE DATE: November 3, 1977.
FOR FURTHER INFORMATION CONTACT:

Frank M. Covington, Director, Air and Hazardous Materials Division, Environmental Protection Agency, 100 California Street, San Francisco, CA 94111, Attn: David R. Souten, 415-556-7288.

SUPPLEMENTARY INFORMATION: On May 26, 1977, in 42 FR 27001, EPA published a Notice of Proposed Rulemaking for revisions to the Sacramento

County Air Pollution Control District's Rules and Regulations submitted on November 10, 1976 by the California Air Resources Board for inclusion in the California SIP.

Rules concerning new source review and gasoline vapor recovery have been submitted; however, no action is being taken at this time, and these rules will be acted upon in separate FEDERAL REGISTER notices.

The changes contained in the above mentioned submittal and being acted on by this notice, include the following: procedural changes, which update California Health and Safety Code citations contained in the rules, and which delete obsolete effective dates from various rules; procedural changes are made with several definitions; the deletion of a "Gasoline Storage" rule (the requirements of this rule are added to another rule which will be acted on at a future date); permit fees are raised and clarifying language is added to the "Permit Fees" rule; miscellaneous changes are made to rules affecting agricultural burning; and a definitions list is added to the end of Regulation VII. A list of the Rules initially considered for this notice was published as part of the notice of proposed rulemaking and can be found in 42 FR 27001 (May 26, 1977). The proposed rulemaking provided 30 days for public comments. No comments were received.

It is the purpose of this final rulemaking to approve all of the changes contained in the November 10, 1976 submittal for Sacramento County and incorporate them into the California SIP, with the exception of those rules not being acted upon and the rule discussed below.

EPA is disapproving paragraph a. of Rule 96, *Emergency Permits*, which authorizes the Air Pollution Control Officer to permit agricultural burning otherwise prohibited, if the denial of such authorization would threaten imminent and substantial loss. This allowance is disapproved because Section 110 of the Clean Air Act does not allow exceptions on the basis of economic factors absent a showing that other requirements of this section have been met. In addition, no analysis has been presented to show that such exemptions will not interfere with the attainment or maintenance of National Ambient Air Quality Standards or will not violate other Section 110 requirements.

The California Air Resources Board has certified that the public hearing requirements of 40 CFR 51.4 have been satisfied.

Pursuant to Section 110 of the Clean Air Act as amended, and 40 CFR Part 51, the Administrator is required to approve or disapprove the regulations as State Implementation Plan revisions.

(Sections 110 and 301 (a) of the Clean Air Act, as amended, (42 U.S.C. § 1857c-5 and 1857g(a)))

Dated: September 27, 1977.

DOUGLAS M. COSTLE,
Administrator.

Subpart F of Part 52 of Chapter I, Title 40 of the Code of Federal Regulations is amended as follows:

Subpart F—California

1. Section 52.220, paragraph (c) (35) (A) is added as follows:

§ 52.220 Identification of plan.

(c)

(35) Revised regulations for the following APCDs submitted on November 10, 1976 by the Governor's designee.

(i) Sacramento County APCD.

(A) Rules 1, 2, 11, 12, 21, 22a, 22b, 24, 25, 27, 28, 29, 33, 39, 44, 70, 71, 90, 92, 93, 94, 95, 96, 97, 98, and definitions list addition to Regulation VII.

2. Section 52.273, paragraph (a) (3) (i) (A) is added as follows:

§ 52.273 Open burning.

(a) The following rules or portions of rules are disapproved because they contain exemptions to open burning (including open agricultural burning) prohibitions, that do not satisfy the requirements of Section 110 of the Clean Air Act:

(i) Sacramento Valley Intrastate Region:

(i) Sacramento County APCD.

(A) Paragraph a. of Rule 96.

[FRL 784-5]

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

Approval of New Mexico Regulations 100, 705, and 706

AGENCY: Environmental Protection Agency.

ACTION: Final rule.

SUMMARY: This action approves revisions to Regulations 100 and 705 and a new Regulation 706 of the State Implementation Plan for New Mexico. Revised Regulation 100 includes additional definitions for new and existing petroleum processing facilities, petroleum refineries, natural gas processing plants, and gasification plants. Revised Regulation 705 requires that compliance schedules be submitted on a regulation's effective date rather than the adoption date. New Regulation 706 identifies applicable Air Quality Maintenance Areas in New Mexico. These regulations are considered necessary for the State to exercise its responsibility for attainment and maintenance of National Ambient Air Quality Standards.

EFFECTIVE DATE: October 4, 1977.

FOR FURTHER INFORMATION CONTACT:

Oscar Cabra, Jr., Air Program Branch, Environmental Protection Agency, Region VI, Dallas, Tex. 75270 (214-749-3837).

SUPPLEMENTARY INFORMATION: On November 6, 1975, the Governor of New Mexico, after adequate notice and public hearing, submitted revisions to Regulations 100 and 705, and a new Regulation 706. After EPA's review of these submittals, a proposed approval was published in the FEDERAL REGISTER on June 20, 1977 (42 FR 31175).

PUBLIC COMMENTS

In the proposed approval of Regulations 100, 705, and 706, interested persons were given 30 days to submit comments for consideration by EPA in making a final approval, disapproval decision. No comments on the proposed approval were received. Therefore, there is no information which conflicts with a final approval decision.

CURRENT ACTION

In this action, approval of the revisions to Regulations 100 and 705 and the new Regulation 706 is being promulgated as proposed.

A revision to Regulation 201 and new Regulations 623, 626, 628, 673, 674, 675, and 677 were also included with the Governor's submittal. All of these regulations pertain to non-criteria pollutants such as ammonia, hydrogen sulfide, and hydrogen chloride. EPA does not have authority to require or approve regulations designed to control pollutants other than those identified under Section 109 of the Clean Air Act. Therefore, no action is being taken on these regulations.

(Sec. 110(a) of the Clean Air Act as amended, (42 U.S.C. 1857c-5(a)))

Dated: September 28, 1977.

DOUGLAS M. COSTLE,
Administrator.

Part 52 of Chapter I, Title 40 of the Code of Federal Regulations is amended as follows:

Subpart GG—New Mexico

1. In § 52.1620, paragraph (c) is amended by adding paragraph (9) as follows:

§ 52.1620 Identification of Plan.

(c)

(9) Revisions to Regulation 100 Definitions, Regulation 705, Schedules of Compliance, and a new Regulation 706, Air Quality Maintenance Areas, were submitted by the Governor on November 6, 1975.

§ 52.1633 [Revoked]

2. Section 52.1633 is revoked.

[FR Doc. 77-29081 Filed 10-3-77; 8:45 am]

[4310-84]

Title 43—Public Lands: Interior

CHAPTER II—BUREAU OF LAND MANAGEMENT, DEPARTMENT OF THE INTERIOR

PART 3300—OUTER CONTINENTAL SHELF OIL AND GAS LEASES

Suspensions and the Five-Year Lease Term
AGENCY: Bureau of Land Management, U.S. Department of the Interior.

ACTION: Final rule.

SUMMARY: By a rule published today in conjunction with this rule, Geological Survey's OCS operations regulations are amended to provide the procedures to be followed in the case of certain emergency suspensions of operations. This rule amends the lease term and lease extension regulations to incorporate the manner in which the lease term is affected by the 30 CFR 250.12(c) (2) emergency suspension provision.

EFFECTIVE DATE: This rule applies, as amended, to all OCS oil and gas leases issued subsequent to this publication.

SUPPLEMENTARY INFORMATION: The proposal received fifteen comments. Most of these were chiefly directed at the Geological Survey portion of the regulation, 30 CFR 250.12(c), published today. These comments recommended that if the proposed § 250.12(c) was amended to delete subsection (2) (iii), then these provisions could be left essentially as they were. As can be seen from the discussion of the comments in the Geological Survey rule published today, we are proceeding with those amendments. These amendments follow.

Other comments were directed to the question whether these provisions dovetailed with the proposed 30 CFR 250.12 (c). We have revised § 3305a.4 to make clear the operation of 30 CFR 250.12 (c) (2) (iii) on the running of the lease term.

NOTE:—The Department of the Interior has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Analysis under Executive Order 11821 and OMB Circular A-107.

It is hereby determined that publication of this rule is not a major Federal action significantly affecting the quality of the human environment and that no detailed statement pursuant to section 102(2) (c) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(2) (c)) is required.

Dated: September 28, 1977.

CELESTINE ANDREWS,
Secretary.

Under the authority of the Outer Continental Shelf Lands Act of August 7, 1953 (43 U.S.C. 1331 et seq.), Subparts 3302 and 3305a of Part 3300, Group 3300, Subchapter C, Chapter II, Title 43 of the Code of Federal Regulations are hereby amended as set forth below.

Subpart 3302—Issuances of Leases

1. Subpart 3302 is amended to read as follows:

§ 3302.2 Term.

(a) All oil and gas leases shall be issued for a term of 5 years and so long thereafter as oil or gas may be produced from the leasehold in paying quantities, or drilling or well reworking operations, as approved by the Secretary under § 3305a.1 are conducted thereon. The term of an oil and gas lease is subject to extension as provided in 43 CFR 3305a.4.

Subpart 3305a—Extension of Leases

2. Subpart 3305a is amended to read as follows:

§ 3305a.4 Effect of suspensions on lease term.

In the event that under the provisions of 30 CFR 250.12(c) or (d) (1), the regional oil and gas supervisor of the Geological Survey directs the suspension of either operations or production, or both, with respect to any lease in its primary term, the primary term of the lease will be extended by a period equivalent to the period of the suspension. In the event that under the provisions of 30 CFR 250.12(c) or (d) (1) the supervisor orders or approves the suspension of either operations or production, or both, with respect to any lease extended beyond its primary term, the term of the lease will not be deemed to expire so long as the suspension remains in effect.

Title 49—Transportation

CHAPTER III—FEDERAL HIGHWAY ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

SUBCHAPTER B—FEDERAL MOTOR CARRIER SAFETY REGULATIONS

[Amendment No. 76-5]

PART 386—RULES OF PRACTICE FOR MOTOR CARRIER SAFETY PROCEEDINGS

PART 391—QUALIFICATIONS OF DRIVERS

Motor Carrier Safety Settlement and Hearing Procedures

AGENCY: The Federal Highway Administration, DOT.

ACTION: Amendment to final rule.

SUMMARY: The changes being made in this document relate to replies, requests for admissions, service, and driver qualification applications. Each of the changes made should result in easier processing and fewer motions being filed.

EFFECTIVE DATE: This amendment takes place on October 4, 1977.

FOR FURTHER INFORMATION CONTACT:

Person in legal office to contact; Gerald M. Tierney, Motor Carrier and Highway Safety Law Division, Office of the Chief Counsel (202-426-0346), Federal Highway Administration, Washington, D.C. 20590. Principal Program Contact: Gerald J. Davis, Chief, Driver Requirements Branch, Regulations Division, Bureau of Motor Carrier Safety (202-426-9767), Federal Highway Administration, Washington, D.C. 20590.

SUPPLEMENTARY INFORMATION: On April 5, 1977, the Federal Highway Administration (FHWA) published revised rules of practice for its motor carrier settlement and hearing procedures. 49 FR 18076. At that time, the FHWA requested the public to submit comments on the rules. The intention was to determine whether the rules presented any

problems in operation and, if they did, to change them.

The rules have now been in effect for over 5 months. Although the rules have worked well, experience has shown that a few additions or clarifications are justified. This document makes those changes.

In answer to FHWA solicitation of comments concerning the new rules of practice, one response was received. That response, submitted by the Private Truck Council of America, Inc., commented favorably on the rules in general, but took exception to certain particulars.

RESPONSE OF THE PRIVATE TRUCK COUNCIL OF AMERICA, INC.

The Council claimed that the failure to grant a hearing as a right in all cases should be changed. It contends that it is improper to allow the Associate Administrator to deny a hearing when there are no material factual issues in dispute.

The FHWA cannot agree that such a procedure is improper. The general rule of law regarding the necessity of granting a hearing is that one need be granted only if there are material factual issues in dispute. To grant a hearing whenever one is requested would result in an unnecessary expenditure of money, both the taxpayers' and the parties', for hearings that would not serve any purpose. The rule has already proved effective in several cases in which disqualified drivers requested hearings at the same time they admitted they had physical conditions that were disqualifying. Although they asked for hearings, they were really asking that the rule in question be changed.

Another purpose accomplished by the rule is a narrowing of issues. The requirement for a listing of factual issues in dispute requires the party requesting the hearing to thoroughly evaluate his position before he submits his request. This eliminates frivolous requests.

The rule is not unfair. Parties who show serious factual issues are guaranteed a hearing. The Associate Administrator has and will continue to evaluate each case on its own merit and to grant hearings in all questionable cases.

The Private Truck Council requested that §§ 386.15, 386.35 and 386.40 be changed to allow intervention, discovery and amendment of pleadings in cases not called for oral hearing. The request, as it relates to discovery and amendments to pleadings, is reasonable and may help to increase the information available to the decisionmaker. Those two sections are, therefore, being amended to accomplish the requested changes. Allowing intervention prior to the hearing would, however, only serve to delay and complicate cases where there are no issues in dispute. If there is no dispute between the parties, there is no need to receive evidence of an intervenor. If there is a dispute, the matter will be called for a hearing and intervention will be permitted. Because of these reasons, the present rule on intervention will not be changed.

The Private Truck Council claims that paragraphs (a) and (c) of § 386.43 are

inconsistent and ambiguous. Paragraph (c) merely provides the parties a less formal procedure for requesting the attendance of Government witnesses or Government documents. It is neither ambiguous nor confusing and has, therefore, not been changed.

It is claimed that § 386.56 is extreme and harsh in not allowing a motion for rehearing for 1 year. The other procedural safeguards in the rules, including the allowance of petitions for reconsideration, remove any harshness this rule may have. A rule of this type is necessary to give a certain finality to decisions and to prevent petitions from being filed in rapid succession.

Another of the comments of the Private Truck Council questions the letter of disqualification. These are letters to drivers issued by the Director, Bureau of Motor Carrier Safety, or the FHWA Regional offices. They inform the driver that he has been found not qualified and allow him the opportunity to appeal the determination. These letters are issued only in cases of obvious disqualification when the public safety is at stake. They are issued under the authority granted in 49 U.S.C. 304.

The Private Truck Council questions the authority of 49 CFR 391.47(f) which states that a driver is not qualified once an application is submitted. The authority for this section is 49 U.S.C. 304 which gives the FHWA the power to issue regulations concerning the qualification of drivers. Under § 391.47 there has to be a conflict of medical opinion before an application is submitted. When a conflict exists there is no valid certification. A driver who is not certified cannot drive under the regulations. Therefore, until a determination of the validity of the certification is made, the driver cannot be considered qualified.

The section provides that the Director can issue an order finding the driver qualified pending the issuance of the determination. This procedure was added to the rule to allow the Director to prevent any hardship to the driver if the issuance of the determination is delayed. It is not expected that this section will present a hardship to the driver because, in most cases, the determination will be quickly issued. When it is not, the Director can issue an order finding the driver qualified until the determination is made.

Based on the above explanation, paragraph 391.47(f) will not be changed. Other parts of the section are, however, changed to allow all parties the opportunity to submit records prior to the Director's determination and to require the applicant to establish jurisdiction. These changes will result in more information being available on which to base a decision and will screen out improper cases.

Additional Changes: Practice under the rules during the past several months has shown that additional changes can be made to streamline procedures and clarify issues. The following changes are designed to accomplish that purpose:

Section 386.13(b) is revised to clarify the requirements for a reply and to fur-

ther explain the procedures for requesting a hearing and submitting evidence if no hearing is requested. The time period for requesting a hearing is shortened to provide time for submission of evidence if no hearing is requested.

Section 386.13(d) is changed to require a motion before the Associate Administrator issues a final determination.

Section 386.14(b) is amended to elaborate on the Associate Administrator's actions in deciding on a request for a hearing.

It has been determined that these amendments are not major actions requiring the preparation of either an economic impact statement or environmental impact statement. Because these rules concern practice and procedure, have been issued after public comment and are necessary for immediate enforcement, notice and comment are unnecessary and the changes will go into effect upon publication.

Therefore, the Motor Carrier Safety Settlement and Hearing Procedures are amended as follows:

1. 49 CFR 386.13(b) is revised to read as follows:

§ 386.13 Petitions to review, replies.

(b) *Civil forfeiture proceedings.* (1) The respondent must reply within 20 days after the claim letter is served or within such additional time as the claim letter may specify. The reply must contain the following:

(i) An admission or denial of each allegation of the claim and a concise statement of facts constituting each defense;

(ii) A statement of whether the respondent wishes to discuss the amount claimed; and

(iii) Certification that the reply has been served in accordance with § 386.38.

(2) Additional procedures for proceedings under the Hazardous Materials Transportation Act.

(i) *Request for hearing or for submission of evidence without hearing.* At any time within 40 days after the date the reply was filed or within such other time as the claimant may specify in writing, the respondent must either request an oral hearing or give notice that he intends to submit his evidence without oral hearing. A request for oral hearing must contain a listing of all factual issues believed to be in dispute. Failure to request a hearing as required by this section shall constitute a waiver of any right to a hearing.

(ii) *Submission of evidence.* If a notice of intent to submit evidence without oral hearing is filed or if no hearing is requested under paragraph (b)(2)(i) of this section, all evidence must be served in written form no later than the 20th day following the date the respondent's request for a hearing or notice of intent to submit evidence without oral hearing was due under paragraph (b)(2)(i) of this section. Evidence must be submitted in the form specified in § 386.37.

(iii) *Complainant's requests for a hearing.* If the respondent files a notice

of intent to submit evidence without oral hearing, the complainant may, within 10 days after that request is filed, submit a request for oral hearing. The request must include a listing of all factual issues believed to be in dispute.

2. 49 CFR 386.13(d) is revised to read as follows:

of intent to submit evidence without oral hearing, the complainant may, within 10 days after that request is filed, submit a request for oral hearing. The request must include a listing of all factual issues believed to be in dispute.

3. 49 CFR 386.13(d) is revised to read as follows:

§ 386.13 Petition to review, replies.

(d) *Failure to reply or petition, decision.* Failure to submit a petition as specified in paragraph (a) of this section shall constitute a waiver of the right to petition for review of the determination or letter of disqualification. In these cases the determination or disqualification issued automatically becomes the final decision of the Associate Administrator, 30 days after the time to submit the reply or petition to review has expired unless the Associate Administrator orders otherwise. When no reply is received to the claim letter or notice of investigation under paragraphs (b) and (c) of this section, the Associate Administrator may, on motion of any party, find the facts as alleged and issue a final order in the case.

3. 49 CFR 386.14(b) is revised to read as follows:

§ 386.14 Action on petitions or replies.

(b) *Request for Oral Hearing.* If a request for an oral hearing has been filed, the Associate Administrator shall determine whether there are any factual issues in dispute. If there are, he shall call the matter for a hearing. If there are none, he shall issue an order to that effect and set a time for submission of argument by the parties. Upon the submission of argument he shall decide the case.

4a. 49 CFR 386.35 is revised to read as follows:

§ 386.35 Deposition and interrogatories.

At any time after a reply or petition is submitted under § 386.13, any party may file a motion with the Associate Administrator or the hearing officer, if one has been appointed, requesting permission to take a deposition of any person, including a party, or to file written interrogatories on any party to a proceeding. All requests for depositions or interrogatories must include a description of the general subject matter about which the depositions and interrogatories are requested and the time and place for such matters to take place. Service of the motion shall be made on all other parties. Other parties may submit responses within 7 days after the motion is served. The hearing officer, if one has been appointed, or the Associate Administrator may then rule on the motion. His ruling may deny the motion or permit it in whole or in part.

4b. 49 CFR 386.40(a) is revised to read as follows:

§ 386.40 Amendment and withdrawal of pleadings.

(a) *Amendment or withdrawal of pleadings.* Except in instances covered by other rules, anytime more than 15 days prior to the hearing, a party may amend his pleadings by serving the amended pleading on the Associate Administrator or the hearing officer, if one has been appointed, and on all parties. After 15 days prior to the hearing, an amendment shall be allowed only at the discretion of the hearing officer. When an amended pleading is filed, other parties may file a response and objection within 10 days.

5. 49 CFR 386.36 is revised to read as follows:

§ 386.36 Medical records and physicians' reports.

In cases involving the physical qualifications of a driver, copies of all physicians' reports, test results, and other medical records that a party intends to rely upon shall be served on all other parties at least 30 days prior to the date set for hearing. Except as waived by the Director, Bureau of Motor Carrier Safety, reports, test results and medical records not served under this rule shall be excluded from evidence at any hearing.

6. 49 CFR 386.38 is revised to read as follows:

§ 386.38 Service.

In accordance with the delegations of authority in § 301.60 the following identifies those persons who must be served with papers filed under these rules.

(a) *Docket file.* The original and two copies of all papers filed under these rules of practice shall be served on the docket. A docket number will be assigned to each case and will appear on all papers filed by or served on the Government. Address docket copies to FHWA Docket No. —, Office of the Chief Counsel (HCC-20), Federal Highway Administration, Department of Transportation, Washington, D.C. 20590.

(b) *Associate Administrator for Safety.* A copy of all papers filed under these rules of practice shall be filed with the Associate Administrator for Safety, Federal Highway Administration, Department of Transportation, Washington, D.C. 20590.

(c) *Hearing Officer.* After a hearing officer is appointed by the Associate Administrator, a copy of all papers filed under these rules shall be served on such hearing officer.

(d) *Parties.* A copy of all papers filed under these rules shall be served on all parties to the proceeding.

(e) *Notification.* The first pleading of the Government in a proceeding initiated under this section shall have attached to it a list of persons to be served. Such list shall be updated as necessary.

(f) *Service.* All service required by these rules shall be by registered or certified mail, first class postage prepaid.

(g) *Responsibilities in these proceedings.* The following is a brief summary of the present delegations of authority. A more detailed breakdown is included in § 301.60.

(1) *Director, Bureau of Motor Carrier Safety.* The Director issues driver qualification determinations, letters of qualification, claim letters and notices of investigation under §§ 386.11 and 391.47 of this Chapter. He is also authorized to sign consent orders and compromise claims.

(2) *Regional Administrator.* The Regional Administrator, or his delegate, may issue letters of qualification, may settle claims and sign consent orders.

(3) *The Associate Administrator for Safety.* The Associate Administrator makes the final administrative decisions on all disputed issues in proceedings under Part 386. He makes the final decision, determines whether a matter should be called for a hearing, decides appeals under § 386.53, and decides all motions prior to the appointment of a hearing officer.

(4) *Hearing Officer.* The Hearing Officer issues a decision under § 386.51 and decides all motions submitted from the time he is appointed until he issues a decision under § 386.51.

7. A new section is added to 49 CFR Part 386 as follows:

§ 386.49 Request for Admissions.

(a) Request for Admission. (1) Any party may serve upon any other party a request for admission of any relevant matter or the authenticity of any relevant document. Copies of any document about which an admission is requested must accompany the request.

(2) Each matter of which an admission is requested shall be separately set forth and numbered. The matter is admitted unless within 15 days after service of the request, the party to whom the request is directed serves upon the party requesting the admission a written answer signed by the party or his attorney.

(3) Each answer must specify whether the party admits or denies the matter. If the matter cannot be admitted or denied, the party shall set out in detail the reasons.

(4) A party may not issue a denial or fail to answer on the ground that he lacks knowledge unless he has made reasonable inquiry to ascertain information sufficient to allow him to admit or deny.

(5) A party may file an objection to a request for admission within 10 days after service. Such motion shall be filed with the hearing officer if one has been appointed, otherwise it shall be filed with the Associate Administrator. An objection must explain in detail the reasons the party should not answer. A reply to the objection may be served by the party requesting the admission within 10 days after service of the objection. It is not sufficient ground for objection to claim that the matter about which an admission is requested presents an issue of fact for hearing.

(b) *Effect of Admission.* Any matter admitted is conclusively established unless the Associate Administrator or hearing officer permits withdrawal or amendment. Any admission under this rule is for the purpose of the pending action only and may not be used in any other proceeding.

(c) If a party refuses to admit a matter or the authenticity of a document which is later proved, the party requesting the admission may move for an award of expenses incurred in making the proof. Such a motion shall be granted unless there was a good reason for failure to admit.

8. 49 CFR 391.47(b) (9) and (10) are added and (d) is revised as follows:

§ 391.47 Resolution of conflicts of medical evaluation.

(b)

(9) The application must be accompanied by a statement of the driver that he intends to drive in interstate commerce not subject to the commercial zone exemption or a statement of the carrier that he has used or intends to use the driver for such work.

(10) The applicant must submit three copies of the application and all records.

(d) (1) *Action.* Upon receiving a satisfactory application the Director shall notify the parties (the driver, motor carrier, or any other interested party) that the application has been accepted and that a determination will be made. A copy of all evidence received shall be attached to the notice.

(2) *Reply.* Any party may submit a reply to the notification within 15 days after service. Such reply must be accompanied by all evidence the party wants the Director to consider in making his determination. Evidence submitted should include all medical records and test results upon which the party relies.

(3) *Parties.* A party for the purposes of this section includes the motor carrier and the driver, or anyone else submitting an application.

(49 U.S.C. 304, P.L. 93-633, 88 Stat. 2156 (49 U.S.C. 1801 et seq.); 49 CFR 1.48, 301.60.)

Issued this 26th day of September, 1977, in Washington, D.C.

KENNETH L. PIERSON,
Acting Director,
Bureau of Motor Carrier Safety.

Title 50—Wildlife and Fisheries

CHAPTER I—UNITED STATES FISH AND WILDLIFE SERVICE, DEPARTMENT OF THE INTERIOR

PART 33—SPORT FISHING

Opening of Sand Lake National Wildlife Refuge, S. Dak., to Sport Fishing

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special Regulation.

SUMMARY: The Director has determined that the opening to sport fishing of Sand Lake National Wildlife Refuge is compatible with the objectives for which the area was established, will utilize a renewable natural resource, and will provide additional recreational opportunity to the public.

DATES: January 1 through December 31, 1978.

FOR FURTHER INFORMATION CONTACT:

Refuge Manager, Sand Lake NWR, Columbia, S. Dak. 57433 (605-885-6320).

SUPPLEMENTARY INFORMATION:

§ 33.5 Special regulations: sport fishing; for individual wildlife refuge areas.

Sport fishing is permitted on the Sand Lake National Wildlife Refuge, S. Dak., only on the areas designated by signs as being open to fishing. These areas comprising 150 acres are delineated on maps available at the refuge headquarters and from the office of the Regional Director, U.S. Fish and Wildlife Service, P.O. Box 25486, Denver Federal Center, Denver, Colo. 80225. Sport fishing shall be in accordance with all applicable State regulations subject to the following conditions:

1. The use of boats is not permitted. The provisions of this special regulation supplement the regulations which govern fishing on wildlife refuge areas generally which are set forth in Title 50 Code of Federal Regulations, Part 33. The public is invited to offer suggestions and comments at any time.

NOTE.—The U.S. Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A-107.

Dated: September 20, 1977.

SAM WALDSTEIN,
Refuge Manager.

Title 7—Agriculture
CHAPTER XVIII—FARMERS HOME ADMINISTRATION, DEPARTMENT OF AGRICULTURE

SUBCHAPTER G—MISCELLANEOUS REGULATIONS

[FmHA Instruction 440.3]

PART 1888—SPECIAL ASSISTANCE TO DROUGHT STRICKEN AREAS

Obligation of Loan and Grant Funds

AGENCY: Farmers Home Administration, USDA.

ACTION: Final rule.

SUMMARY: The Farmers Home Administration issues amended regulations to provide that loan and grant funds must be obligated on or before October 31, 1977. This action is brought about by the

need to allow more time for obligation of funds.

EFFECTIVE DATE: October 4, 1977.

FOR FURTHER INFORMATION CONTACT:

Mr. Charles B. Hart, 202-447-5717.

SUPPLEMENTARY INFORMATION: Section 1888.17 of Part 1888 of Chapter XVIII, Title 7, Subchapter G, "Miscellaneous Regulations," in the Code of Federal Regulations (42 FR 19322; 42 FR 23158; 42 FR 37355; 42 FR 42843) is amended. The text of paragraph (a) of this section is amended to provide that loan and grant funds must be obligated on or before October 31, 1977. It is the policy of this Department that rules relating to public property, loans, grants,

benefits, or contracts shall be published for comment notwithstanding the exemptions in 5 U.S.C. 553 with respect to such rules. This amendment, however, is not published for proposed rulemaking since delay in initiating this would reduce the number of communities that obtain funds for drought assistance. Since this assistance is currently needed any delay would be contrary to the public interest. Accordingly, § 1888.17(a) is amended to read as follows:

§ 1888.17 Termination provisions.

(a) Any assistance provided under this regulation must be for an applicant with an application on file on or before September 30, 1977. For projects eligible for assistance under paragraph (b) of § 1888.13, the obligating documents must

have been received in the Finance Office as of close of business on September 30, 1977, and funds must be obligated on or before October 31, 1977.

(7 U.S.C. 1889; delegation of authority by the Secretary of Agriculture, 7 CFR 2.23; delegation of authority by the Assistant Secretary for Rural Development, 7 CFR 2.70)

NOTE.—The Farmers Home Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821 and OMB Circular A-107.

Dated: October 3, 1977.

JAMES E. THORNTON,
Associate Administrator,
Farmers Home Administration.

proposed rules

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

[3410-34]

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

[9 CFR Parts 1, 3]

HUMANE HANDLING, CARE, TREATMENT, AND TRANSPORTATION OF MARINE MAMMALS; PROPOSED REGULATIONS AND STANDARDS

Informal Public Hearing on Proposed Rules

AGENCY: Animal and Plant Health Inspection Service (APHIS), USDA

ACTION: Notice of informal public hearing.

SUMMARY: On August 19, 1977, the Deputy Administrator, Veterinary Services, APHIS, published in the FEDERAL REGISTER proposed rulemaking under the authorities of the Animal Welfare Act (7 U.S.C. 2131) to provide for the humane handling, care, treatment, and transportation of marine mammals maintained in captivity. The notice gave all interested persons a period of 60 days for the filing of written comments concerning the proposed regulations and standards. On September 13, 1977, a notice concerning public hearings to be held in Los Angeles, Calif., and Miami Springs, Fla., on September 26 and 29, 1977, respectively, was published in the FEDERAL REGISTER to further allow interested persons an opportunity to participate in this rulemaking proceeding. This document announces another informal public hearing to be held in College Park, Md., to give interested persons a further opportunity to participate in this rulemaking proceeding through the submission of written comments with an opportunity for oral presentation.

DATE: The hearing will be held on Tuesday, October 18, 1977, at College Park, Md., between the hours of 10 a.m. and 4 p.m.

ADDRESS: The informal public hearing will be held at the Terrapin Room, Quality Inn Motel, 7200 Baltimore Avenue, College Park, Md. 20740, telephone number (301-864-5820).

FOR FURTHER INFORMATION CONTACT:

Dale F. Schwindaman, Senior Staff Veterinarian, Animal Care Staff, Veterinary Services, Animal and Plant Health Inspection Service, U.S. Department of Agriculture, Room 703, Federal Building, 6505 Belcrest Road, Hyattsville, Md. 20782, telephone number 301-436-8271.

SUPPLEMENTARY INFORMATION: The allegation has been made that the marine mammal hearings to be held in

Los Angeles, Calif., and Miami Springs, Fla., by the Department will allow for presentations by the regulated industry, but will not allow for presentations of opposing views by other interested parties based in and around the Washington, D.C., area. In order to provide for such public participation, an informal public hearing is scheduled to be held in the Washington, D.C., area so that interested parties in such area may present their views concerning the proposed regulations and standards covering marine mammals.

A Veterinary Services representative will serve as chairman at the informal public hearing. The procedure to be followed will be informal and without a structured agenda. Individual presentations will not be scheduled in advance. A written copy of a speaker's comments must be given to the chairman prior to the speaker's oral presentation, but is not required to be read into the record. Individuals making presentations may verbally summarize or emphasize certain points of their written comments. Opportunity will be provided for the chairman or other persons at the hearing to ask questions relating to each presentation made. The time for oral presentations and questions may be limited at the discretion of the chairman in order to give all persons at the hearing an opportunity to be heard. Transcripts of the oral hearing will be made, and copies of the transcripts and any written comments submitted at the hearing, will be made a part of the record in this rulemaking proceeding and will be available for public inspection together with all other comments received in this proceeding in accordance with the notice dated August 19, 1977.

Done at Washington, D.C. this 28th day of September 1977.

NOTE.—The Animal and Plant Health Inspection Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821 and OMB Circular A-107.

NORVAN L. MEYER,
Acting Deputy Administrator,
Veterinary Services.

[3410-34]

[9 CFR Part 114]

VIRUSES, SERUMS, TOXINS, AND ANALOGOUS PRODUCTS

Miscellaneous Amendments; Proposed Rulemaking

AGENCY: Animal and Plant Health Inspection Service (APHIS).

ACTION: Proposed rule.

SUMMARY: This proposed amendment clarifies and simplifies the requirements for extending the expiration date for a biological product. A "U.S. Standard of Potency" for each fraction of a product is presently required before an extension of expiration date is granted, although the meaning of that term is unclear. The present regulations also require that the extended expiration date must be computed from the harvest date. This proposed amendment would delete the necessity of establishing a "U.S. Standard of Potency", would provide for different potency evaluation tests, and would delete the "from harvest" requirement.

DATES: Comments must be received on or before October 31, 1977.

ADDRESS: Interested persons are invited to submit written data, views, or arguments regarding the proposed regulations to: Deputy Administrator, Veterinary Services, Animal and Plant Health Inspection Service, U.S. Department of Agriculture, Room 828-A, Federal Building, Hyattsville, Md. 20782.

FOR FURTHER INFORMATION CONTACT:

Dr. R. J. Price, 301-436-8245.

SUPPLEMENTARY INFORMATION: The present regulations prescribe conditions for permitting an extension of dating for a biological product. One of the conditions is that "U.S. Standard of Potency" be available for all fractions of the product (see § 114.14(a) of the regulations), and another condition is that the new date be determined "from harvest" (see § 114.14(b) of the regulations).

"U.S. Standard of Potency" is an undefined and unclear term. Some potency tests are part of the Standard Requirements. Others are written into the filed Outline of Production and are accepted by Veterinary Services. Misunderstandings as to meaning of the term "U.S. Standard of Potency" have resulted. This proposed amendment of the regulations removes the necessity of having a "U.S. Standard of Potency" for all fractions of a product before an extension of expiration date may be granted for such product, and requires instead, that in order to be granted such extension, a product must be evaluated for potency by tests approved by the Deputy Administrator which are filed in an Outline of Production for such product.

The harvest date is used as the point in time from which expiration dates are computed for certain biological products. As a result, the harvest date was made the point in time from which an extension would be granted for all biological products. Adjustments have been made

in this proposed amendment to provide for changes in manufacturing practices relating to products which do not have their expiration date determined from the date of harvest.

This proposed amendment would delete the "U.S. Standards of Potency" requirement, would provide for different potency evaluation tests, and would delete the "from harvest" requirement.

In § 114.14, paragraphs (a)(1) and (b)(1) would be revised to read as follows:

§ 114.14 Extension of the expiration date for a serial or sub-serial.

(a)

(1) If all fractions of the product are not evaluated for potency by tests designated in the filed Outline of Production for such product in accordance with § 113.4(b) of this subchapter; or

(b)

(1) The new expiration date shall not exceed 6 months beyond the maximum time permitted in the filed Outline of Production; and

All written submissions made pursuant to this notice will be made available for public inspection at the address listed in this document during regular hours of business (8 a.m. to 4:30 p.m., Monday to Friday, except holidays) in a manner convenient to the public business (7 CFR 12.7(b)).

Done at Washington, D.C., this 28th day of September 1977.

NOTE.—The Animal and Plant Health Inspection Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821 and OMB Circular A-107.

NORVAN L. MEYER,
Acting Deputy Administrator,
Veterinary Services.

FEDERAL RESERVE SYSTEM

[12 CFR Part 226]

[6210-01]

[Reg. Z; Docket Nos. R-0087, R-0093]

PART 226—TRUTH IN LENDING

Proposed Amendment to Regulation Z Concerning Descriptive Billing Requirements

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Proposed rule.

SUMMARY: This proposed rule would amend the provision of Regulation Z that now requires that the date that a cash advance check transaction takes place be disclosed on the creditor's descriptive periodic billing statement. In lieu of disclosing the transaction date, the proposal would permit creditors to disclose the date of debiting (the date on which a creditor honors a cash advance check) provided that the creditor treat any subsequent related inquiry from a

PROPOSED RULES

customer as a billing error and an erroneous billing under the Fair Credit Billing Act. The purpose of the proposed rule is to facilitate compliance by certain creditors who have experienced operational difficulties in capturing transaction dates. Creditors with the capability of disclosing transaction dates would be permitted to do so.

DATE: Comments must be received on or before November 1, 1977.

ADDRESS: Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551. All materials submitted should include the docket numbers R-0087, R-0093.

FOR FURTHER INFORMATION CONTACT:

Glenn E. Loney, Attorney, Fair Credit Practices Section, Division of Consumer Affairs, Board of Governors of the Federal Reserve System, Washington, D.C. 20551 (202-452-2412).

SUPPLEMENTARY INFORMATION: The Board of Governors of the Federal Reserve System is publishing for comment a proposed amendment to Regulation Z designed to facilitate compliance with the disclosure requirements relating to cash advance check transactions that are descriptively billed on periodic billing statements. The proposed amendment is in response to serious operational difficulties experienced by a number of creditors in capturing transaction dates on such checks. The regulation currently requires that transaction dates be disclosed in all cases. The proposed amendment would permit debiting dates to be disclosed in substitution for transaction dates provided that the creditor treats any subsequent customer inquiries seeking clarification of cash advance check transactions as billing errors and erroneous billings under the regulation. This would mean that no finance charge on such transactions would be allowed to accrue during the time that the creditor took to provide the customer with documentary or other evidence supporting the transactions. The current requirements were to become fully effective on October 28, 1977. In light of the creditor compliance problems with these requirements, the Board on August 31, 1977, suspended this effective date with regard to cash advance transactions until March 28, 1978.

The Board believes that the substitution of the date of debiting may be permitted without harm to the consumer's understanding of transaction activity in his or her open end credit account. Cash advance transactions appear to be relatively infrequent as compared with purchase transactions in such accounts. Moreover, cash advance transactions appear to be substantially larger in amount. Evidence submitted in support of these assumptions indicated that one bank's open end credit plan averaged six cash advance transactions per account during 1976 and that the average amount was \$176. Comparable figures on purchase transactions under the same plan

were 24 transactions per account during the year for an average amount of \$29. This evidence suggests that consumers may have less difficulty in recalling cash advance transactions in light of their relative infrequency and high dollar amounts.

The Board is interested in having the views of interested persons on whether these assumptions on dollar volume and frequency are typical of other open end credit plans. It is also interested in receiving relevant cost data on supplying transaction dates and debiting dates.

Pursuant to the authority granted in 15 U.S.C. 1604 (1970), the Board proposes to amend paragraph 226.7(k)(3) (ii) of Regulation Z, 12 CFR Part 226 as follows:

§ 226.7 Open end credit accounts—specific disclosures.

(k)

(3)

(ii) A description of the transaction, which characterizes it as a cash advance, loan, overdraft loan, or other designation as appropriate, and which includes the amount of the transaction and the date of the transaction or the date which appears on the document or instrument evidencing the transaction (if the customer signed the document or instrument), or the date of debiting the amount to the account, provided that if only the debiting date is disclosed and the customer submits a proper written notification of a billing error related to the transaction, the creditor shall treat such inquiry as a billing error under §§ 226.2(j) and 226.14, and as an erroneous billing under § 226.14(b), and shall supply documentary evidence of the transaction whether or not the customer requests it, within the time period allowed under § 226.14 for resolution of a billing error without charge to the customer. If the date of debiting is disclosed, it must be reasonably identified as such on the periodic statement.

To aid in the consideration of this proposal by the Board, interested persons are invited to submit relevant data, views, comments, or arguments. All such material should be submitted in writing to the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, to be received not later than November 1, 1977. All material submitted should include the docket numbers R-0087, R-0093. Such information will be made available for inspection and copying upon request, except as provided in § 261.6(a) of the Board's Rules Regarding Availability of Information (12 CFR 261.6(a)).

This notice is published pursuant to § 553(b) of Title 5 United States Code

*In cases in which an amount is debited to a customer's open end credit account under an overdraft checking plan, the date of debiting the open end credit account shall be considered the date of the transaction for purposes of this paragraph.

and § 262.2(a) of the Rules of Procedure of the Board of Governors of the Federal Reserve System (12 CFR 262.2(a)).

By order of the Board of Governors, September 28, 1977.

THEODORE E. ALLISON,
Secretary of the Board.

[FR Doc. 77-29214 Filed 10-3-77; 8:45 am]

[6355-01]

CONSUMER PRODUCT SAFETY COMMISSION

[16 CFR Parts 1304, 1305]

RESPIRABLE FREE-FORM ASBESTOS

Proposal To Ban Certain Patching Compounds and Artificial Embroidering Materials (Embers and Ash); Extension of Time

AGENCY: Consumer Product Safety Commission.

ACTION: Extension of time.

SUMMARY: This notice extends from September 27, 1977, to November 28, 1977, the period in which the Commission must either publish in the FEDERAL REGISTER a consumer product safety rule to declare that two consumer products containing respirable free-form asbestos are banned hazardous products under section 9 of the CPSA (15 U.S.C. 2058), or withdraw the rule proposed on July 29, 1977.

FOR FURTHER INFORMATION CONTACT:

John Liskey, Consumer Product Safety Commission, Washington, D.C. 20207 (301-492-6557).

SUPPLEMENTARY INFORMATION: On July 29, 1977, the Commission published in the FEDERAL REGISTER (42 FR 38783) a proposal to ban consumer patching compounds and artificial embroidering materials (embers and ash) containing respirable free-form asbestos. Based on information discussed in the proposal, the Commission stated its preliminary determination that inhalation of asbestos fibers released during the use of these products, present an unreasonable risk of injury to the public of certain types of cancer, including lung cancer and mesothelioma. The Commission also preliminarily determined that no feasible standard under the CPSA could adequately protect the public from the unreasonable risk of injury associated with these products.

The FEDERAL REGISTER notice of July 29, 1977, invited interested persons to submit written comments on the proposal by August 29, 1977. In addition, the notice invited interested persons to make oral presentations of data, views, or arguments on the proposal at a public meeting on August 15, 1977. During the August 15 meeting, the Commission solicited other written comments on the oral presentations.

To date, the Commission has received approximately 25 written comments concerning the proposed ban; several of

these were received by the staff after the closing date for comments, August 29, 1977. Many of the comments and oral presentations concern complex, technical issues that must be reviewed by the Commission staff prior to evaluation by the Commission. Since the comment period expired recently, the Commission staff will require additional time to analyze these comments and brief the Commission.

Accordingly, pursuant to section 9(a) (1) of the CPSA, the period of time in which the Commission must either publish a consumer product safety rule declaring that consumer patching compounds and artificial embroidering materials containing respirable free-form asbestos are banned hazardous products, or withdraw the rule proposed on July 29, 1977, is extended to November 28, 1977. This period may be further extended for good cause by notice published in the FEDERAL REGISTER.

Dated: September 28, 1977.

RICHARD E. RAPPS,
Secretary, Consumer Product
Safety Commission.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Food and Drug Administration

[21 CFR Part 133]

[Docket No. 77P-0070]

PASTEURIZED PROCESS CHEESE AND CHEESE PRODUCTS

Proposed Revision of Definitions and Standards of Identity

AGENCY: Food and Drug Administration.

ACTION: Proposed rule.

SUMMARY: This proposal would revise the definitions and standards of identity for pasteurized process cheese and other pasteurized process cheese products. It is based on petitions for establishing such standards which have been received from the industry as well as on recommended international standards. The proposed rule would make a wider variety of high quality, lower fat products available.

DATE: Comments by January 3, 1978. Proposed compliance for products initially introduced into interstate commerce: July 1, 1979.

ADDRESS: Written comments to the Hearing Clerk (HFC-20), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, Md. 20857.

FOR FURTHER INFORMATION CONTACT:

Eugene T. McGarrahan, Bureau of Foods (HFF-415), Food and Drug Administration, Department of Health, Education, and Welfare, 200 C St. SW., Washington, D.C. 20204 (202-245-1155).

SUPPLEMENTARY INFORMATION: The Commissioner of Food and Drugs, on his own initiative and in consideration of two separate petitions and the Codex Alimentarius Recommended International Standards (A-8 (a), (b), and (c) for process cheese and cheese products), proposes to revise the standards of identity for pasteurized process cheese and other pasteurized process cheese products.

PETITIONS FOR PROMULGATION OF STANDARD OF IDENTITY

A petition was filed by Borden, Inc., 50 West Broad St., P.O. Box 2478, Columbus, Ohio 43216, proposing that a standard of identity be established for a pasteurized process cheese product that contains less fat than is currently provided for in the standards of identity for pasteurized process cheese, pasteurized process cheese food, and pasteurized process cheese spread (21 CFR 133.169, 133.173, and 133.179, respectively), and is prepared from skim milk cheese for manufacturing (21 CFR 133.685) as a mandatory cheese ingredient with or without other optional cheese varieties.

A notice was published in the FEDERAL REGISTER of October 22, 1971 (36 FR 20451), granting a marketing permit to Borden, Inc., for limited interstate marketing tests of a pasteurized process cheese product that deviated from the identity standards prescribed in §§ 133.169 and 133.173, in that it contained skim milk cheese for manufacturing and American type cheeses as the cheese ingredient, enzyme-modified cheese, and less fat (8.0 percent fat). A notice extending this permit to July 13, 1973 was published in the FEDERAL REGISTER of September 30, 1972 (37 FR 20582).

Based on the technological and marketing information obtained during the permit period, Borden has set forth the following grounds in support of the proposal to establish a standard of identity for a pasteurized process cheese product:

(1) One of the most prevalent nutritional problems in the United States is excessive calorie intake. Expanding the availability of a wide assortment of calorie-reduced foods is in the best interest of consumers since this will better enable them to plan a reduction in their total intake of calories.

(2) There is a great interest on the part of consumers in modified food products having reduced fat and/or calorie content.

(3) It is technically and economically feasible to make a pasteurized process cheese product that is substantially lower in fat and calories than presently available in standardized process cheese, process cheese food, and process cheese spread.

(4) Market testing has shown that a substantial number of consumers will purchase and repurchase a pasteurized process cheese product with a lower fat content than presently available.

(5) The pasteurized process cheese product described in item (3) has a flavor, taste, and texture that is highly

acceptable to a substantial number of consumers, as indicated by actual consumer testing.

(6) Market testing in diverse areas has established that the acceptance of a pasteurized process cheese product is not limited geographically.

(7) Over 14 months of experience distributing this pasteurized process cheese product has shown that it can be distributed in the same manner as regular pasteurized process cheese and has a comparable shelf life.

A petition similar to that filed by Borden, Inc., was filed by Kraft Foods Division, Division of Kraftco Corp., 500 Peshigo Court, Chicago, Ill. 60690. The Kraft petition proposed the promulgation of a standard of identity for a pasteurized process cheese product and proposed the amendment of the standards of identity for pasteurized process cheese, cheese food, and cheese spread, as well as the related standards in 21 CFR 133.170, 133.171, 133.174, 133.176, and 133.180. To facilitate these amendments, proposals were also made to amend the standard of identity for skim milk cheese for manufacturing.

Copies of the Borden and Kraft petitions are on file at the Hearing Clerk's office, Food and Drug Administration.

CODEx ALIMENTARIUS RECOMMENDED INTERNATIONAL STANDARDS

The Joint Food and Agriculture Organization/World Health Organization (FAO/WHO) Committee of Government Experts on the Code of Principles Concerning Milk and Milk Products, an auxiliary body of the Codex Alimentarius Commission, has submitted to the United States for consideration of acceptance recommended international standards for process cheese, process cheese and spreadable process cheese and process cheese preparations, process cheese food, and process cheese spread.

The United States, as a member nation of the Food and Agriculture Organization of the United Nations and the World Health Organization, is obliged to consider all recommended international standards. The rules of procedure of the Codex Alimentarius Commission state that a standard may be accepted by a participating country in one of three ways: (1) Full acceptance, (2) target acceptance, or (3) acceptance with specified deviations. A participating country that concludes that it cannot accept the standard in full is requested to indicate the ways in which its requirements differ from the recommended international standard. Member nations of FAO/WHO Commission are requested to notify the Technical Secretary, Committee on the Code of Principles Concerning Milk and Milk Products, Animal Production and Health Division, FAO, Rome, Italy, of their decision. Should a sufficient number of governments accept these standards, the Secretariat of the Committee will notify the Codex Alimentarius Commission and request the publication of these standards by the Codex Alimentarius Commission as

worldwide standards in light of the acceptances received.

COMMISSIONER'S PROPOSED COURSES OF ACTION

Based on the extensive revisions contemplated in the proposals submitted by the two petitioners, as well as the treaty obligation of the United States to consider the recommended Codex Alimentarius standards for process cheese products in accordance with 21 CFR 130.6, the Commissioner concludes that it would be appropriate to make a combined proposal concerning the standards of identity for these products. He is also of the opinion that the establishment of a fourth category of pasteurized process cheese items is not in the best interest of consumers because there is already considerable confusion about the differences between the present three standards for pasteurized process cheese, cheese food, and cheese spread.

Therefore, the Commissioner proposes to establish only two categories: pasteurized process cheese and pasteurized process cheese product. The proposed pasteurized process cheese product standard will be broad in scope and will not limit fat content. Both the proposed pasteurized process cheese product standard and proposed pasteurized process cheese standard will require label declaration of the percent milkfat. This is necessary because of the variations of fat content of such foods. For example, the fat content of the solids of such foods made from a single variety of cheese may vary from as low as 43 percent for Swiss cheese to as high as approximately 50 percent for cheddar cheese. The resulting pasteurized process cheese would be labeled as containing 24 and 30 percent fat, respectively. With all of the potential variations of fat content for such foods, the Commissioner believes it is necessary to provide the consumer with this label information.

The reason for label declaration of the percent fat in the proposed pasteurized process cheese product standard is that the fat may range from a theoretical zero percent to 23 percent, or even higher, depending on the fat content of the cheese used to make up the 51 percent cheese requirement of pasteurized process cheese product. Label declaration of fat content for both pasteurized process cheese and pasteurized process cheese products will also aid consumers in differentiating between the two standards.

Furthermore, the label declaration of percent fat will automatically require that the foods be nutritionally labeled. Since there are many types of ingredients that the processors of pasteurized process cheese and pasteurized process cheese product may use in manufacturing these foods, the ingredients are considered to be optional and therefore are required to be declared in the ingredient statement in accordance with 21 CFR Part 101.

The Commissioner's proposed revision of the existing standard for pasteurized process cheese in 21 CFR 133.169:

(1) Requires label declaration of fat content.

(2) Adopts the use of class designation for safe and suitable optional ingredients and requires that all such ingredients be declared on the label by their common or usual name in accordance with 21 CFR Part 101 labeling requirements.

(3) Provides for the use of Monterey cheese as one of the varieties of cheese approved for use under the term "American cheese" since this cheese was developed in the United States and is similar to the other cheeses now used for "Pasteurized Process American Cheese".

(4) Provides for the use of semisoft part-skim cheese.

(5) Provides for the use of safe and suitable enzymes for the development of flavor and body in ground or shredded cheese used as the cheese ingredient in pasteurized process cheese.

(6) Provides for the use of butterfat as well as milkfat for the purpose of standardizing the fat content of the pasteurized process cheese.

(7) Provides, within the framework of the standard, for the addition of fruits, vegetables, and meats, etc., previously provided for in 21 CFR 133.170 and 133.171, thus permitting these sections to be revoked.

(8) Provides for the optional use of the word "pasteurized" in the name of the food.

The Commissioner's proposed standard for pasteurized process cheese product:

(1) Sets no limitation on the fat content or the moisture content. However, the proposed standard requires that the fat content shall be declared on the label and the product must contain at least 51 percent by weight of natural cheese.

(2) Adopts the use of class designations for safe and suitable optional ingredients and requires all ingredients to be declared on the label by their common or usual name in accordance with 21 CFR Part 101 labeling requirements.

(3) Provides for the use of all natural cheese varieties as part of the cheese ingredient.

(4) Provides for the use of safe and suitable enzymes for the development of flavor and body in ground or shredded cheese used as the cheese ingredient in pasteurized process cheese product.

(5) Provides for the use of butterfat as well as milkfat for the purpose of standardizing the fat content of the product.

(6) Provides, within the framework of the standard, for the addition of fruits, vegetables, and meats, etc., previously provided for in 21 CFR 133.174 and 133.180, thus permitting these sections to be revoked.

(7) Provides for the optional use of the words "pasteurized process" in the name of the food.

STANDARD OF IDENTITY VERSUS COMMON OR USUAL NAME

The Commissioner considered establishing a common or usual name for pasteurized process cheese and/or pasteurized process cheese product as an alter-

native to the proposed standards of identity. A common or usual name is a name that accurately identifies or describes the basic nature of a food or its characterizing ingredients (21 CFR 102.5). The basic difference between a common or usual name regulation and a standard of identity is that the latter generally prescribes with greater detail and particularity the ingredients to be used, often including the amounts of ingredients permitted in the food and specifying the manufacturing process to be used. A standard of identity thus ensures the quality and identity of the food by controlling its composition. A common or usual name, however, permits the use of a wide variety of ingredients and requires label declaration of the amount of the most valuable ingredients as well as the presence of all other ingredients in the ingredient statement so that consumers can determine the quality and identity of the food.

The proposed standards of identity for pasteurized process cheese and cheese product set minimum compositional requirements for these foods. The Commissioner is of the opinion that these compositional requirements are necessary to assure the uniformity and quality of these foods. In addition, the public has come to associate certain minimum levels of valuable ingredients with the names of the existing standards of identity for pasteurized process cheese, cheese food, and cheese spread. All three of these standards mandate a high cheese content and permit only dairy ingredients as nutritive ingredients in the food. Although consumers may not have understood the distinctions between these different foods, they have come to associate the various pasteurized process cheese type products as being characterized by a high cheese level and the use of only dairy ingredients. The two proposed standards replace the existing standards for pasteurized process cheese, cheese food, and cheese spread, and they mandate the same cheese and dairy content characteristics. The Commissioner concludes that it is appropriate to establish requirements for such characteristics by means of a standard of identity.

The Commissioner considered a requirement that would allow any use of cheese or dairy ingredients, subject to a requirement of percentage declaration, but concluded that it would not be sufficient to meet the consumer expectations for this type of food and it could be potentially confusing to consumers since the name would have to include the percentage of cheese and dairy products as well as fat. Accordingly, the Commissioner concludes that standards of identity for pasteurized process cheese and pasteurized process cheese products will promote honesty and fair dealing in the interest of consumers.

DIFFERENCES BETWEEN CODEX STANDARD AND FDA PROPOSED STANDARDS OF IDENTITY

The primary differences between the Codex Recommended General Standard for Process(ed) Cheese (A-8(a)) and the

proposed revision of the FDA standard of identity for pasteurized process cheese are as follows:

1. The Codex standard does not include a maximum phenol equivalent value to be used as an indicator of effective pasteurization.
2. The Codex standard does not provide for the use of enzyme-modified cheese.
3. Specific optional ingredients and limits of use vary; several are permitted for use by the Codex standard but are

prohibited by the proposed revised standard, and vice versa.

4. The proposed revision requires label declaration of all ingredients, including color. However, some dissimilarities as to the manner of declaring those ingredients do exist.

To assist interested persons in making a detailed comparison of the Codex standard and the Commissioner's proposal, the Codex standard A-8(a) is provided below in its entirety.

STANDARD NO. A-8(A) (1970)

RECOMMENDED GENERAL STANDARD FOR PROCESS(ED) CHEESE¹ OR PROCESS(ED)¹ CHEESE "Fromage — fondu"¹ ou "Fromage fondu —"¹

1. Definition.

1.1 Process(ed) — Cheese or — Process(ed) Cheese is made by grinding, mixing, melting and emulsifying with the aid of heat and emulsifying agents one or more varieties of cheese, with or without the addition of foodstuffs in accordance with paragraph 2.

1.2 "Sugars" means any carbohydrate sweetening matter.

2. Optional ingredients.

2.1 Cream, butter and butteroil may be added in quantities to ensure compliance with the minimum fat requirements.

2.2 Salt (sodium chloride).

2.3 Spices and other vegetable seasonings in sufficient quantity to characterize the product.

2.4 For the purposes of flavouring the product, foods other than sugars, properly cooked or otherwise prepared, may be added in sufficient quantity to characterize the product provided these additions, calculated on the basis of dry matter, do not exceed one sixth of the weight of the total solids of the final product.

3. Food Additives.

3.1 Necessary Food Additives.

3.1.1 Emulsifiers:

- | | |
|---|--|
| 3.1.1.1 Sodium, sodium-aluminum, potassium and calcium salts of | Maximum level
40 g/kg singly or
in combination
calculated as
anhydrous sub-
mono-, di- and
polyphosphates
not to exceed
30 g/kg. |
| 3.1.1.2 Sodium, potassium and calcium salts of citric acid. | |
| 3.1.1.3 Sodium, potassium and calcium salts of citric acid. | |
| 3.1.1.3 Citric acid and/or phosphoric acid with sodium hydrogen carbonate and/or calcium carbonate. | |

3.2 Optional Food Additives.

3.2.1 Colours:

- | | |
|-----------------------------------|-------------------------------|
| Annatto ² | Maximum level
Not limited. |
| Beta-carotene | |
| Chlorophyll | |
| Riboflavin | |
| Oleoresin of paprika ² | |
| Curcumin ² | |

3.2.2 Acidifiers:

- | | |
|-----------------|---|
| Vinegar | Maximum level
Within the limits
specified in 3.1.1. |
| Citrus acid | |
| Phosphoric acid | |
| Acetic acid | |
| di-Lactic acid | |

3.2.3 Preservatives:

- | | |
|---|---|
| 3.2.3.1: | Maximum level
2,000 mg/kg.
3,000 mg/kg.
100 mg/kg. |
| Either sorbic acid and its sodium and potassium salts, or | |
| Propionic acid and its sodium and calcium salts. | |
| 3.2.3.2 Nisin | |

3.2.4 Other Additives:

- | | |
|----------------------------------|--|
| Calcium chloride | Within the limits
specified in 3.1.1. |
| Sodium hydrogen carbonate and/or | |
| Calcium carbonate | |

4. Heat Treatment.

During their manufacture products conforming to the definition of the standard shall be heated to a temperature of 70° C for 30 seconds, or any other equivalent or greater time/temperature combination.

5. Composition and Designation.

Process(ed) cheese, the designation of which includes one or more variety names: 5.1 Shall contain only the varieties mentioned in the name, with the exception of Gruyère and Emmental which are interchangeable;

¹ Blank shall be filled in by (a) cheese variety name(s).

² Temporarily endorsed.

5.2 The fat and solid content of Process(ed) Cheese or — Process(ed) Cheese shall be:

(a) In accordance with the national legislation of the consuming country for Process(ed) Cheese or — Process(ed) Cheese, if any such legislation exists;

(b) In the absence of such national legislation the minimum fat content in the dry matter shall be not less than that prescribed in the international individual cheese standard for that variety and in the case of two or more varieties, not less than that of the arithmetical average of the fat contents in dry matter prescribed in the standards concerned. The minimum solid contents shall be as shown in the following table with the exception of Process(ed) Gruyère, Emmental or Appenzeller cheese where the solid content shall be at least 50% and in the case of Edam the solid content shall be at least 51% and that of Gouda be at least 53%.

Milkfat in dry matter (FBD) percent:	Dry matter (percent)
65	53
60	52
55	51
50	50
45	48
40	46
35	44
30	42
25	40
20	38
15	37
10	36
Less than 10	34

6. Labelling.

The following provisions in respect of the labelling of the products are subject to endorsement by the Codex Committee on Food Labelling. In addition to sections 1, 2, 4 and 6 of the General Standard for the Labelling of Prepackaged Foods (Ref. No. CAC/RS 1-1969), the following specific provisions apply:

6.1 The Name of the Food.

6.1.1 The name of a product made from a single variety and designated by a variety name shall be "Process(ed) Cheese or — Process(ed) Cheese", the blank being filled with the name of the variety of cheese used.

6.1.2 The name of a product made from two or more varieties of cheese shall be "Process(ed) and Cheese or — and Process(ed) Cheese" in descending order of proportion.

6.1.3 In case the process(ed) cheese above includes spices used in accordance with paragraph 2.3 or natural foodstuffs in accordance with paragraph 2.4, the name of the product shall be the one applicable above followed by the term "with _____", the blank being filled with the common or usual name or names of the spices or natural foodstuffs used, in order of predominance by weight.

6.1.4 The milkfat content shall be declared on the label in multiples of 5% (the figure used to be that of the 5% multiple below the actual composition), ex-

cept in those cases where process(ed) cheese or — process(ed) cheese carries the name of a single variety of cheese covered by an international individual cheese standard.

6.2 List of Ingredients.³ The presence of optional food additives used in accordance with paragraph 3.2 shall be declared on the label. Class titles listed in paragraph 3.2(c) (ii) of the General Standard for the Labelling of Prepackaged Foods may be used, as appropriate.

6.3 Net Contents. The net contents, except on individual portions not intended for separate sale, shall be declared by weight in either the metric ("Système International" units) or avoirdupois or both systems of measurement as required by the country in which the food is sold.

6.4 Name and Address. The name and address of the manufacturer, packer, distributor, importer, exporter or vendor of the product shall be declared, except on individual portions not intended for separate sale, in which case the declaration may be replaced by a trademark or other indication of the manufacturer, or importer, or seller.

6.5 Country of Origin (Manufacture). The name of the producing country shall be declared (for export only).

7. Methods of sampling and analysis.

7.1 Sampling: according to FAO/WHO Standard B-1 "Sampling Methods for Milk and Milk Products", paragraphs 2 and 7.

7.2 Fat Content: according to FAO/WHO Standard B-3 "Determination of the Fat Content of Cheese and Processed Cheese Products".

7.3 Phosphorus Content: according to FAO/WHO Standard B-12 "Determination of the Phosphorus Content of Cheese and Processed Cheese Products".

7.4 Citric Acid Content: according to FAO/WHO Standard B-13 "Determination of the Citric Acid Content of Cheese and Processed Cheese Products".

The primary differences between the Codex recommended General Standard for Process(ed) Cheese Preparations (A-8(c)) and the proposed FDA standard of

³ Subject to endorsement.

The original text of paragraph 6.2 (see Report of the 13th Session, Appendix IV-A) foresaw the mandatory labelling solely of the presence of preservatives according to paragraph 3.2.3, allowing the use of the class title "Preservatives(s)".

The present text of paragraph 6.2 is the result of a proposal agreed to by the Committee at its 15th Session, requiring the mandatory declaration of the optional food additives. This proposal was the result of a compromise between suggestions for the mandatory labelling of a complete and a selective list of ingredients. The compromise proposal which was supported by 14 countries and objected to by 6 countries was rejected by the Codex Committee on Food Labelling. A decision on the matter will be taken by the Codex Alimentarius Commission (see Report of the 14th Session of the Committee, paragraphs 53 to 57 and the Report of the 15th Session of the Committee, paragraphs 57 to 61).

identity for pasteurized process cheese product are the same four points enumerated in the above comparison of the recommended Codex standard A-8(a) and the proposed revision of the FDA standard for pasteurized process cheese. An additional difference is that the Codex standard A-8(c) defines two distinct foods within the one standard. The Codex standard provides for either specific labeling (Process(ed) Cheese Food or Process(ed) Cheese Spread, depending on the ingredients used) or general labeling (Process(ed) Cheese Preparations) of the food.

To assist interested persons in making a detailed comparison of the Codex standard and the Commissioner's proposal, the Codex standard A-8(c) is provided below in its entirety.

STANDARD NO. A-8(C) (1970)

RECOMMENDED GENERAL STANDARD FOR PROCESS(ED) CHEESE PREPARATIONS

PREPARATIONS A BASE DE FROMAGE FONDU (PROCESS(ED) CHEESE FOOD AND PROCESS(ED) CHEESE SPREAD

(PROCESS(ED) CHEESE FOOD ET PROCESS(ED) CHEESE SPREAD)

1. Definition.

1.1 Process(ed) cheese preparations are made by grinding, mixing, melting and emulsifying with the aid of heat and emulsifying agents one or more varieties of cheese, which contain, moreover in any case, the products mentioned in paragraph 2.4 and/or those mentioned in paragraphs 2.6 and 3.2.4.2. Process(ed) cheese preparations designated as Process(ed) Cheese Food shall contain milk components to an amount of at least 5% expressed as lactose and may contain any of the ingredients in accordance with paragraph 2 except sugars, and food additives in accordance with paragraph 3 except vegetable gums. Process(ed) cheese preparations designated as Process(ed) Cheese Spreads may contain any or all of the ingredients in accordance with paragraph 2 and food additives in accordance with paragraph 3.

1.2 "Sugars" means any carbohydrate sweetening matter.

2. Ingredients.

2.1 Cream, butter and butteroil may be added.

2.2 Salt (sodium chloride).

2.3 Spices and other vegetable seasonings in sufficient quantity to characterize the product.

2.4 Milk components.

2.5 For the purposes of flavoring the product foods properly cooked or otherwise prepared, may be added in sufficient quantity to characterize the product provided these additions, calculated on the basis of dry matter, do not exceed one sixth of the weight of the total solids of the final product.

2.6 Sugars.

3. Food Additives.

3.1 Necessary Food Additives.

3.1.1 Emulsifiers:

- 3.1.1.1 Sodium, sodium-aluminum, potassium and calcium salts of the mono-, di- and polyphosphoric acids.
 3.1.1.2 Sodium, potassium and calcium salts of citric acid.
 3.1.1.3 Citric acid and/or phosphoric acid with sodium hydrogen carbonate and/or calcium carbonate.

Maximum level

40 g/kg, singly or in combination as anhydrous substances, but mono-, di- and polyphosphates not to exceed 30 g/kg.

3.2 Optional Food Additives.

3.2.1 Colours:

- Annatto¹
 Beta-carotene
 Chlorophyll
 Riboflavin
 Oleoresin of paprika¹
 Curcumin¹

Maximum level

Not limited.

3.2.2 Acidifiers:

- Vinegar
 Citric acid
 Phosphoric acid
 Acetic acid
 di-Lactic acid

Maximum level

specified in 3.1.1. Within the limits

3.2.3 Preservatives:

- 3.2.3.1 Either sorbic acid and its sodium and potassium salts, or Propionic acid and its sodium and calcium salts.
 3.2.3.2 Nisin

Maximum level

2,000 mg/kg.
 3,000 mg/kg.
 100 mg/kg.

3.2.4 Other Additives:

- 3.2.4.1: Calcium chloride
 Sodium hydrogen carbonate and/or calcium carbonate
 3.2.4.2: Arabic gum
 Locust (carob) bean gum¹
 Karaya gum¹
 Guar gum¹
 Oat gum¹
 Tragacanth gum¹
 Agar-agar
 Carrageenan
 Sodium carboxymethylcellulose (cellulose gum)
 Sodium, potassium, calcium and ammonium salts of alginate acid
 Propylene glycol ester of alginate acid¹
 Pectin
 Gelatine

Maximum level

Within the limits specified in 3.1.1.

8,000 mg, kg, singly or in combination.

4. Heat Treatment.

During their manufacture products conforming to the definition of the standard shall be heated to a temperature of 70° C for 30 seconds, or any other equivalent or greater time/temperature combination.

5. Composition and Designation.

5.1 Products conforming to this standard may not be designated by a cheese variety name in connection with the name "Process(ed) Cheese Preparations" (Process(ed) Cheese Food and Process(ed) Cheese Spread) but mention may be made of the name of a cheese variety on the label in close proximity to the label declarations required under paragraph 6.2.

5.2 Process(ed) Cheese Preparations (Process(ed) Cheese Food and Process(ed) Cheese Spread) shall have a minimum dry matter content related to the declared minimum milkfat in dry matter, as follows:

¹Temporarily endorsed.

²Pending endorsement by the Codex Committee on Food Additives.

Milkfat in dry matter (FDP) percent:	Dry matter
65	45
60	44
55	44
50	43
45	41
40	39
35	36
30	33
25	31
20	29
15	29
10	29
less than 10	29

At least 51% of the dry matter of the finished product shall be derived from cheese.

6. Labelling.

The following provisions in respect of the labelling of the products are subject to endorsement by the Codex Committee on Food Labelling. In addition to sections 1, 2, 4 and 6 of the General Standard for the Labelling of Prepackaged Foods (Ref.

No. CAC/RS 1-1969), the following specific provisions apply:

6.1 The Name of the Food.

6.1.1 Process(ed) cheese preparation or where national legislation distinguished between "process(ed) cheese food" and "process(ed) cheese spread" these names shall be used.

6.1.2 In case the products include spices used in accordance with paragraph 2.3 or natural foodstuffs used in accordance with paragraph 2.5 the name of the product shall be the one applicable above followed by the term "with _____", the blank being filled in with the common or usual name or names of the spices or foodstuffs used, in order of predominance by weight.

6.1.3 The minimum milkfat content shall be declared on the label in multiples of 5%, the figure used to be that of the 5% multiple below the actual composition.

6.2 List of Ingredients.² The presence of ingredients used in accordance with paragraph 2 and optional food additives used in accordance with paragraph 3.2 shall be declared on the label, in order of predominance by weight. Class titles listed in paragraph 3.2(c) (i) and (ii) of the General Standard for the Labelling of Prepackaged Foods may be used, as appropriate.

6.3 Net Contents. The net contents, except on individual portions not intended for separate sale, shall be declared by weight in either the metric ("Système International" units) or avoirdupois or both systems of measurement as required by the country in which the food is sold.

6.4 Name and Address. The name and address of the manufacturer, packer, distributor, importer, exporter or vendor of the product shall be declared, except on individual portions not intended for separate sale, in which case the declaration may be replaced by a trademark or other indication of the manufacturer, or importer, or seller.

6.5 Country of Origin (Manufacture). The name of the producing country shall be declared (for export only).

7. Methods of Sampling and Analysis.
 7.1 Sampling: according to FAO/WHO Standard B-1 "Sampling Methods for Milk and Milk Products", paragraphs 2 and 7.

7.2 Fat Content: according to FAO/WHO Standard B-3 "Determination of the Fat Content of Cheese and Processed Cheese Products".

²Subject to endorsement.

The original text of paragraph 6.2 (see Report of the 13th Session, Appendix IV-C) foresaw the mandatory labelling of all ingredients with the exception of the necessary food additives, the colours, acidifiers and "other additives", according to 3.1, 3.2.1, 3.2.2 and 3.2.4.1—i.e. out of the food additives listed solely the preservatives (3.2.3) and the gums, etc (3.2.4.2) had to be declared.

The present text is the result of a proposal agreed to by the Committee at its 14th Session (see also footnote on page 43).

7.3 Phosphorus Content: according to FAO/WHO Standard B-12 "Determination of the Phosphorus Content of Cheese and Processed Cheese Products".

7.4 Citric Acid Content: according to FAO/WHO Standard B-13 "Determination of the Citric Acid Content of Cheese and Processed Cheese Products".

The recommended Codex standard (A-8(b)) for Process(ed) Cheese and Spreadable Process(ed) Cheese bears such close resemblance to the Codex standard A-8(c) and to the existing FDA

standards of identity for pasteurized process cheese food and cheese spread that it is apparent that foods which fall under A-8(b) would correspondingly fall under the applicable FDA standards of identity. Therefore, any comparison would be repetitive.

However, to assist interested persons in making a detailed comparison of this Codex standard, A-8(b), and the Commissioner's proposal for pasteurized process cheese product, the Codex standard A-8(b) is provided below in its entirety.

STANDARD No. A-8(b) (1970)

RECOMMENDED GENERAL STANDARD FOR "PROCESS (ED) CHEESE" AND "SPREADABLE PROCESS (ED) CHEESE"

"Fromage fondu" et "Fromage fondu pour tartine"

1. Definition.

1.1 "Process(ed) cheese" and "spreadable process(ed) cheese" are made by grinding, mixing, melting and emulsifying with the aid of heat and emulsifying agents one or more varieties of cheese, with or without the addition of milk components and/or other foodstuffs in accordance with paragraph 2.

1.2 "Sugars" means any carbohydrate sweetening matter.

2. Optional Ingredients.

2.1 Cream, butter and butteroil may be added.

2.2 Milk components may be added to a maximum total lactose content in the final product of 5%.

2.3 Salt (sodium chloride).

2.4 Spices and other vegetable seasonings in sufficient quantity to characterize the product.

2.5 For the purposes of flavouring the product, foods other than sugars, properly cooked or otherwise prepared, may be added in sufficient quantity to characterize the product provided these additions, calculated on the basis of dry matter, do not exceed one sixth of the weight of the total solids of the final product.

3. Food additives.

3.1 Necessary Food Additives.

3.1.1 Emulsifiers

3.1.1.1 Sodium, sodium-aluminum, potassium and calcium salts of the mono-, di- and polyphosphoric acids.

3.1.1.2 Sodium, potassium and calcium salts of citric acid.

3.1.1.3 Citric acid and/or phosphoric acid with sodium hydrogen carbonate and/or calcium carbonate.

Maximum level

40 g/kg singly or in combination calculated as anhydrous substances, but mono-, di- and polyphosphates not to exceed 30 g/kg.

3.2 Optional Food additives:

3.2.1 Colours:

- Annatto¹
 Beta-carotene
 Chlorophyll
 Riboflavin
 Oleoresin of paprika¹
 Curcumin¹

Maximum level

Not limited.

3.2.2 Acidifiers:

- Vinegar
 Citric acid
 Phosphoric acid
 Acetic acid
 di-Lactic acid

Maximum level

Within the limits specified in 3.1.1.

3.2.3 Preservatives:

- 3.2.3.1: Either sorbic acid and its sodium and potassium salts, or Propionic acid and its sodium and calcium salts.
 3.2.3.2 Nisin

Maximum level

2,000 mg/kg.
 3,000 mg/kg.

3.2.4 Other additives:

- Calcium chloride
 Sodium hydrogen carbonate and/or Calcium carbonate

Within the limits specified in 3.1.1.

¹Temporarily endorsed.

4. Heat Treatment.

During their manufacture products conforming to the definition of the standard shall be heated to a temperature of 70° C for 30 seconds, or any other equivalent or greater time/temperature combination.

5. Composition and Designation.

5.1 Products conforming to this standard may not be designated by a cheese variety name in connection with the names "Process(ed) Cheese" or "Spreadable Process(ed) Cheese" but mention may be made of the name of a cheese variety on the label in close proximity to the label declarations required under paragraph 6.2.

5.2 Process(ed) Cheese and Spreadable Process(ed) Cheese shall have a minimum dry matter content related to the declared minimum milk fat in dry matter content, as follows:

Milk fat in dry matter (FDP) percent	Dry matter percent process(ed) cheese	Dry matter percent spreadable process(ed) cheese
65	53	45
60	52	44
55	51	43
50	50	43
45	48	41
40	46	39
35	44	36
30	42	33
25	40	31
20	38	29
15	37	29
10	36	29
Less than 10	34	29

6. Labelling.

The following provisions in respect of the labelling of the products are subject to endorsement by the Codex Committee on Food Labelling. In addition to sections 1, 2, 4 and 6 of the General Standard for the Labelling of Prepackaged Foods (Ref. No. CAC/RS 1-1969), the following specific provisions apply:

6.1 The Name of the Food.

6.1.1 The name of the product shall be "Process(ed) Cheese" or "Spreadable Process(ed) Cheese" as applicable.

6.1.2 In case the "Process(ed) Cheese" or "Spreadable Process(ed) Cheese" above includes spices used in accordance with paragraph 2.4 or natural foodstuffs used in accordance with paragraph 2.5, the name of the product shall be the one applicable above followed by the term "with _____", the blank being filled with the common or usual name or names of the spices or natural foodstuffs used in order of predominance by weight.

6.1.3 The milk fat content shall be declared on the label in multiples of 5%, the figure used to be that of the 5% multiple below the actual composition.

6.2 List of Ingredients.² The presence of optional food additives used in

²Subject to endorsement.

The original text of paragraph 6.2 (see Report of the 13th Session, Appendix IV-B) foresaw the mandatory labelling solely of the presence of preservatives according to paragraph 3.2.3, allowing the use of the class title "Preservative(s)".

The present text is the result of a proposal agreed to by the Committee at its 14th Session (see also footnote on page 43).

accordance with paragraph 3.2 shall be declared on the label. Class Titles listed in paragraph 3.2(c)(1) of the General Standard for the Labeling of Prepackaged Foods may be used, as appropriate.

6.3 *Net Contents.* The net contents, except on individual portions not intended for separate sale, shall be declared by weight in either the metric ("Système International" units) or avoirdupois or both systems of measurement as required by the country in which the food is sold.

6.4 *Name and Address.* The name and address of the manufacturer, packer, distributor, importer, exporter or vendor of the product shall be declared, except on individual portions not intended for separate sale, in which case the declaration may be replaced by a trademark or other indication of the manufacturer, or importer, or seller.

6.5 *Country of Origin (Manufacture).* The name of the producing country shall be declared (for export only).

7. *Methods of Sampling and Analysis.*
7.1 Sampling: according to FAO/WHO Standard B-1 "Sampling Methods for Milk and Milk Products", paragraphs 2 and 7.

7.2 Fat Content: according to FAO/WHO Standard B-3 "Determination of the Fat Content of Cheese and Processed Cheese Products".

7.3 Phosphorus Content: according to FAO/WHO Standard B-12 "Determination of the Phosphorus Content of Cheese and Processed Cheese Products".

7.4 Citric Acid Content: according to FAO/WHO Standard B-13 "Determination of the Citric Acid Content of Cheese and Processed Cheese Products".

The Commissioner concludes that adequate consideration of the recommended Codex standards A-8 (a), (b), and (c) has been taken in preparing the proposed revised standards of identity for pasteurized process cheese and pasteurized process cheese product.

The Codex standards include certain basic labeling requirements that are not considered a part of food standards under section 401 of the Federal Food, Drug, and Cosmetic Act, which is the legal basis for promulgation of food standards. Among these labeling requirements are declaration of net quantity of contents, name of the manufacture, and country of origin. Such requirements are provided for by other sections of the act, the Fair Packaging and Labeling Act, and regulations promulgated thereunder in 21 CFR Part 101 and are applicable to all products entered into interstate commerce in the United States.

The Codex standards also reference specific methods of sampling as, for example, FAO/WHO Standard B-1 "Sampling Methods for Milk and Milk Products," paragraphs 2 and 4 (CAC/M1-1973).¹ Such sampling methods are not specifically designated in the U.S. standards of identity for milk and cream

¹ "Code of Principles Concerning Milk and Milk Products, International Standards and Standard Methods of Sampling and Analysis for Milk Products," 7th Ed.

products. However, these FAO/WHO sampling methods have been published in the "Official Methods of Analysis of the Association of Official Analytical Chemists," 12th Ed., 1975, the source of the referenced methods of analysis for milk and cream products contained in the U.S. standards of identity.

OTHER MATTERS

Both the standards for pasteurized cheese spread (§ 133.175) and pasteurized cheese spread with fruits, vegetables, or meats (§ 133.176) are cross-referenced to the standard for pasteurized process cheese spread (§ 133.179). The only difference is that §§ 133.175 and 133.176 do not provide for the use of emulsifiers in the food. Since this proposal to revise and combine the standards for pasteurized process cheese food (§ 133.173) and pasteurized process cheese spread (§ 133.179) would cause an inconsistency in §§ 133.175 and 133.176 which would require those two sections to be amended (by changing the name of the food) or possibly revoked, the Commissioner requests interested parties to comment on the need for these standards.

In a similar manner, both the standards for pasteurized blended cheese (§ 133.167) and pasteurized blended cheese with fruits, vegetables, or meats (§ 133.168) are cross-referenced to the standard for pasteurized process cheese (§ 133.169). The differences are that in §§ 133.167 and 133.168 emulsifiers are not used, and when mixtures of two or more cheeses are used in a blend, cream cheese may also be used and the word "blended" is substituted for the word "process" in the name of the food. It is possible that these two sections should be amended (by changing the name of the food) or possibly revoked. The Commissioner requests interested parties to comment on the need for these standards.

The Commissioner proposes that all products initially introduced into interstate commerce on or after July 1, 1979 shall comply with the regulation, except as to any provisions that may be stayed by the filing of proper objections.

The Commissioner has considered the environmental effects of the issuance or amendment of food standards and has concluded in 21 CFR 25.1(d)(4) that food standards are not major agency actions significantly affecting the quality of the human environment. Therefore, an environmental impact statement is not required for this amendment.

Accordingly, this document proposes to: (1) consider the need to amend or revoke §§ 133.167, 133.168, 133.175, and 133.176; (2) revoke §§ 133.170 and 133.171 and combine them into a revised § 133.169 and (3) revoke §§ 133.174, 133.179, and 133.180 and combine them into a revised § 133.173.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 401, 701 (e), 52 Stat. 1046, 70 Stat. 919 as amended (21 U.S.C. 341, 371(e))) and under authority delegated to him (21 CFR 5.1), the Commissioner proposes that Part 133 be amended as follows:

1. By revising § 133.169 to read as follows:

§ 133.169 Pasteurized process cheese.

(a)(1) Pasteurized process cheese is the food prepared by comminuting and mixing, with the aid of heat, one or more cheeses of the same or two or more varieties, except cream cheese, neufchâtel cheese, cottage cheese, lowfat cottage cheese, cottage cheese dry curd, cook cheese, hard grating cheese, part-skim spiced cheese, and skim milk cheese with an emulsifying agent prescribed by paragraph (b) of this section into a homogeneous plastic mass. One or more of the optional ingredients designated in paragraph (b)(1), (2), (3), (4), (5), (6), (7), (8), and (9) of this section may be used.

(2) During its preparation, pasteurized process cheese is heated for not less than 30 seconds at a temperature of not less than 150° F. When tested for phosphatase by the method prescribed in § 133.113(f), the phenol equivalent of 0.25 gram of pasteurized process cheese is not more than 3 micrograms.

(3)(i) The moisture content of a pasteurized process cheese made from a single variety of cheese is not more than 1 percent greater than the maximum moisture content prescribed by the definition and standard of identity, if any there be, for the variety of cheese used; but in no case is more than 43 percent, except that the moisture content of pasteurized process washed curd cheese or pasteurized process colby cheese is not more than 40 percent; the moisture content of pasteurized process swiss cheese or pasteurized process gruyere cheese is not more than 44 percent; and the moisture content of pasteurized process limburger cheese is not more than 51 percent.

(ii) The fat content of the solids of a pasteurized process cheese made from a single variety of cheese is not less than the minimum prescribed by the definition and standard of identity, if any there be, for the variety of cheese used, but in no case is less than 47 percent; except that the fat content of the solids of pasteurized process swiss cheese is not less than 43 percent, and the fat content of the solids of pasteurized process gruyere cheese is not less than 45 percent.

(4)(i) The moisture content of a pasteurized process cheese made from two or more varieties of cheese is not more than 1 percent greater than the arithmetical average of the maximum moisture contents prescribed by the definitions and standards of identity, if any there be, for the varieties of cheese used; but in no case is the moisture content more than 43 percent, except that the moisture content of a pasteurized process cheese made from two or more of the varieties cheddar cheese, washed curd cheese, colby cheese, and granular cheese is not more than 40 percent, and the moisture content of a mixture of swiss cheese and gruyere cheese is not more than 44 percent.

(ii) The fat content of the solids of a pasteurized process cheese made from two or more varieties of cheese is not less than the arithmetical average of the minimum fat contents prescribed by the definitions and standards of identity, if any there be, for the varieties of cheese used, but in no case is less than 47 percent, except that the fat content of the solids of a pasteurized process gruyere cheese made from a mixture of swiss cheese and gruyere cheese is not less than 45 percent.

(5) Moisture and fat are determined by the methods prescribed in § 133.113 (c).

(6) The weight of each variety of cheese in a pasteurized process cheese made from two varieties of cheese is not less than 25 percent of the total weight of both, except that the weight of blue cheese, nuworld cheese, roquefort cheese, or gorgonzola cheese is not less than 10 percent of the total weight of both, and the weight of limburger cheese is not less than 5 percent of the total weight of both. The weight of each variety of cheese in a pasteurized process cheese made from three or more varieties of cheese is not less than 15 percent of the total weight of all, except that the weight of blue cheese, nuworld cheese, roquefort cheese, or gorgonzola cheese is not less than 5 percent of the total weight of all, and the weight of limburger cheese is not less than 3 percent of the total weight of all. These limits do not apply to the quantity of cheddar cheese, washed curd cheese, colby cheese and granular cheese in mixtures which are designated as "American cheese" as prescribed in paragraph (d)(2) of this section. Such mixtures are considered as one variety of cheese for the purposes of this paragraph (a)(6).

(7) For the purposes of this section, cheddar cheese for manufacturing, washed curd cheese for manufacturing, colby cheese for manufacturing, granular cheese for manufacturing, brick cheese for manufacturing, muenster cheese for manufacturing, and swiss cheese for manufacturing are considered as cheddar cheese, washed curd cheese, colby cheese, granular cheese, brick cheese, muenster cheese, and swiss cheese, respectively.

(8) The flavor and body of any optional cheese ingredient used may be modified by the addition of safe and suitable enzymes. For the purpose of this section, the common name of each enzyme-modified cheese ingredient shall be "enzyme-modified _____ cheese," the blank being filled in with the variety name of the cheese so modified.

(b) The optional ingredients referred to in paragraph (a) of this section are any of the following safe and suitable ingredients:

(1) Emulsifying agents (such as phosphates, citrates, and tartrates) in such quantity that the weight of the solids of such emulsifying agents is not more than 3 percent of the weight of the pasteurized process cheese.

(2) Organic acidifying agents in such quantity that the pH of the pasteurized process cheese is not below 5.3.

(3) Cream, anhydrous milkfat, dehydrated cream, butter, butteroil and anhydrous butteroil, or any combination of two or more of these in such quantity that the weight of the fat derived therefrom is less than 5 percent of the weight of the pasteurized process cheese.

(4) Water.

(5) Salt.

(6) Artificial coloring.

(7) Spices and/or flavorings, none of which singly or in combination with other ingredients simulate the flavor of a cheese of any age or variety.

(8) Antimicrobials on cuts or slices of pasteurized process cheese in consumer-sized packages.

(9) Lecithin on cuts or slices of pasteurized process cheese in consumer-sized packages as an anti-sticking agent in an amount not to exceed 0.03 percent by weight of the finished food.

(10) Enzyme-modified cheese solids.

(11) Tissues derived from fruits, vegetables, meat, fish or poultry.

(c) Nomenclature: The name of a pasteurized process cheese for which a definition and standard of identity is prescribed by this section is as follows:

(1) In case it is made from a single variety of cheese, its name is "Pasteurized process _____ cheese", the blank being filled in with the name of the variety of cheese used.

(2) In case it is made from two or more varieties of cheese, its name is "Pasteurized process _____ and _____ cheese", or "Pasteurized process _____ blended with _____ cheese", or "Pasteurized process blend of _____ and _____ cheese", the blanks being filled in with the names of the varieties of cheeses used, in order of predominance by weight; except that:

(i) In case it is made from gruyere cheese and swiss cheese, and the weight of gruyere cheese is not less than 25 percent of the weight of both, it may be designated "Pasteurized process gruyere cheese"; and

(ii) In case it is made of cheddar cheese, washed curd cheese, colby cheese, granular cheese, monterey cheese, or any mixture of two or more of these, it may be designated "Pasteurized process American cheese"; or when cheddar cheese, washed curd cheese, colby cheese, granular cheese, monterey cheese, or any mixture of two or more of these is combined with other varieties of cheese in the cheese ingredient, any of such cheeses or such mixture may be designated as "American cheese".

The full name of the food shall appear on the principal display panel of the label in type of uniform size, style, and color.

(3) The name of the food shall be followed by the statement "_____ percent milkfat", the blank being filled in with the whole number nearest the actual fat content of the food. This statement of

fat content shall appear in letters not less than one-half the height of the letters used for the name of the food, but in no case less than one-eighth of an inch in height.

(4) If the optional ingredients described in paragraph (b)(11) of this section are utilized, the name of the food is "Pasteurized process cheese with _____ percent milkfat", the first blank being filled in with the common or usual name or names of the ingredients used, in descending order of predominance by weight. When such substances contain fat, the method for determination of fat prescribed by § 133.113(c) is not applicable. The moisture content may be 1 percent more and the milkfat content may be 1 percent less than the prescribed limits for pasteurized process cheese when the ingredients listed in paragraph (b)(11) of this section are added to the food.

(5) The word "Pasteurized" in the name of the food is optional.

(d) Label declaration. Each of the ingredients used in the food shall be declared on the label as required by the applicable sections of Part 101 of this chapter except that:

(1) Artificial coloring need not be declared.

(2) If the cheese ingredient contains cheddar cheese, washed curd cheese, colby cheese, granular cheese, monterey cheese, or any mixture of two or more of these and such ingredients are declared in accordance with § 101.4(b)(2)(i) of this chapter, such cheese or such mixture may be designated as "American cheese."

(3) Wherever any word or statement emphasizing the name of any ingredient appears on the label (other than in an ingredient statement) so conspicuously as to be easily seen under customary conditions of purchase, the full name of the food followed by a statement as to its fat content shall immediately and conspicuously precede or follow such word or statement in type of at least the same size as the type used in such word or statement.

§ 133.170 [Revoked]

2. By revoking § 133.170 *Pasteurized process cheese with fruits, vegetables, or meats.*

§ 133.171 [Revoked]

3. By revoking § 133.171 *Pasteurized process pimento cheese.*

4. By revising § 133.173 to read as follows:

§ 133.173 Pasteurized process cheese product.

(a)(1) Pasteurized process cheese product is the food prepared by comminuting and mixing, with the aid of heat, one or more of the optional cheese ingredients prescribed in paragraph (b) of this section, with or without one or more of the optional dairy ingredients prescribed in paragraph (c) of this section, with one or more of the optional ingredients prescribed by paragraph (d)

of this section, into a homogeneous plastic mass.

(2) During this preparation, a pasteurized process cheese product is heated for not less than 30 seconds at a temperature of not less than 150° F. When tested for phosphatase by the method prescribed in § 133.113(f), the phenol equivalent of 0.25 gram of pasteurized process cheese product is not more than 3 micrograms.

(3) There is no limitation on the fat content or the moisture content of pasteurized process cheese product. However, the fat content shall be properly declared and the product shall contain the specified amount of cheese.

(4) The weight of the cheese ingredient referred to in paragraph (a) (1) of this section shall constitute not less than 51 percent of the weight of the pasteurized process cheese product.

(5) The weight of each variety of cheese in a pasteurized process cheese product made with two varieties of cheese is not less than 25 percent of the total weight of both, except that the weight of blue cheese, nuworld cheese, roquefort cheese, gorgonzola cheese, or limburger cheese is not less than 10 percent of the total weight of both. The weight of each variety of cheese in a pasteurized process cheese product made with three or more varieties of cheese is not less than 15 percent of the total weight of all, except that the weight of blue cheese, nuworld cheese, roquefort cheese, gorgonzola cheese, or limburger cheese is not less than 5 percent of the total weight of all. These limits do not apply to the quantity of cheddar cheese, washed curd cheese, colby cheese, monterey cheese, or granular cheese in mixtures that are designated as "American cheese" as prescribed in paragraph (f) of this section. Such mixtures are to be considered as one variety of cheese for the purpose of this paragraph.

(6) Moisture and fat shall be determined by the methods prescribed in § 133.113(c), except that in determining moisture, the loss in weight that occurs in drying for 5 hours under the conditions prescribed in such method is taken as the weight of the moisture.

(7) The flavor and body of any optional cheese ingredient used may be modified by the addition of safe and suitable enzymes. For the purpose of this section, the common name of each enzyme-modified cheese ingredient shall be "enzyme-modified _____ cheese", the blank being filled in with the varietal name of the cheese so modified.

(b) The optional cheese ingredients referred to in paragraph (a) of this section include all natural cheese varieties for which there is a specific definition and standard of identity as well as those natural cheese varieties included in the class category definitions and standards of identity in this part.

(c) The optional dairy ingredients referred to in paragraph (a) of this section are milk or any safe and suitable milk-derived ingredient.

(d) The other optional ingredients referred to in paragraph (a) of this section

are any of the following safe and suitable ingredients:

(1) Emulsifying agents (such as phosphates, citrates, and tartrates) in such quantity that the weight of the solids of such emulsifying agents is not more than 4 percent of the weight of the pasteurized process cheese product, except the total weight of phosphates shall not exceed 3 percent of the weight of the finished food calculated as the anhydrous substance.

(2) (i) Stabilizers consisting of one or any mixture of two or more vegetable gums or xanthan gum. The total weight of such substances is not more than 0.8 percent of the weight of the finished food.

(ii) When one or more of the optional ingredients listed in paragraph (d) (2) (i) of this section is used, dioctyl sodium sulfosuccinate complying with the requirements of § 172.810 of this chapter may be used in a quantity not in excess of 0.5 percent of the weight of such ingredients.

(3) Organic acidifying agents in such quantity that the pH of the pasteurized process cheese product is not below 5.0.

(4) Nutritive carbohydrate sweeteners.

(5) Water.

(6) Salt.

(7) Artificial coloring.

(8) Spices and/or flavorings, one of which singly or in combination with other ingredients simulate the flavor of a cheese of any age or variety.

(9) Antimicrobials on cuts or slices of pasteurized process cheese product in consumer-sized packages.

(10) Lecithin on cuts or slices of pasteurized process cheese product in consumer-sized packages as an anti-sticking agent in an amount not to exceed 0.03 percent by weight of the finished food.

(11) Enzyme-modified cheese solids.

(12) Tissues derived from fruit, vegetable, meat, fish, or poultry for flavoring purposes.

(e) Nomenclature: The name of the food is "pasteurized process cheese product".

(1) The full name of the food shall appear on the principal display panel of the label in type of uniform size, style, and color, followed by the statement "_____ percent milkfat", the blank being filled in with the whole number closest to the actual fat content of the food. This statement of fat content shall appear in letters not less than one-half the height of the letters used for the name of the food, but in no case less than one-eighth of an inch in height. At the option of the manufacturer (for a period not to exceed 24 months from the effective date of this standard), the name of the food may be accompanied by the following terms in type size no larger than one-half that used for the name of the food: "Pasteurized process cheese spread" when the milkfat content is greater than 20 percent but less than 23 percent, and the moisture content is more than 44 but less than 60 percent; and "Pasteurized process cheese food" when the milk fat content is greater than

23 percent and the moisture content no greater than 44 percent. All other label requirements as to the name of the food, shall apply.

(2) If the optional ingredients described in paragraph (d) (12) of this section are utilized, the name of the food is "Pasteurized process cheese product with _____ percent milkfat", the first blank being filled in with the common or usual name or names of the substances used, in order of predominance by weight. When such substances contain fat, the method for determination of fat prescribed by § 133.113(c) is not applicable.

(3) The words "pasteurized process" in the name of the food is optional.

(f) Label declaration: Each of the ingredients used in the food shall be declared on the label as required by the applicable sections of Part 101 of this chapter except that:

(1) If the cheese ingredient contains cheddar cheese, washed curd cheese, colby cheese, granular cheese, monterey cheese, or any mixture of two or more of these, and such ingredients are declared in accordance with § 101.4(b) (2) (i), such cheese or such mixture may be designated as "American cheese."

(2) Whenever any word or statement emphasizing the name of any ingredient appears on the label (other than in an ingredient statement) so conspicuously as to be easily seen under customary conditions of purchase, the full name of the food followed by a statement as to its fat content shall immediately and conspicuously precede or follow such word or statement in a type of at least the same size as the type used in such word or statement.

§ 133.174 [Revoked]

5. By revoking § 133.174 *Pasteurized process cheese food with fruits, vegetables, or meats.*

§ 133.179 [Revoked]

6. By revoking § 133.179 *Pasteurized process cheese spread.*

§ 133.180 [Revoked]

7. By revoking § 133.180 *Pasteurized process cheese spread with fruits, vegetables, or meats.*

Interested persons may, on or before January 3, 1978, submit to the Hearing Clerk (HFC-20), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, Md. 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments, and shall be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

NOTE.—The Food and Drug Administration has determined that this document does not contain a major proposal requiring preparation of an economic impact statement under Executive Order 11821 (as amended by Executive Order 11949) and OMB Circular

A-107. A copy of the economic impact assessment is on file with the Hearing Clerk, Food and Drug Administration.

Dated: September 27, 1977.

[21 CFR Part 133]

SKIM MILK CHEESE FOR MANUFACTURING

Proposal to Amend Identity Standard

AGENCY: Food and Drug Administration.

ACTION: Proposed rule.

SUMMARY: This proposal would amend the identity standard for skim milk cheese for manufacturing, based on a petition filed by the Kraft Foods Division of Kraftco Corp. Such an amendment would provide for the use of skim milk cheese in producing lower fat cheese products.

DATES: Comments by December 5, 1977. Proposed compliance for products initially introduced into interstate commerce: July 1, 1979.

ADDRESS: Written comments to Hearing Clerk (HFC-20), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, Md. 20857.

FOR FURTHER INFORMATION CONTACT:

Eugene T. McGarrahan, Bureau of Foods (HFF-415), Food and Drug Administration, Department of Health, Education, and Welfare, 200 C St. SW., Washington, D. C. 20204 (202-245-1155).

SUPPLEMENTARY INFORMATION: Kraft Foods Division, 135 South LaSalle St., Rm. 2360, Chicago, IL 60603, filed a petition proposing to amend the identity standard for skim milk cheese for manufacturing in § 133.189 (21 CFR 133.189) to: (1) Change the name of the food to "skim milk cheese"; (2) increase the maximum permissible moisture from 50 percent to 60 percent; (3) eliminate the necessity of applying to the surface of the cheese a blue paraffin coating; (4) permit the use of modern cheddar type cheese curd handling techniques; and (5) consistent with other more recent standards, recognize skim milk products as acceptable foods and ingredients in other foods.

Grounds given in support of the proposal are: (1) The proposed changes will update the standard and make the food more useful as a cheese ingredient since "skim milk cheese for manufacturing" is currently seldom used for this purpose; and (2) the use of skim milk cheese as a cheese ingredient in lower fat pasteurized process cheese products would be necessary for the production of high quality, but lower fat, cheese products desired by consumers.

The petitioner has proposed, elsewhere in this issue of the FEDERAL REGISTER, to amend the definitions and standards of identity for pasteurized process cheese food and pasteurized process cheese spread to permit the use of skim milk cheese for manufacturing as an optional cheese ingredient when used in combination with other higher fat cheese varieties, rather than as an optional dairy ingredient. The petitioner states that the use of skim milk cheese is becoming increasingly important as a potential means of standardizing the physical and organoleptic qualities of process cheese foods and spreads without reduction of product quality, wholesomeness, safety, or value.

The Commissioner of Food and Drugs wishes to point out, based on information available to him, the following facts:

1. There is currently an interest among consumers in foods containing a lower fat content.

2. Skim milk cheese is no longer considered to be fit only for use in animal feeds.

3. Acceptable skim milk cheese products, both palatable and nutritious, are being made and sold as nonstandardized foods.

4. Skim milk type cheeses are being imported and sold to consumers in the United States.

Skim milk cheese for manufacturing as provided for in the current standard is considered only as an optional dairy ingredient and, as such, is not readily acceptable as a cheese for direct consumption by consumers. The Kraft petition would amend the standard for skim milk cheese for manufacturing to provide for manufacture of a skim milk cheese that could be sold directly to consumers and could also be used satisfactorily as a cheese ingredient in pasteurized process cheese products.

The Commissioner is therefore proposing that the identity standard for skim milk cheese for manufacturing be amended to provide for the new use of the product.

The Commissioner proposes that all products initially introduced into interstate commerce on or after July 1, 1979 shall comply with the regulation, except as to any provisions that may be stayed by the filing of proper objections.

The Commissioner has considered the environmental effects of the issuance or amendment of food standards and has concluded in 21 CFR 25.1(d) (4) that food standards are not major agency actions significantly affecting the quality of the human environment. Therefore, an environmental impact statement is not required for this proposal.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 401, 701 (e), 52 Stat. 1046, 70 Stat. 919, as amended (21 U.S.C. 341, 371(e))) and under authority delegated to the Commissioner (21 CFR 5.1), it is proposed that Part 133 be amended by revising § 133.189 to read as follows:

§ 133.189 Skim milk cheese.

(a) Skim milk cheese is the food prepared by the procedure set forth in paragraph (b) of this section, or by another procedure that produces a finished cheese having the same physical and chemical properties as the cheese produced when the procedure set forth in paragraph (b) of this section is used. It contains not more than 60 percent moisture, as determined by the method prescribed in § 133.113. (c).

(b) Skim milk, which shall be pasteurized, and which may be warmed, is subjected to the action of harmless lactic acid-producing bacteria present in such skim milk or added thereto. Artificial coloring may be added. Sufficient rennet, other safe and suitable milk-clotting enzyme that produces equivalent curd formation, or both, with or without purified calcium chloride in a quantity not more than 0.02 percent (calculated as anhydrous calcium chloride) of the weight of the skim milk, is added to set the skim milk to a semisolid mass. The curd is formed, handled, and drained as in the preparation of any American cheese (i.e., either cheddar, washed curd, colby, or granular cheese). Proteins from whey may be incorporated. A harmless preparation of enzymes of animal or plant origin capable of aiding in the curing or development of flavor of skim milk cheese may be added during the procedure, in such quantity that the weight of the solids of such preparation is not more than 0.1 percent of the weight of the skim milk used.

(c) For the purposes of this section: (1) "Skim milk" means cow's milk from which the milkfat has been separated to form skim milk having a milkfat content of less than 0.5 percent, concentrated skim milk, nonfat dry milk, or a mixture of any two or more of these with water in a quantity not in excess of that sufficient to reconstitute any concentrated skim milk or nonfat dry milk used.

(2) Milk shall be deemed to have been pasteurized if it has been held at a temperature of not less than 143° F for a period of not less than 30 minutes, or for a time and at a temperature equivalent thereto in phosphatase destruction.

(d) Label declaration of ingredients: Each of the ingredients used in the food shall be declared on the label as required by applicable sections of Part 101 of this chapter.

Interested persons may, on or before December 5, 1977, submit to the Hearing Clerk, Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, Md. 20857, written comments (in quadruplicate and identified with the Hearing Clerk docket number found in brackets in the heading of this document) regarding this proposal. Received comments may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

NOTE.—The Food and Drug Administration has determined that this document does not contain a major proposal requiring preparation of an economic impact statement under

Executive Order 11821 (as amended by Executive Order 11949) and OMB Circular A-107.

Dated: September 27, 1977.

[Docket No. 77N-0094]

OVER-THE-COUNTER DRUGS

Establishment of a Monograph for OTC Internal Analgesic, Antipyretic and Antirheumatic Products; Extension of Time

AGENCY: Food and Drug Administration.

ACTION: Extension of time for comments and reply comments.

SUMMARY: The Food and Drug Administration is extending by 60 days the times for filing comments and reply comments on a proposal to establish conditions under which over-the-counter (OTC) internal analgesic, antipyretic and antirheumatic drugs are generally recognized as safe and effective and not misbranded. The extension is in response to requests for such extensions.

DATES: Comments by December 5, 1977 and reply comments by January 6, 1978.

ADDRESS: Written comments to the Hearing Clerk (HFC-20), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, Md. 20857.

FOR FURTHER INFORMATION CONTACT:

William E. Gilbertson, Bureau of Drugs (HFD-510), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, Md. 20857 (301-443-4960).

SUPPLEMENTARY INFORMATION: In the FEDERAL REGISTER of July 8, 1977 (42 FR 35345), the Commissioner of Food and Drugs issued a proposed regulation containing the monograph recommended by the Advisory Review Panel on OTC Internal Analgesic and Antirheumatic Products establishing: (1) conditions under which OTC internal analgesic, antipyretic and antirheumatic drugs are generally recognized as safe and effective and not misbranded; (2) a statement of the conditions excluded from the monograph on the basis of a determination by the Panel that they would result in the drugs' not being generally recognized as safe and effective or would result in misbranding; (3) a statement of the conditions excluded from the monograph on the basis of a determination by the Panel that the available data are insufficient to classify such conditions under either (1) or (2) above; and (4) the conclusions and recommendations of the Panel to the Commissioner. Interested persons were given until October 6, 1977 to submit comments

PROPOSED RULES

on the proposal and until November 7, 1977 to reply to any comments so filed.

The agency has received requests from the Proprietary Association, the National Association of Pharmaceutical Manufacturers, the American Home Products Corp., and the Bristol-Myers Co. to extend the time for comments, arguing that 90 days as granted in the proposal is insufficient time to respond properly to the Commissioner's expressed hope that publication of the Panel's findings would "stimulate discussion, evaluation, and comment on the full sweep of the Panel's deliberations" and to obtain his goal of receiving "full public comment before any decision is made on the recommendations of the Panel." The requests noted that the findings cover nearly 450 columns of small FEDERAL REGISTER print and also information contained in more than 150 volumes of submitted data and additional references. They also pointed out that extensive redrafting of the findings was completed by the Panel and that this information was not in previous drafts supplied to the public. The requests for extension are on file in the office of the Hearing Clerk, Food and Drug Administration.

The Commissioner is persuaded that granting additional time for comment is appropriate. Accordingly, interested persons are invited to submit written comments (preferably four copies and identified with the Hearing Clerk docket number found in brackets in the heading of this document) regarding the proposal on or before December 5, 1977. Such comments should be addressed to the office of the Hearing Clerk (HFC-20), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, Md. 20857, and may be accompanied by a memorandum or brief in support thereof. Additional comments replying to any comments so filed may also be submitted on or before January 6, 1978. Received comments may be seen in the above-named office between 9 a.m. and 4 p.m., Monday through Friday.

This action is taken under the Federal Food, Drug, and Cosmetic Act (secs. 502, 505, 701(a), 52 Stat. 1050-1053 as amended, 1055 (21 U.S.C. 352, 353, 371 (a))) and under authority delegated to the Commissioner (21 CFR 5.1).

Dated: September 29, 1977.

WILLIAM F. RANDOLPH,
Acting Associate Commissioner
for Compliance.

LIBRARY OF CONGRESS

Copyright Office

[37 CFR Part 201]

[Docket RM 77-10]

NONDRAMATIC LITERARY WORKS

Voluntary License To Permit Reproduction Solely for Use of the Blind and Physically Handicapped

AGENCY: Library of Congress, Copyright Office.

ACTION: Proposed rule.

SUMMARY: This notice of proposed rulemaking is issued to inform the public that the Copyright Office of the Library of Congress is considering adoption of a new regulation designed to implement section 710 of the Act for General Revision of the Copyright Law. This section directs the Register of Copyrights to establish procedures by which the owner of copyright in nondramatic literary works may, at the time of copyright registration, grant the Library of Congress a license to reproduce and distribute the work for the use of the blind and physically handicapped. The effect of the proposed regulation is to establish the terms and conditions of these licenses.

DATES: Initial comments should be received on or before October 21, 1977. Reply comments on or before November 4, 1977.

ADDRESSES: Interested persons should submit five copies of their written comments, if by mail, to: Office of the General Counsel, Copyright Office, Library of Congress, Caller No. 2999, Arlington, Va. 22202, or, if by hand, to: Office of the General Counsel, Copyright Office, Library of Congress, Room 519, Crystal Mall Building No. 2, 1921 Jefferson Davis Highway, Arlington, Va.

FOR FURTHER INFORMATION CONTACT:

Jon Baumgarten, General Counsel, Copyright Office, Library of Congress, Washington, D.C. 20559 (703-557-8731).

SUPPLEMENTARY INFORMATION: One of the major programs of the Library of Congress is to provide Braille editions and special sound recordings of readings of works for the exclusive use of the blind and physically handicapped. In an effort to simplify and speed up the copyright procedures that are a necessary part of this program, section 710 of the first section of Pub. L. 94-553 (99 Stat. 2541) provides for the establishment of a voluntary licensing system to be tied in with copyright registration. Section 710 directs the Register of Copyrights, after consultation with the Division for the Blind and Physically Handicapped of the Library of Congress, to establish forms and procedures by which the copyright owner of a nondramatic literary work may, at the time of copyright registration, grant a license to the Library of Congress. This license would permit the Library to reproduce the work by means of Braille or similar tactile symbols, or by fixation of a reading of the work in a phonorecord, or both, and to distribute the resulting copies and phonorecords solely for use of the blind and physically handicapped.

We propose to give copyright owners the opportunity to grant licenses under section 710 by including, on the application form for registration of nondramatic literary works (Form TX), a statement with "check off" boxes. The statement would make clear that, by checking off

one of the boxes and signing the application, the copyright owner would be granting a nonexclusive license to the Library of Congress without the need for further paperwork. We also propose that the terms and conditions of the license be set forth in a new § 201.15 of the regulations of the Copyright Office.

The proposed regulation adopts a definition of "blind and physically handicapped" from 2 U.S.C. 135(a), as amended, and Library of Congress regulations issued under that provision. That definition identifies persons eligible for special Library loan services as "blind and other physically handicapped readers certified by competent authority as unable to read normal printed material as a result of physical limitations, under regulations prescribed by the Librarian of Congress for this service." The pertinent regulations of the Library of Congress (36 CFR 701.11) are as follows:

(b) **Eligibility criteria.** (1) The following persons are eligible for such service:

(i) Blind persons whose visual acuity, as determined by competent authority, is 20/200 or less in the better eye with correcting glasses, or whose widest diameter if visual field subtends an angular distance no greater than 20 degrees.

(ii) Persons whose visual disability, with correction and regardless of optical measurement, is certified by competent authority as preventing the reading of standard printed material.

(iii) Persons certified by competent authority as unable to read or unable to use standard printed material as a result of physical limitations.

(iv) Persons certified by competent authority as having a reading disability resulting from organic dysfunction and of sufficient severity to prevent their reading printed material in a normal manner.

(2) In connection with eligibility for loan services "competent authority" is defined as follows:

(i) In cases of blindness, visual disability, or physical limitations "competent authority" is defined to include doctors of medicine, ophthalmologists, optometrists, registered nurses, therapists, professional staff of hospitals, institutions, and public or welfare agencies (e.g., social workers, caseworkers, counselors, home teachers, and superintendents). In the absence of any of these, certification may be made by professional librarians or by any person whose competence under specific circumstances is acceptable to the Library of Congress.

(ii) In the case of reading disability from organic dysfunction, competent authority is defined as doctors of medicine who may consult with colleagues in associated disciplines.

Proposed regulation. We propose to amend Part 201 of 37 CFR, Chapter II by adding a new § 201.15 to read as follows:

§ 201.15 Voluntary license to permit reproduction of nondramatic literary works solely for use of the blind and physically handicapped.

(a) **General.** (1) The "blind and physically handicapped" are persons eligible for special loan services of the Library of Congress, as designated by section 135a of title 2 of the United States Code as amended by Pub. L. 89-552 and regulations of the Library of Congress issued under that section.

(2) This section, and any license granted or exercised under this section, applies only to nondramatic literary works which have previously been published with the consent of the copyright owner.

(b) **Form.** The Copyright Office provides the following form as part of applications for registration of claim to copyright in nondramatic literary works (Form TX):

REPRODUCTION FOR USE OF BLIND OR PHYSICALLY HANDICAPPED PERSONS

Signature of this form at space 10 and a check in one of the boxes here in space 8, constitutes a nonexclusive grant of permission to the Library of Congress to reproduce and distribute solely for the blind and physically handicapped and under the conditions and limitations prescribed by the regulations of the Copyright Office: (1) copies of the work identified in space 1 of this application in Braille (or similar tactile symbols); or (2) phonorecords embodying a fixation of a reading of that work; or (3) both.

--- Copies only; --- Phonorecords only;
--- Copies and phonorecords.

(c) **Terms and conditions.** A copyright owner who consents to the use of a copyrighted work by the Library of Congress for the use of the blind and physically handicapped may accomplish this purpose by checking the appropriate box on the application form, by signing the application form as a whole, and by submitting the application for copyright registration to the Copyright Office. The copyright owner thereby grants a non-exclusive license to the Library of Congress with respect to the work identified in the application, under the terms and conditions set forth in this section.

(1) The work may be reproduced only by or on behalf of the Library of Congress.

(2) The work may not be reproduced in any other form than Braille (or similar tactile symbols), or by a fixation of a reading of the work in phonorecords specially designed for use of the blind and physically handicapped, or both, as designated by the copyright owner on the application form.

(3) Such copies and phonorecords of the work may be distributed by the Library of Congress solely for the use of the blind and physically handicapped under conditions and guidelines provided by the Division for the Blind and Physically Handicapped of the Library of Congress.

(4) In the case of any conflict with any other right or license given by the copyright owner to the Library of Congress pertaining to the work, the terms and conditions most favorable to the Library of Congress for the benefit of the blind and physically handicapped shall govern.

(5) Copies and phonorecords reproduced and distributed under this license will contain identification of the author and publisher of the work, and copyright notice, as they appear on the copies or phonorecords deposited with the application.

(6) This license is nonexclusive, and the copyright owner is in no way precluded from granting other nonexclusive

licenses with respect to reproduction for the use of the blind and physically handicapped or other exclusive or nonexclusive licenses or transfers with respect to reproduction or distribution for other purposes.

(7) All responsibility for the clearing and exercise of the rights granted is that of the Library of Congress.

(d) **Duration of license.** (1) The license is effective upon the effective date of registration for the work and, subject to the conditions and procedures stated in paragraph (d) (2) of this section, continues for the full term of copyright in the work provided in section 302 of title 17 of the United States Code as amended by Pub. L. 94-553.

(2) Termination of the license may be accomplished by the copyright owner at any time by submitting a written statement of intent to terminate, signed by the copyright owner or by the duly authorized agent of the copyright owner, to the Division for the Blind and Physically Handicapped of the Library of Congress. Termination will become effective 90 days after receipt of the written statement, or at a later time set forth in the statement. Upon the effective date of termination the Library of Congress will be prohibited from reproducing additional copies of phonorecords of the work, or both, without the consent of the copyright owner, but copies or phonorecords, or both, reproduced under authority of the license before the effective date of termination may continue to be utilized and distributed under the terms of the license after its termination.

(17 U.S.C. 207, and under the following sections of Title 17 of the United States Code as amended by Pub. L. 94-533: § 702; § 710.)

Dated: September 27, 1977.

BARBARA RINGER,
Register of Copyrights.

Approved:

DANIEL J. BOORSTIN,
Librarian of Congress.

ENVIRONMENTAL PROTECTION AGENCY

[40 CFR Part 52]

[FRL 800-8]

APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

Tennessee: Proposed Plan Revisions

AGENCY: Environmental Protection Agency.

ACTION: Proposed rulemaking.

SUMMARY: On October 6, 1975, the Environmental Protection Agency (EPA) promulgated regulations which require the States to revise their air implementation plans to provide for the installation, calibration, maintenance, and operation of equipment for continuously monitoring and recording emissions. These regulations must require the owner or operator of specific sources subject to continu-

ous emission monitoring and recording requirements to maintain a file of all pertinent information. The Metropolitan Nashville-Davidson County Health Department responded by adopting, after public notice and public hearing, continuous monitoring regulations and by submitting them for approval as a proposed implementation plan revision. The purpose of this notice is to announce these regulations as proposed rulemaking and to solicit public comment on them.

DATES: Comments must be received on or before November 3, 1977, to be considered.

ADDRESSES: Written comments on the proposed revisions should be addressed to Mr. Tom Helms of EPA's Air Programs Branch in Atlanta (see address below). Copies of materials submitted by Tennessee may be examined during normal business hours at the following locations:

Public Information Reference Unit, Library Systems Branch, EPA (PM-213), 401 M Street SW., Washington, D.C. 20406.

EPA Region IV, 345 Courtland Street NE., Atlanta, Ga. 30308.

Metropolitan Health Department, 311 23rd Avenue North, Nashville, Tenn. 37203.

FOR FURTHER INFORMATION CONTACT:

Mr. Tom Helms, Chief, Air Programs Branch, EPA Region IV, 345 Courtland Street NE., Atlanta, Ga. 30308.

SUPPLEMENTARY INFORMATION: Proposed Regulation No. 6, "Emission Monitoring of Stationary Sources," adopted by the Metropolitan Nashville-Davidson County Health Department, essentially incorporates the minimum Federal requirements for continuous monitoring. The sources subject to Regulation No. 6 are fossil-fuel fired steam generators and incinerators. Nitric acid plants and sulfuric acid plants are not included because there are none in Davidson County.

(Section 110(a) of the Clean Air Act (42 U.S.C. 1857c-5(a)).)

Dated: August 17, 1977.

JOHN A. LITTLE,
Acting Regional Administrator.

DEPARTMENT OF LABOR

Office of Federal Contract Compliance Programs

[41 CFR Part 60-4]

CONSTRUCTION CONTRACTORS

Affirmative Action Requirements; Extension of Comment Period

AGENCY: Office of Federal Contract Compliance Programs, Labor.

ACTION: Extension of time for comments.

SUMMARY: This notice extends the time for filing comments on proposed affirmative action standards for women in construction and the consolidation and standardization of requirements for construction contractors and subcontractors from September 30, 1977 to October 15, 1977.

DATES: Comments by October 15, 1977.

ADDRESSES: Send comments to the Director, Office of Federal Contract Compliance Programs, Room C3324, New Department of Labor Building, 200 Constitution Avenue NW., Washington, D.C. 20210. Comments received will be available for inspection during regular working hours at the above address.

FOR FURTHER INFORMATION CONTACT:

William Raymond, Associate Director, Construction Division, Office of Federal Contract Compliance Programs, Room N3402, Constitution Avenue NW., Washington, D.C. 20210, telephone 202-523-9447.

SUPPLEMENTARY INFORMATION: On August 16, 1977, a document was published in the FEDERAL REGISTER (42 FR 41378) proposing to establish rules relating to affirmative action requirements for construction contractors under Executive Order 11246, as amended. That proposal allowed a comment period of 45 days or until September 30, 1977.

Since the publication of that document, various requests for the extension of the period provided for the receipt of comments have been received. The importance of the issues addressed in that proposal requires that the Department proceed to final rulemaking as expeditiously as possible. However, the Department also wishes to provide sufficient time for all interested parties to prepare and submit comments. Therefore, an additional 15-day period is provided and comments will be received on this proposal until October 15, 1977.

Dated: September 29, 1977.

RAY MASHRALL,
Secretary of Labor.

DONALD ELISBURG,
Assistant Secretary, Employment Standards Administration.

WELDON J. ROUGEAU,
Director, Office of Federal Contract Compliance Programs.

INTERSTATE COMMERCE COMMISSION

[49 CFR Parts 1003, 1130, 1134]

[Ex Parte No. MC-100 (Sub-No. 2)]

MOTOR CARRIER CERTIFICATES AND PERMITS; CONTROL OR CONSOLIDATION; LIST OF FORMS

Revision of Procedures Requiring Service of Applications on State Officials

Proposed rules revising application procedures for the purpose of saving time, money, and effort expended by motor carrier applicants and State officials in the service and receipt of copies of applications for permanent operating authority or various types of financial control.

AGENCY: Interstate Commerce Commission.

ACTION: Proposed regulations.

SUMMARY: The Interstate Commerce Commission (Commission) is proposing to revise the procedures for serving on State officials copies of applications for permanent motor carrier certificates and permits, applications to consolidate, merge, purchase, lease or control operating rights or properties of motor carriers, and applications for temporary authority to operate motor-carrier properties sought to be acquired under separately filed application under section 5 of the Interstate Commerce Act. Applicants would be required to submit a copy of their application form only to the State of domicile. Other States in or through which applicants operate or propose to operate would be sent only a notice of the application. This new procedure would expedite the application process for applicants (with attendant savings of expense) and eliminate the maintenance of needless records by State functionaries. Those States which need more detailed information in a given proceeding would still be able to obtain from the applicant, upon request, a copy of the application as filed with the Commission.

DATES: Written comments should be filed with the Commission on or before November 3, 1970.

ADDRESSES: Send comments to: Office of Proceedings, Interstate Commerce Commission, Washington, D.C. 20423.

FOR FURTHER INFORMATION CONTACT:

Michael Erenberg, Assistant Deputy Director, Office of Proceedings, Interstate Commerce Commission, Washington, D.C. 20423, Phone: 202-275-7292.

¹Through inadvertence, this proceeding initially was docketed incorrectly as No. 36657.

SUPPLEMENTARY INFORMATION: On June 2, 1977, a Staff Task Force was established for the purpose of investigating the Commission's administration of the Interstate Commerce Act, particularly as it relates to motor carriers, and recommending improvements in motor carrier regulation. In Recommendation No. 29 of its report (issued July 6, 1977) the Task Force suggested that the requirement of serving on State Boards copies of applications for permanent operating rights be abolished if there appeared no substantial State support for the continuation of such practice. To facilitate the determination of the States' positions in this matter, it was further suggested that the States be polled. Therefore, a copy of this Notice will be served on all State Public Utility Commissioners so that they might individually comment on the rule changes proposed.

By petition filed August 16, 1977, the National Association of Regulatory Utilities Commissioners (NARUC) seeks the revision of Commission rules regarding the service of applications on State officials in both operating rights and finance proceedings. Both the Staff Task Force and NARUC recommendations were taken into consideration in formulating the regulations proposed here.

CURRENT REGULATIONS AND THEIR EFFECT

Pursuant to 49 CFR 1130.1(b), an applicant for permanent motor carrier operating authority must deliver a copy of its application to the "Board, Commission, or official (or Governor if there is no Board, Commission or official) having authority to regulate the business of transportation by motor vehicles, of each State in or through which applicant operates or proposes to operate." Virtually identical requirements are found in 49 CFR 1134.1(b), 1134.6(b), and 1134.50(b), regarding applications for various types of merger and permanent or temporary financial control of motor carrier operating rights or properties.

The staff task force suggested that these rules appear to have no beneficial effect on either the States or motor carrier applicants before the Commission. NARUC (an association whose members are State officials charged, among others, with the duty of regulating motor carriers within their respective States) believes that the vast majority of the applications covered by these regulations are of only minimal interest to the States and that only under certain circumstances do the States have use for the entire applications. The filing and concomitant administrative costs can be a burden on those States which retain these applications and some States (Rhode Island is cited in the Task Force report) discard them upon receipt. Many applications are quite lengthy and the cost and effort of copying and service (including mailing) may be unjustified by any corresponding benefit derived therefrom.

DISCUSSION OF PROPOSED REVISIONS

The Interstate Commerce Act requires only that reasonable notice of the proceedings to which these applications pertain be afforded to the States, 49 U.S.C. 305(e). Thus, there exists no statutory requirement that the entire application be served and the proposed revisions lie wholly within the Commission's rule-making power.

A substantial portion of the expense and effort inherent in the above-outlined service procedure could be eliminated by substituting a simple short-form notice requirement with regard to all pertinent States except the applicant's State of domicile. This would allow States having a particular interest in any given proceeding to request a complete copy of the application from the carrier(s). Under the proposed revisions, complete applications would be served upon the carrier's domiciliary State. Public comment is sought as to whether it is necessary to serve the carrier's domiciliary State with a complete application.

The Commission's present regulations require that copies of applications be delivered in person or sent by "registered or receipted mail" to the appropriate State officials. Public comment is sought as to whether this requirement should be modified to permit service by first-class mail.

The adoption of the proposed regulations will make necessary slight revisions of the application forms pertaining to each of the revised regulations (OP-OR-9, OP-F-44, OP-F-40, and OP-F-45, 49 CFR 1003.1).

Accordingly, the Commission proposes to amend 49 CFR 1130.1(b), 1134.1(b), 1134.6(b), 1134.50(b), and 1003 to read as follows:

§ 1130.1 Applications.

(b) *Filing and service.* The verified original of each such application shall be filed with this Commission, one true copy thereof shall be furnished the Regional Operations Director of the Bureau of Operations located in the region wherein applicant is domiciled and one true copy shall be delivered in person or by registered or receipted mail, to the Board, Commission, or official (or Governor if there is no Board, Commission or official) having authority to regulate the business of transportation by motor vehicle, in the State of applicant's domicile. Notice of the application in the form and containing the information called for in the form of notice designated as Form B.M.C. 15 (§ 1003.1 of this chapter), shall be provided in the same manner to the appropriate Board or official designated above of each State in or through which applicant operates or proposes to operate. Applicant is not required to give notice to competitors since notice of such filing will be by publication in the FEDERAL REGISTER.

§ 1134.1 Applications for authority to merge properties or franchises.

(b) The original of each such application and five copies thereof shall be filed with this Commission, one copy thereof shall be furnished to each of the Regional Operations Directors of the Bureau of Operations in which are located the headquarters of the carriers involved in the application, and one copy shall be delivered, in person or by registered or receipted mail, to the Board, Commission, or Official (or to the Governor where there is no Board, Commission, or Official) having authority to regulate the business of transportation by motor vehicle in the State of carriers' domicile. Notice of the application in the form and containing the information called for in the form of notice designated as Form B.M.C. 15-A (Revised) (§ 1003.1 of this chapter), shall be provided in the same manner to the appropriate Board or official designated above of each State in which said carriers operate. Applicants are not required to give notice to competitors since notice of such filing will be by publication in the FEDERAL REGISTER, as provided in Rule 240 of the Special Rules of Practice (§ 1100.240 of this chapter).

§ 1134.6 Applications for approval of temporary operation.

(b) The original of each such application and five copies thereof, shall be filed with this Commission, one copy thereof shall be furnished to each of the Regional Operations Directors of the Bureau of Operations in which the headquarters of applicants are located, and one copy shall be delivered, in person or by registered or receipted mail, to the Board, Commission, or Official (or to the Governor where there is no Board, Commission, or Official) having authority to regulate the business of transportation by motor vehicle in the State of applicant's domicile. Notice of the application in the form and containing the information called for in the form of notice designated as Form B.M.C. 15-A (Revised) (§ 1003.1 of this chapter), shall be provided in the same manner to the appropriate Board or Official designated above of each State in which applicants operate. Applicants are not required to give notice to competitors since notice of such filing will be by publication in the FEDERAL REGISTER, as provided in Rule 240 of the Special Rules of Practice (§ 1140.240 of this chapter).

§ 1134.50 Application for authority to acquire control.

(b) The original of each such application and five copies thereof shall be filed with this Commission, one copy thereof shall be furnished to each of the Regional Operations Directors of the Bureau of Operations in which are located

the headquarters of the carriers involved in the application, and one copy shall be delivered in person or by registered or receipted mail, to the Board, Commission, or Official (or to the Governor where there is no Board, Commission, or Official) having authority to regulate the business of transportation by motor vehicle in the State of applicant's domicile. Notice of the application in the form and containing the information called for in the form of notice designated as Form B.M.C. 15-A (Revised) (§ 1003.1 of this chapter), shall be provided in the

same manner to the appropriate Board or official designated above of each State in which said carriers operate. Applicant is not required to give notice to competitors since notice of such filing will be by publication in the FEDERAL REGISTER, as provided in Rule 240 of the Special Rules of Practice (§ 1100.240 of this chapter).

§ 1003.1 [Amended]

Adoption of the above proposed regulations would require modification of Form B.M.C. 15-A.

This notice of proposed rulemaking is promulgated under the authority contained in 49 U.S.C. 304 and 305; and 5 U.S.C. 553, and was adopted formally at a General Session of the Interstate Commerce Commission held at its office in Washington, D.C., on the 28th day of September, 1977.

By the Commission.

H. G. HOMME, Jr.,
Acting Secretary.

Forest Service

VERNON UNIT PLAN

Availability of Final Environmental Statement

Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969, the Forest Service, Department of Agriculture, has prepared a final environmental statement for the Vernon Unit Plan, Kisatchie National Forest, La., USDA-FS-R8-FES (Adm.) 76-21.

This unit contains 84,874 acres of National Forest land located in Vernon Parish, La. Major actions are harvesting timber products, development and maintenance of wildlife improvements, development of recreation facilities for dispersed recreation and construction and reconstruction of roads.

This final environmental statement was transmitted to CEQ September 26, 1977. Copies are available for inspection during regular working hours at the following locations:

USDA, Forest Service, South Agriculture Bldg., Rm. 3230, 12th St. and Independence Ave. SW., Washington, D.C. 20230.
USDA, Forest Service, 1720 Peachtree Road NW., Rm. 804, Atlanta, Ga. 30309.
USDA, Forest Service, Kisatchie National Forest, 2500 Shreveport Highway, Pineville, La. 71360.

A limited number of single copies are available upon request to Forest Supervisor, Kisatchie National Forest, 2500 Shreveport Highway, Pineville, La. 71360.

Copies of the environmental statement have been sent to various Federal, State, and local agencies as outlined in the CEQ guidelines.

Dated: September 26, 1977.

CIVIL AERONAUTICS BOARD

(Order 77-9-107; Docket 29123; Agreement C.A.B. 26886)

INTERNATIONAL AIR TRANSPORT ASSOCIATION

Order; Western Hemisphere Long-Haul Passenger Fares

Issued under delegated authority September 26, 1977.

An agreement has been filed with the Board pursuant to section 412(a) of the Federal Aviation Act of 1958 (the Act) and Part 261 of the Board's Economic Regulations between various air carriers, foreign air carriers, and other carriers embodied in the resolutions of the Joint Traffic Conferences of the International Air Transport Association (IATA). The agreement, adopted by mail vote, has been assigned the above C.A.B. agreement number.

In general, the agreement would increase passenger fares in various U.S.-South American long-haul markets by two percent of the normal economy fare between Miami on the one hand and Brazil, Argentina, and Uruguay on the other, to compensate for rising fuel prices.

The purpose of this order is to establish procedural dates for the submission of carrier justification in support of the agreement and comments from interested persons. The carriers' justifications should set out, in the tabular format suggested in Order 75-7-88 (July 17, 1975), historical data for the year ended June 30, 1977, to establish the present economic status of scheduled passenger service in the market area covered by the agreement. For this purpose, the historical data reported to the Board in Form 41 reports by functional account for total Latin American passenger services should be adjusted to exclude market areas not covered by the agreement and to exclude all scheduled cargo and charter operations. The carriers should specifically document the cost per gallon and the amount of fuel purchased in Brazil, Argentina, and Uruguay during the year ended June 30, 1977. In addition, the carriers should provide comparable forecasts for the year ending September 30, 1978, assuming both present and proposed fare levels, annualizing the expected cost and revenue increases, indicating the amount of fuel to be purchased, and adequately documenting changes in fuel costs and revenue impact. Costs should be allocated between the passenger and cargo compartments of scheduled passenger aircraft by the "space method" stipulated by the Board in the Nonpriority Mail Rates decision (Orders 70-4-9 and 70-4-10), with complete explanatory notes and supporting detail, including statistical data, to describe the methods used in making the allocation.

Accordingly, it is ordered, that: 1. All United States air carrier members of the International Air Transport Association providing service within the affected

area shall file, within 15 calendar days after the date of service of this order, full documentation and economic justification for the fares embodied in the subject agreement:

2. Comments and objections from interested persons and parties shall be submitted within 15 calendar days after the date of service of this order;

3. Replies to submissions received in response to ordering paragraphs 1 and 2 above shall be submitted within 25 calendar days after the date of service of this order; and

4. Insofar as air transportation as defined by the Act is concerned, tariffs implementing the subject agreement shall not be filed in advance of Board action on the subject agreement.

This order will be published in the FEDERAL REGISTER.

PHYLLIS T. KAYLOR,
Secretary.

[FR Doc.77-29161 Filed 10-3-77; 8:45 am]

Agreement
CAB Specific
Commodity
Item No.

Description and Rate¹

20906 R-1	4109	Aircraft engines and parts of aircraft excluding fuselages, wings, aircraft tail assemblies, stabilizers and/or stabilizers; 315 $\frac{1}{2}$ kg. minimum weight 100 kg. 275 $\frac{1}{2}$ kg. minimum weight 200 kg. 220 $\frac{1}{2}$ kg. minimum weight 500 kg. From Addis Ababa to New York.
R-2	6227	Pyrethrum extract, 150 $\frac{1}{2}$ kg. minimum weight 100 kg. From Dar-Es-Salaam to New York.

¹ Subject to applicable currency exchange factors as shown in tariffs.
² Expires Jan. 31, 1978.
³ Expires Dec. 31, 1977.

Pursuant to authority duly delegated by the Board in the Board's Regulations, 14 CFR 385.14, it is not found that the agreement is adverse to the public interest or in violation of the Act, provided that approval is subject to the conditions ordered.

Accordingly, it is ordered, That: Agreement C.A.B. 26906, R-1 and R-2, is approved, provided that (a) approval shall not constitute approval of the specific commodity descriptions contained therein for purposes of tariff publications; (b) tariff filings shall be marked to become effective on not less than 30 days' notice from the date of filing; and (c) where a specific commodity rate is published for a specified minimum weight at a level lower than the general commodity rate applicable for such weight, and where a general commodity rate is published for a greater minimum weight at a level lower than such specific commodity rate, the specific commodity rate shall be extended to all such greater minimum weights at the applicable general commodity rate level.

Persons entitled to petition the Board for review of this order, pursuant to the Board's Regulations, 14 CFR 385.50, may file such petitions within ten days after the date of service of this order.

INTERNATIONAL AIR TRANSPORT ASSOCIATION

Order, Specific Commodity Rates

Issued under delegated authority September 26, 1977.

An agreement has been filed with the Board pursuant to section 412(a) of the Federal Aviation Act of 1958 (the Act) and Part 261 of the Board's Economic Regulations between various air carriers, foreign air carriers, and other carriers embodied in the resolutions of the Joint Traffic Conferences of the International Air Transport Association (IATA), and adopted pursuant to the provisions of Resolution 590 dealing with specific commodity rates.

The agreement names two specific commodity rates under existing commodity descriptions as set forth below, reflecting reductions from general cargo rates; and was adopted pursuant to unopposed notice to the carriers and promulgated in an IATA letter dated September 15, 1977.

This order will be published in the FEDERAL REGISTER.

PHYLLIS T. KAYLOR,
Secretary.

DEPARTMENT OF COMMERCE

Domestic and International Business Administration

TELECOMMUNICATIONS EQUIPMENT TECHNICAL ADVISORY COMMITTEE

Partially Closed Meeting

Pursuant to Section 10(a)(2) of the Federal Advisory Committee Act, 5 U.S.C. App. I (Supp. V, 1975), notice is hereby given that a meeting of the Telecommunications Equipment Technical Advisory Committee will be held on Tuesday, October 25, 1977, at 10 a.m. in Room 5230, Main Commerce Building, 14th and Constitution Avenue NW., Washington, D.C.

The Telecommunications Equipment Technical Advisory Committee was initially established on April 5, 1973. On March 12, 1975 and March 16, 1977, the Acting Assistant Secretary for Administration approved the recharter and extension of the Committee for two additional years, pursuant to Section 5(c)(1) of the Export Administration Act of 1969, as amended, 50 U.S.C. App. Sec.

2404(c)(1) and the Federal Advisory Committee Act.

The Committee advises the Office of Export Administration, Bureau of East-West Trade, with respect to questions involving (A) technical matters, (B) worldwide availability and actual utilization of production technology, (C) licensing procedures which affect the level of exports controls applicable to telecommunications equipment, including technical data or other information related thereto, and (D) exports of the aforementioned commodities and technical data subject to multilateral controls in which the United States participates including proposed revisions of any such multilateral controls.

The Committee meeting agenda has five parts:

GENERAL SESSION

- (1) Opening remarks by the Chairman
- (2) Presentation of papers or comments by the public.
- (3) Finalization of Findings—Volume I of the annual report to meet November 1, 1977, due date.
- (4) Discussion of microprocessors used in telecommunications equipment.

EXECUTIVE SESSION

- (5) Discussion of matters properly classified under Executive Order 11652, dealing with the U.S. and COCOM control program and strategic criteria related thereto.

The General Session of the meeting is open to the public, at which a limited number of seats will be available. To the extent time permits members of the public may present oral statements to the Committee. Written statements may be submitted at any time before or after the meeting.

With respect to agenda item (5), the Acting Assistant Secretary of Commerce for Administration, with the concurrence of the delegate of the General Counsel, formally determined on April 22, 1977, pursuant to Section 10(d) of the Federal Advisory Committee Act, as amended by Section 5(c) of the Government In The Sunshine Act, Pub. L. 94-409, that the matters to be discussed in the Executive Session should be exempt from the provisions of the Federal Advisory Committee Act relating to open meetings and public participation therein, because the Executive Session will be concerned with matters listed in 5 U.S.C. 552b(c)(1). Such matters are specifically authorized under criteria established by an Executive Order to be kept secret in the interests of the national defense or foreign policy. All materials to be reviewed and discussed by the Committee during the Executive Session of the meeting have been properly classified under the Executive Order. All Committee members have appropriately security clearances.

Copies of the minutes of the open portion of the meeting will be available upon written request addressed to the Freedom of Information Officer, Domestic and International Business Administration, Room 3012, U.S. Department of Commerce, Washington, D.C. 20230.

For further information, contact Mr. Charles C. Swanson, Director, Opera-

tions Division, Office of Export Administration, Domestic and International Business Administration, Room 1617M, U.S. Department of Commerce, Washington, D.C. 20230, telephone: 202-377-4196.

The complete Notice of Determination to close meetings or portions thereof of the series of meetings of the Telecommunications Equipment Technical Advisory Committee and of any subcommittees thereof, was published in the FEDERAL REGISTER on May 25, 1977 (42 FR 26682).

Dated: September 29, 1977.

RAUER H. MEYER,
Director, Office of Export Administration Bureau of East-West Trade, U.S. Department of Commerce.

[3510-24]

Economic Development Administration SMITHFIELD SUGAR COOPERATIVE, INC.

Determination of Eligibility To Apply for Trade Adjustment Assistance

A petition by Smithfield Sugar Cooperative, Inc., Route 1, Box 157, Port Allen, La. 70767, a processor of cane sugar, was accepted for filing on September 26, 1977, pursuant to section 251 of the Trade Act of 1974 (Pub. L. 93-618) and § 315.23 of the Adjustment Assistance Regulations for Firms and Communities (13 CFR Part 315). Consequently, the U.S. Department of Commerce has initiated an investigation to determine whether increased imports into the United States of articles like or directly competitive with those produced by the firm contributed importantly to total or partial separation of the firm's workers, or threat thereof, and to a decrease in sales or production of the petitioning firm.

Any party having a substantial interest in the proceedings may request a public hearing on the matter. A request for a hearing must be received by the Chief, Trade Act Certification Division, Economic Development Administration, U.S. Department of Commerce, Washington, D.C. 20230, no later than the close of business, October 14, 1977.

JACK W. OSBURN, JR.,
Chief, Trade Act Certification Division, Office of Planning and Program Support.

GERALD J. SHORROCK

Receipt of Application for Certificate of Exemption

Notice is hereby given that the following applicants have applied in due form for Certificates of Exemption under Pub. L. 94-359, and the regulations issued thereunder (50 CFR Part 222, Subpart B), to engage in certain commercial activities with respect to pre-Act endangered species parts or products.

APPLICANTS

1. Gerald J. Shorrock, 2222 Sepulveda Boulevard, Los Angeles, Calif. 90064.

Period of Exemption: The applicant requests that the period of time to be covered by the Certificate of Exemption begin on the date of the original issuance of the Certificate of Exemption and be effective for a 3-year period.

Commercial activities exempted: (i) The prohibition, as set forth in section 9(a)(1)(A) of the Act, to export any such species part from the United States;

(ii) The prohibitions, as set forth in section 9(a)(1)(E) of the Act, to deliver, receive, carry, transport, or ship in interstate or foreign commerce, by any means whatsoever and in the course of a commercial activity any such species part;

(iii) The prohibitions, as set forth in section 9(a)(1)(F) of the Act, to sell or offer for sale in interstate or foreign commerce any such species part.

Parts or products exempted: Finished scrimshaw products consisting of approximately 47 etched whale teeth, 10 carved whale teeth, 7 carved or etched whale teeth pieces, 93 carved whale bone pieces, 2 items made from carved baleen and one carved section of sperm whale jaw bone containing 6 teeth.

2. G & W Laboratories, Inc., 20 Markley Street, Port Reading, N.J. 07064.

Period of Exemption: The applicant requests that the period of time to be covered by the Certificate of Exemption

begin on the date of the original issuance of the Certificate of Exemption and be effective for a 3-year period.

Commercial activities exempted: (i) The prohibitions, as set forth in section 9(a)(1)(E) of the Act, to deliver, receive, carry, transport, or ship in interstate or foreign commerce, by any means whatsoever and in the course of a commercial activity any such species part;

(ii) The prohibitions, as set forth in section 9(a)(1)(F) of the Act, to sell or offer for sale in interstate or foreign commerce any such species part.

Parts or products exempted: Approximately 170.5 pounds of spermaceti.

3. Cape Cod Scrimshaw, Inc., 190 Longview Drive, Centerville, Mass. 02632.

Period of Exemption: The applicant requests that the period of time to be covered by the Certificate of Exemption begin on the date of the original issuance of the Certificate of Exemption and be effective for a 3-year period.

Commercial activities exempted: (i) The prohibition, as set forth in section 9(a)(1)(A) of the Act, to export any such species part from the United States; (ii) The prohibitions, as set forth in section 9(a)(1)(E) of the Act, to deliver, receive, carry, transport, or ship in interstate or foreign commerce, by any means whatsoever and in the course of a commercial activity any such species part;

(iii) The prohibitions, as set forth in section 9(a)(1)(F) of the Act, to sell or offer for sale in interstate or foreign commerce any such species part.

Parts or products exempted: Finished scrimshaw products consisting of approximately 237 jewelry items, 6 etched whale teeth and 4 items carved from whale teeth. Finished scrimshaw products to be made from approximately 33 whale teeth, 138 pieces cut from whale teeth, an additional 302.25 pounds of whale teeth, 111 pounds of whale tooth scrap and one sperm whale jaw bone.

Written comments on these applications may be submitted to the Director, National Marine Fisheries Service, Department of Commerce, Washington, D.C. 20235, on or before November 3, 1977.

Dated: September 26, 1977.

ENERGY RESEARCH AND
DEVELOPMENT ADMINISTRATION

[ERDA 1545-D]

ROCKY FLATS PLANT SITE; JEFFERSON
COUNTY, GOLDEN, COLO.

Availability of Draft Environmental Impact
Statement

Notice is hereby given that the Energy Research and Development Administration (ERDA) has issued the Draft Environmental Impact Statement, ERDA-1545-D, Rocky Flats Plant Site, Jefferson County, Golden, Colo., pursuant to ERDA's implementation of the National Environmental Policy Act of 1969. The statement was prepared to support

ERDA's continued operation of the Rocky Flats Plant and other activities at the Site. The statement assesses the potential cumulative environmental impacts associated with the current site activities and the operation of the plant and with the alternatives to current plant operations.

Copies of the draft environmental impact statement have been distributed for review and comment to appropriate Federal, Colorado State and local agencies, and other organizations and individuals who are known to have an interest in the activities at the Site. Copies have also been sent to those who provided comments and suggestions in response to the Federal Register notice (40 FR 24234) which announced that ERDA had commenced preparation of this statement, and solicited comments and suggestions. Copies of the statement are available for public inspection at the ERDA public document rooms located at:

ERDA Headquarters, 20 Massachusetts Avenue NW., Washington, D.C.
Albuquerque Operations Office, National Atomic Museum, Kirtland Air Force Base East, Albuquerque, N. Mex.
Chicago Operations Office, 9800 South Cass Avenue, Argonne, Ill.
Chicago Operations Office, 175 West Jackson Boulevard, Chicago, Ill.
Idaho Operations Office, 550 Second Street, Idaho Falls, Idaho.
Nevada Operations Office, 2753 South Highland Drive, Las Vegas, Nev.
Oak Ridge Operations Office, Federal Building, Oak Ridge, Tenn.
Richland Operations Office, Federal Building, Richland, Wash.
San Francisco Operations Office, 1333 Broadway, Oakland, Calif.
Savannah River Operations Office, Savannah River Plant, Aiken S.C.

In addition a copy will be placed in the:

Regional Energy Environmental Information Center, Denver Public Library, 1357 Broadway, Denver, Colo.

Comments and views concerning the draft environmental impact statement are requested from other interest agencies, organizations and individuals. Single copies of the statement will be furnished for review and comment upon request addressed to W. H. Pennington, Director, Office of NEPA Coordination, Mail Station E-201, Energy Research and Development Administration, Washington, D.C. 20545 (301-353-4241). Comments should be sent to the same address.

In accordance with the guidelines of the Council on Environmental Quality, those submitting comments on the draft environmental impact statement should endeavor to make their comments as specific, substantive, and factual as possible without undue attention to matters of fact in the impact statement. However, it would assist in the review of the comments if the comments were organized in a manner consistent with the structure of the draft environmental impact statement. Emphasis should be placed specifically on the assessment of the environmental impacts of continued

Plant operations, and the acceptability of those impacts on the quality of the environment, particularly as contrasted with the impacts of reasonable alternatives to the proposed action. Commenting entities may recommend modifications and or new alternatives that will enhance environmental quality and avoid or minimize adverse environmental impacts.

Copies of comments received on the draft environmental impact statement will be placed in the above referenced locations for inspection and will be considered in the preparation of the final environmental impact statement. If received within 90 days of this notice.

Dated at Germantown, Md., this 23rd day of September 1977.

For the Energy Research and Development Administration.

JAMES L. LIVERMAN,
Assistant Administrator for
Environment and Safety.

[FRL 801-1; OPP-00060]

FEDERAL INSECTICIDE, FUNGICIDE, AND RODENTICIDE ACT SCIENTIFIC ADVISORY PANEL

Meeting

AGENCY: Office of Pesticide Programs, Environmental Protection Agency (EPA).

ACTION: Notice of open meeting.

SUMMARY: There will be a two-day meeting of the Federal Insecticide Fungicide, and Rodenticide Act (FIFRA) Scientific Advisory Panel from 9 a.m. to 4:30 p.m. daily on Tuesday, October 25, and Wednesday, October 26, 1977. The meeting will be held in Room 2117, Waterside Mall, 401 M Street SW., Washington, D.C. 20460, and will be open to the public.

FOR FURTHER INFORMATION CONTACT:

Dr. H. Wade Fowler, Jr., Executive Secretary, FIFRA Scientific Advisory Panel, Office of Pesticide Programs, Rm. 803 (WH-566-CM No. 2), Crystal Mall, Building 2, 1921 Jefferson Davis Highway, Arlington, Va., telephone 703-557-7560.

SUPPLEMENTARY INFORMATION: In accordance with section 25(d) of the amended FIFRA, the Scientific Advisory Panel will comment on the impact on health and the environment of regulatory actions under sections 6(b) and 25(a) prior to implementation. The purpose of this meeting is to discuss the following topics:

1. Continue preliminary review of Subpart F of the Guidelines for Registering Pesticides in the United States, entitled, "Hazard Evaluation: Humans and Domestic Animals."

2. Briefing on minor revisions of Section 19 Regulations on Pesticide Disposal and Storage.

3. In addition, the Agency may present a status report on the pesticide endrin.

Any member of the public wishing to attend or submit a paper should contact Dr. N. Wade Fowler, Jr., at the address or phone listed above. Interested persons are permitted to file written statements before or after the meeting, and may upon advance notice to the Executive Secretary, present oral statements to the extent that time permits. Written or oral statements will be taken into consideration by the Panel in formulating comments or in deciding to waive comments. Persons desirous of making oral statements must notify the Executive Secretary and submit four copies of a summary not later than October 21, 1977.

Individuals who wish to file written statements are advised to submit ten copies of statements to the Executive Secretary in a timely manner to ensure appropriate consideration by the Panel.

Dated: September 28, 1977.

EDWIN L. JOHNSON,
Deputy Assistant Administrator
for Pesticide Programs.

PESTICIDE PROGRAMS

Linuron; Establishment of Temporary Tolerances

E. I. du Pont de Nemours and Co., Inc., Wilmington, Del. 19898, has submitted a pesticide petition (PP 6G1791) to the Environmental Protection Agency (EPA). This petition requests that temporary tolerances be established for residues of the herbicide linuron (3-(3,4-dichlorophenyl)-1-methoxy-1-methylurea) in or on the raw agricultural commodities sugar beet roots at 0.2 part per million (ppm) and sugar beet tops at 1.0 ppm. (A related document establishing a feed additive regulation for residues of linuron on dried sugar beet pulp appears elsewhere in today's FEDERAL REGISTER.)

Establishment of these temporary tolerances will permit the marketing of the above raw agricultural commodities when treated in accordance with an experimental use permit that is being issued concurrently under the Federal In-

secticide, Fungicide, and Rodenticide Act, as amended (86 Stat. 973, 89 Stat. 751; 7 U.S.C. 136(a) et seq.).

An evaluation of the scientific data reported and other relevant material has shown that the requested tolerances are adequate to cover residues resulting from the proposed experimental use, and it has been determined that the temporary tolerances will protect the public health. The temporary tolerances are established for the pesticide, therefore, with the following provisions:

1. The total amount of the pesticide to be used must not exceed the quantity authorized by the experimental use permit.
2. E. I. du Pont de Nemours and Co. must immediately notify the EPA of any findings from the experimental use that have a bearing on safety. The firm must also keep records of production, distribution, and performance and on request make records available to any authorized officer or employee of the EPA or the Food and Drug Administration.

These temporary tolerances expire September 28, 1978. Residues not in excess of 0.2 ppm in sugar beet roots and 1 ppm in sugar beet tops after this expiration date will not be considered actionable if the pesticide is legally applied during the term of and in accordance with the provisions of the experimental use permit and temporary tolerances. These temporary tolerances may be revoked if the experimental use permit is revoked or if any scientific data or experience with this pesticide indicates such revocation is necessary to protect the public health. Inquiries concerning this notice may be directed to the Special Registrations Section, Registration Division (WH-567), Office of Pesticide Programs, Room 315, East Tower, 401 M St. SW., Washington D.C. 20460 (202-755-4851).

Dated: September 28, 1977.

"Section 408(j) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 346a(j))."

DOUGLAS D. CAMPBELL,
Acting Director,
Registration Division.

SCIENCE ADVISORY BOARD, ENVIRONMENTAL MEASUREMENTS ADVISORY COMMITTEE

Open Meeting

Pursuant to Pub. L. 92-463, notice is hereby given that a meeting of the Environmental Measurements Advisory Committee will be held beginning at 9 a.m. on October 24, 1977, in the Lobby Conference Room of the Holiday Inn, 1489 S. Jefferson Davis Highway, Arlington, Va.

This is the eighth meeting of the Committee. The Agenda includes current activities of the Science Advisory Board; report by the Chairman of the EPA Air and Water Monitoring Strategies Task Group; discussion of suitable topics for anticipatory research in environmental

measurements and monitoring; review of plans and schedules for future meetings of the committee; and member items of interest.

The meeting is open to the public. Any member of the public wishing to attend or obtain additional information should contact Dr. A. F. Forziati, Acting Executive Secretary, Environmental Measurements Advisory Committee, 202-245-3027, by close of business on October 17, 1977, as visitor space is limited.

RICHARD M. DOWD,
Staff Director,
Science Advisory Board.

FEDERAL ENERGY ADMINISTRATION

ISSUANCE OF PROPOSED DECISIONS AND ORDERS BY THE OFFICE OF EXCEPTIONS AND APPEALS

September 15 Through September 16, 1977

Notice is hereby given that during the period from September 15 through September 16, 1977, the Proposed Decisions and Orders which are summarized below were issued by the Federal Energy Administration's Office of Exceptions and Appeals with regard to Applications for Exception which had been filed with that Office.

Amendments to the FEA's procedural regulations, 10 CFR, Part 205, were issued in proposed form on September 14, 1977 (41 FR 47210; September 20, 1977), and are currently being implemented on an interim basis. Under the new procedures any person who will be aggrieved by the finalization of a Proposed Decision and Order issued with regard to an application for exception may file a written Notice of Objection within ten days of service. For purposes of the new procedures, the date of service of notice shall be deemed to be the date of publication of this Notice or the date of receipt by an aggrieved person of actual notice, whichever occurs first. The new procedures also specify that if a Notice of Objection is not received from any aggrieved party within the time period specified in the regulations, a Proposed Decision and Order will become a final order. Any aggrieved party that wishes to contest any finding or conclusion contained in a Proposed Decision and Order must also file a detailed Statement of Objections within 30 days of the date of service of the Proposed Decision and Order. In that Statement of Objections an aggrieved party must specify each issue of fact or law contained in the Proposed Decision and Order which it intends to contest in any further proceeding involving the exception matter.

Copies of the full text of these Proposed Decisions and Orders are available in the Public Docket Room of the Office of Private Grievances and Redress, Room

B-120, 2000 M Street NW., Washington, D.C. 20461. Monday through Friday, between the hours of 1 p.m. and 5 p.m., e.d.t., except Federal holidays.

SEPTEMBER 27, 1977.

ERIC J. FYGI,
Acting General Counsel.

PROPOSED DECISIONS AND ORDERS

Charter Oil Co.; Jacksonville, Fla.; FFE-FXE-4448; Crude Oil

On July 22, 1977, the Charter Oil Co. filed an Application for Exception from the provisions of 10 CFR 211.67 (the Old Oil Entitlements Program). The request, if granted, would relieve Charter of its obligation to purchase entitlements beginning with the month of September 1977. On September 16, 1977, the FEA issued a Proposed Decision and Order in which it determined that the request be granted.

George A. Hoffman; Henderson, Ky.; FEE-4041; Crude Oil

On April 15, 1977, George A. Hoffman filed an Application for Exception from the provisions of 6 CFR, Part 150, Subpart L and 10 CFR, Part 212, Subpart D. The exception request, if granted, would permit Hoffman to retain the revenues which he realized during the period November 1, 1973 through December 31, 1975 from charging prices for crude oil produced from the Edward Bohnhoff Lease which exceeded the applicable ceiling prices. On September 16, 1977, the FEA issued a Proposed Decision and Order which determined that the exception request be granted in part.

Special Jet Services, Inc.; West Mifflin, Pa.; FEE-3922; Aviation Fuels

Special Jet Services, Inc. filed an Application for Exception from the provisions of 10 CFR 212.93. The exception request, if granted, would permit Special Jet to increase its selling prices for aviation fuel above the maximum permissible levels specified in 10 CFR 212.93. On September 15, 1977, the FEA issued a Proposed Decision and Order which determined that the exception request be denied.

4-Way Grocery; Molalla, Ore.; FEE-4284; Motor Gasoline

The 4-Way Grocery filed an Application for Exception from the provisions of 10 CFR 211.9. The exception request, if granted, would result in the issuance of a Decision and Order terminating 4-Way's supplies/purchaser relationship with its base period supplier of motor gasoline, then Stein Oil Co., and substituting the Union Oil Co. of California as its current supplier. On September 16, 1977, the FEA issued a Proposed Decision and Order which determined that the exception request be denied.

[3128-01]

ISSUANCE OF PROPOSED DECISIONS AND ORDERS BY THE OFFICE OF EXCEPTIONS AND APPEALS

September 19 Through September 21, 1977

Notice is hereby given that during the period from September 19 through September 21, 1977, the Proposed Decisions and Orders which are summarized below were issued by the Federal Energy Administration's Office of Exceptions and Appeals with regard to Applications for

Exception which had been filed with that Office.

Amendments to the FEA's procedural regulations, 10 CFR, Part 205, were issued in proposed form on September 14, 1977 (41 FR 47210; September 20, 1977), and are currently being implemented on an interim basis. Under the new procedures any person who will be aggrieved by the finalization of a Proposed Decision and Order issued with regard to an application for exception may file a written Notice of Objection within ten days of service. For purposes of the new procedures, the date of service of notice shall be deemed to be the date of publication of this Notice or the date of receipt by an aggrieved person of actual notice, whichever occurs first. The new procedures also specify that if a Notice of Objection is not received from any aggrieved party within the time period specified in the regulations, a Proposed Decision and Order will become a final order. Any aggrieved party that wishes to contest any finding or conclusion contained in a Proposed Decision and Order must also file a detailed Statement of Objections within 30 days of the date of service of the Proposed Decision and Order. In that Statement of Objections an aggrieved party must specify each issue of fact or law contained in the Proposed Decision and Order which it intends to contest in any further proceeding involving the exception matter.

Copies of the full text of these Proposed Decisions and Orders are available in the Public Docket Room of the Office of Private Grievances and Redress, Room B-120, 2000 M Street NW., Washington, D.C. 20461. Monday through Friday, between the hours of 1 p.m. and 5 p.m., e.d.t., except Federal holidays.

ERIC J. FYGI,
Acting General Counsel.

SEPTEMBER 27, 1977.

PROPOSED DECISIONS AND ORDERS

Little America Refining Co.; Evansville, Wyo.; FFE-4462; Crude Oil

On August 1, 1977, the Little America Refining Co. filed an Application for Exception from the provisions of 10 CFR 211.67 (the Old Oil Entitlements Program). The exception request, if granted, would relieve the firm of its entitlements purchase obligations commencing with the month of September 1977. On September 19, 1977, the FEA issued a Proposed Decision and Order which determined that the exception request be granted in part.

Skelton Operating Co., Inc.; Jackson, Miss.; FEE-4407; Crude Oil

On July 26, 1977, Skelton Operating Co., Inc. filed an Application for Exception from the provisions of 10 CFR, Part 212, Subpart D. The exception request, if granted, would permit Skelton to sell at upper tier ceiling prices the crude oil that is produced on behalf of the working interest owners of the Lee Beard No. 2 well, located on the Diamond Field, in Wayne County, Miss. On September 19, 1977 the FEA issued a Proposed Decision and Order which determined that the exception request be denied.

REQUESTS FOR EXCEPTION RECEIVED FROM NATURAL GAS PROCESSORS

The Office of Exceptions and Appeals of the Federal Energy Administration has issued proposed Decisions and Orders granting exception relief from the provisions of 10 CFR 212.165 to the natural gas processors listed below. The proposed exception relief would permit the firms involved to increase the prices of the production of the gas plants listed below to reflect certain non-product cost increases.

PROPOSED INDIANA GAS CO. SYNTHETIC NATURAL GAS PLANT

Availability of Final Environmental Impact Statement

AGENCY: Federal Energy Administration.

ACTION: Notice of availability.

SUMMARY: The Federal Energy Administration (FEA) hereby gives notice

of the availability of the final environmental impact statement (EIS) on the proposed Indiana Gas Co. synthetic natural gas (SNG) plant. The Indiana Gas Co.'s proposed SNG plant will be located in Pike Township, a rural suburb of Indianapolis. This plant will have the capacity to produce 60,000 mcf (thousand cubic feet) of SNG per day or 20,820,000 mcf annually based on 347 days of operation. The feedstock will be naphtha supplied by the LaGloria Oil and Gas Co.

DATE: Comments by November 3, 1977.

ADDRESS: Written comments to: Executive Communications, Box PV, Room 3317, Federal Energy Administration (Department of Energy), Washington, D.C. 20461.

FOR FURTHER INFORMATION CONTACT:

Finn K. Neilsen (Regulatory Programs), Room 6318, 2000 M Street NW., Washington, D.C. 20461 (202-254-9730).
Robert J. Stern (Office of Environmental Impact), Room 7119, Federal Building, 12th and Pennsylvania Avenue NW., Washington, D.C. 20461 (202-566-9760).

Janine Landow-Esser (Office of General Counsel), Room 5113, Federal Building, 12th and Pennsylvania Avenue NW., Washington, D.C. 20461 (202-566-9380).

SUPPLEMENTARY INFORMATION: On December 23, 1976, the FEA made available to the Council on Environmental Quality and the public a draft EIS concerning the allocation of SNG feedstocks to the proposed Indiana Gas Co. plant (41 FR 56842). A public hearing was held on January 25, 1977, to receive comments from interested parties. The written comment period closed on April 8, 1977. On August 5, 1977, FEA made available to the Council on Environmental Quality and the public a supplement to the draft EIS (42 FR 40019). The written comment period on this supplement closed on September 19, 1977.

COMMENT PROCEDURE: Single copies of the Indiana Gas Co. final EIS (FES 77-1) are available upon request from the National Energy Information Center, Room 1404, 12th and Pennsylvania Avenue NW., Washington, D.C. 20461. Copies of the EIS will also be available for public review in the FEA Freedom of Information Reading Room, Room 2107, 12th and Pennsylvania Avenue NW., Washington, D.C. between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

Interested parties are invited to submit written comments with respect to the final EIS to Executive Communications, Box PV, Room 3317, 12th and Pennsylvania Avenue NW., Washington, D.C. 20461. Comments should be identified on the outside of the envelope and on the documents submitted to FEA with the designation "Indiana Gas Company Final EIS (FES 77-1)." Ten copies should be submitted. All comments

should be received by FEA no later than November 3, 1977, in order to ensure consideration.

Any information or data considered by the person furnishing it to be confidential must be so identified and submitted in one copy only, in accordance with the procedures set forth at 10 CFR 205.9 (f). Any material not accompanied by a statement of confidentiality will be considered to be non-confidential. FEA reserves the right to determine the confidential status of the information or data and to treat it according to that determination.

Issued in Washington, D.C., September 29, 1977.

ERIC J. FYGE,
Acting General Counsel,
Federal Energy Administration.

FEDERAL HOME LOAN BANK BOARD FEDERAL SAVINGS AND LOAN ADVISORY COUNCIL

Meeting

SEPTEMBER 28, 1977.

Pursuant to Section 10(a) of Pub. L. 92-463, entitled the Federal Advisory Committee Act, notice is hereby given of the meeting of the Federal Savings and Loan Advisory Council on Monday, Tuesday, and Wednesday, November 7, 8, and 9, 1977. The meeting will commence at 9 a.m. on November 7 and 8, and 7:30 a.m. on November 9. The locations of the meetings are listed below:

MONDAY, NOVEMBER 7
9:30 a.m. Conference Level, Hyatt Regency Washington

Hiring and promotion policies.
Memorandum R-41—Guidelines Regarding Procedures and Management.
Loans to one borrower.
Liquidity and reserves on collateralized savings deposits of a public unit.
Appraiser instructions regarding real estate owned.
Need for land acquisition and development loans to sustain housing.
Status of RSU program.
Discussion of Memorandum R-42—Guidelines for determining the reasonableness of compensation and fees paid to officers, directors, and attorneys.

2 p.m. Federal Home Loan Bank Board Building

Savings and loan involvement in urban lending.
Mobile home lending.
Service corporation rule change 77-337 dated 6-1-77.
Review of asset limitations on real estate loan investments.
Review of net worth regulations.
IRA, Keogh, and pension funds insurance.
Modification of appraisal requirements.
Savings and Loan Association to act as trustees for pensions and profit sharing plans.

TUESDAY, NOVEMBER 8

9 a.m. Federal Home Loan Bank Board Building

Continued discussion of Monday afternoon topics.

2 p.m., Conference Level, Hyatt Regency Washington

General discussion.

WEDNESDAY, NOVEMBER 9

7:30 a.m., Conference Level, Hyatt Regency Washington

General discussion.

The meeting of the Federal Savings and Loan Advisory Council is open to the public.

ROBERT H. MCKINNEY,
Chairman.

FEDERAL MARITIME COMMISSION PACIFIC STRAITS CONFERENCE AND PACIFIC INDOONESIAN CONFERENCE

Agreement Filed

Notice is hereby given that the following agreement has been filed with the Commission for approval pursuant to section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, 46 U.S.C. 814).

Interested parties may inspect and obtain a copy of the agreement at the Washington office of the Federal Maritime Commission, 1100 L Street NW., Room 10126; or may inspect the agreement at the Field Offices located at New York, N.Y., New Orleans, La., San Francisco, Calif. and San Juan, Puerto Rico. Comments on such agreements, including requests for hearing, may be submitted to the Secretary, Federal Maritime Commission, Washington, D.C. 20573, on or before October 24, 1977. Any person desiring a hearing on the proposed agreement shall provide a clear and concise statement of the matters upon which they desire to adduce evidence. An allegations of discrimination or unfairness shall be accompanied by a statement describing the discrimination or unfairness with particularity. If a violation of the Act or detriment to the commerce of the United States is alleged, the statement shall set forth with particularity the acts and circumstances said to constitute such violation or detriment to commerce.

A copy of any such statement should also be forwarded to the party filing the agreement (as indicated hereinafter) and the statement should indicate that this has been done.

Notice of agreements filed by:

H. R. Rollins, Secretary, Pacific Straits Conference, Pacific Indonesian Conference, 635 Sacramento Street, San Francisco, Calif. 94111.

Agreements Nos. 5680-26 and 6060-22 are substantially similar modifications of, respectively, the Pacific Straits Conference's and the Pacific Indonesian Conference's basic agreements which have been entered into by the member lines of each of the two conferences for the primary purpose of modifying the conferences' self-policing provisions. In particular, it is proposed to replace the

present conference arbitration procedure of self-policing with a neutral body system of self-policing.

In addition, Agreement No. 6060-22 deletes in its entirety the present Appendix thereto, and replaces it with a revised Appendix restricted to only those matters considered by the Conference members to be of legitimate Section 15 concern. Conference matters which the members consider to be of a purely internal nature and, therefore, not subject to Section 15 approval, have been transferred to a new Administrative Regulations section. In consequence of the above changes, Agreement No. 6060-22 modifies the approved basic agreement by making necessary conforming changes to the basic agreement.

By Order of the Federal Maritime Commission.

Dated: September 28, 1977.

FRANCIS C. HURNEY,
Secretary.

[6730-01]

[Docket No. 77-48]

SEA-LAND SERVICE, INC.

General Increase in Rates in the U.S. West Coast/Puerto Rico Trade; Order of Investigation and Suspension

Effective September 29, 1977, Sea-Land Service, Inc. (Sea-Land) proposes to increase all of its ocean freight rates between U.S. West Coast ports and ports in Puerto Rico by 24 percent. The increase was filed with the Commission on August 30, 1977, and was accompanied by supporting financial data pursuant to Amendment 1 to General Order 11 (46 CFR 512.3(d)(1)).

Protests and inquiries have been received concerning the reasonableness of Sea-Land's proposed general increase from Omak Industries, Inc.; Puerto Rico Manufacturers Association; Star-kist Foods, Inc.; C. E. Grosjean Rice Milling Co. and Hunt-Wesson Foods, Inc. Generally, the protestants contend that the increase will have serious detrimental effects upon both their ability to do business in Puerto Rico and the Puerto Rican economy as a whole, or they request that the Commission carefully examine Sea-Land's increase to make certain that it is the minimum amount necessary to insure adequate transportation service.

Both the actual and projected data Sea-Land submitted for its proposed increase employed allocations using container statistics. General Order 11 requires the use of revenue ton statistics. Sea-Land contends that the two methods of allocation produce the same results. We do not agree.

Sea-Land submitted a Report of Rate Base and Income Account which used container-mile allocations in support of its April 1, 1977 general rate increase. By coincidence this data involved the same time period as Sea-Land's annual report for 1976. The annual report was

calculated using revenue ton-mile allocations. A comparison of these reports reveals that the use of container-mile allocations resulted in a significantly lower rate of return than would have resulted if revenue ton-mile allocations had been made. A similar difference could occur relative to the subject increase. Since both the actual and projected data submitted for the current increase employed container statistics, we feel that the rates of return for each report could be significantly understated.

Due to this area of concern relative to financial data submitted by Sea-Land, the Commission is of the opinion that the proposed general rate increase should be made the subject of an investigation to determine whether it is unjust, unreasonable or otherwise unlawful under Section 18(a) of the Shipping Act, 1916, and/or Section 4 of the Intercoastal Shipping Act, 1933. The Commission is of the further opinion that the involved tariff matter should be suspended pursuant to the authority granted the Commission by Section 3 of the Intercoastal Shipping Act, 1933.

It is the Commission's intention to expeditiously resolve the issues in this proceeding. Particular attention is invited to our Order dated March 23, 1977 in which this Commission announced its policy of avoidance of trial-type oral hearings. Commensurate with this policy, the Commission's Rules of Practice and Procedure (46 CFR 502.67(c)) were amended to provide for an expedited procedure in general revenue proceedings. An expedited procedure is herein ordered to enable the Commission to discharge the mandate imposed by Section 3 of the Intercoastal Shipping Act, 1933 to give preference to proceedings in which this Section is invoked "and decide the same as speedily as possible." In the fulfillment of its obligation to speedily decide the issues in this proceeding the Commission directs the respondent, intervenors and Hearing Counsel to exchange among themselves, information in support of their respective positions and wherever possible to enter into stipulations.

Now, therefore, it is ordered, That pursuant to Sections 18(a) and 22 of the Shipping Act, 1916, and Sections 3 and 4 of the Intercoastal Shipping Act, 1933, an investigation is hereby instituted to determine the lawfulness of Supplement No. 1 to Sea-Land Service, Inc. Tariff FMC-F No. 29, for the purpose of making such findings as the facts and circumstances warrant;

It is further ordered, That Sea-Land Service, Inc. be named Respondent in this proceeding;

It is further ordered, That Respondent furnish the Commission with financial data for the actual year ending June 30, 1977 and the projected year ending September 30, 1978 as required by Amendment 1 to General Order 11 (46 CFR 2(d)(1)) using revenue ton allocations as required by General Order 11, (46 CFR 514);

It is further ordered, That the parties submit to the Secretary, not later than October 28, 1977 individual or joint recommendations to the Commission identifying all unresolved issues and specifying the type of procedure best suited to resolve them. After consideration of these recommendations, the Commission will issue an appropriate order limiting the issues and establishing the procedure for their resolution or, alternatively, refer the matter to the Office of Administrative Law Judges for the establishment of such a procedure.

It is further ordered, That pursuant to Section 3 of the Intercoastal Shipping Act, 1933, Supplement No. 1 to Sea-Land Service, Inc. Tariff No. 29 is hereby suspended and the use thereof deferred to and including January 29, 1978 unless otherwise ordered by the Commission.

It is further ordered, That Sea-Land Service, Inc. file immediately a supplement to the aforementioned tariff matter, which supplement shall bear no effective date, shall reproduce this Order in its entirety, and shall state that the aforesaid matter is suspended and may not be used until January 29, 1978 and that the suspended matter may not be changed until this proceeding has been disposed of or until the period of suspension has expired; and that the rates, fares, charges, classifications, rules, regulations or practices in effect prior to the date of this Order and which were to be changed by the suspended tariff matter, or part or parts thereof, shall remain in effect during the period of suspension, unless otherwise ordered by the Commission.

It is further ordered, That this investigation determine whether the gross revenue to be derived from the proposed rate changes is just and reasonable. Evidence as to the effect of the proposed changes on the movement of any particular commodity or commodities will be considered relevant to this basic issue and may be used to determine what overall revenue will, in fact, be derived. However, the question of reasonableness of any particular rate will be affected by an order that may result from this proceeding only insofar as a finding is made regarding the reasonableness of the overall rate level of which the particular rate is a part.

It is further ordered, That shippers or other persons complaining about the level of any particular commodity rate may file a complaint pursuant to Section 22 of the Shipping Act, 1916 (46 USC 821) and litigate the issue of reasonableness of such rate with respect to cost of service, value of service and any other applicable ratemaking factors. They may also petition for leave to intervene in this proceeding provided that they will not broaden the issue described above and that they meet the other tests prescribed by Rule 72 of the Commission's Rules of Practice and Procedure (46 CFR 502.72).

It is further ordered, That any changes or amendments to the tariff of Sea-Land Service, Inc. as may be filed during the

pendency of this investigation will be included in this investigation subject to the foregoing unless, as a result of such changes or amendments, more than 50 percent of Sea-Land's tariff items are increased or decreased by 3 percent or more, or the gross revenue of Sea-Land Service, Inc. will increase or decrease by 3 percent or more.

It is further ordered, That during the pendency of this investigation Sea-Land Service, Inc. will serve the Secretary of the Commission and all parties of record with notice of any tariff changes affecting any of the ten leading commodities as reported pursuant to 46 CFR 512.25 at the same time such changes are filed with the Commission.

It is further ordered, That copies of this Order shall be filed with the appropriate tariff schedules in the Bureau of Compliance of the Federal Maritime Commission.

It is further ordered, That (1) a copy of this Order be served upon Respondent, and upon this Commission's Bureau of Hearing Counsel, and published in the Federal Register.

All persons (including individuals, corporations, associations, firms, partnerships and public bodies) having an interest in this proceeding and desiring to intervene therein should notify the Secretary of the Commission promptly and file petitions for leave to intervene in accordance with Rule 72 of the Commission's Rules of Practice and Procedure (46 CFR 502.72) with a copy to all parties to this proceeding.

By the Commission:

FRANCIS C. HURNEY,
Secretary.

[6730-01]

[Docket No. 77-49]

UNITED STATES LINES, INC.

General Increase in Rates in the U.S. Mainland/Guam Trade; Order of Investigation and Suspension

Effective September 29, 1977, United States Lines, Inc. (USL) proposes to increase its ocean freight rates and charges between U.S. East Coast, U.S. West Coast, Hawaiian Ports and Guam Ports by 5 percent. The increases were filed with the Commission on August 26 and 29, 1977 and were accompanied by supporting financial and operating data pursuant to Commission General Order No. 11, 46 CFR 512.

A protest and petition for suspension and investigation was received relative to the reasonableness of USL's proposed increase from the Government of Guam (Guam). Generally, Guam contends that the proposed increase is not cost justified and that its implementation would inflict severe economic consequences upon Guam and its citizens and requests that the Commission suspend the proposed increase and initiate an appropriate investigation.

Examination of USL's financial and operating data disclosed that the carrier is earning, and will continue to earn what may be inordinately high profits in its Guam service. It appears that this condition would prevail whether the carrier effects its proposed increases or not. Due to the level of these profits, the Commission is of the opinion that USL's proposed general increase should be made the subject of an investigation to determine whether they are unjust, unreasonable or otherwise unlawful under Section 18(a) of the Shipping Act, 1916, and/or Section 4 of the Intercoastal Shipping Act, 1933. Further, the Commission is of the opinion that the involved tariff matter should be suspended pursuant to Section 3 of the Intercoastal Shipping Act, 1933.

Now, therefore, it is ordered, That pursuant to the authority of Sections 18(a) and 22 of the Shipping Act, 1916, as amended, and Section 4 of the Intercoastal Shipping Act, 1933, an investigation is hereby instituted into the lawfulness of the tariff matter listed in Supplement No. 6 to USL Tariff FMC-F No. 52 and in Supplement No. 2 to USL Tariff FMC-F No. 58 for the purpose of making such findings as the facts and circumstances warrant.

It is further ordered, That pursuant to Section 3 of the Intercoastal Shipping Act, 1933, the tariff matter set forth in Supplement No. 6 to USL Tariff FMC-F No. 52 and in Supplement No. 2 to USL Tariff FMC-F No. 58 is hereby suspended and the use thereof deferred to and including January 23, 1978, unless otherwise ordered by the Commission.

It is further ordered, That there shall be filed immediately by USL consecutively numbered supplements to the aforementioned tariffs which supplements shall bear no effective date, shall reproduce this Order in its entirety and shall state that the aforesaid matter is suspended and may not be used until January 29, 1978, and that the suspended matter may not be changed until this proceeding has been disposed of or until the period of suspension has expired and that the rates, fares, charges, classifications, rules, regulations or practices in effect prior to the date of this Order and which were to be changed by the suspended tariff matter, or part or parts thereof, shall remain in effect during the period of suspension, unless otherwise ordered by the Commission.

It is further ordered, That this investigation determine whether the gross revenue to be derived from the proposed rate changes is just and reasonable. Evidence as to the effect of the proposed changes on the movement of any particular commodity or commodities will be considered relevant to this basic issue and may be used to determine what overall revenue will, in fact, be derived. However the question of reasonableness of any particular commodity rate is not an issue for determination in this proceeding. A particular rate will be affected by an order that may result from this proceeding only insofar as a finding is

made regarding the reasonableness of the overall rate level of which the particular rate is a part;

It is further ordered, That shippers or other persons complaining about the level of any particular commodity rate may file a complaint pursuant to Section 22 of the Shipping Act, 1916 (46 U.S.C. 821) and litigate the issue of reasonableness of such rate with respect to cost of service, value of service and any other applicable ratemaking factors. They may also petition for leave to intervene in this proceeding provided that they will not broaden the issue described above and that they meet the other tests prescribed by Rule 72 of the Commission's Rules of Practice and Procedure, 46 CFR 502.72;

It is further ordered, That during the pendency of this investigation, USL will serve the presiding officer and all parties of record with notice of any tariff changes affecting any of the ten leading commodities as reported pursuant to 46 CFR 512.25 at the same time such changes are filed with the Commission.

It is further ordered, That this proceeding be assigned for public hearing before an Administrative Law Judge of the Commission's Office of Administrative Law Judges and that the hearing be held at a date and place to be determined by the Presiding Administrative Law Judge, but in any event, the hearing date shall be set no later than January 13, 1978.

The hearing shall include oral testimony and cross-examination in the discretion of the presiding officer only upon a proper showing that there are genuine issues of material fact that cannot be resolved on the basis of sworn statements, affidavits, depositions, or other documents or that the nature of the matters in issue is such that an oral hearing and cross-examination are necessary for the development of an adequate record;

It is further ordered, That (1) a copy of this Order be forthwith served upon the respondent and upon the Commission's Bureau of Hearing Counsel and published in the Federal Register, and (2) the respondent and Hearing Counsel be duly served with notice of time and place of hearing.

All persons (including individuals, corporations, associations, firms, partnerships and public bodies) having an interest in this proceeding and desiring to intervene herein should notify the Secretary of the Commission promptly and file petitions for leave to intervene in accordance with Rule 72 of the Commission's Rules of Practice and Procedure (46 CFR 502.72) with a copy to all parties to the proceeding.

By the Commission.

FRANCIS C. HURNEY,
Secretary.

[6740-02]

FEDERAL POWER COMMISSION

[Docket No. ER76-92]

CENTRAL TELEPHONE & UTILITIES CORP.

Compliance Filing

SEPTEMBER 28, 1977.

Take notice that Central Telephone & Utilities Corp. on August 25, 1977, tendered for filing revised Schedules 77-CWh-2 and 77-MWh-5, pursuant to ordering paragraph (C) of the Commission's Order issued July 26, 1977, in Docket No. ER76-92.

A copy of this filing has been mailed to all parties in the subject proceeding.

Any person desiring to protest said application should file a protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with § 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.10). All protests should be filed on or before October 5, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc. 77-29053 Filed 10-3-77; 8:45 am]

[6740-02]

[Docket No. R177-129]

COASTAL STATES GAS PRODUCING CO.

Petition for Special Relief

SEPTEMBER 28, 1977.

Take notice that on September 7, 1977, Coastal States Gas Producing Co. (Petitioner), 5 Greenway Plaza East, Houston, Tex. 77046, filed in Docket No. R177-129 a petition for special relief pursuant to §§ 2.56a(g) and 2.76 of the Commission's Statements of General Policy and Interpretation (18 CFR 2.56a(g), 2.76).

Petitioner seeks to collect a rate of \$2.69 for the sale of natural gas to Transcontinental Gas Pipe Line Corporation from its 43.75 percent working interest in wells located in Blocks 255 and 241, Offshore Texas. Petitioner proposes no additional investment.

It appears reasonable and consistent with the public interest to prescribe a period shorter than ten days for filing protests and petitions to intervene. Accordingly, any person desiring to be heard or to make any protest with reference to said petition should on or before October 7, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice

and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any party wishing to become a party to a proceeding, or to participate as a party in any hearing therein, must file a petition to intervene in accordance with the Commission's Rules.

KENNETH F. PLUMB,
Secretary.

[6740-02]

[Docket No. CP77-623]

COLUMBIA GULF TRANSMISSION CO. AND COLUMBIA GAS TRANSMISSION CORP.

Application

SEPTEMBER 28, 1977.

Take notice that on September 19, 1977, Columbia Gas Transmission Corp. (Columbia Transmission), 1700 MacCorkle Avenue SE., Charleston, W. Va. 25314, and Columbia Gulf Transmission Co. (Columbia Gulf), 3805 West Alabama Avenue, Houston, Tex. 77027 (Applicants), filed in Docket No. CP77-623 a joint application pursuant to Section 7 of the Natural Gas Act and § 2.79 of the Commission's General Policy and Interpretations (18 CFR 2.79) for a certificate of public convenience and necessity authorizing the transportation of up to 160 Mcf of natural gas per day for two years for E. R. Carpenter Company, Inc. (Carpenter), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicants request authorization to transport up to 160 Mcf of natural gas per day for Carpenter which volumes Columbia Gulf would receive from Tennessee Gas Pipeline Co., a Division of Tenneco Inc. (Tennessee), at mutually agreeable existing points of exchange in the State of Louisiana, and redeliver such volumes to Columbia Transmission for Carpenter's account. It is stated that Columbia Transmission would receive the subject gas delivered to it by Columbia Gulf for Carpenter's account in Boyd County, Ky. at an existing point of delivery and would transport and redeliver such gas to CNG Transmission Company (CNG) at an existing point of delivery in Greene County, Va. CNG, in turn, would deliver the transported volumes to the City of Richmond (City) for ultimate delivery to Carpenter for use in its Richmond, Va. plant, it is said.

Applicants indicate that Carpenter has contracted with its wholly-owned subsidiary Carpenter Oil and Gas Co. (Carpenter Oil) to purchase the subject gas proposed herein to be transported. It is stated that Carpenter Oil would sell Carpenter its total interest in Well No. 3,

Lac Blanc Field, Vermillion Parish, La., which interest is approximately 700 Mcf per day of natural gas production, at a cost of \$1.75 per Mcf for the entire 2-year term. Carpenter Oil affirms that the gas to be transported hereunder has not been dedicated to the interstate market and it would not be willing to sell the gas on a jurisdictional basis, it is said.

It is stated that Columbia Gulf would make a charge, which is currently 29.34 cents per Mcf for the proposed transportation service and would retain for company-use and unaccounted-for gas a percentage of the total volume of gas delivered into its system by Tennessee for Carpenter's account, which percentage is currently 2.5 percent. It is further stated that Columbia Transmission would make a transportation charge, which is currently 22.21 cents per Mcf and would retain for company-use and unaccounted-for gas a percentage of the total volume of gas delivered into its system by Columbia Gulf for Carpenter's account, which percentage is currently 3.1 percent.

Applicants indicate that the gas to be transported hereunder is for Priority 2 uses for which alternative fuels are not feasible since the products produced at Carpenter's Richmond plant would be contaminated by the by-products of combustion of alternate fuels. Applicants assert that Carpenter's Richmond plant is a customer of City on a firm basis and has been advised that severe curtailment can be expected for the next two years. Carpenter's Richmond facility manufactures cushioning products used in furniture, bedding, automotive seating, carpet cushioning and related uses, it is indicated.

Applicants state that they would not be required to construct any additional facilities to perform the transportation service requested herein.

Any person desiring to be heard or to make any protest with reference to said application should on or before October 12, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required

herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[FR Doc 77 29055 Filed 10 3 77;8:45 am]

[6740-02]

[Docket No. R177-127]

MAURICE L. BROWN CO.

Petition for Special Relief

SEPTEMBER 28, 1977.

Take notice that on September 6, 1977, The Maurice L. Brown Co. (Petitioner), filed in Docket No. R177-127 a petition for special relief pursuant to § 2.76 of the Commission's Statements of General Policy and Interpretations (18 CFR 2.76). Petitioner seeks to collect a rate of \$1.5986 per Mcf for the sale of natural gas to United Gas Pipeline Co. from the Blocker-Fultz Gas Unit No. 1, Harrison County, Tex. Petitioner states that the well is currently shut in due to a casing leak, and that the proposed rate increase is necessary to put the well back into production.

It appears reasonable and consistent with the public interest in this case to prescribe a period shorter than 10 days for the filing of protests and petitions to intervene.

Therefore, any person desiring to be heard or to make any protest with reference to said petition should on or before October 7, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any party wishing to become a party to a proceeding, or to participate as a party in any hearing therein, must file a petition to intervene in accordance with the Commission's Rules.

KENNETH F. PLUMB,
Secretary.

[Docket No. ER76-830]

MISSISSIPPI POWER & LIGHT CO.

Compliance Filing

SEPTEMBER 28, 1977.

Take notice that on September 13, 1977, Mississippi Power & Light Co.

(MP&L) tendered for filing, pursuant to ordering paragraph (B) of the Commission's Order Approving Settlement Agreement issued August 3, 1977 in this proceeding, its Rate Schedule MW-15, which is applicable to resale service to municipalities, and its Rate Schedule REA-15, which is applicable to resale service to electric power associations.

MP&L states that Rate Schedules MW-15 and REA-15 are in substitution for Rate Schedules MW-14 (Revised) and REA-14 (Revised) as of December 1, 1976, and that they incorporate the recommendations made by the Federal Power Commission's Office of Chief Accountant, Audits Division Report released May 17, 1977.

Any person desiring to be heard or to protest said filing should file a protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8 and 1.10). All such protests should be filed on or before October 5, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. ER77-594]

ROCHESTER GAS & ELECTRIC CORP.

Cancellation

SEPTEMBER 28, 1977.

Take notice that Rochester Gas & Electric Corp. (Rochester) on September 19, 1977, tendered for filing notice of cancellation of FPC Rate Schedule No. 22. Rochester proposes an effective date of October 29, 1977.

Rochester states that copies of this filing have been sent to Consolidated Edison Co. of New York, Inc.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8 and 1.10). All such petitions or protests should be filed on or before October 5, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

[6740-02]

[Docket No. RP77-129-2]

UNITED GAS PIPE LINE CO.; (GEORGIA-PACIFIC CORP.)

Petition for Extraordinary Relief

SEPTEMBER 27, 1977.

Public notice is hereby given that on August 19, 1977, Georgia-Pacific Corp. (G-P) filed a petition pursuant to § 2.78 (b) of the Commission's Rules and Regulations for extraordinary relief from the curtailment plan of its supplier, United Gas Pipe Line Co. (United). By its petition, G-P seeks an order directing United to deliver to G-P's paper mill at Port Hudson, La., sufficient gas to meet its daily average requirements of 255 Mcf at that facility.

G-P's petition refers to a letter dated July 15, 1977 addressed by United to all of its direct industrial and city gate customers, which letter states United's intention, effective November 1, 1977, to completely curtail plant protection volumes and to curtail industrial requirements of less than 50 Mcf per day by up to 40 percent. G-P states that it presently receives all of its natural gas supplies from United, and that it has no existing alternate fuel capability for the boiler and furnace requirements in question. G-P has, however, retained a consulting firm to do design engineering for a LP gas system to meet the energy requirements for which it now seeks relief. Furthermore, G-P states that natural gas is available from an alternate source and that it is presently negotiating to establish transportation arrangements for the direct purchase of that gas pursuant to the provisions of the Commission's Order No. 533. However, G-P apprehends that it will be impossible to install the alternate fuel capability equipment or to finalize the Order 533 purchases prior to November 1. Absent the relief sought, G-P states that it will be necessary to shut down its plant in Port Hudson, La., thereby risking extensive, but indeterminate damage to equipment from freezing.

Any person desiring to be heard or to protest Georgia-Pacific Corp.'s filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8 and 1.10). All such petitions should be filed on or before October 12, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc 77-29052 Filed 10-3-77;8:45 am]

[6740-02]

[Docket No. RP77-129-1]

UNITED GAS PIPE LINE CO.; (SOUTHLAND OIL CO.)

Petition for Extraordinary Relief

SEPTEMBER 27, 1977.

Public notice is hereby given that on October 29, 1976, Southland Oil Co. (Southland) filed a petition pursuant to § 2.78(b) of the Commission's Rules and Regulations for extraordinary relief pendente lite and on a permanent basis from the curtailment plan of its supplier, United Gas Pipe Line Co. (United). By its petition, Southland seeks an order directing United to deliver to Southland's refinery at Lumberton, Miss. the following minimum volumes of natural gas: 375 Mcf per day during the 1977-78 winter season, 176 Mcf per day during the 1978-79 and all subsequent winter seasons, and 370 Mcf per day during each summer season commencing in 1978. Southland requests that such deliveries not be conditioned on any payback obligation.

Southland's petition cites evidence from United Gas Pipe Line Company, Docket No. RP77-92, to demonstrate that gas deliveries to its Lumberton Refinery would be completely curtailed during the coming winter. Southland states that it is currently taking steps to convert most of its natural gas requirements at the Lumberton Refinery to fuel oil, but that if the requested relief is not granted, it may be necessary to shut down that facility.

Southland's petition states that Southland is a small independent refiner of crude oil and that it has a purchase contract with United for 1,000 Mcf/d on an annual basis. Southland asserts that the requested relief volumes would be utilized for high priority purposes in the processing of crude oil. Southland argues that the public interest requires the granting of its request for extraordinary relief since its refinery operation results in a net production of energy. Furthermore, Southland argues that its petition is consistent with the established national policy of protecting the viability of small, independent refiners.

Any person desiring to be heard or to protest Southland's filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions should be filed on or before October 14, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[6210-01]

FEDERAL RESERVE SYSTEM

BARNETT BANKS OF FLORIDA, INC.

Order Approving Acquisition of Bank

Barnett Banks of Florida, Inc., Jacksonville, Fla., a bank holding company within the meaning of the Bank Holding Company Act, has applied for the Board's approval under Section 3(a)(3) of the Act (12 U.S.C. 1842(a)(3)) to acquire 100 percent of the voting shares of Amelia Island Bank, Fernandina Beach, Fla. ("Bank").

Notice of the application, affording opportunity for interested persons to submit comments and views, has been given in accordance with Section 3(b) of the Act. The time for filing comments and views has expired, and the application and all comments received have been considered in light of the factors set forth in Section 3(c) of the Act (12 U.S.C. 1842(c)).

Applicant, the second largest banking organization in Florida, controls 50 banks with aggregate deposits of \$2.2 billion representing approximately 8.2 percent of total commercial bank deposits in Florida.¹ Acquisition of Bank (\$5.3 million in deposits) would increase applicant's share of commercial bank deposits be less than one-tenth of one percent, would not change Applicant's rank among banking organizations in the State, and would have no appreciable effect upon the concentration of banking resources in the State.

Applicant is seeking to make its initial entry into the Fernandina Beach market by acquiring Bank, the smaller of the two banks located in the market, with 21.5 percent of commercial bank deposits in the market.² Applicant's closest subsidiary bank is in Jacksonville, 25 miles south of Bank. Based upon the facts of record, it appears that no significant competition exists between Applicant's banking subsidiaries and Bank, and it is not likely that significant future competition would develop between them because of the distances involved and Florida's restrictive branching laws. De Novo entry into the market is unlikely due to the unattractiveness of the market in light of its low population and deposits per banking office ratios. Accordingly, on the basis of the record, it is concluded that consummation of the proposed transaction would not have any significant adverse effects on existing or potential competition in any relevant area.

The financial and managerial resources and future prospects of Applicant and its subsidiaries are regarded as satisfactory and consistent with approval. The financial and managerial re-

¹ All banking data are as of December 31, 1976 and reflect bank holding company formations and acquisitions approved through July 31, 1977.

² The relevant market is approximated by the eastern portion of Nassau County extending westward from the Atlantic Ocean to a boundary roughly defined by Interstate 95.

sources and future prospects of Bank would be improved through affiliation with Applicant. Affiliation with Applicant will enable Bank to provide improved and additional services to the community. Considerations relating to the convenience and needs of the community. Considerations relating to the convenience and needs of the community to be served lend weight toward approval of the application. It has been determined that the proposed acquisition would be in the public interest and that the application should be approved.

On the basis of the record, the application is approved for the reason summarized above. The transaction shall not be consummated (a) before the thirtieth calendar day following the effective date of this Order or (b) later than three months after the effective date of this Order, unless such period is extended for good cause by the Board, or by the Federal Reserve Bank of Atlanta pursuant to delegated authority.

By order of the Secretary of the Board, acting pursuant to delegated authority from the Board of Governors, effective September 28, 1977.

THEODORE E. ALLISON,
Secretary of the Board.

CITICORP

Request for Determination and Notice Providing Opportunity for Hearing

Notice is hereby given that a request has been made to the Board of Governors of the Federal Reserve System, pursuant to the provisions of section 2(g)(3) of the Bank Holding Company Act of 1956 (12 U.S.C. 1841(g)(3)) ("the Act"), by Citicorp, New York, N.Y., with respect to its sale of all of the shares of Cresap, McCormick and Paget, Inc. ("CMP"), for a determination that Citicorp is not, nor will it be, in fact capable of controlling the transferees of such shares, despite the indebtedness of each such transferee to Citicorp as a result of their purchase of such shares. The transferees of the shares of CMP are: Arnold B. Becker, Rodney F. Beckwith, Robert L. Bush, James W. Buttner, Rodman L. Drake, Bill G. Evans, Chris R. Geckeler, Milton F. Heller, Jr., John H. Hoffman, Fred H. Meyer, Georges Pelipas, Allan J. Prager, Nicholas J. Radell, George I. Roen, James J. Sullivan, Peter Van Pelt and George M. Whitmore, Jr.

Section 2(g)(3) of the Act provides that shares transferred after January 1, 1966, by any bank holding company (or any company which but for such transfer, would be a bank holding company) directly or indirectly to any transferee that is indebted to the transferor or has one or more officers, directors, trustees, or beneficiaries in common with or subject to control by the transferor, shall be deemed to be indirectly owned or controlled by the transferor, unless the

Board, after opportunity for hearing, determines that the transferor is not, in fact, capable of controlling the transferee.

Notice is hereby given, that, pursuant to section 2(g)(3) of the Act, an opportunity is provided for filing a request for oral hearing. Any such request or written comments on the application should be submitted in writing (in duplicate) to the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, to be received no later than October 24, 1977. If a request for oral hearing is filed, each request should contain a statement of the nature of the requesting person's interest in the matter, the person's reasons for wishing to appear at an oral hearing, and a summary of the matters concerning which such person wishes to give testimony. The Board subsequently will designate a time and place for any hearing it orders, and will give notice of such hearing to the transferor, the transferee, and all persons that have requested an oral hearing. In the absence of a request for an oral hearing, the Board will consider the requested determination on the basis of documentary evidence filed in connection with the application.

Board of Governors of the Federal Reserve System, September 24, 1977.

GRIFFITH L. GARWOOD,
Deputy Secretary of the Board.

[6210-01]

CLEVETRUST CORP.

Order Approving Acquisition of Lake Life Insurance Co.

CleveTrust Corp., Cleveland, Ohio, a bank holding company within the meaning of the Bank Holding Company Act, has applied for the Board's approval, under section 4(c)(8) of the Act (12 U.S.C. 1843(c)(8)) and 225.4(b)(2) of the Board's Regulation Y (12 CFR 225.4(b)(2)), to acquire shares of Lake Life Insurance Co., Wilmington, Del. ("Company"), a company that will engage de novo in the activity of underwriting, as reinsurer, credit life and credit accident and health insurance directly related to extensions of credit by the bank holding company system. Such activity has been determined by the Board to be closely related to banking (12 CFR 225.4(a)(10)).

Notice of the application, affording opportunity for interested persons to submit comments and views on the public interest factors, has been duly published (42 FR 38939 (1977)). The time for filing comments and views has expired, and the Board has considered the application and all comments received in the light of the public interest factors set forth in section 4(c)(8) of the Act (12 U.S.C. 1843(c)(8)).

Applicant, the largest bank holding company in Ohio, controls ten subsidiary banks with aggregate deposits of \$3.4

billion,¹ representing 11.1 percent of the total deposits in commercial banks in the State. Applicant currently owns no non-banking subsidiaries.

Company is chartered under the laws of Delaware and will engage in the activity of underwriting, as reinsurer, credit life and credit accident and health insurance sold in connection with extensions of credit by Applicant's lending subsidiaries.² Inasmuch as the subject proposal involves engaging in this activity de novo, consummation of this transaction would not have any adverse effect upon existing or potential competition in any relevant market.

Credit life and credit accident and health insurance is generally made available by banks and other lenders and is designed to assure repayment of a loan in the event of death or disability of the borrower. In connection with its addition of the underwriting of such insurance to the list of permissible activities for bank holding companies, the Board stated:

To assure that engaging in the underwriting of credit life and credit accident and health insurance can reasonably be expected to be in the public interest, the Board will only approve applications in which an applicant demonstrates that approval will benefit the consumer or result in other public benefits. Normally such a showing would be made by a projected reduction in rates or increase in policy benefits due to bank holding company performance of this service. (12 CFR 225.4(a)(10), n.7)

Applicant proposes to offer, through Company, various credit life and credit accident and health insurance coverages to its customers at rates ranging from 4.9 to 5.1 percent below the approved and prima facie rates established in Ohio.³ In addition, Applicant proposes to expand generally the insurance coverage that it currently makes available so that uniform coverage is offered to all borrowers from its banking subsidiaries. Based upon these factors, the Board concludes that Applicant's proposed continued reductions in premiums and expanded coverage are precompetitive and in the public interest.

¹ All banking data are as of December 31.

² Company is not qualified to act as a direct underwriter of insurance in Ohio, and, consequently, it has entered into an agreement with Credit Life Insurance Co., Springfield, Ohio ("Credit"), whereby Credit will directly underwrite the credit insurance generated by Applicant's banking subsidiaries. Credit is prohibited by Ohio law from reinsuring its policies with any insurance company that is not authorized to do business in Ohio. Therefore, Credit will cede the risk of the insurance related to extensions of credit by Applicant's banking subsidiaries to such a company, which in turn will cede to Company the liability on any credit life and credit accident and health insurance related to extensions of credit by Applicant's banking subsidiaries.

³ Prima facie rates are the maximum rates allowed by the State for particular types of insurance coverage. Where no prima facie rate exists for a type of coverage, the insurance company may apply to the State insurance department for approval of a proposed rate.

DEXTER BANKING CO.

Formation of Bank Holding Company

Dexter Banking Co., Dexter, Kans., has applied for the Board's approval under section 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)) to become a bank holding company by acquiring 80 percent or more of the voting shares of Farmers & Merchants State Bank, Dexter, Kans. The factors that are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Kansas City. Any person wishing to comment on the application should submit views in writing to the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551 to be received no later than October 26, 1977.

Board of Governors of the Federal Reserve System, September 28, 1977.

GRIFFITH L. GARWOOD,
Deputy Secretary of the Board.

[6210-01]

FIRST STATE BANCORP., INC.

Formation of Bank Holding Company

First State Bancorp., Inc., Dimmitt, Tex., has applied for the Board's approval under section 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)) to become a bank holding company by acquiring 80 percent or more of the voting shares of First State Bank of Dimmitt, Texas, Dimmitt, Tex. The factors that are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Dallas. Any person wishing to comment on the application should submit views in writing to the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551 to be received no later than October 25, 1977.

Board of Governors of the Federal Reserve System, September 27, 1977.

GRIFFITH L. GARWOOD,
Deputy Secretary of the Board.

[FR Doc.77-29090 Filed 10-3-77;8:45 am]

[6210-01]

HOLT COUNTY INVESTMENT CO.

Order Approving Formation of Bank Holding Company

Holt County Investment Co., St. Joseph, Mo., has applied for the Board's

approval under section 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)) of formation of a bank holding company by acquiring 94 percent of the voting shares of Zook and Roecker State Bank, Oregon, Mo. ("Bank").

Notice of the application, affording opportunity for interested persons to submit comments and views, has been given in accordance with section 3(b) of the Act. The time for filing comments and views has expired, and the Board has considered the application and all comments received in light of the factors set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Applicant is a nonoperating corporation organized for the purpose of becoming a bank holding company through the acquisition of Bank, Bank (deposits of \$2.9 million) ranks fourth out of the six banks operating in the Holt County banking market (which is approximated by Holt County) and controls 11.9 percent of the total deposits in commercial banks in the market. Upon acquisition of the Bank, Applicant would control .02 percent of total deposits in commercial banks in Missouri.

The principals of Applicant are also officers and directors of First Midwest Bancorp., St. Joseph, Mo., and four of its six subsidiary banks. However, none of these banks operates in Bank's market. Inasmuch as the proposed transaction represents a reorganization of the present control of Bank from individuals to a corporation owned by the same individuals, the acquisition of Bank by Applicant would not have any significant adverse effect upon either existing or potential competition within the relevant banking market. Accordingly, on the basis of the record, the Board concludes that competitive considerations are consistent with approval of the application.

The financial and managerial resources and future prospects of both Applicant and Bank are regarded as satisfactory. While Applicant will incur acquisition debt as a result of this approval, Applicant plans to meet its debt servicing requirements primarily through the earnings of Bank. In the Board's view, Bank's earnings prospects appear to be adequate in order to allow Applicant to service that debt without impairing the financial condition of the Bank. Accordingly, the Board concludes that considerations relating to the banking factors are consistent with approval of the application. Although consummation of the transaction would effect no immediate changes in the services that are being offered by Bank, the Board regards considerations relating to convenience and needs of the community to be served as being consistent with approval.

¹ All banking data are as of December 31, 1976.

proval. It is the Board's judgment that consummation of the holding company formation would be in the public interest and that the application to acquire Bank should be approved.

On the basis of the record, the application is approved for the reasons summarized above. The transaction shall not be made (a) before the thirtieth calendar day following the effective date of this Order or (b) later than three months after the effective date of this Order, unless such period is extended for good cause by the Board, or by the Federal Reserve Bank of Kansas City pursuant to delegated authority.

By order of the Board of Governors,
Effective September 27, 1977.

GRIFFITH L. GARWOOD,
Deputy Secretary of the Board.

[6210-01]

[Docket No. R-0115; Reg. Q]

INTEREST OF DEPOSITS

Order Granting Temporary Suspension of Early Withdrawal Penalty

The Board of Governors has suspended temporarily the Regulation Q penalty for the withdrawal of time deposits prior to maturity from member banks (12 CFR 217.4(d)) for depositors affected by the severe storms and flooding beginning about September 12, 1977, in the State of Kansas. On September 20, 1977, pursuant to section 301 of the Disaster Relief Act of 1974 (42 U.S.C. 5141) and Executive Order 11795 of July 11, 1974, the President designated the following counties of the State of Kansas a major disaster area: Atchison, Brown, Doniphan, Jackson, Jefferson, Johnson, Leavenworth, Nemaha, Shawnee, and Wyandotte. The Board regards the President's action as recognition by the Federal government that a disaster of major proportions has occurred. The President's designation enables victims of the disaster to qualify for special emergency financial assistance. The Board believes it appropriate to provide an additional measure of assistance to victims by temporarily suspending the Regulation Q early withdrawal penalty.¹ The Board's action permits a member bank wherever located to pay a time deposit before maturity without imposing this penalty upon a showing that the depositor has, in fact, suffered property or other financial loss in the disaster area as a result of the severe storms and flooding. A member bank should obtain from a depositor seeking to

¹ Voting for this action: Governors Coldwell, Jackson, Partee and Lilly. Absent and not voting: Chairman Burns and Governors Garner and Walllich.

² Section 217.4(d) of Regulation Q provides that where a time deposit, or any portion thereof, is paid before maturity, a member bank may pay interest on the amount withdrawn at a rate not to exceed that currently prescribed for a savings deposit and that the depositor shall forfeit three months of interest payable at such rate.

withdraw a time deposit pursuant to this action a signed statement describing fully the disaster-related loss. This statement should be approved and certified by an officer of the bank. This action will be retroactive to September 20, 1977, and will remain in effect until 12 midnight March 31, 1978.

Section 19(j) of the Federal Reserve Act (12 U.S.C. 371b) provides that no member bank shall pay any time deposit before maturity except upon such conditions and in accordance with such rules and regulations as may be prescribed by the Board. The Board has determined it to be in the overriding public interest to suspend the penalty provision in § 217.4(d) of Regulation Q for the benefit of depositors suffering disaster-related losses within those geographical areas of the State of Kansas officially designated a major disaster area by the President. The Board, in granting this temporary suspension, encourages member banks to permit penalty-free withdrawal before maturity of time deposits for depositors who have suffered disaster-related losses within the designated disaster area.

In view of the urgent need to provide immediate assistance to relieve the financial hardship being suffered by persons directly affected by the severe damage and destruction occasioned by the flooding in the designated counties of Kansas, the Board finds that good cause exists for dispensing with notice and public participation referred to in section 553(b) of Title 5 of the United States Code with respect to this action and that public procedure with regard to this action would be contrary to the public interest. Because of the need to provide assistance as soon as possible and because the Board's action relieves a restriction, the Board finds that there is good cause to make the action effective immediately.

By order of the Board of Governors,
effective September 27, 1977.

GRIFFITH L. GARWOOD,
Deputy Secretary of the Board.

[6210-01]

LANDMARK BANKING CORP. OF FLORIDA

Order Approving Application to Engage in the Activity of Providing Management Consulting Advice

Landmark Banking Corporation of Florida, Fort Lauderdale, Fla., a bank holding company within the meaning of the Bank Holding Company Act, has applied for the Board's approval, under Section 4(c)(8) of the Act (12 U.S.C. 1843(c)(8)) and § 225.4(b)(2) of the Board's Regulation Y (12 CFR 225.4(b)(2)), to engage de novo in the activity of providing management consulting advice to nonaffiliated commercial banks. Such activity has been determined by the Board to be closely related to banking (12 CFR 225.4(a)(12)).

Notice of the application, affording opportunity for interested persons to submit comments and views on the public

interest factors, has been duly published (42 FR 34554 (1977)). The time for filing comments and views has expired, and the Board has considered the application and all comments received, including those submitted by the United States Department of Justice, in the light of the public interest factors set forth in Section 4(c)(8) of the Act (12 U.S.C. 1843(c)(8)).

Applicant, the eighth largest commercial banking organization in Florida, controls seventeen banks with aggregate deposits of approximately \$869 million, representing 3.2 per cent of the total deposits in commercial banks in the State.¹ Applicant is also engaged, through nonbank subsidiaries, in the permissible nonbank activities of providing investment advisory and mortgage banking services.

Applicant proposes to engage de novo in providing management consulting advice to nonaffiliated commercial banks on an explicit fee basis only. Such consulting services would include advice concerning bank operations, systems and procedures, computer operations and mechanization, cost analysis, and site planning. Since Applicant proposes to engage in these activities de novo, it does not appear that any meaningful competition would be eliminated or potential competition foreclosed as a result of approval of the application. Rather, it appears that Applicant's de novo entry into this industry should have a procompetitive effect by increasing the number of firms offering this specialized consulting advice. Furthermore, by making this service available on an explicit fee basis rather than as a correspondent banking service, clients will be able to analyze more accurately the cost of such services and may be able to allocate their funds more efficiently.

There is no evidence in the record to indicate that Applicant's engaging in the activity of providing management consulting advice would result in any undue concentration of resources, unfair competition, conflicts of interests or unsound banking practices.²

¹ Unless otherwise noted, all banking data are as of December 31, 1976.

² In connection with the subject application, the United States Department of Justice submitted a letter expressing concern that possible conflicts of interests could result from approval of this proposal. However, at the time the Board adopted the activity of providing management consulting advice to nonaffiliated banks pursuant to section 4(c)(8) of the Act, the Board considered the potential for conflicts of interests resulting from a bank holding company's engaging in this activity. In recognition of this potential, the Board incorporated in Regulation Y a number of restrictions upon a bank holding company's performance of this activity, including the stipulation that any bank holding company providing management consulting advice must disclose to each potential client bank the names of all banks that are affiliates of the consulting company and the names of all existing client banks located in the same market area(s) as the potential client. The Board is of the opinion that these restrictions provide ample protection against possible conflicts of interests.

Based upon the foregoing and other considerations reflected in the record, the Board has determined that the balance of the public interest factors the Board is required to consider under section 4(c)(8) is favorable. Accordingly, the application is hereby approved. This determination is subject to the conditions set forth in § 225.4(c) of Regulation Y and to the Board's authority to require such modification or termination of the activities of a holding company or any of its subsidiaries as the Board finds necessary to assure compliance with the provisions and purposes of the Act and the Board's regulations and orders issued thereunder, or to prevent evasion thereof.

The transaction shall be made not later than three months after the effective date of this Order, unless such period is extended for good cause by the Board or by the Federal Reserve Bank of Atlanta, pursuant to authority hereby delegated.

By order of the Board of Governors,
effective September 26, 1977.

GRIFFITH L. GARWOOD,
Deputy Secretary of the Board.

[FR Doc.77-29092 Filed 10-3-77; 8:45 am]

[6210-01]

PHILLIPSCO, INC.

Order Approving Formation of Bank Holding Company

Phillipsco, Inc., Denver, Colo. ("Applicant"), has applied for the Board's approval under section 3(a)(1) of the Bank Holding Company Act ("the Act") (12 U.S.C. 1842(a)(1)) of formation of a bank holding company by acquiring 97.5 percent of the voting shares of The First National Bank of Holyoke, Holyoke, Colo. ("Bank").

Notice of the application, affording opportunity for interested persons to submit comments and views, has been given in accordance with section 3(b) of the Act. The time for filing comments and views has expired, and the application and all comments received have been considered in light of the factors set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Applicant is a recently chartered, non-operating corporation, organized for the purpose of becoming a bank holding company by acquiring Bank, which holds deposits of \$12.8 million.¹ Upon acquisition of Bank, Applicant would control the 139th largest commercial bank in the State of Colorado. Applicant would control approximately 0.15 percent of total deposits in commercial banks in the State.

Bank, located in Holyoke, Colo., is the largest of three commercial banks in the relevant banking market and holds approximately 55.9 percent of the total

¹ Voting for this action: Governors Wallich, Coldwell, Jackson, and Partee. Absent and not voting: Chairman Burns and Governors Gardner and Lilly.

² All banking data are as of December 31, 1976.

commercial bank deposits in the market.² It was recently purchased by Applicant's principals. One of the principals of Applicant is also a director of a large Colorado multibank holding company and an officer and director of one of its subsidiary banks. However, that company currently has no subsidiaries in the relevant market, and, therefore, there is no significant competition between that company and Bank at this time. In addition, it appears unlikely that consummation of this proposal would have any adverse effect upon potential competition or increase the concentration of banking resources in any relevant area. Thus, the Board concludes that the competitive effects of the proposal are consistent with approval of the application.

On February 15, 1977, Applicant agreed to acquire, subject to Board approval, shares of Bank that Applicant's principals had purchased two months earlier. In originally purchasing the shares that are the subject of this application, those principals incurred debt which, if this application is approved and the proposed transaction consummated, will be assumed by Applicant.

Upon consideration of the size and terms of this debt, service of which will be dependent upon Bank's earnings, the historic growth of the relevant banking market in particular and Colorado banks in general, Bank's historical earnings and the operating results of other banks located in the same geographic area, the Board believes that Applicant's acquisition debt, the debt temporarily assumed by its principals in anticipation of Applicant's formation, can be serviced without adversely affecting the financial resources of Bank, which are considered generally satisfactory. In reaching this conclusion, the Board is influenced by several facts. First, Applicant will be able to service its debt if Bank achieves earnings equal to the average of banks in its area, and current Bank earnings are well ahead of Applicant's projections. Second, while Applicant is somewhat leveraged, the individual investors incurred no personal debt in making a substantial capital contribution to Applicant. Third, the principals of Applicant have many years of banking experience. Finally, Applicant does not plan any immediate expansion of its operations and intends to limit its activities in the near future solely to the ownership and management of Bank, thereby permitting its entire resources to be devoted to Bank. The Board therefore concludes that the financial resources and future prospects of Bank and Applicant lend weight toward approval of the application.

The Board also concludes that considerations relating to the managerial

² The relevant banking market is approximated by Phillips County, Holyoke is the County seat, Phillips County is in northeastern Colorado. Population of this agricultural county declined 7 percent between 1960 and 1970 to 4,131. However, the population of Holyoke increased 5.5 percent in this same period to 1,646.

resources of Bank and Applicant lend weight toward approval of this application. Applicant's managerial resources are considered satisfactory and Applicant's principals in the brief period they have controlled Bank pending disposition of this application have actively strengthened Bank's managerial resources. Before Applicant's principals acquired Bank, Bank had no middle management and no plans for succession, and the two senior officers were near or above retirement age. Applicant's principals have substantial banking experience and have provided Bank with experienced management which will ensure management succession which was lacking before.

Regarding convenience and needs factors, Applicant states that there are no plans for significant changes in the kinds of services provided by Bank. Under new ownership, however, Applicant's principals have initiated a more aggressive loan policy, with the result that Bank has become more responsive to the borrowing needs of the area. In this connection, Bank has been able to increase its loan to deposit ratio without injury to the quality of its loan portfolio. The Board regards the expansion of Bank's lending services as a positive factor and, therefore, concludes that convenience and needs considerations lend weight toward approval of the application.

For the reasons discussed above, the Board concludes that approval of the application to become a bank holding company would be in the public interest and that the application should be approved.

On the basis of the facts of record and for the reasons summarized above, the application is approved. The transaction shall not be made (a) before the thirtieth calendar day following the effective date of this Order or (b) later than three months after the effective date of this Order unless such period is extended for good cause by the Board or by the Federal Reserve Bank of Kansas City pursuant to delegated authority.

By order of the Board of Governors,
effective September 27, 1977.

GRIFFITH L. GARWOOD,
Deputy Secretary of the Board.

SECURITY STATE BANK HOLDING CO.

Order Approving Formation of Bank Holding Company

Security State Bank Holding Company, Hannaford, N. Dak., has applied for the Board's approval under section 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)) of formation of a bank holding company through ac-

¹ Voting for this action: Governors Coldwell, Jackson, Partee, and Lilly. Absent and not voting: Chairman Burns and Governors Gardner and Wallich.

quisition of 96 per cent of the voting shares of Security State Bank of Hannaford, Hannaford, N. Dak. ("Bank").

Notice of the application, affording opportunity for interested persons to submit comments and views, has been given in accordance with section 3(b) of the Act. The time for filing comments and views has expired, and the Board has considered the application and all comments received in light of the factors set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Applicant, a nonoperating corporation with no subsidiaries, was organized for the purpose of becoming a bank holding company through the acquisition of Bank. Bank, with deposits of \$8.5 million,¹ is the fourth largest of six banking organizations and controls approximately 15.8 per cent of the total commercial bank deposits in the relevant banking market.² Upon acquisition of Bank, Applicant would control the 81st largest banking organization in North Dakota, holding 0.3 per cent of the total deposits in commercial banks in the State. Inasmuch as the proposed transaction is essentially a reorganization whereby the shareholders who presently control Bank directly will control Bank indirectly through Applicant, and since Applicant presently has no subsidiaries and engages in no activities, consummation of the proposal would not eliminate existing or potential competition, or increase the concentration of banking resources in the relevant market.³ Therefore, competitive considerations are consistent with approval of the application.

The financial and managerial resources of Applicant, which are dependent upon those of Bank, are considered to be satisfactory, and their future prospects appear favorable. Although Applicant would incur some debt as a result of this proposal, it appears that dividends from Bank would enable Applicant to meet its debt service requirements without adversely affecting the financial condition of Bank. Accordingly, considerations relating to banking factors are consistent with approval of the application.

While no major changes are contemplated in Bank's services, considerations relating to the convenience and needs of the community to be served are consistent with approval of the application. Accordingly, it is the Board's judgment that consummation of the proposed transaction would be consistent with the public interest and that the application should be approved.

On the basis of the record, the application is approved for the reasons summarized above. The transaction shall not be made (a) before the thirtieth calendar day following the effective date of this Order or (b) later than three months after the effective date of this Order, unless such period is extended for good cause by the Board, or by the Fed-

¹ All banking data are as of December 31, 1976.

[6210-01]

FEDERAL RESERVE SYSTEM

FIRST NATIONAL HOLDING CORP.

Order Approving Acquisition of Banks

First National Holding Corp., Atlanta, Ga., a bank holding company within the meaning of the Bank Holding Company Act, has applied for the Board's approval under section 3(a) (3) of the Act (12 U.S.C. 1842(a) (3)) to acquire 100 percent of the voting shares of First Bank of Savannah ("Savannah"), Savannah, Ga., and approximately 78 percent of the voting shares of The First National Bank of Dalton ("Dalton"), Dalton, Ga. In acquiring Dalton, Applicant would formally acquire indirect ownership of 64.4 percent of the voting shares of The Bank of Dalton, Dalton, Ga. These shares are held by National Loan Company, Dalton, Ga., a wholly owned subsidiary of Dalton.

Notice of the applications, affording opportunity for interested persons to submit comments and views, has been given in accordance with section 3 of the Act (41 FR 46059; 42 FR 12236). The time for filing comments and views has expired, and the Board has considered the applications and all comments received in light of the factors specified in section 3(c) of the Act.

The applications are consolidated because of a set of facts common to them. In both instances Applicant seeks the

¹ Voting for this action: Governors Coldwell, Jackson, Partee, and Lilly. Absent and not voting: Chairman Burns and Governors Gardner and Wallich.

Board's permission to acquire bank shares held by, or subject to a contractual right to acquire bank shares held by, former directors of Applicant's subsidiary bank, The First National Bank of Atlanta ("Atlanta Bank"), Atlanta, Ga., pursuant to arrangements made in 1969 and 1970. Under those arrangements Atlanta Bank financed the ultimate acquisition of controlling interest in Savannah and Dalton by persons affiliated with Atlanta Bank at preferential terms and without risk of loss to the borrowers. The Board has previously determined that similar arrangements may evidence indirect control of bank shares by a company and, if undertaken without prior Board approval, may constitute violations of the Bank Holding Company Act.¹ In connection with these proposals, the Board has scrutinized the underlying facts surrounding the acquisitions of shares of Dalton and Savannah and the acquisition of rights to acquire shares of Dalton by Applicant's subsidiary bank acting through persons related to it, and has concluded that Atlanta Bank, by virtue of these arrangements, acquired indirect ownership and control of more than 25 percent of the shares of both banks without the Board's prior approval in violation of section 3 of the Act.² In

¹ See, e.g., The Jacobus Co. and Inland Financial Corp., 60 Federal Reserve Bulletin 130 (1974); MidAmerica Bancorporation, 60 Federal Reserve Bulletin 131 (1974); First United Bancorporation, Inc., 61 Federal Reserve Bulletin 889 (1975).

² The material facts, summarized here, are undisputed. In the case of Savannah, Atlanta Bank in March 1969 lent, without interest, \$2.7 million to an unrelated individual to acquire all but the directors' qualifying shares of that bank. In April 1970, the bank shares and loan were transferred to the former chairman of Atlanta Bank's executive committee. This loan was structured so that the borrower assumed no personal liability on his debt to Atlanta Bank beyond the shares of Savannah pledged as collateral for that loan, and so that interest would equal dividends paid by Savannah. In September 1971, Atlanta Bank lent this individual on the same basis an additional \$500,000 to acquire additional shares of Savannah. Since 1971 Applicant has invested an additional \$4.4 million directly in Savannah's preferred shares and capital notes. Since 1972, Savannah's executive committee has voted the shares of Savannah held by Atlanta Bank's former director pursuant to proxies executed by him.

In the case of Dalton, several individual shareholders of Dalton, unrelated to Atlanta Bank, placed shares of Dalton in a trust in January 1969, with a view to preventing another Georgia bank from gaining control of Dalton. Under the terms of the trust four directors and former directors of Atlanta Bank agreed to buy from the trust shares of Bank agreed to buy from the trust shares of who any shareholder-beneficiary who died or who decided to sell, at a formula price, if the remaining shareholder-beneficiaries declined to do so. At the same time Atlanta Bank agreed to lend to its designated directors the funds necessary to buy shares from the trust, without personal liability and at interest equal to dividends. Over time additional shares were placed in trust. These arrangements involved about 78 percent of Dalton's voting shares, 39 percent that are still held in trust and another 39 percent that passed through the trust to Atlanta Bank's former directors between 1969 and 1976.

accordance with its policy regarding violations of the Act, and, upon its examination of all the facts of record, the Board is of the view that the specific facts involved in the original indirect acquisitions, even viewed in isolation and absent other adverse considerations, might require denial of the applications but for Applicant's thorough and definite undertakings to guard against violations in the future.³

Applicant, the second largest banking organization in Georgia, controls one bank other than Dalton and Savannah, holding total deposits of \$1.2 billion, or approximately 10 percent of the total deposits in commercial banks in the State.⁴ Savannah is the fourth largest of nine commercial banks located in the Savannah banking market,⁵ and holds deposits of \$33.4 million, or 6 percent of the deposits in commercial banks in that market. Dalton is the largest of six banks in the Dalton banking market,⁶ and holds deposits of \$74 million, or approximately 46 percent of the deposits in commercial banks in that market. The Bank of Dalton, which also is located in the Dalton banking market, holds deposits of \$20.8 million (11 percent of market deposits), and is the third largest commercial bank in that market. Taken together, Dalton and The Bank of Dalton control approximately 57 percent of the market's commercial bank deposits.

Applicant's direct subsidiary bank is located in the Atlanta banking market,⁷ which is approximately 250 miles from Savannah and over 50 miles from Dalton, and Applicant's nonbank subsidiaries are not significant competitors in either the Savannah or Dalton banking markets. Viewing the competitive situation as it existed in 1969 and 1970 when Atlanta Bank arranged to obtain control of Dalton and Savannah, it appears that, in light of the fact that Dalton, Savan-

³ The record also reflects that before initiating these transactions Atlanta Bank had reason to believe them lawful, and that Applicant openly disclosed its transactions regarding Dalton and Savannah to its shareholders and to the Board as soon as those transactions were questioned and cooperated with efforts by the Board's staff to resolve the violations question. Applicant's cooperation, the nature of the violations, the fact that the transactions originated before the Board publicized its policy on such transactions and that management has changed since the transactions originated, coupled with Applicant's undertaking a definite program regarding its future conduct, together persuade the Board that the violations do not reflect so adversely on Applicant's management as to require denial of these applications, though no one of those considerations standing alone might be persuasive.

⁴ Banking data are as of December 31, 1976.

⁵ The Savannah banking market is approximated by Chatham and Effingham Counties and those portions of Liberty and Bryan Counties that lie east of Fort Stewart.

⁶ The Dalton banking market is approximated by Whitfield and Murray Counties.

⁷ The Atlanta banking market is approximated by Fulton, DeKalb, Cobb, Gwinnett, Clayton, Douglas, Henry, and Rockdale Counties.

nah, and Atlanta Bank serve separate banking markets, the acquisitions eliminated and, viewed as present acquisitions would eliminate, no existing banking competition in the relevant markets. Furthermore, consummation of the Dalton proposal may have a procompetitive effect, inasmuch as Applicant has committed, if its application is approved, to sever the affiliation between Dalton and The Bank of Dalton that has existed since 1918.⁸ This would establish The Bank of Dalton as an independent new competitor in a relatively concentrated market. Moreover, continued affiliation between Applicant and Savannah may preserve Savannah's ability to compete with the larger organizations in the market.⁹ The Board accordingly concludes that competitive considerations are consistent with approval of both applications and lend weight to approval of the application to acquire Dalton.

Considerations relating to the convenience and needs of the communities to be served are also consistent with approval of both applications. Applicant states that it will provide a number of new services to both banks, and Applicant has provided assistance to both banks under its present relationship with them.

The financial and managerial resources and future prospects of Dalton and Savannah are viewed as generally satisfactory. Applicant's managerial resources and future prospects are also considered generally satisfactory. Its financial resources, which suffered during the downturn in the real estate industry in the Southeast, are improving. There is no indication in the record that Applicant's recovery is progressing at an unsatisfactory rate, but the Board believes that applicant should continue to strengthen those financial resources before it attempts to expand through proposals involving a diversion of its existing resources.

These proposed transactions, however, represent essentially the reorganization of existing indirect investments, one that would have only a minimal or conceivably a positive effect on the financial resources of Applicant. Applicant made most of its proposed investments in Dalton and Savannah beginning in 1969. In the case of Savannah, converting Applicant's indirect investment to a direct investment requires an additional outlay of only \$10,000. Acquisition of 39 percent of

⁸ Applicant has filed a written commitment that upon consummation of the proposed acquisition of shares held by Atlanta's former directors it will cause director and officer interlocks between Dalton and The Bank of Dalton to be severed, and cause termination of Applicant's direct and indirect ownership and control of, and power to vote, voting shares of The Bank of Dalton at the earliest practicable time and in any event within two years.

⁹ The two largest banking organizations in the Savannah banking market control approximately 70 percent of the market's deposits, and a majority of the market's deposits are controlled by the State's largest and third largest banking organizations.

the shares of Dalton can likewise be accomplished at negligible cost, and the Board is satisfied that Applicant's commitments regarding the circumstances under which it will acquire additional shares of Dalton sufficiently insure that the acquisition will not have any materially adverse effect on Applicant or Atlanta Bank. Moreover, Applicant's ability to consolidate the earnings of Savannah after consummation of that proposed transaction should enhance its financial resources. On the other hand, divestiture of the shares and rights held by Atlanta's former directors could involve adverse financial consequences to Applicant. Having considered all aspects of the proposed transactions, including Applicant's most recent financial information, the Board concludes that on balance considerations relating to Applicant's financial resources are consistent with approval of these applications.¹⁰

Accordingly, based on the record¹¹ and for the reasons summarized herein, these applications are approved. Approval of the application to acquire Dalton is subject to the condition that Applicant cause complete divestiture of The Bank of Dalton in accordance with its commitment, subject to continuing review and the imposition of such further terms as the Board or its General Counsel may direct. Applicant is directed to submit to the Board's General Counsel within 30 days after the effective date of this Order reasons why the divestiture of The Bank of Dalton should not be ordered earlier than Applicant proposes, and authority is hereby delegated to the Board's General Counsel to order such earlier divestiture, and to impose conditions that will insure that the divestiture is complete and effective, if the reasons submitted in his judgment warrant such action. The transactions hereby approved shall not be made before the thirtieth calendar day following the effective date of this Order, or later than three months after the effective date of this Order unless such period is extended for good cause by the Board or by the Federal Reserve Bank of Atlanta pursuant to delegated authority.

By Order of the Board of Governors,¹² effective September 28, 1977.

GRIFFITH L. GARWOOD,
Deputy Secretary of the Board.

[FR Doc.77-29196 Filed 10-3-77; 8:45 am]

¹⁰ There is nothing in the record to show that Atlanta Bank's financial resources at the time it arranged to obtain control of Savannah and Dalton were incompatible with those investments at the time they were made. Instead it appears that the problems Applicant has experienced were chiefly those common to other banking organizations and arose several years later.

¹¹ Dissenting Statement of Governors Coldwell and Jackson filed as part of the original document. Copies are available upon request to Board of Governors of the Federal Reserve System, Washington, D.C. 20551, or to the Federal Reserve Bank of Atlanta.

FEDERAL TRADE COMMISSION

WARRANTIES COMPLYING WITH
MAGNUSON-MOSS WARRANTY ACT

Applicability of Certain Provisions of California State Law; Final Findings and Determination

AGENCY: Federal Trade Commission.

ACTION: Final findings and determination in the proceeding.

SUMMARY: Magnuson-Moss Warranty Act § 111 states the Federal scheme for the effect of Federal law on state warranty provisions. Paragraph (c) (1) provides that certain types of State provisions will be inapplicable to warranties complying with the Federal law. However paragraph (c) (2) preserves such provisions if the Commission finds they meet certain criteria stated in the Act. The State of California filed two applications under this paragraph. The Commission's determination on the applications is set forth below. The Commission's final determination includes an explanation of the scheme of § 111.

FOR FURTHER INFORMATION CONTACT:

Rachel Miller, Attorney, Division of Special Statutes, 202-724-1100, or Charles Taylor, Attorney, Division of Marketing Practices, 202-523-3660, Federal Trade Commission, Washington, D.C. 20580.

SUPPLEMENTARY INFORMATION: The California state provisions included in the application of July 1, 1975, are the following:

Civil Code Sections 1790-1795 (Song-Beverly Consumer Warranty Act)
Civil Code Section 1797
Commercial Code Section 2801
Health and Safety Code Sections 39156-39157
Vehicle Code Sections 9975, 34715

In addition, the State of California submitted a supplemental application, dated November 2, 1976, requesting consideration of the following provisions as amended by the 1976 Amendments to the Song-Beverly Act:

§ 17904, 1791, 1793.3, 1793.6, 1794.1.

The Commission initially determined that the only provisions subject to § 111 (c) (1) were the following four sections of the Civil Code:

§ 1793.1(b) (disclosure of warrantor's repair facilities)
§ 1797.3 (mobile home warranty title)
§ 1797.3(d) (disclosure of warrantor's telephone number in mobile home warranties)
§ 1797.5 (posting of mobile home warranties)

It therefore initiated this rulemaking proceeding to determine if any of these provisions meet the requirements of § 111 (c) (2) for preservation.

The Commission also considered the supplementing application of November 2, 1976, and found that none of the provisions as amended are subject to § 111 (c) (1) of the federal Act.

FINDINGS AND DETERMINATIONS

I. HISTORY OF THE PROCEEDING

This proceeding was initiated by the Commission July 9, 1976, in response to an application filed by the State of California pursuant to the provisions of Title I, Section 111(c) (2), 15 U.S.C. 2311(c) (2), of the Magnuson-Moss Warranty-Federal Trade Commission Improvement Act, Pub. L. 93-637, 15 U.S.C. 2301, et seq., (1975) hereinafter the "Warranty Act".

The initial notice of this proceeding, together with staff's analysis of the California state law provisions submitted with the application, was published in the FEDERAL REGISTER on July 9, 1976 (41 FR 28361). All interested persons were invited to file written data, views or arguments concerning this matter or to present such information orally at public hearings. A period of 60 days was allowed for submission of written comments. Public hearings, as announced in the notice, were held September 13-14, 1976, in Los Angeles, California, and September 20, 1976, in Washington, D.C., with Mr. John A. Gray, Attorney, Office of the Special Assistant Director for Rulemaking, Bureau of Consumer Protection, presiding. Every person who had expressed a desire to present his views orally at these hearings was accorded the opportunity to do so. The public record remained open for the receipt of written data, views or arguments until October 20, 1976.

Section 111(c) of the Warranty Act (15 U.S.C. 2311(c)), provides:

(c) (1) Except as provided in subsection (b) and in paragraph (2) of this subsection, a State requirement—
(A) which relates to labeling or disclosure with respect to written warranties or performance thereunder;
(B) which is within the scope of an applicable requirement of sections 102, 103, and 104 (and rules implementing such sections); and
(C) which is not identical to a requirement of section 102, 103, or 104 (or a rule thereunder), shall not be applicable to written warranties complying with such sections (or rules thereunder).

(2) If, upon application of an appropriate State agency, the Commission determines (pursuant to rules issued in accordance with section 109) that any requirement of such State covering any transaction to which this title applies (A) affords protection to consumers greater than the requirements of this title and (B) does not unduly burden interstate commerce, then such State requirement shall be applicable (notwithstanding the provisions of paragraph (1) of this subsection) to the extent specified in such determination for so long as the State administers and enforces effectively any such greater requirement.

Section 111(b), 15 U.S.C. 2311(b), provides:

(b) (1) Nothing in this title shall invalidate or restrict any right or remedy of any consumer under State law or any other Federal law.

(2) Nothing in this title (other than sections 108 and 104(a) (2) and (4)) shall (A)

affect the liability of, or impose liability on, any person for personal injury, or (B) supersede any provision of State law regarding consequential damages for injury to the person or other injury.

In its initial notice the Commission indicated that four provisions of the California laws submitted for Commission analysis would be affected by operation of § 111(c) of the Warranty Act, i.e., Sections 1793.1, 1797.3 and 1797.5 of the California Civil Code. That notice stated:

(1) Section 1793.1(b) of the Song-Beverly Consumer Warranty Act, while similar to disclosures required by 16 CFR § 701.3(a) (5) of the regulations implementing § 102 of the Warranty Act, is not identical to that requirement;

(2) The "Mobile Home Warranty" designation requirement of California Civil Code § 1797.3 is not identical to the provisions of § 103 of the Warranty Act;

(3) That part of § 1797.3(d) of the California Civil Code which requires disclosure of telephone numbers is not identical to the disclosure provided by 16 CFR 701.3(a) (5); and

(4) The pre-sale availability requirements of § 1797.5 of the California Civil Code are not identical to the requirements of 16 CFR Part 702 which also implements Warranty Act § 102.

The purpose of this proceeding is:

to determine, pursuant to the California petition and the provisions of section 111(c) (2) of the Warranty Act (15 U.S.C. 2311(c) (2)), whether the above described State requirements afford protection to consumers greater than the requirements of the Warranty Act and do not unduly burden interstate commerce. If it is determined that a provision of the State law affords protection to consumers greater than the requirements of the Warranty Act and that such provision does not unduly burden interstate commerce, then the provision will be applicable to written warranties in compliance with the federal requirements to the extent specified in such determination for as long as the State of California administers and enforces effectively such greater requirement.

II. THRESHOLD ISSUES

As a general rule Federal and state consumer protection laws are read harmoniously and viewed as supplementing each other rather than being in conflict.¹ The courts have determined that Federal laws will preempt state consumer protection laws only when the state legislation frustrates the full effectiveness of the Federal law, or when compliance with both is a physical impossibility.²

The Congress, in its consideration of the Warranty Act, plainly recognized

these principles and expressed its intention in this area by including a section to deal with these matters—§ 111 entitled "Effect on Other Laws."

Section 111(c) is the centerpiece for the preemption scheme established by Congress. It provides that state labeling and disclosure requirements which are within the scope of requirements of the Warranty Act provisions (§ 101, 103, or 104), or rules thereunder, governing warranty disclosures, designations and minimum standards, and which are not identical to those requirements, are inapplicable to warranties which meet the federal requirements.

Section 111(c) (2) provides a procedure whereby states may petition the Commission for permission to enforce state laws regarding written warranty labeling or disclosures which are not identical to the requirements of the Warranty Act and which would otherwise be rendered inapplicable to written warranties complying with Federal standards.

Section 111(b) preserves all rights and remedies of consumers under state or other federal laws and state requirements directed at liability for personal injury or consequential damages.

During this proceeding numerous alternative interpretations for various sections were advanced. The Commission believes it is important to formulate a consistent interpretation of the section as a whole before proceeding to examine the specific issues raised by the California Application. The Commission has carefully considered the various interpretations and the history of the section. This discussion should give states, consumer groups and industry representatives a guide to the Commission's approach in interpreting this provision.³

The first issue concerns the scope of the exception provided for in paragraph (b). Specifically, does the phrase "right or remedy of any consumer" include rights under a state labeling or disclosure requirement? In California for example, under the provisions of the Song-Beverly Act a consumer can maintain an action at law if he is injured by a failure to comply with that Act's requirements. If that Act contained a warranty disclosure provision—for example, that every written warranty contain the manufacturer-warrantor's telephone number—which was otherwise within the scope of

¹ See Part I, supra.

² See Part I, supra.

³ Ordinarily, the views of the agency charged with implementing a statute are accorded great weight. See *Red Lion Broadcasting v. FCC*, 395 U.S. 367, 381 (1969); *Udall v. Tallman*, 380 U.S. 1, 16 (1964).

During the course of this proceeding the State of California took the position that state requirements concerning written warranty disclosures and labeling can provide consumer rights within the meaning of paragraph (b). See Testimony of Herschel Elkins, Deputy Attorney General, State of California, Transcript pp. 46-50 (Tr. 46-50). See also Statement of Center for Auto Safety, Record pp. 118-124 (R. 118-124), and Testimony of Dennis Kavanagh, Counsel, Golden State Mobilehome Owners League, Inc., Tr. 15.

⁴ See, e.g., *Double-Eagle Lubricants v. State of Texas*, 248 F. Supp. 515, 518 (1965); *Head v. New Mexico Board of Examiners*, 374 U.S. 424, 427, (1963).

⁵ See generally *Perez v. Campbell*, 402 U.S. 632 (1971); *Florida Lime and Avocado Growers, Inc. v. Paul*, 373 U.S. 132 (1963); *Hines v. Davidowitz*, 312 U.S. 52 (1941).

§ 111(c), would it be excluded from preemption because it is a consumer right?

Since one of the purposes of this legislation is to provide standards for disclosures in written warranties, Congress could not have intended for disclosure or labeling provisions to be automatically construed as consumer rights and preserved. Rather, the Commission believes that Congress established the procedure described in subparagraph (2) of § 111 (c) as the proper means by which to determine future applicability of such disclosure and labeling provisions.⁴

Were it otherwise, the federal disclosure scheme would be completely frustrated. If, for example, a state disclosure or labeling requirement, preserved by operation of (b), were directly contradictory to the Federal rules, under the terms of (b) the normal preemption rules would not prevail, and the Federal provision, not the state provision, would fall.

The proviso in § 111(c) "except as provided in (b)" makes it absolutely clear that consumer rights and remedies under state law would never be affected by the Warranty Act. The proviso may have been intended to distinguish between a consumer right to information and a requirement to provide information in a particular form or manner (e.g., in the warranty document). It is even possible that the presence of the proviso in the final Act is due to a drafter's error. The scope of § 111 was limited by the Conference Committee to labeling and disclosure provisions. The House and Senate versions of the legislation would have included performance requirements in the preemption scheme. The proviso preserving consumer rights and remedies was contained in the House version. The Conference Committee took out references to performance requirements but it left in—perhaps to make it entirely clear—the provision that the Act would not affect consumer rights or remedies.

The phrase "right or remedy of any consumer" in § 111(b), therefore, does not include any right to a specific manner of disclosure or labeling of information.

The next issue concerns the scope of the preemption scheme itself. Section 111(c) (1) lists three elements which a state requirement must meet to be within the scope of this section. These requirements are in the conjunctive; all must be found for a requirement to be within the scope of the section.⁵

It should be remembered too that this statute was passed prior to the recent Supreme Court decision recognizing a First Amendment "right" to commercial information. See *Virginia State Board of Pharmacy v. Virginia Citizens Consumer Council, Inc.*, 425 U.S. 748, 96 Sup. Ct. 1817 (1976).

The legislative history of the Warranty Act indicates that the House version of § 111(c) (1) was adopted in the Act. From a reading of that section it appears clear that § 111(c) (1) (A), (B), and (C) were meant to be conjunctive, and the absence of an "and" between subparagraphs (A) and (B) is merely the result of a normal grammatical process. See also University of

Pennsylvania would place a nonexistent "or" between the clauses, which the Commission believes would be contrary to the legislative intent.

First, the state requirement must relate to "labeling or disclosure with respect to written warranties or performance thereunder." It is the Commission's view that the phrase "with respect to written warranties or performance thereunder" in § 111(c) (1) (A) was intended to modify the phrase "which relates to labeling or disclosure." Thus we interpret the clause to mean that state requirements which relate strictly to warranty performance, and which do not involve warranty labeling or disclosure of terms, are outside the scope of § 111(c). In other words, we read this clause as dealing with state requirements which relate to labeling or disclosure with respect to written warranties, and with state requirements which relate to labeling or disclosure with respect to performance under written warranties.

This construction is supported by the legislative history of this section. While the scope of this provision, as proposed in both houses, extended to labeling disclosure and "other requirements" or "other matters," this latter language was dropped in the Conference Committee. No explanation for this is provided in the Conference Report but it may be inferred that Congress intended that the scope of this section should extend only to labeling and disclosure provisions.

Second, the state requirement must be within the scope of § 102, 103, or 104 (or rules thereunder). Section 102 of the Warranty Act authorized Commission promulgation of FTC regulations governing disclosure of written warranty terms and conditions of consumer product warranties. A rule has been promulgated pursuant to the statutory mandate establishing requirements for warrantors for disclosing written warranty terms and conditions. Thus, a state requirement would be within the scope of the Federal requirement if it requires disclosure of terms in a written warranty in a manner different from the Federal rules or if it requires disclosure of additional terms in the warranty.⁶ The Commission has also promulgated a rule establishing requirements for pre-sale availability of warranty terms. A state

Chicago Press "A Manual of Style," § 5.64 (12 ed., 1969) and the comments of the Center for Auto Safety, R. 127-128, and National Consumer Law Center, R. 114-115.

But see Statement of J. C. Penney Co., R. 150. Penney's contended that:

[T]he staff analysis relies upon a conjunctive construction at the end of section 111(c) (1) (A), thus inferring the presence of a nonexistent "and" and substitutes the inferred "and" for the semicolon which actually appears. Penney disagrees with this interpretation and believes that the presence of the semicolon further established a Congressional intent to preserve uniformity of written warranty requirements.

requirement would be within the scope of this requirement if it establishes written warranty pre-sale availability requirements different from or in addition to those of the federal rule.¹² Sections 103 and 104 create a labeling scheme for warranties.¹³ These sections divide the universe of warranties into two types—i.e., those which meet the Federal minimum requirements for a warranty ("full" warranties) and those which do not ("limited" warranties). The Commission has stated that these designations must appear clearly and conspicuously as a caption or prominent title of the warranty.¹⁴ A state requirement would be within the scope of these provisions if it imposed a warranty designation requirement different from the Federal scheme or if it attempted to alter the standards for qualifying for the Federal "full" warranty designation.

Finally, the state requirements must be different from the Federal requirement.

If all the conditions above are met, then the state requirement will be rendered inapplicable to written warranties complying with the provisions of the Warranty Act section or rules thereunder. Thus § 111(c) does not in fact preempt state provisions; it merely renders them inapplicable to warranties which meet the Federal requirements.

Further, subparagraph (2) of § 111(c) provides for a procedure whereby such state requirements can be made applicable even to warranties meeting Federal regulations. A State may apply to the Commission for this determination. In reaching this determination, the Commission must consider whether the state requirement in question affords protection to consumers greater than the requirements of the Warranty Act and does not unduly burden interstate commerce.

The questions of greater protection and undue burden are complex issues requiring careful analysis. They can only be answered on a case-by-case basis. The Commission believes the proponent of the state requirement has the burden of showing that the requirement provides more protection to consumers than the Federal requirement. Likewise, persons viewing the state requirement as unduly burdensome have an obligation to support, by more than mere conclusory

¹² 16 CFR Part 702. Note that other rules are authorized by § 102; as they are promulgated, additional state rules may fall within their scope.

¹³ Section 104 appears to be a group of substantive provisions and in fact is entitled "Federal Minimum Standards For Warranties." However, the fact that no warrantor need meet these requirements, but must merely choose a "designation" or label depending on whether he meets them, makes those requirements merely part of the labeling scheme established in § 103.

¹⁴ FTC Magnuson-Moss Warranty Act Implementation and Enforcement Policy, 40 Fed. Reg. 25721 (June 18, 1975); Interpretations of Magnuson-Moss Warranty Act 16 CFR Part 700, 42 Fed. Reg. 36112 (July 13, 1977).

statements and unsupported allegation, their contentions with respect to a requirement's burdensomeness.

It should be noted that U.S. Supreme Court decisions interpreting the Commerce Clause (U.S. Const., Art. I, § 8, cl. 3) have established that only undue and discriminatory burdens are forbidden by the Commerce Clause.¹⁵ The Commission believes these decisions set forth the basic criteria for determining whether a State requirement constitutes an "undue burden on interstate commerce" for purposes of subparagraph (2) of § 111(c).

One final point should be added to this analysis. Warrantors and industry commentators throughout this proceeding argued that the purpose of the Warranty Act was to preserve uniformity of warranties—i.e., to ensure that nationwide manufacturer-warrantors would not have to comply with a multiplicity of State laws on the subject. They base their contentions on the Committee Reports¹⁶ published before the Conference Committee changed § 111. The purpose of the Act, however, is to provide minimum disclosure and content standards for warranties.

The Commission believes that Congress rejected the idea of uniformity of warranties as the major purpose of § 111(c) when it limited its scope to labeling and disclosure requirements. It also rejected the idea of uniformity of disclosure requirements as predominant when it rejected the Senate's absolute preemption scheme and substituted the House version which provides for a savings procedure for such State laws. While uniformity of warranty documents is a goal of § 111, therefore, it is by no means the predominant goal.

As noted herein, because of the comments received during this proceeding and re-examination of the legislative history of the Warranty Act, the Commission has made slight changes in its analysis of § 111 since publication of the initial notice. One additional point should be made in this regard. As discussed above, the Commission is now convinced that the legislative history of § 111 supports the conclusion that the section was meant to apply only to written warranty labeling and disclosure requirements and not to substantive warranty performance requirements. Therefore, the earlier analysis of several sections which were declared exempt from preemption, either because they contained performance requirements identical to those of § 104 or because they constituted consumer rights or remedies, would instead be considered outside the scope of this section because they do not involve written warranty labeling or disclosure. More specifically,

see the discussion in staff's analysis, published with the initial notice, concerning California Civil Code §§ 1793.2 to 1793.5 and 1797 to 1797.4.

III. CONSIDERATION OF STATE REQUIREMENTS

A. *Disclosure of repair facilities.* Section 102 of the Warranty Act mandates that the Commission promulgate rules requiring full disclosure of written warranty terms and conditions. The Commission has carried out this directive by promulgating 16 CFR Parts 701, 702 which became effective December 31, 1976.

Section 701.3(a)(5) of the Commission's regulations implementing § 102 requires that a written warranty contain the mailing address of the warrantor or the person responsible for performance of warranty obligations.

Section 1793.1(b) of the California Civil Code provides that a warrantor who maintains service and repair facilities in California must disclose the location of such facilities by one of three

¹⁷ 16 CFR § 701.3(a) entitled "Written warranty terms" provides, in pertinent part:

"(a) Any warrantor warranting to a consumer by means of written warranty . . . shall clearly and conspicuously disclose in a single document in simple and readily understood language, the following items of information:

"(5) A step-by-step explanation of the procedure which the consumer should follow in order to obtain performance of any warranty obligation, including the persons or class of persons authorized to perform warranty obligations: This includes the name(s) of the warrantor(s), together with the mailing address(es) of the warrantor(s), and/or the name or title and the address of any employee or department of the warrantor responsible for the performance of warranty obligations, and/or a telephone number which consumers may use without charge to obtain information on warranty performance

"(b) Every manufacturer, distributor, or retailer making express warranties and who elects to maintain service and repair facilities within this state pursuant to the provisions of this chapter shall:

"(1) At the time of sale, provide the buyer with the name and address of each such service and repair facility within this state; or

"(2) At the time of sale, provide the buyer with the name and address and telephone number of the service and repair facility central directory within this State, or the toll-free telephone number of a service and repair facility central directory outside this state. It shall be the duty of the central directory to provide, upon inquiry, the name and address of the authorized service and repair facility nearest the buyer; or

"(3) Maintain at the premises of retail sellers of the warrantor's consumer goods a current listing of such warrantor's authorized service and repair facilities, or retail sellers to whom the consumer goods are to be returned for service and repair, whichever is applicable, within this state. It shall be the duty of every retail seller provided with such a listing to provide, on inquiry, the name, address, and telephone number of the nearest authorized service and repair facility, or the retail seller to whom the consumer goods are to be returned for service and repair, whichever is applicable."

methods. The warrantor may (1) give the buyer a list showing the name and address of each such repair facility; or, (2) give the name, address and telephone number of the repair facility central directory within the state or toll free number; or (3) maintain at the seller's premises a list of authorized service facilities. In the latter instance, it is the duty of the seller to provide the name, address and telephone number of the nearest repair facility upon request.

This section of the Federal regulations concerns disclosures of the location of the warrantor or the person responsible for warranty performance. The State of California, for the protection of consumers in that state, has established a similar requirement that the location of repair facilities be disclosed, but the disclosure required is more comprehensive than that prescribed by the Federal regulations.

At the hearing on this matter it was also brought out by the State of California that so long as the required information is presented (or is available) at the time of sale it need not be disclosed in the written warranty itself.¹⁸ A reading of the statute confirms that nowhere does the provision require a disclosure in the written warranty itself, although inclusion in the warranty is one way to comply.

As discussed above, the scope of Warranty Act § 102 and the regulations promulgated thereunder extends only to information that is required in a written warranty. As the California State provision does not mandate written warranty terms or disclosures, it is not within the scope of Warranty Act § 102 or the regulations promulgated thereunder.

The Commission concludes therefore that § 1793.1(b) of California's Civil Code is not a warranty requirement within the scope of § 111 of the Warranty Act and thus is not subject to preemption.

B. *Mobile home warranty title requirement.* Section 103 of the Warranty Act requires that a warrantor clearly and conspicuously designate, or label, its warranty either "full (statement of duration) warranty" or "limited warranty." Section 1797.3 of the California Civil

¹⁸ Testimony of Herschel Elkins, Deputy Attorney General, State of California, Tr. pp. 57-58, 60-62. See also Statement of Center for Auto Safety R 116 n. 2 and R 117 n. 5.

¹⁹ Warranty Act § 103, 15 U.S.C. § 2303, provides in pertinent part:

"(a) Any warrantor warranting a consumer product by means of a written warranty shall clearly and conspicuously designate such warranty in the following manner: . . .

"(1) If the written warranty meets the Federal minimum standards for warranty set forth in section 104 of this Act, then it shall be conspicuously designated a 'full (statement of duration) warranty.'

"(2) If the written warranty does not meet the Federal minimum standards . . . , then it shall be conspicuously designated a 'limited warranty.'

"The mobilehome warranty from the manufacturer or dealer to the buyer shall be set forth in a separate written document entitled 'Mobilehome Warranty.' . . ."

Code requires a written warranty to be given in connection with the sale of mobile homes, and requires this warranty to be entitled "Mobilehome Warranty."

The Commission in its Final Interpretations, 16 CFR 700.6(a), 42 FR 36112 (July 13, 1977), stated that the "full" and "limited" designations provided by the Act "are the exclusive designations permitted under the Act, unless a specific exception is created by rule." The Commission also stated that the appropriate designation "should appear clearly and conspicuously as a caption, or prominent title," to the warranty. The Commission intended to ensure that readers would focus in the first instance on the status of the warranty with respect to the Federal minimum standards for warranties. The California requirement, which would lead consumers to focus instead on the product being warranted, is inconsistent with this goal.

The state provision thus is a labeling provision within the scope of a requirement of § 103 of the Warranty Act, and not identical to it. It is therefore subject to the provisions of § 111(c) of the Act. The provision may be preserved, however, under paragraph (c) (2) of that section if it affords consumers greater protection than the Federal requirement and does not unduly burden interstate commerce. California Deputy Attorney General Herschel Elkins testified that many mobile homes are now sold with a number of separate warranties on different portions of the home, and that consumers are frequently confused as to the coverage of a particular warranty. He stated that preservation of the state provision would assist consumers in knowing just what the warranty covers.²⁰ However, a statement of what the warranty covers must in any event appear in the warranty. The Commission finds that this state provision does not afford the necessary greater protection to consumers. Therefore it shall not be applicable to warranties which comply with the Federal rule.

C. *Telephone number requirement.* Section 701.3(a)(5) of the rules implementing Warranty Act § 102 requires disclosure of the mailing address where consumers may obtain information on warranty performance; however, disclosure of a telephone number which consumers may use to obtain such information is optional. Section 1797.3 of the California Civil Code requires that the mobile home warranty mandated therein contain the address and phone number of where to mail or deliver written notices of defects.²¹

This state provision is within the scope of a requirement of a rule promulgated under § 102 of the Warranty Act, since

it requires certain information to appear in the warranty itself. Further, it is not identical to the Federal requirement, and is therefore subject to preemption under § 111(c) of that Act. The provision may be preserved, however, under paragraph (a) (2) of that section if it affords consumers greater protection than the Federal requirement and does not unduly burden interstate commerce.

The state requirement compels the use of a telephone system for receiving consumer grievances. Warrantors who do not presently have such a system would be required to install one. The National Retail Merchants Association²² stated that the requirement would therefore be a burden. However, such a requirement affords significantly greater protection to consumers than the Warranty Act which has no such requirement.²³ The consumer has a fast and convenient method of communication with the warrantor. The consumer can make personal contact with the responsible party, and can receive an immediate response. Any burden imposed on the warrantor is outweighed by the benefit to the consumer of having this communication system available.

For those warrantors who presently have a way of handling consumer complaints by telephone, listing the telephone number in the warranty is merely a slight inconvenience. While the burden could be greater on nationwide warrantors if other states were to impose a similar requirement,²⁴ it is hardly an undue burden within the meaning of § 111(c) (2) of the Warranty Act.

It must be noted that industry representatives offered absolutely no data to establish the burdensomeness of this requirement.

The Commission therefore concludes that this requirement provides consumers greater protection than the Warranty Act requirement and will not unduly burden interstate commerce. Furthermore, the state has made an adequate showing that it has the capability to enforce this provision. According to the remarks of the Deputy Attorney General, California's Attorney General has authority under common law principles as well as under California Civil Code § 3369 to bring actions against companies engaging in unlawful and unfair business practices.²⁵ The state requirement will therefore continue to be applicable to warranties complying with the Magnuson-Moss Warranty Act and regulations thereunder.

D. *Pre-sale availability requirement.* Section 102(b)(1)(A) of the Warranty Act authorizes the Commission to prescribe rules "requiring that the terms of any written warranty on a consumer product be made available to the consumer (or prospective consumer) prior to the sale of the product to him." A rule implementing this provision was promulgated by the Commission and became effective December 31, 1976.* The rule requires that warrantors' written warranties be made available to consumers prior to sale by one of four methods.* This requirement may be met by displaying the warranty in close conjunction with the product, by maintaining copies of warranties in a binder available to the consumer, by displaying the product's package if the warranty appears on it, or by posting a sign containing the warranty. Section 1797.5 of the California

*16 CFR Part 702.
*16 CFR § 702.3(a) entitled "Pre-sale availability of written warranty terms" provides in pertinent part that:

"(1) The seller of a consumer product with a written warranty shall:

"(i) Make available for the prospective buyer's review, prior to sale, the text of such written warranty by the use of one or more of the following means:

"(1) Clearly and conspicuously displaying the text of the written warranty in close conjunction to each warranted product; and or

"(ii) maintaining a binder or series of binders which contain(s) copies of the warranties for the products sold in each department in which any consumer product with a written warranty is offered for sale. Such binder(s) shall be maintained in each department, or in a location which provides the prospective buyer with ready access to such binder(s), and shall be prominently entitled 'Warranties' or other similar title which clearly identifies the binder(s). Such binder(s) shall be indexed according to product or warrantor and shall be maintained up to date when new warranted products or models or new warranties for existing products are introduced into the store or department by substituting superseding warranties and by adding new warranties as appropriate.

"The seller shall either:

"(A) display such binder(s) in a manner reasonably calculated to elicit the prospective buyers attention; or

"(B) make the binders available to prospective buyers on request, and place signs reasonably calculated to elicit the prospective buyer's attention in prominent locations in the store or department advising such prospective buyers of the availability of the binders, including instructions for obtaining access; and or

"(iii) displaying the package of any consumer product on which the text of the written warranty is disclosed, in a manner such that the warranty is clearly visible to prospective buyers at the point of sale; and or

"(iv) placing in close proximity to the warranted consumer product a notice which discloses the text of the written warranty, in a manner which clearly identifies to prospective buyers the products to which the notice applies."

Section 702.3(b) requires warrantors to make required materials available to sellers.

*Notice of warrant display posting. Every dealer shall display a notice of reasonable size stating the existence of a one-year

Civil Code requires that mobile home dealers display in the area where sales contracts are signed, a notice stating the existence of a one-year warranty and a sample copy.

This State provision is a requirement within the scope of a rule promulgated under § 102 of the Warranty Act. Further, it is not identical to the Federal requirement and is therefore subject to preemption under § 111(c) of that Act. The provision may be preserved, however, under paragraph (c)(2) of that section if it affords consumers greater protection than the Federal requirement and does not unduly burden interstate commerce.

National Retail Merchants Association asserted that this State provision appears to offer less protection than the Federal regulations because it does not require that the warranty itself be displayed.* However, the representative of the State of California disagreed with this interpretation and stated that copies of warranties must be posted.*

The provision therefore differs from the Federal requirement in two ways. First, the State provision requires posting of the text of the warranty, whereas the Federal rule permits, as an alternative to posting the text, the use of a binder which is calculated to attract shoppers' attention or whose availability is announced by similarly conspicuous signs. Second, the State provision requires the display of the warranty in the area where sales contracts are signed, while the Federal options regarding posting of the warranty require it to appear where the warranted products are displayed. In the mobile home industry, the functions of product display and contract signing are likely to be performed in separate areas. Thus, compliance with the State provision will not be sufficient compliance with the Federal rule, and vice versa. Preservation of the state method of presale availability will therefore entail for sellers separate compliance with the State and Federal provisions. The Commission is not convinced that posting a copy of the warranty in the area for contract signing, where consumers may well never go until their purchase decision has already been made, provides greater protection than posting signs announcing the availability of warranties in the display area. The Commission feels the extra burden on sellers of providing two sets of pre-sale materials is not justified by such benefit to consumers as this state provision may give. The State provision will therefore not be applicable to warranties which comply with the Federal rule. It should be noted, however, that the Commission does not here make any determination of whether a state provision mandating

warranty and a sample copy of such warranty. The notice shall be posted in each area where purchase orders and conditional sales contracts are written."

*R 168.

*Testimony of Herschel Elkins, Deputy Attorney General, State of California. Tr. 68.

one of the four Federal options would meet the requirements for preservation in § 111(c)(2).

IV. FINDINGS

In view of the above stated conclusions, the Commission makes the following findings pursuant to its authority under the Warranty Act and specifically under 15 U.S.C. 2311(c)(2):

(1) California Civil Code § 1793.1(b), which requires that warrantors maintaining service and repair facilities in California disclose the location of such facilities, is not a state requirement within the scope of § 111(c) of the Warranty Act and thus is not subject to preemption under that section.

(2) California Civil Code § 1797.3, which requires that the state-mandated mobile home written warranty be entitled "Mobilehome Warranty," does not afford protection to consumers greater than the requirements of the Warranty Act, 15 U.S.C. 2301, et seq., and regulations thereunder, and therefore shall not be applicable to warranties complying with that Act.

(3) California Civil Code § 1797.3(d), which provides that telephone numbers be disclosed in a state-mandated mobile home written warranty, affords protection to consumers greater than the requirements of the Warranty Act, 15 U.S.C. 2301, et seq., and regulations thereunder, and does not unduly burden interstate commerce; therefore, this State requirement shall be applicable to warranties complying with the Magnuson-Moss Warranty Act for so long as the state administrators and enforces effectively such greater requirement.

(4) California Civil Code § 1797.5, which provides that mobile home dealers display a notice stating the existence of a one-year warranty and a sample copy of such warranty, does not afford protection to consumers greater than the requirements of the Warranty Act, 15 U.S.C. 2301, et seq., and regulations thereunder, and therefore shall not be applicable to warranties complying with that Act.

V. LETTER OF NOTIFICATION TO APPLICANT

For further information, the Commission's letter of notification to the Attorney General of California is set forth:

FEDERAL TRADE COMMISSION,
OFFICE OF THE SECRETARY,
Washington, D.C.

HON. EVELLE J. YOUNGER,
Attorney General, State of California Department of Justice, 3586 Wilshire Blvd., Los Angeles Calif.
(Attention: Herschel Elkins, Deputy Attorney General).

DEAR MR. YOUNGER: The Commission has concluded the proceeding entitled "Determination of Applicability of California State Law to Warrantors Complying with the Magnuson-Moss Warranty Act."

Attached is a copy of the Notice to be published in the FEDERAL REGISTER concerning the Commission's final determination in this matter. Briefly, the Commission made the following findings pursuant to its authority under the Warranty Act and specifically under § 111(c)(2), 15 U.S.C. § 2311(c)(2):

(1) California Civil Code § 1793.1(b), which requires that warrantors maintaining service and repair facilities in California disclose the location of such facilities, is not a state requirement within the scope of § 111(c) of the Warranty Act and thus is not subject to preemption under that section.

(2) California Civil Code § 1797.3, which requires that the state-mandated mobile home written warranty be entitled "Mobilehome Warranty," does not afford protection to consumers greater than the requirements of the Warranty Act, 15 U.S.C. § 2301, et seq., and regulations thereunder, and therefore shall not be applicable to warranties complying with that Act.

(3) California Civil Code § 1797.3(d), which provides that telephone numbers be disclosed in a state-mandated mobile home written warranty, affords protection to consumers greater than the requirements of the Warranty Act, 15 U.S.C. § 2301, et seq., and regulations thereunder, and does not unduly burden interstate commerce; therefore, this State requirement shall be applicable to warranties complying with the Magnuson-Moss Warranty Act for so long as the state administrators and enforces effectively such greater requirement.

(4) California Civil Code § 1797.5, which provides that mobile home dealers display a notice stating the existence of a one-year warranty and a sample copy of such warranty, does not afford protection to consumers greater than the requirements of the Warranty Act, 15 U.S.C. § 2301, et seq., and regulations thereunder, and therefore shall not be applicable to warranties complying with that Act.

Recently, you requested an additional hearing under the Warranty Act on recent amendments to the Song-Beverly Act. Specifically, you requested a Commission determination that 1790.4, 1791, 1793.3 and 1794.1 and the new Civil Code Section 1793.6, which went into effect January 1, 1977, afford protection to consumers greater than the requirements of the Warranty Act and do not unduly burden interstate commerce. However, since none of the amendments relate to labeling of or disclosures in written warranties, the Commission has determined that these provisions are outside the scope of § 111(c) of the Warranty Act and thus not subject to preemption under that section. The Commission believes, therefore, that a hearing on this matter is unnecessary.

In your most recent letter you also requested the Commission's opinion whether state enforcement of requirements determined to be excepted from the preemption section of the Warranty Act by § 111(b)(1) preserving consumer rights and remedies, is nevertheless barred by operation of the preemption provision. The Commission sees no reason why the state cannot enforce such requirements.

By direction of the Commission,

CAROL M. THOMAS,
Secretary.

Enclosure.

By direction of the Commission.

Issued: October 4, 1977.

CAROL M. THOMAS,
Secretary.

[6820-14]

GENERAL SERVICES ADMINISTRATION

[FPMR Temporary Reg. 41]

AGENCY PROCUREMENT REQUESTS FOR AUTOMATED DATA PROCESSING EQUIPMENT, SOFTWARE, MAINTENANCE SERVICES, AND SUPPLIES

General Services Administration Action

1. *Purpose.* This regulation temporarily suspends the requirement in § 1-4.1105 (b) for GSA to take action on an agency procurement request (APR) within 20 workdays.

2. *Effective date.* This regulation is effective September 23, 1977.

3. *Expiration date.* This regulation will continue in effect until March 31, 1978.

4. *Background.* a. The number of APR's received from Federal agencies over the past few months has increased significantly. At the same time, congressional interest has been expressed in many ADP procurements. Due to the increased workload, it has become more and more difficult for GSA to meet the prescribed 20 workday response time. The result has been that agencies have proceeded without a substantive GSA review. A continuing absence of these reviews is inconsistent with GSA's responsibilities under Section 111 of the Federal Property and Administrative Services Act of 1949, as amended (40 U.S.C. 759) (Pub. L. 89-306, the Brooks Act). Accordingly, it is desirable to prescribe an alternate procedure for use on an interim basis.

b. In view of the foregoing circumstances it is appropriate and necessary to suspend temporarily the requirement in § 1-4.1105(b) for GSA to take action on an APR within 20 workdays. GSA will make every effort to expedite its action on each APR. In view of the potential impact on fulfillment of agency needs, GSA will continue to seek an early, more satisfactory solution to this problem.

5. *Effect on other issuances.* Section 1-4.1105 is amended to read as follows:

§ 1-4.1105 GSA action on procurement requests.

(b) Expeditious action will be taken by GSA after receipt of full information from an agency involving a request for procurement as provided in § 1-4.1104. Agencies shall not proceed with the procurement until a delegation of authority has, in fact, been granted.

SEPTEMBER 23, 1977.

JAY SOLOMON,
Administrator of General Services.
[FR Doc.77-29101 Filed 10-3-77;8:45 am]

[6820-14]

[FPMR Temporary Reg. 42]

CHANGES IN THE SMALL BUSINESS ACT BY PUB. L. 95-89

1. *Purpose.* This regulation provides an interim implementation of Pub. L. 95-89, which amended the Small Business Act.

2. *Effective date.* This regulation is effective.

3. *Expiration date.* This regulation will continue in effect until canceled.

4. *Background.* Pub. L. 95-89, August 4, 1977, amended the Small Business Act, Title V—Procurement Assistance, of the public law expanded the authority of the Small Business Administration (SBA) to certify the responsibility of small business concerns for both purchases and sales, to establish priorities regarding the award of contracts to small business and labor surplus area concerns, and to prescribe procedures applicable to awards to small business concerns involving the Walsh-Healey Act.

5. *Agency action.* Agencies shall comply with the provisions of the Small Business Act, as amended by Public Law 95-89, when the provisions of the FPR are inconsistent with the provisions of the Act.

6. *Effect on other issuances.* a. To the extent that the provisions and clauses in the FPR are inconsistent with Pub. L. 95-89, the provisions of the Act apply. A formal amendment of the FPR which implements the Act will be issued as soon as possible.

b. The following provisions (not necessarily all inclusive) of the FPR are affected and will require modification:

(1) *Certificate of Competency program, § 1-1.708.* The FPR provisions which restrict SBA's authority to "capacity and credit" only are modified by the Act to grant SBA statutory authority to certify the competency of any small business concern with respect to all elements of responsibility, including but not limited to capability, competency, capacity, credit, integrity, perseverance, and tenacity.

(2) *Walsh-Healey Public Contracts Act, Subpart 1-12.6.* The FPR requirement that the contracting officer provide findings of ineligibility and supporting documentation to the Wage and Hour Division of the Department of Labor is modified by the Act with respect to small business concerns. SBA is authorized under the Act to dismiss findings of ineligibility or, where SBA concurs in the contracting officer's findings, SBA is required to refer the matter to the Department of Labor for final decision.

(3) *Procurement set-asides for small business, § 1-1.706, and Labor surplus area policies, § 1-1.802.* (a) The FPR priorities in carrying out set-aside programs are modified by the Act. Section 502(e) of the Act includes the following requirement:

(e) In carrying out labor surplus areas and small business set-aside programs, departments, agencies, and instrumentalities of the executive branch shall award contracts, and encourage the placement of subcontracts for procurement to the following in the manner and in the order stated:

(1) Concerns which are located in labor surplus areas, and which are also small business concerns, on the basis of a total set-aside.

(2) Concerns which are small business concerns on the basis of a total set-aside.

V
4

O
C
T

4

7
7

U
M
I

- (3) Concerns which are small business concerns, on the basis of a partial set-aside.
- (4) Concerns which are located in labor surplus areas on the basis of a total set-aside.

It is pertinent to note that the Act does not foreclose partial labor surplus area set-asides.

(b) Regarding total labor surplus area set-asides, it should be noted that, though not now authorized by the FPR, such set-asides are now permissible under this Act.

(c) Where solicitations involve partial set-asides for small business concerns (the third priority under the Act), the award procedures in the FPR continue to apply.

Dated: September 27, 1977.

ROBERT T. GRIFFIN,
Acting Administrator
of General Services.

[6820-14]

[FPMR Temporary Reg F-444]

SECRETARY OF DEFENSE

Delegation of Authority

1. *Purpose.* This regulation delegates authority to the Secretary of Defense to represent, in conjunction with the Administrator of General Services, the interests of the executive agencies of the Federal Government in a telephone rate proceeding.

2. *Effective date.* This regulation is effective immediately.

3. *Delegation.* a. Pursuant to the authority vested in me by the Federal Property and Administrative Services Act of 1949, 63 Stat. 377, as amended, particularly sections 201(a)(4) and 205(d), (40 U.S.C. 481(a)(4) and 486(d)), authority is delegated to the Secretary of Defense to represent the consumer interests of the executive agencies of the Federal Government before the Kentucky Public Service Commission involving the application of the South Central Bell Telephone Company for an adjustment of its intrastate rates and charges for the Commonwealth of Kentucky.

b. The Secretary of Defense may redelegate this authority to any officer, official, or employee of the Department of Defense.

c. This authority shall be exercised in accordance with the policies, procedures, and controls prescribed by the General Services Administration, and shall be exercised in cooperation with the responsible officers, officials, and employees thereof.

JAY SOLOMON,
Administrator of General Services.

SEPTEMBER 21, 1977.

[Formal Case No. 686; Intervention Notice No. 39]

WASHINGTON GAS LIGHT CO.

Proposed Intervention in Gas Rate Increase Proceeding Before District of Columbia Public Service Commission

The General Services Administration seeks to intervene in a proceeding before the District of Columbia Public Service Commission concerning an application by the Washington Gas Light Co. for an increase in its tariff rates for intrastate gas service. The GSA represents the interests of the executive agencies of the United States Government, as users of utility services.

Persons desiring to make inquiries concerning this case to GSA should submit them, in writing, to Mr. Spence W. Perry, Assistant General Counsel, Regulatory Law Division, General Services Administration, 18th & F Streets NW., Washington, D.C. 20405, telephone 202-566-0750, on or before November 3, 1977, and refer to this notice number.

Persons making inquiries are put on notice that the making of an inquiry shall not serve to make any persons parties of record in the proceeding.

(Section 201(a)(4), Federal Property and Administrative Services Act, 40 U.S.C. 481(a)(4))

Dated: September 20, 1977.

JOEL W. SOLOMON,
Administrator of General Services.

Ruth S. Magee, National Center for Toxicological Research, Jefferson, AR 72079 (501-541-4528).

SUPPLEMENTARY INFORMATION: Under the Federal Advisory Committee Act of October 6, 1972 (Pub. L. 92-463, 86 Stat. 770-776 (5 U.S.C. App. 1)), the Food and Drug Administration (FDA) announced in a notice published in the FEDERAL REGISTER of August 12, 1977 (42 FR 40958), meetings of FDA public advisory committees and other required information in accordance with provisions set forth in section 10(a)(1) and (2) of the act.

Notice is hereby given that the meeting of the Mutagenesis Subcommittee of the Science Advisory Board scheduled for September 29, 1977 has been changed to October 17, 1977. The open public hearing will begin at 9 a.m. at the National Center for Toxicological Research, Jefferson, Arkansas.

Dated: September 27, 1977.

WILLIAM F. RANDOLPH,
Acting Associate Commissioner
for Compliance.

[4110-03]

[Docket No. 77P-0121]

SIEMENS CORP.

Approval of Variance for Diagnostic X-Ray Systems

AGENCY: Food and Drug Administration.

ACTION: Notice of approval of variance.

SUMMARY: The Director, Bureau of Radiological Health, Food and Drug Administration, has approved a variance from two provisions of the performance standard for diagnostic x-ray systems at the request of the Siemens Corp., 186 Wood Ave. South, Iselin, NJ 08830. The variance will apply to beam-limiting devices to be manufactured and used in fluoroscopic x-ray systems with spot-film devices that, in some cases, may operate in the radiographic mode. Under the terms of the variance, these systems will not be required to meet certain of the requirements for x-ray field limitation applicable to radiographic spot-film devices.

DATES: The variance shall be come effective on November 3, 1977, and shall terminate on November 3, 1978. Objections and supporting information must be submitted by November 3, 1977.

ADDRESSES: Written objections to the Hearing Clerk (HFC-20), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT:

Harvey Rudolph, Bureau of Radiological Health (HFX-460), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, MD 20857 (301-443-3426).

SUPPLEMENTARY INFORMATION: Section 1020.31(e)(2)(i) (21 CFR 1020.31(e)(2)(i)) of the performance standard for diagnostic x-ray systems and their major components requires that stationary, general purpose radiographic x-ray systems be provided with means which prevent x-ray production until the x-ray field size is adjusted to the size of the image receptor as specified by § 1020.31(e)(2)(ii). Section 1020.31(g)(1) requires that x-ray systems equipped with spot-film devices be provided with means to automatically adjust the x-ray field to the portion of the film selected for exposure unless the size of the x-ray field is smaller than the selected portion of the film.

The Siemens Corp. manufactures general-purpose fluoroscopic x-ray systems equipped with spot-film devices that, in some cases, may be operated in the radiographic mode. Under the variance, the beam-limiting devices for these systems would not comply with the above requirements when used with certain sizes of X-ray film cassettes because of their design for use only with a limited number of cassette sizes. Siemens Corp.

has requested a variance from these two requirements, pending completion of a new design for the collimation systems.

Systems subject to the variance would be designed to function with a limited number of cassette sizes, depending on the particular model selected, and would be so described by the manufacturer. However, the sensing system would not preclude the use of a cassette for which the system was not designed. Should a nondesignated cassette size be used, the systems, when operated in the radiographic mode, may not properly adjust the size of the X-ray field or prevent production of X-rays as required by § 1020.31(e)(2)(i). When used in the spot-film mode with a cassette for which the system was not designed, the system may not correctly adjust the X-ray field to a size equal to the selected portion of the film as required by § 1020.31(g)(1).

However, the applicant has stated these systems function in a manner compliant with the intent of the performance standard in that for a large fraction of the sizes of X-ray film cassettes in clinical use, the X-ray beam is adjusted correctly to the image receptor size. The applicant has further stated that purchasers select those systems which provide cassette programs or formats that match the clinical tasks to be performed by the system and the cassette sizes to be used by the facility. The applicant maintains that it is unlikely that a cassette of improper size would be used with any of these systems. Therefore, the applicant claims that the chance of unnecessary-patient exposure due to the failure to comply with §§ 1020.31(e)(2)(i) and (g)(1) is remote. On these grounds, and in order to market these X-ray systems to facilities desiring them and to avoid delays in furnishing such facilities with the capability to provided needed X-ray services, the applicant has requested the variance from the performance standard for diagnostic X-ray systems.

The Director, Bureau of Radiological Health, agrees that the diagnostic X-ray systems to be marketed under the variance will comply with the X-ray standard for the large majority of X-ray examinations anticipated and that appropriate warning labels will minimize the likelihood that inappropriate cassette sizes would be used. He therefore concludes that the X-ray systems will provide suitable radiation protection and is granting the variance in accordance with § 1010.4 (21 CFR 1010.4) for a period of 1 year. The variance will apply to beam-limiting devices with the following model numbers, to be used on fluoroscopic or radiographic/fluoroscopic X-ray systems marketed by the applicant:

12-74-836-G0865, 12-75-478-G0865, 16-23-180-G0865, 48-68-089-G0865, 02-83-176-G444G, 02-83-192-G444G, 04-90-227-G444G, 04-90-235-G444G, 42-71-490-G5139, 40-83-424-G5153, and 40-83-432-G5153.

The Director notes that the variance is being granted for 1 year to provide the applicant time to develop beam-limiting devices which comply with all provisions of the performance standard, and it is

his intention that the variance not be extended beyond 1 year.

The applicant has been directed to modify, in accordance with § 1010.4(d), the tags, labels, or other certification required by § 1010.2 (21 CFR 1010.2), which are permanently affixed to or inscribed upon products marketed under this variance to state the following:

This product complies with variance 77003, effective November 3, 1977.

The terms of the variance further require that the applicant permanently label the products marketed under the variance to show those cassette sizes for which the system is designed and to warn users of the consequences of using a cassette for which the products are not designed. This label must be permanently affixed or attached to the X-ray system in the immediate vicinity of the cassette tray or holder and be clearly visible and legible to an operator during the installation of a cassette into the system.

The Commissioner of Food and Drug has reviewed the potential environmental impact of this variance and has concluded that the action will not significantly affect the quality of the human environment and that an environmental impact statement is not required. A copy of the environmental impact analysis report is on file in the office of the Hearing Clerk, Food and Drug Administration.

Variance No. 77003 shall become effective on November 3, 1977, and shall terminate on November 3, 1978, unless written objections and supporting documentation are filed with the Hearing Clerk, Food and Drug Administration, on or before November 3, 1977, requesting that the variance be modified or not granted. Upon receipt of such objections and supporting documentation, the effective date of the variance will be stayed until the Director, Bureau of Radiological Health, rules on them. Pursuant to § 1010.4(c)(3), the applicant shall be notified by certified mail, and a notice of the stay shall be published in the FEDERAL REGISTER. The ruling on the objections shall be made within 60 days, shall be published in the FEDERAL REGISTER, and shall constitute final agency action subject to judicial review under section 358 (d) (42 U.S.C. 263f(d)) of the Public Health Service Act, as amended by the Radiation Control for Health and Safety Act of 1968.

The application for this variance and all related correspondence, except information covered by the confidentiality provisions of section 360A(e) of the act (42 U.S.C. 263i(e)), have been placed on public display in the office of the Hearing Clerk, Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, Md. 20857, and may be seen Monday through Friday from 9 a.m. to 4 p.m., except on Federal legal holidays.

Dated: September 28, 1977.

WILLIAM F. RANDOLPH,
Acting Associate Commissioner
for Compliance.

[Docket No. 77N-0048]

LAETRIECommissioner's Decision
Correction

In FR Doc. 77-22310, appearing at page 39768 in the issue for Friday, August 5, 1977:

1. On page 39768, first column, under the heading "FOR FURTHER INFORMATION CONTACT:", the telephone number reading "310-44-3480" should read "301-443-3480".

2. On page 39768, third column, the word "energy" in the third line of footnote 1 should read "agency".

3. On page 39770, (a) first column, second line from the top, insert the word "would" after "which". (b) Third column, eighth line under "Vitamin B-17", the word "cynophoric" should read "cyanophoric".

4. On page 39774, (a) second column, third line in the first full paragraph, change "glucosides" to "glucosides"; (b) second column, second line of the quoted material in the first full paragraph, the word "beta-glucuronidase" should read "beta-glucuronidase"; (c) in the twenty-first line of that same paragraph, change "(R183 . . ." to "(R378 . . ."; and (d) in the third column, the twentieth line from the bottom, change "glucucenic" to "glucuronic".

5. On page 39777, third column, thirteenth line of the first full paragraph and the last line of the second full paragraph, change "314.11" to "314.11".

6. On page 39781, first column, fourteenth line, change "§ 7" to "§ 7".

7. On page 39785, second column, bottom line, insert "medicine" after "tritional".

8. On page 39788, second column, thirty-first line, the word "Urbutcit" should read "Urbutcit".

9. On page 39790, first column, seventh line of the first full paragraph, the word "patent" should read "patents".

10. On page 39794, second column, eighteenth line of the paragraph numbered "(v)", insert "C." after "U.S.".

11. On page 39794, third column, thirteenth line of the first full paragraph, change "us" to "use", and after the seventeenth line of that paragraph, insert "about its safety. Yet two volunteered".

12. On page 39799, (a) first column, nineteenth line of the first paragraph under "3. Methods of Promotion of Laetria", change "388" to "389"; (b) second column, sixth line from the top, after the word "them", change "§" to "2" and (c) second column, in the first full paragraph, in the eighth line from the bottom, insert the word "time" after "survival"; and (d) in the fourth line from the bottom of that same paragraph, change "theapy" to "therapy".

13. On page 39802, first column, twelfth line, insert "a" after "of", and in the fifteenth line, change "beta-glucosides" to "beta-glucosidase".

14. On page 39803, third column, fifth line from the bottom, change "(R148)" to "(R148)".

[4110-83]**Health Resources Administration
HEALTH CAREER OPPORTUNITY
PROGRAM****Grant Orientation Conferences**

The Office of Health Resources Opportunity, Health Resources Administration, Public Health Service, Department of Health, Education, and Welfare, is providing grant application information for the Health Career Opportunity Program (HCOP) through the conduct of twelve program orientation conferences. HCOP supports projects designed to assist students from disadvantaged backgrounds in entering and completing health professions training. These orientation conferences, scheduled to be conducted October 17-28, 1977, are for the benefit of interested, potential applicants who may be eligible to participate in HCOP.

Eligible applicants include any public or nonprofit private health or educational entity located in any one of the United States, the District of Columbia, Puerto Rico, the Virgin Islands, Guam, American Samoa, the Northern Mariana Islands, or the Trust Territory of the Pacific Islands.

Each of the twelve conferences will be of one-day duration and will be conducted on the following dates in the cities indicated:

October 17, 1977—New York, N.Y.
October 17, 1977—Philadelphia, Pa.
October 18, 1977—Little Rock, Ark.
October 19, 1977—Atlanta, Ga.
October 20, 1977—Syracuse, N.Y.
October 20, 1977—Chicago, Ill.
October 20, 1977—Portland, Ore.
October 25, 1977—Denver, Colo.
October 25, 1977—Boston, Mass.
October 26, 1977—Albuquerque, N. Mex.
October 27, 1977—San Francisco, Calif.
October 28, 1977—Kansas City, Mo.

Further information pertaining to the conferences may be obtained from the DHEW regional offices listed below or from the Program Coordination Branch, Office of Health Resources Opportunity, Public Health Service, 3700 East-West Highway, Hyattsville, Md. 20782. Call area code 301-436-7230. Application kits will be distributed at each of the conferences or may be obtained from the Program Coordination Branch, Office of Health Resources Opportunity in Hyattsville, Md.

DHEW Region I, John F. Kennedy Federal Building, Room 1405A, Government Center, Boston, Mass. 02203, Ms. Rose Kennedy (617-223-4258).

DHEW Region II, 26 Federal Plaza, Room 3300, New York, N.Y. 10007, Mr. Josue Diaz (212-264-3936).

DHEW Region III, 3535 Market Street, Room 200, Post Office Box 13716, Philadelphia, Pa. 19101, Mr. Louis Coccodrilli (215-596-6472).

DHEW Region IV, Peachtree Seventh Building, Room 831, 50 Seventh Street NE., Atlanta, Ga. 30323, Mr. Al Witcher (404-881-3700).

DHEW Region V, 300 South Wacker Drive, Chicago, Ill. 60606, Ms. Arlene Granderson (312-353-4506).

DHEW Region VI, 1200 Main Tower Building, Room 18-35, 1114 Commerce Street, Dallas, Tex. 75202, Mr. David Diaz (214-655-3930).

DHEW Region VII, 601 East 12th Street, Kansas City, Mo. 64106, Ms. Sally Chappel (816-374-2008).

DHEW Region VIII, 9017 Federal Office Building, 19th and Stout Streets, Denver, Colo. 80202, Ms. Karen Hansen (303-837-2701).

DHEW Region IX, Federal Office Building, 50 United Nation's Plaza, San Francisco, Calif. 94102, Mr. Jack Maready (415-556-7007).

DHEW Region X, The Arcade Building, 1321 Second Avenue, Seattle, Wash. 98101, Dr. Larry Clausen (206-442-0536).

Interested applicants in Hawaii and in the Trust Territory of the Pacific Islands who are unable to attend one of the conferences may contact Dr. Margie R. Matthews, Director of Continuing Education, School of Public Health, University of Hawaii, 1960 East-West Road, D-202, Honolulu, Hawaii 96822 (808-948-7421), for information and assistance.

Dated: September 28, 1977.

[4110-83]**HEALTH CARE TECHNOLOGY STUDY
SECTION AND HEALTH SERVICES
Developmental Grants Study Section
Meetings**

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), announcement is made of the following National Advisory bodies scheduled to meet during the month of October 1977:

NAME: Health Care Technology Study Section.

DATE AND TIME: October 19-21, 1977, 9 a.m.

PLACE: Sheraton-Silver Spring Motor Inn, 8727 Colesville Road, Silver Spring, Md. 20910.

OPEN: October 19, 9 a.m.-10 a.m.

CLOSED: For remainder of meeting.

PURPOSE: The Committee is charged with the initial review of grant applications for Federal assistance in the program areas administered by the National Center for Health Services Research.

AGENDA: The open session of the meeting on October 19, 1977, will be devoted to a business meeting covering administrative matters. The closed portion of the meeting on October 19-21 will be utilized in a review of health services research grant applications relating to the delivery, organization, and financing of health services. The closing is in accordance with the provisions set forth in section 552b(c)(6), Title 5, U.S. Code, and the Determination by the Acting Deputy Administrator, Health Resources Administration, pursuant to Pub. L. 92-463.

Anyone wishing to obtain a roster of members, minutes of meetings, or other relevant information should contact Dr. Alan E. Mayers, National Center for Health Services Research, Room 7-50A, Center Building, 3700 East-West Highway, Hyattsville, Md. 20782, telephone 301-436-6916.

NAME: Health Services Developmental Grants Study Section.

DATE AND TIME: October 27-28, 1977, 8:30 a.m.

PLACE: Potomac Room, Metropolitan Hotel, 1143 New Hampshire Ave. NW., Washington, D.C. 20037.

OPEN: October 27, 8:20 a.m.-9 a.m.

CLOSED: For remainder of meeting.

PURPOSE: The Committee is charged with the initial review of grant applications for Federal assistance in the program areas administered by the National Center for Health Services Research.

AGENDA: The open session of the meeting on October 27, 1977, will be devoted to a business meeting covering administrative matters and reports. During the closed sessions, the Study Section will be reviewing research grant applications relating to the delivery, organization and financing of health services. The closing is in accordance with provisions set forth in section 552b(c)(6), Title 5, U.S. Code, and the Determination by the Acting Deputy Administrator, Health Resources Administration, pursuant to Pub. L. 92-463.

Anyone wishing to obtain a roster of members, minutes of meetings, or other relevant information should contact Mr. David McFall, National Center for Health Services Research, Room 7-50A, Center Building, 3700 East-West Highway, Hyattsville, Md. 20782, telephone 301-436-6916.

Agenda items are subject to change as priorities dictate.

Dated: September 23, 1977.

[4110-]**Office of the Assistant Secretary for
Education****COLLECTION OF INFORMATION AND
DATA ACQUISITION ACTIVITIES OF
EDUCATION DIVISION AND THE OFFICE
FOR CIVIL RIGHTS****Procedures for Review and Coordination**

Pursuant to the authority contained in Section 406(g) of the General Education Provisions Act, as amended by Section 406 of the Education Amendments of 1976 (Pub. L. 94-482; 20 U.S.C. 1221e-1(g)), the Assistant Secretary for Education, with the approval of the Secretary of Health, Education, and Welfare hereby gives notice of the procedures established for review and coordination of proposed collection of information and data acquisition activities of the Education Division and the Office for Civil Rights in order to eliminate excessive detail and unnecessary or redundant information requests.

1. A "collection of information and data acquisition activity" (hereinafter called an activity) is any form, survey instrument, or plan for the collection of information that is subject to review by the Office of Management and Budget under the Federal Reports Act (44 U.S.C. 3502). The term "information" has the meaning given it by that Act and circulars of the Office of Management and Budget issued pursuant to it.

2. All activities proposed by any bureau or agency of the Education Division and of the education related activities of the Office for Civil Rights shall be submitted to the Administrator of the National Center for Education Statistics (hereinafter called the Administrator) for review and coordination in accordance with these procedures at such times and in such manner as hereafter prescribed by the Administrator. The Administrator shall require of each bureau, agency, and office a detailed justification of how the information once collected will be used; and an estimate of the man-hours required by respondent agencies or institutions to complete the request.

3. The Administrator is responsible for the preparation and maintenance of the HEW Education Data Acquisition Plan (hereinafter called the Plan), which shall include all proposed, continuing, preliminary approved, and approved activities of the Education Division and those of the Office for Civil Rights for which the respondents are educational agencies or institutions. No activity subject to these procedures may be submitted to the Office of Management and Budget for clearance under the Federal Reports Act unless it is approved for inclusion in the Plan; nor shall an activity subject to these procedures be included in any contract or request for proposal unless it has preliminary approval for inclusion in the Plan.

4. Furthermore, each educational agency or institution (i.e., any public or private agency or institution which is the recipient of funds under any applicable program) subject to a request under an activity and their representative organizations shall have an opportunity, during a 30-day period prior to transmittal of the activity to the Director of the Office of Management and Budget, to comment to the Administrator on the activity.

5. There is established the HEW Education Data Acquisition Council to be composed of the following: the Deputy Assistant Secretary for Education (Policy Development), who is the Chairman of the Council; the Deputy Assistant Secretary for Planning and Evaluation (Education); a Deputy Commissioner (to be named by the Commissioner of Education); the Deputy Director for Compliance and Enforcement, Office for Civil Rights; the Deputy Administrator of the National Center for Education Statistics; the Deputy Director, National Institute of Education. The Council shall advise the Administrator on: (1) appeals as to whether a proposed activity should be included in the Plan; and (2) the establishment of standards, criteria, and guidelines for planning and developing a sound body of national education data, and otherwise promoting the objectives of Section 406(g) of the General Education Provisions Act as amended. The Administrator shall designate an appropriately qualified staff person of the National Center for Education Statistics, of grade GS-15 or higher, to serve as the Executive Director of the Council.

The Council may establish such procedures as are needed to fulfill its responsibilities.

6. The heads of the agencies of the Education Division, the Assistant Secretary for Education, the Assistant Secretary for Planning and Evaluation, and the Director, Office for Civil Rights shall designate appropriate staff from their respective agencies and offices to serve on such committees and review groups as the Council, upon the recommendation of the Administrator, establishes for the purpose of carrying out these procedures.

7. The Administrator is authorized to decide on the inclusion of activities in the Plan after having received recommendations from the Executive Director and the appropriate review group. If the Administrator decides not to recommend inclusion of a proposed activity in the Plan, the head of the sponsoring agency, bureau, or office may appeal such decision to the Council, which will advise the Administrator. The head of any agency of the Education Division, the Assistant Secretary for Planning and Evaluation or the Director, Office for Civil Rights may appeal any decision of the Administrator made pursuant to these procedures to the Assistant Secretary for Education whose decision shall be final, except that the Assistant Secretary for Planning and Evaluation or the Director, Office for Civil Rights may further appeal any such decision of the Assistant Secretary for Education to the Secretary.

8. The head of each agency, bureau and office of the Education Division and the Office for Civil Rights is responsible for assisting the Administrator and the Council in the review and coordination of activities subject to these procedures; and shall each designate a Data Acquisition Coordination Officer whose responsibility is to assist the staff of the respective agencies, bureaus, and offices in complying with these procedures.

9. No action taken pursuant to these procedures shall interfere with the enforcement of the provisions of the Civil Rights Act of 1964 or any other nondiscrimination provisions of Federal law.

10. The Administrator is responsible for the overall direction of the coordination and review procedures herein established and shall, after receiving the advice of the Council, issue such supplemental procedures as are necessary to carry out the objectives of these procedures.

(20 U.S.C. 1221-1(g).)

Dated: July 20, 1977.

MARY F. BERRY,
Assistant Secretary for Education.
Approved: August 8, 1977.

HALE CHAMPION,
Acting Secretary of Health, Education, and Welfare.

[4110-02]

Office of Education NATIONAL ADVISORY COUNCIL ON ADULT EDUCATION Meeting

AGENCY: National Advisory Council on Adult Education.

ACTION: Notice of Meeting.

SUMMARY: This notice sets forth the schedule and proposed agenda of a forthcoming meeting of the National Advisory Council on Adult Education. The meeting shall be open to the public. This notice also describes the functions of the Council. Notice of this meeting is required under the Federal Advisory Committee Act (Pub. L. 92-463, Section 10(a) (2)).

DATES: October 27, 1977, 7 p.m. to 10 p.m., Executive Committee Meeting; October 28-29, 1977, 9 a.m. to 5 p.m.; October 30, 1977, 9 a.m. to 12 noon.

ADDRESS: Detroit Plaza Hotel, Renaissance Center, Detroit, Mich. 48242.

FOR FURTHER INFORMATION CONTACT:

Dr. Gary A. Eyre, Executive Director, National Advisory Council on Adult Education, 425 13th St. NW., Washington, D.C. 20004 (202-376-8892).

SUPPLEMENTARY INFORMATION: The National Advisory Council on Adult Education is established under Section 311 of the Adult Education Act (80 Stat. 1216.20 U.S.C. 1201). The Council is directed to:

Advise the Commissioner in the preparation of general regulations and with respect to policy matters arising in the administration of this title, including policies and procedures governing the approval of State plans under section 306 and policies to eliminate duplication, and to effectuate the coordination of programs under this title and other programs offering adult education activities and services.

The Council shall review the administration and effectiveness of programs under this title, make recommendations with respect thereto, and make annual reports to the President of its findings and recommendations (including recommendations for changes in this title and other Federal laws relating to adult education activities and services). The President shall transmit each such report to the Congress together with his comments and recommendations.

The meeting of the Council shall be open to the public.

The proposed agenda includes:

Education in Industry, Committee Meetings and Reports, Legislative Review with the Boards of the Adult Education Association, and the National Association for Public Continuing and Adult Education, 311(d) Project, Council Discussion and Approval of Legislative Package.

Records shall be kept of all Council proceedings, and shall be available for public inspection at the Office of the

National Advisory Council on Adult Education, Room 323, Pennsylvania Bldg., 425 13th St. NW., Washington, D.C. 20004.

Signed at Washington, D.C., on September 27, 1977.

GARY A. EYRE,
Executive Director, National
Advisory Council on Adult
Education.

Total for Works and Projects Area is 3,428.56 acres.

The area described contains 6,458.35 acres in Broadwater, Jefferson, Lewis and Clark, and Madison Counties, Mont. The applicant desires the land for Reichle Reservoir, diversion works, and for irrigation development.

A notice of the proposed withdrawal was published in the FEDERAL REGISTER on July 23, 1968, Volume No. 33, Page No. 10465, Document No. 68-8706.

Pursuant to section 204(h) of the Federal Land Policy and Management Act of 1976, 90 Stat. 2754, notice is hereby given that an opportunity for a public hearing is afforded in connection with the pending withdrawal application. All interested persons who desire to be heard on the proposed withdrawal must file a written request for a hearing with the State Director, Bureau of Land Management, P.O. Box 30157, Billings, Mont. 59107, on or before November 4, 1977. Notice of the public hearing will be published in the FEDERAL REGISTER, giving the time and place of such hearing. The hearing will be scheduled and conducted in accordance with BLM Manual Sec. 2351.16B. All previous comments submitted in connection with the withdrawal application have been included in the record and will be considered in making a final determination on the application.

In lieu of or in addition to attendance at a scheduled public hearing, written comments or objections to the pending withdrawal application may be filed with

the undersigned authorized officer of the Bureau of Land Management on or before November 4, 1977.

The above-described lands are temporarily segregated from the operation of the public land laws, including the mining laws, to the extent that the withdrawal applied for, if and when effected, would prevent any form of disposal or appropriation under such laws. Current administrative jurisdiction over the segregated lands will not be affected by the temporary segregation. In accordance with section 204(g) of the Federal Land Policy and Management Act of 1976, the segregative effect of the pending withdrawal application will terminate on October 20, 1991, unless sooner terminated by action of the Secretary of the Interior.

All communications (except for public hearing requests) in connection with the pending withdrawal application should be addressed to the Chief, Branch of Lands and Minerals Operations, Bureau of Land Management, Department of the Interior, P.O. Box 30157, Billings, Mont. 59107.

ROLAND F. LEE,
Chief, Branch of Lands
and Minerals Operations.

[C-071520-C-063968]

WYOMING

Application

SEPTEMBER 26, 1977.

Notice is hereby given that pursuant to Section 28 of the Mineral Leasing Act of 1920, as amended (30 U.S.C. 185), the Amoco Pipeline Co. of Denver, Colo. has applied to amend right-of-way grants C-071520 and C-063968 to install cathodic protection units on the following public land:

SIXTH PRINCIPAL MERIDIAN, WYOMING
(C-071520)

T. 14 N., R. 91 W.,
Sec. 18, NW $\frac{1}{4}$.

(C-063968)

T. 21 N., R. 85 W.,
Sec. 36, NE $\frac{1}{4}$.

The purpose of this notice is to inform the public that the Bureau will be proceeding with consideration of whether the application should be approved, and if so under what terms and conditions.

Interested persons desiring to express their views should do so promptly. Persons submitting comments should include their name and address and send them to the District Manager, Bureau of Land Management, 1300 Third Street, P.O. Box 670, Rawlins, Wyo. 82301.

WILLIAM S. GILMER,
Acting Chief, Branch of
Lands and Minerals Operations.

[Wyoming 61092]

WYOMING

Application

SEPTEMBER 26, 1977.

Notice is hereby given that pursuant to Section 28 of the Mineral Leasing Act of 1920, as amended (30 U.S.C. 185), the Amoco Pipeline Co. of Denver, Colo. filed an application for a right-of-way to construct a 4 inch pipeline for the purpose of transporting crude oil across the following described public lands:

SIXTH PRINCIPAL MERIDIAN, WYOMING

T. 15 N., R. 119 W.,
Sec. 4, Lot 4;
Sec. 6, S $\frac{1}{2}$ NE $\frac{1}{4}$.
T. 16 N., R. 119 W.,
Sec. 34, SW $\frac{1}{4}$ SE $\frac{1}{4}$ and S $\frac{1}{2}$ SW $\frac{1}{4}$.

The pipeline will transport crude oil from wells in Section 6, T. 15 N., R. 119 W., and will tie into an existing pipeline facility in Section 34, T. 16 N., R. 119 W., Uinta County, Wyo.

The purpose of this notice is to inform the public that the Bureau will be proceeding with consideration of whether the application should be approved and, if so, under what terms and conditions.

Interested persons desiring to express their views should do so promptly. Persons submitting comments should include their name and address and send them to the District Manager, Bureau of Land Management, Highway 187 North, P.O. Box 1869, Rock Springs, Wyo. 82901.

WILLIAM S. GILMER,
Acting Chief, Branch of
Lands and Minerals Operations.

Proposed Approval of Coal Mining Plan

In accordance with the requirements of 30 CFR 211.5(c) (2), notice is hereby given that the Wyodak Resources Development Corp., P.O. Box 149, Gillette, Wyo., has submitted a plan to expand the North Pit of the Wyodak Mine by surface mining methods from Federal lease W-0111833 into Federal lease W-0313666. The current North Pit operation on Federal lease W-0111833 in secs. 21 and 22, T. 50 N., R. 71 W., 6th P.M., Campbell County, Wyo., was approved on April 1, 1971, by the Area Mining Supervisor. The plan to expand the North Pit into Federal lease W-0313666 in secs. 10, 15, 21, and 22, T. 50 N., R. 71 W., 6th P.M., was initially received for review by the Area Mining Supervisor on March 16, 1976. On May 17, 1977, the company submitted an updated mining plan to comply with the requirements of 30 CFR 211.10.

The purpose of this notice is to inform the public that the Area Mining Super-

visor proposes to approve the mining plan. Any person having an interest, which is or may be adversely affected by this action, may request a public meeting in writing. Requests should include the name and address of the requestor and should be submitted to the Area Mining Supervisor, Conservation Division, U.S. Geological Survey, P.O. Box 2550, Billings, Mont. 59103. All requests should be made on or before October 24, 1977. No decision on the plan to expand the North Pit will be made prior to October 24, 1977.

V. E. McKELVEY,
Director.

Dated: September 20, 1977.

National Park Service NATIONAL REGISTER OF HISTORIC PLACES

Additions, Deletions, and Corrections

By notice in the FEDERAL REGISTER of February 1, 1977, Part IX, there was published a list of the properties included in the National Register of Historic Places. Further notice is hereby given that certain amendments or revisions in the nature of additions, deletions, or corrections to the previously published list are adopted as set out below.

It is the responsibility of all Federal agencies to take cognizance of the properties included in the National Register as herein amended and revised in accordance with section 106 of the National Historic Preservation Act of 1966, 80 Stat. 16 U.S.C. 470 et seq. (1970 ed.), and the procedures of the Advisory Council on Historic Preservation, 36 CFR Part 800.

CHARLES A. HERRINGTON,
Acting Keeper
of the National Register.

The following properties have been added to the National Register since Sept. 6, 1977. National Historic Landmarks are designated by NHL; properties recorded by the Historic American Buildings Survey are designated by HABS; and properties recorded by the Historic American Engineering Record are designated by HAER.

The following properties have been determined to be eligible for inclusion in the National Register. All determinations of eligibility are made at the re-

NOTICES

quest of the concerned Federal Agency under the authorities in section 2(b) and 1(3) of Executive Order 11593 as implemented by the Advisory Council on Historic Preservation, 36 CFR Part 800. This listing is not complete. Pursuant to the authorities discussed herein, an Agency Official shall refer any questionable actions to the Director, Office of Archeology and Historic Preservation, National Park Service, Department of the Interior, for an opinion respecting a property's eligibility for inclusion in the National Register.

Historical properties which are determined to be eligible for inclusion in the National Register of Historic Places are entitled to protection pursuant to section 106 of the National Historic Preservation Act of 1966, as amended, and the procedures of the Advisory Council on Historic Preservation, 36 CFR Part 800. Agencies are advised that in accord with the procedures of the Advisory Council on Historic Preservation, before an agency of the Federal Government may undertake any project which may have an effect on such a property, the Advisory Council on Historic Preservation shall be given an opportunity to comment on the proposal.

[4410-01]**DEPARTMENT OF JUSTICE**

**Drug Enforcement Administration
COLLABORATION RESEARCH, INC.
Manufacture of Controlled Substances;
Correction**

On August 23, 1977, Notice was published in the FEDERAL REGISTER (No. 163, 42 FR 42392) that on July 18, 1977, Collaborative Research, Inc., 1365 Main Street, Waltham, Mass. 02154, made application to the Drug Enforcement Administration to be registered as a bulk manufacturer of lysergic acid diethylamide, a basic class of controlled substance in schedule I.

The latest date, September 26, 1977, for filing comments, objections and requests for a hearing was inadvertently omitted from the Notice.

Time for filing comments, objections and requests for a hearing is extended to October 14, 1977.

Dated: September 29, 1977.

PETER B. BENSINGER,
Administrator.

[FR Doc.77-29140 Filed 10-3-77;8:45 am]

[4410-01]

**CONTROLLED SUBSTANCES IN
SCHEDULE II**

**Proposed 1977—Revised Aggregate
Production Quota—Oxycodone for Conversion**

Section 306 of the Comprehensive Drug Abuse Prevention and Control Act of 1970 (21 U.S.C. 826) requires the Attorney General to establish aggregate

production quotas for all controlled substances in Schedules I and II each year. This responsibility has been delegated to the Administrator of the Drug Enforcement Administration pursuant to § 0.100 of Title 28 of the Code of Federal Regulations.

On August 1, 1977, a notice of the final aggregate production quota for this substance was published in the FEDERAL REGISTER (42 FR 38945). Since the finalization of this quota, DEA has been advised by the producer of oxymorphone, which is derived by conversion from oxycodone, that calculation errors were made in the derivation of data supplied to DEA in support of the quota request for this substance. These errors on the part of the manufacturer of oxymorphone dosage units has now resulted in an inadequate supply of oxycodone for conversion to produce the entire oxymorphone quota issued this manufacturer.

Factors which the Administrator of the Drug Enforcement Administration is required to consider pursuant to § 1303.11(b) (5) of Title 21 Code of Federal Regulations are yield and stability problems as well as potential disruption to production. Considering these factors as well as the other factors listed in § 1303.11 of Title 21 Code of Federal Regulations, the Administrator has deemed that it is necessary to allow the production during 1977 of additional amounts of oxycodone which will be utilized expressly for conversion to oxymorphone. Therefore, the Administrator of the Drug Enforcement Administration, under the authority vested in the Attorney General by Section 306 of the Comprehensive Drug Abuse Prevention and Control Act of 1970 (21 U.S.C. 826) and delegated to the Administrator by § 0.100 of Title 28 of the Code of Federal Regulations does hereby propose the following change of the aggregate production quota for 1977 for Oxycodone for Conversion expressed in grams in terms of anhydrous base:

Basic class	Previously finalized 1977 aggregate production quota	Proposed revised 1977 aggregate production quota
Oxycodone for conversion	8,400	11,000

All interested persons are invited to submit their comments and objections in writing regarding this proposal. The comments or objections should state with particularity the issues concerning which the person desires to be heard. Comments and objections should be submitted in quintuplicate to the Administrator, Drug Enforcement Administration, United States Department of Justice, Washington, D.C. 20537, Attention: DEA Federal Register Representative, and must be received by October 28, 1977. If a person believes that one or more issues raised by him warrant a full adversary-type hearing, he should so state and summarize the reasons for his belief.

In the event that comments or objections to this proposal raise one or more issues which the Administrator finds, in

NOTICES

his sole discretion, warrants a fully adversary-type hearing, the Administrator shall order a public hearing in the FEDERAL REGISTER summarizing the issues to be heard and setting the time for the hearing.

Dated: September 28, 1977.

PETER B. BENSINGER,
Administrator.

[FR Doc.77-29141 Filed 10-3-77;8:45 am]

[4510-01]**DEPARTMENT OF LABOR**

**Employment and Training Administration
EMPLOYMENT TRANSFER AND BUSINESS
COMPETITION DETERMINATIONS UNDER
RURAL DEVELOPMENT ACT**

Applications

The organizations listed in the attachment have applied to the Secretary of Agriculture for financial assistance in the form of grants, loans, or loan guarantees in order to establish or improve facilities at the locations listed for the purposes given in the attached list. The financial assistance would be authorized by the Consolidated Farm and Rural Development Act, as amended, 7 U.S.C. 1924 (b), 1932, or 1942 (b).

The Act requires the Secretary of Labor to determine whether such Federal assistance is calculated to or is likely to result in the transfer from one area to another of any employment or business activity provided by operations of the applicant. It is permissible to assist the establishment of a new branch, affiliate or subsidiary, only if this will not result in increased unemployment in the place of present operations and there is no reason to believe the new facility is being established with the intention of closing down an operating facility.

The Act also prohibits such assistance if the Secretary of Labor determines that it is calculated to or is likely to result in an increase in the production of goods, materials, or commodities, or the availability of services or facilities in the

area, when there is not sufficient demand for such goods, materials, commodities, services, or facilities to employ the efficient capacity of existing competitive commercial or industrial enterprises, unless such financial or other assistance will not have an adverse effect upon existing competitive enterprises in the area.

The Secretary of Labor's review and certification procedures are set forth at 29 CFR Part 75. In determining whether the applications should be approved or denied, the Secretary will take into consideration the following factors:

1. The overall employment and unemployment situation in the local area in which the proposed facility will be located.

2. Employment trends in the same industry in the local area.

3. The potential effect of the new facility upon the local labor market, with particular emphasis upon its potential impact upon competitive enterprises in the same area.

4. The competitive effect upon other facilities in the same industry located in other areas (where such competition is a factor).

5. In the case of applications involving the establishment of branch plants or facilities, the potential effect of such new facilities on other existing plants or facilities operated by the applicant.

All persons wishing to bring to the attention of the Secretary of Labor any information pertinent to the determinations which must be made regarding these applications are invited to submit such information in writing within two weeks of publication of this notice to:

Deputy Assistant Secretary for Employment and Training, 601 D St. NW, Washington, D.C. 20213.

Signed at Washington, D.C., this 26th day of September 1977.

ERNEST G. GREEN,
Assistant Secretary for
Employment and Training.

Applications received during the week ending September 23, 1977

Office of Federal Contract Compliance Programs

WOMEN IN CONSTRUCTION UNDER EXECUTIVE ORDER 11246, AS AMENDED
Proposed Goals and Timetables Pursuant to Proposed Rule; Extension of Comment Period

On August 16, 1977, a notice proposing goals and timetables for women in construction was published in the *FEDERAL REGISTER* (42 FR 41383). These goals and timetables would be issued under regulations (41 CFR Part 60-4) also proposed by the Department of Labor on August 16, 1977, pursuant to Executive Order 11246. That notice invited comment on the goals and timetables until September 30, 1977.

Since the publication of that document, various requests for the extension of the period provided for the receipt of comments have been received. The importance of the issues addressed in that proposal requires that the Department proceed to establish goals and timetables for women in construction as expeditiously as possible. However, the Department also wishes to provide sufficient time for all interested parties to prepare and submit their comments. Therefore, an additional 15-day period is provided and comments will be received on this proposal until October 15, 1977.

Dated: September 29, 1977.

WELDON J. ROUGEAU,
Director, Office of Federal
Contract Compliance Programs.

Occupational Safety and Health Administration

[V-77-3]

CLARK GRAVE VAULT CO.
Grant of Variance

AGENCY: Occupational Safety and Health Administration, Department of Labor.

ACTION: Grant of Variance.

SUMMARY: This notice announces the grant of a variance to the Clark Grave Vault Co. from the standards prescribed in 29 CFR 1910.22(c) and 1910.23(c) (3) concerning guardrails.

DATES: The effective date of the variance is October 4, 1977.

FOR FURTHER INFORMATION CONTACT:

James J. Concannon, Director, Office of Variance Determination, Occupational Safety and Health Administration, U.S. Department of Labor, 3rd Street and Constitution Avenue NW, Room N-3668, Washington, D.C. 20210, telephone: 202-523-7121.

or the following Regional and Area Offices:

U.S. Department of Labor, Occupational Safety and Health Administration, 32nd Floor, Room 3263, 230 South Dearborn Street, Chicago, Ill. 60604.
U.S. Department of Labor, Occupational Safety and Health Administration, 360 S. 3rd Street, Room 109, Columbus, Ohio 43215.

I. BACKGROUND

The Clark Grave Vault Co., 375 East Fifth Avenue, Columbus, Ohio 43201 has made application pursuant to section 6(d) of the Occupational Safety and Health Act of 1970 (84 Stat. 1596; 29 U.S.C. 655) and 29 CFR 1905.11 for a variance, and for an interim order pending a decision on the application for a variance, from the safety and health standards prescribed in 29 CFR 1910.22(c) and 1910.23(c) (3). Section 1910.22(c) requires that covers and/or guardrails shall be provided to protect personnel from the hazards of open pits, tanks, vats, ditches, etc. Section 1910.23(c) (3) requires that all galvanizing tanks be guarded with a standard guardrail and toeboard. Section 1910.23(e) states, among other things, that a standard guardrail shall consist of top rail, intermediate rail, and posts and shall have a vertical height of 42 inches nominal from upper surface of top rail to floor, platform, runway, or ramp level. The purpose of the standard is to protect employees from falling into these particularly hazardous areas. The facility affected by this application is as follows:

The Clark Grave Vault Co., 375 East Fifth Avenue, Columbus, Ohio 43201.

Notice of the application, and of the granting of the interim order, was published in the *FEDERAL REGISTER* on July 1, 1977 (42 FR 33813). The notice invited interested persons, including affected employers and employees, to submit written data, views, and arguments regarding the grant or denial of the variance request. In addition, affected employers and employees were notified of their right to request a hearing on the application for a variance. No written comments or requests for a hearing have been received.

II. FACTS

The applicant operates a galvanizing tank which has a 30 inch side height and a 31½ inch ledge width. The applicant asserts that the erection of a 42 inch guardrail around its galvanizing tank would seriously interfere with necessary work practices such as the moving of items into and out of the tank and the skimming of the zinc.

The applicant argues that the combined 30 inch wall height and 31½ inch width would provide the same protection as would a 42 inch guardrail.

III. DECISION

Section 1910.22(c) requires that guardrails be provided to protect personnel from the hazards of open pits, tanks, etc. Section 1910.23(c) (3) requires that

regardless of height, open-sided floors, walkways, platforms or runways above or adjacent to dangerous equipment, pickling or galvanized tanks, degreasing units or similar hazards shall be guarded with a standard railing and toeboard.

In the work area described, the 31½ inch ledge width prevents an employee from accidentally stepping into the tank. The 30 inch side height is sufficient to allow an employee to right himself if he should fall towards the tank. The combination of side height and ledge width, together with the applicant (1) assuring that no employee walks, steps or sits on the ledge around the tank, and (2) training the employees regarding the proper performance of the operation and the hazards associated with walking, stepping, and sitting on the ledge around the tank, provides protection as safe as that which would be provided by use of a standard guardrail and toeboard.

IV. ORDER

Pursuant to authority in section 6(d) of the Occupational Safety and Health Act of 1970, and in the Secretary of Labor's Order No. 8-76 (41 FR 25059), it is ordered that The Clark Grave Vault Company, be, and it is hereby, authorized to continue its operation while using its galvanizing tank having ledges 31½ inches wide and sides 30 inches high, in lieu of the standard guardrail and toeboard required by 29 CFR 1910.22(c) and 1910.23(c) (3) provided that:

(1) No employee shall walk, step, or sit on the ledge around the tank.

(2) Training and information regarding the hazards associated with and the prohibition against walking, stepping or sitting on the ledge around the tank shall be provided for current employees within one week of the effective date of this variance, for new employees at the time of their initial assignment, and for all employees on a quarterly basis after their initial training.

As soon as possible, The Clark Grave Vault Co. shall give notice to affected employees of the terms of this order by the same means required to be used to inform them of the application for variance.

Effective date. This order shall become effective on October 4, 1977, and shall remain in effect until modified or revoked in accordance with section 6(d) of the Occupational Safety and Health Act of 1970.

Signed at Washington, D.C. this 27th day of September, 1977.

EULA BINGHAM,
Assistant Secretary of Labor.

[4510-26]

CONNECTICUT STATE STANDARDS

Approval

1. *Background.* Part 1953 of Title 29, Code of Federal Regulations prescribes procedures under section 18 of the Occupational Safety and Health Act of 1970 (hereinafter called the Act) by which the

Regional Administrator for Occupational Safety and Health (hereinafter called the Regional Administrator), under a delegation of authority from the Assistant Secretary of Labor for Occupational Safety and Health (hereinafter called the Assistant Secretary), (29 CFR 1953.4) will review and approve standards promulgated pursuant to a State plan which has been approved in accordance with section 18(c) of the Act and 29 CFR Part 1902. On January 4, 1974, notice was published in the *FEDERAL REGISTER* (39 FR 1012) of the approval of the Connecticut plan and the adoption of Subpart X to Part 1952 containing the decision.

The Connecticut plan provides for the adoption of Federal standards as State standards (or "for the adoption of State standards which are at least as effective as the comparable Federal standards" where relevant). On May 3, 1977 the Occupational Safety and Health Administration (OSHA) adopted pursuant to section 6(c) of the Act, an emergency temporary standard for Occupational Exposure to Benzene, (42 FR 22516). By letter dated June 8, 1977 from Frank Santaguida, Commissioner, Connecticut Department of Labor to Gilbert J. Saulter, Regional Administrator, and incorporated as part of the plan, the State submitted its emergency temporary standard. This standard was promulgated on May 20, 1977, in accordance with applicable State law contained in Sections 31-372 and 4-168(b) of the Connecticut State laws.

2. *Decision.* Having reviewed the State submission in comparison with the Federal standards, it has been determined that the State standards are identical to the Federal standards and accordingly should be approved. The detailed standards comparison is available at the location specified below.

3. *Location of supplement for inspection and copying.* A copy of the standards supplement, along with the approved plan may be inspected and copied during normal business hours at the following locations: Office of the Regional Administrator, U.S. Department of Labor—OSHA, John F. Kennedy Federal Building, Room 1804, Government Center, Boston, Mass. 02203; State of Connecticut Department of Labor, 200 Folly Brook Boulevard, Wethersfield, Conn. 06109; and the Technical Data Center, Room N3620, 200 Constitution Avenue, Washington, D.C. 20210.

4. *Public participation.* 29 CFR 1953.22 (b) (1) provides that emergency temporary standards which are identical to or "at least as effective as" the comparable Federal standards may be approved effective upon publication under the Administrative Procedure Act requirements for good cause, 5 U.S.C. 553(b) (3) (B), for the following reasons:

1. The standard was adopted in accordance with the procedural requirements of State law which authorizes promulgation without public participation for emergency standards, and par-

ticipation at the Federal level would be impractical.

2. The emergency nature of the standard requires that its approval be implemented immediately.

This decision is effective October 4, 1977.

(Sec. 18, Pub. L. 91-596, 84 Stat. 1608 (29 U.S.C. 667).)

Signed at Boston, Mass., this 2nd day of August 1977.

GERALD M. DUWORS,
Acting Regional Administrator.

FRANCIS HANKIN & CO., INC.

Variance and Interim Order

AGENCY: Occupational Safety and Health Administration, Department of Labor.

ACTIONS: (1) Notice of application for variance and interim order; (2) Grant of interim order.

SUMMARY: This notice announces the application of Francis Hankin & Co., Inc. for a variance and interim order pending a decision on the application for a variance from the standards prescribed in 29 CFR 1926.552(c) concerning personnel hoists, and 1926.451(1)(5) concerning boatswain's chairs. It also announces the granting of an interim order until a decision is rendered on the application for variance.

DATES: The effective date of the interim order is October 4, 1977. The last date for interested persons to submit comments is November 3, 1977. The last date for affected employers and employees to request a hearing on the application is November 3, 1977.

ADDRESSES: Send comments or requests for a hearing to: Office of Variance Determination, Occupational Safety and Health Administration, U.S. Department of Labor, 3rd Street and Constitution Avenue NW, Room N-3668, Washington, D.C. 20210.

FOR FURTHER INFORMATION CONTACT:

Mr. James J. Concannon, Director, Office of Variance Determination, at the above address telephone 202-523-7121, or the following Regional Offices:

U.S. Department of Labor, Occupational Safety and Health Administration, Federal Office Building, Room 6048, 909 First Avenue, Seattle, Wash. 98174.

I. NOTICE OF APPLICATION

Notice is hereby given that Francis Hankin & Co., Inc., 117 Crockford Blvd., Scarborough, Ontario, Canada M1R 3B9, has made application pursuant to section 6(d) of the Occupational Safety and Health Act of 1970 (84 Stat. 1596; 29 U.S.C. 655) and 29 CFR 1905.11 for a variance, and an interim order pending a decision on the application for a variance, from the standards prescribed in 29 CFR 1926.552(c) Personnel Hoists and 29 CFR 1926.451(1)(5) Boatswain's chairs.

The places of employment that will be affected by the application are all the applicant's chimney construction sites in States under Federal jurisdiction, and all future stack erection sites in States under Federal jurisdiction.

The applicant certifies that employees who would be affected by the variance have been notified of the application by giving a copy of it to their authorized employee representative, and by posting a copy at all places where notices to employees are normally posted. Employees have also been informed of their right to petition the Assistant Secretary for a hearing.

The applicant requested a variance from § 1926.451(1)(4) to permit the use of wire rope in lieu of manila rope. Section 1926.451(1)(4) requires an employee using a boatswain's chair to be protected by a safety belt and lifeline in accordance with § 1926.104. Under § 1926.104(c) manila or equivalent rope is permitted. Since wire rope is equivalent to manila rope, a variance from § 1926.451(1)(4) is unnecessary.

Regarding the merits of the application, the applicant contends that it is providing a place of employment as safe as that required by §§ 1926.451(1)(5) and 1926.552(c).

The applicant is engaged in the construction of chimneys and/or chimney liners. In erecting or repairing the chimney and/or chimney liner, work must be performed at elevations at which access ladders are impractical.

The applicant contends that it is not feasible to use personnel hoists meeting the requirements of 1926.552(c) inside a chimney. In a small chimney there would be insufficient room to construct a hoist tower and the hoist tower would interfere with the design and construction of the chimney and/or chimney liner.

Instead, the applicant states that it would use a system incorporating Special Workmen's Hoist and Safety Cages, boatswain's chairs, and a material hoist. Specifically, the applicant proposes to transport personnel to and from the elevated platform, during maintenance (repair) or construction work on chimneys, utilizing a Special Workmen's Hoist, including the hoist machine, safety cage with safety cables on opposite sides, safety devices that will grip the safety cables in the event of any failure of the hoisting cable and limit switches to prevent overrun of the cage at both top and bottom of the chimney; to transport personnel one at a time to and from the elevated scaffold during maintenance or construction work on chimneys or chimney liners of a small diameter or from a bracket scaffold on the outside of a chimney utilizing a boatswain's chair attached to the hoisting cable of a material hoist from which the material bucket shall be temporarily disconnected; to attach the safety belt of the personnel being transported one at a time to or from the elevated scaffold in the boatswain's chair to a clamp riding a separate lifeline of 3/8-inch diameter wire rope securely attached to the rigging at the top and to a weight at the bottom; and to substitute the material hoist for the "block and falls" when transporting personnel one at a time in a boatswain's chair. The applicant has submitted detailed procedures which it will follow in transporting personnel by these means in lieu of the requirements of 29 CFR 1926.451(1)(5) and 29 CFR 1926.552(c).

II. INTERIM ORDER

It appears from the application for a variance and interim order that, as required by section 6(d) of the Act, the use of a Special Workmen's Hoist to transport employees and the substitution of a materials hoist for block and falls on a boatswain's chair will provide to the affected employees a place of employment as safe as that which would be provided if the applicant complied with 29 CFR 1926.451(1)(5) and 1926.552(c). It further appears that an interim order is necessary to prevent undue hardship to the applicant and its employees pending a decision on the variance. Therefore it is ordered, pursuant to the authority in section 6(d) of the Occupational Safety and Health Act of 1970, in 29 CFR 1905.11(c), and in Secretary of Labor's Order No. 8-76 (41 FR 25059), that Francis Hankin Co., Inc., be, and it is hereby, authorized to utilize a Special Workmen's

Hoist consisting of a hoist machine and a special two-man safety cage to transport employees to and from the work platform, and to use a boatswain's chair to transport employees one at a time while substituting a materials hoist for the block and falls, provided that the following conditions are complied with:

I. HOIST MACHINE

- a. *Requirements.* (1) The hoist machine shall be designated as a portable man hoist.
- (2) The hoist machine shall be powered both in the up and down direction.
- (3) The hoist machine shall be located far enough from the footblock to obtain correct feet angle or proper spooling on the hoist drum.
- (4) The hoisting machine shall be a type of which the car hoisting drum is driven in both directions of rotation and is automatically stopped and held rotationless upon loss of applied power so that the drum cannot be in a freewheeling condition. A drive system of which the hoisting drum can be placed into a freewheeling position for the purpose of lowering the car by use of the braking system or a system of which the velocity of the car being lowered is reduced by increasing the engine or motor speed shall not be allowed.
- (5) The hoist machine shall be equipped with a "deadman" control switch in top of operating lever or in conventional foot-type location which shall stop the hoist immediately if released.
- (6) The hoist machine shall be equipped with a winding drum of not less than 30 times the diameter of rope used, with rope not to be spooled closer than two inches to edge of flange.

- (7) The hoist machine shall be equipped with a line speed indicator maintained in good working condition.
- (8) The hoist machine shall be equipped with either two independently operated brakes each capable of holding the load as follows:

- (i) An externally contracting band type brake mounted directly on the hoist drum. A foot pedal shall be located near the operator's seat for sit down control.
- (ii) An electromagnetic braking device, capable of holding 150 percent of the rated load, which shall be automatically applied upon cessation of power. The electromagnetic brake shall be properly located in the drive between the power source and the drum or two independent band type brakes in conjunction with hydraulic braking, each capable of holding the load as follows:

- (i) Two independent band type brakes, one mounted directly on the hoist drum, the second mounted directly on the hydraulic motor which are spring engaged and hydraulically disengaged and will automatically engage upon cessation of power and capable of withstanding 150 percent of the rated load.

- (ii) Hydraulic braking system which is concurrent with hand control lever.

- (9) (i) The hoist machine frame shall be self supporting rigid, welded steel frame with skid base and holding brackets for anchor lines located at corners, as well as legs for anchor bolts.

- (ii) The hoisting machine shall be securely anchored to prevent machine displacement, movement or dislodgement.

- (10) Hoist machine wiring shall be equipped with terminal blocks for connections with limit switches that are placed at upper and lower end of travel to prevent the bottom of the cage from being taken above the platform level of the top scaffold or below the bottom loading platform. The hoist shall stop automatically if limit switch contact is opened.

- (11) All electrical equipment shall be waterproof.

- (12) The hoisting machine shall be electrically grounded.

- (13) Single lever control for both speed and direction shall be used.

- b. *Operating control.* (1) The operator of the hoist shall be an experienced operator.

- (2) The hoist shall not be operated in excess of 250ft/min. when carrying personnel.

- (3) Signals shall consist of two-way radio or wired intercom between hoist operator, the lower landing and the upper landing.

- c. *Hoist rope.* (1) The hoisting rope shall be improved plow steel or equivalent quality of nonrotating type or regular lay rope with proper swivel and shall be not less than one-half inch diameter. It shall be attached to the cage by a closed hook or hook with locking swivel safety latch.

- (2) Where clip fastener is used, the clips shall be installed in accordance with Table H-20, 29 CFR 1926.251(a)(2) and they shall be installed with "U" of clip on dead end of rope. Spacing clip-to-clip shall be six times the diameter of the rope.

- (3) The load end of the hoist rope shall be weighted to prevent line run.

- d. *Footblock.* (1) The footblock shall be of construction type of solid single piece ball, which will prevent rope escapement due to sheave failure, and provide for rope return.

- (2) The line diameter of the footblock shall be not less than 24 times the rope diameter.

- (3) The change in directions of hoist rope at the footblock shall be approximately 90°.

- e. *Cathead.* (1) The overhead sheave supports shall be securely fastened together by bolts or weld to prevent spreading. The sheaves shall be installed between the supporting members and shall rotate on a fixed shaft or the shaft shall revolve in pillow block bearings.

- (2) The sheaves used on cathead shall have a minimum diameter equal to 24 times diameter of rope when travel of rope on the sheaves is approximately 90°. When using 1/2 inch diameter rope, the corresponding minimum sheave diameter shall be 12 inches.

II. SAFETY CAGE

- a. *Cage.* (1) The cage shall be of welded construction of two-man capacity.

- (2) The framework of the cage shall be covered with aluminum expand-X or equivalent.

- (3) The floor shall be of 3/4 inch thick plywood securely fastened in place, or equivalent.

- (4) The roof shall be slanted and of 1/2 inch thick aluminum or equivalent.

- (5) The entrance to the cage shall have positive mechanical locking.

- (6) Safety clamps shall be of a type that are portable and can be attached or detached from the safety cable. The clamps shall be fabricated 100 percent of stainless steel, having instant holding action, and a solid self-locking pin, spring loaded, for locking the two parts together.

- (7) The safety clamps attached on opposite sides of the cage shall grip the safety cables in case of emergency.

- (8) The safety clamps shall operate on the broken rope principle.

- b. *Safety cables.* (1) There shall be two steel safety cables suitable for use with safety clamps, as described in paragraph (g) (6), (7) and (8), or equivalent.

- (2) One end shall be fastened to an overhead support which is supported independently of the overhead support for the hoist rope and the bottom end securely attached with approximately 100 pound tension in ropes. Safety cables shall be 3/4 inch diameter when used with two-man cage.

- c. *Capacity.* The maximum for the two-man cage shall be 2 men or 400 pounds. A

sign stating capacity shall be posted in the cage.

d. *Emergency escape.* An emergency escape device with accommodations for each man in the cage with a minimum 5/16 inch braided nylon rope or better, long enough to reach the bottom landing from the highest escape point below the upper landing shall be securely attached to the inside of the cage. Not more than one man shall use the escape means at a time.

III. WELDING

All welding shall be done by welders in accordance with § 1926.556(b)(5).

IV. INSPECTION

- (1) Visual inspection shall be performed daily on the manlift system.

- (2) A drop test shall be performed before initial use at each job and monthly thereafter for the duration of the job.

Francis Hankin & Co., Inc., shall give notice of this interim order to employees affected thereby by the same means required to be used to inform them of the application for variance.

Effective date: This interim order shall be effective as of October 4, 1977, and shall remain in effect until a decision is rendered on the application for variance.

Signed at Washington, D.C. this 27th day of September, 1977.

EULA BINGHAM,

Assistant Secretary of Labor.

Office of the Secretary

INVESTIGATIONS REGARDING CERTIFICATIONS OF ELIGIBILITY TO APPLY FOR WORKER ADJUSTMENT ASSISTANCE

Petitions have been filed with the Secretary of Labor under Section 221(a) of the Trade Act of 1974 ("the Act") and are identified in the Appendix to this notice. Upon receipt of these petitions, the Director of the Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, has instituted investigations pursuant to Section 221(a) of the Act and 29 CFR 90.12.

The purpose of each of the investigations is to determine whether absolute or relative increases of imports of articles like or directly competitive with articles produced by the workers' firm or an appropriate subdivision thereof have contributed importantly to an absolute decline in sales or production, or both, of such firm or subdivision and to the actual or threatened total or partial separation of a significant number or proportion of the workers of such firm or subdivision.

Petitioners meeting these eligibility requirements will be certified as eligible to apply for adjustment assistance under Title II, Chapter 2, of the Act in accordance with the provisions of Subpart B of 29 CFR Part 90. The investigations with further relate, as appropriate, to

the determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved.

Pursuant to 29 CFR 90.13, the petitioners or any other persons showing a substantial interest in the subject matter of the investigations may request a public hearing, provided such request is filed in writing with the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than October 14, 1977.

Interested persons are invited to submit written comments regarding the subject matter of the investigations to the Director, Office of Trade Adjustment

Assistance, at the address shown below, not later than October 14, 1977.

The petitions filed in this case are available for inspection at the Office of the Director, Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, U.S. Department of Labor, 200 Constitution Avenue NW., Washington, D.C. 20210.

Signed at Washington, D.C. this 12th day of September 1977.

MARVIN M. FOOKS,

Director, Office of Trade Adjustment Assistance.

**Employment and Training Administration
FEDERAL COMMITTEE ON
APPRENTICESHIP**

Cancellation of Meeting

Notice is hereby given of the cancellation of the meeting of the Federal Committee on Apprenticeship, Employment and Training Administration, October 6-7, 1977, at The Harry Lundberg School, Lundberg Maryland Seaman's School, Inc., Piney Point, Md., which was published in the FEDERAL REGISTER on September 21, 1977 (42 FR 47595) and again on September 23, 1977 (42 FR 48413).

This cancellation is due to the uncertain funding authority for the Department of Labor until the enactment of the 1978 Labor-HEW Appropriation Bill.

Signed at Washington, D.C., this 3rd day of October 1977.

ERNEST G. GREEN,
Assistant Secretary for Em-
ployment and Training Ad-
ministration.

**NATIONAL AERONAUTICS AND
SPACE ADMINISTRATION**

[Notice (77-65)]

**RESEARCH AND TECHNOLOGY ADVISORY
COUNCIL INFORMAL COMMITTEE ON
AERIAL APPLICATIONS TECHNOLOGY**

Meeting

A meeting of the NASA Research and Technology Advisory Council Informal Committee on Aerial Applications Technology originally scheduled for October 5-6, 1977 and announced in FEDERAL REGISTER Doc. 77-60 dated Friday, September 16, 1977 on page 46621 has been rescheduled and will be held November 8-10, 1977. The previously announced places, hours and agenda remain the same. The meeting is open to the public.

KENNETH R. CHAPMAN,
Assistant Administrator for
DOD and Interagency Af-
fairs, National Aeronautics
and Space Administration.

**NATIONAL SCIENCE FOUNDATION
RESEARCH INITIATION AND SUPPORT
(RIAS)**

Project Directors' Meeting

A project directors' meeting will be held from 7:30 p.m. to 9 p.m. on October 20, 1977 at the Holiday Inn, 5520 Wisconsin Ave., Chevy Chase, and from 8:30 a.m. to 5 p.m. on October 21, 1977 at 5225 Wisconsin Avenue NW., Room 651, Washington, D.C.

The purpose of this meeting is to give project directors of the Research Initiation and Support program an opportunity to become better informed regarding appropriate methods for conducting internal project evaluation and to allow the RIAS staff to set into motion mechanisms for monitoring of projects.

While this project directors' meeting is not considered to be a meeting of an "advisory committee" as that term is defined in Section 3 of the Federal Advisory Committee Act (Public Law 92-463), the meetings are believed to be of sufficient importance and interest to the general public to be announced in the FEDERAL REGISTER as meetings open for public attendance and participation.

The meeting will be chaired by Dr. Alfred F. Borg. Because of space limitation, members of the public who wish to attend should call 202-282-7950 regarding attendance at any of these meetings.

TERENCE L. PORTER,
Acting Division Director,
Division of Science Education,
Resources Improvement.

September 29, 1977.

**SUBCOMMITTEE ON ANTHROPOLOGY OF
ADVISORY COMMITTEE FOR BEHAV-
IORAL AND NEURAL SCIENCES**

Meeting

In accordance with the Federal Advisory Committee Act, Pub. L. 92-463, as amended, the National Science Foundation announces the following meeting:

NAME: Subcommittee on Anthropology of the Advisory Committee for Behavioral and Neural Sciences.

DATE & TIME: October 20, 21 and 22, 1977, 9 a.m. to 5 p.m. each day.

PLACE: Room 628, National Science Foundation, 1800 G Street NW., Washington, D.C. 20550.

TYPE OF MEETING: Closed.

CONTACT PERSON:

John E. Yellen, Program Director for Anthropology, Room 320, National Science Foundation, 1800 G Street NW., Washington, D.C. 20550, telephone: 202-632-4208.

PURPOSE OF SUBCOMMITTEE: To provide advice and recommendations concerning support for research in anthropology.

AGENDA: To review and evaluate research proposals and projects as part of the selection process for awards.

REASON FOR CLOSING: The proposals being reviewed include information of a proprietary or confidential nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with the proposals. These matters are within exemptions (4) and (6) of 5 U.S.C. 552b(c), Government in the Sunshine Act.

AUTHORITY TO CLOSE MEETING: This determination was made by the Committee Management Officer pursuant to provisions of Section 10(d) of Pub. L. 92-463. The Committee Management Officer was delegated the authority to make such determinations by the Director, NSF, on February 18, 1977.

M. REBECCA WINKLER,
Acting Committee
Management Officer.

**OFFICE OF MANAGEMENT AND
BUDGET**

CLEARANCE OF REPORTS

List of Requests

The following is a list of requests for clearance of reports intended for use in collecting information from the public received by the Office of Management and Budget on September 26, 1977 (44 U.S.C. 3509). The purpose of publishing this list in the FEDERAL REGISTER is to inform the public.

The list includes the title of each request received; the name of the agency sponsoring the proposed collection of information; the agency form number(s), if applicable; the frequency with which the information is proposed to be collected; the name of the reviewer or reviewing division within OMB, and an indication of who will be the respondents to the proposed collection.

Requests for extension which appear to raise no significant issues are to be approved after brief notice through this release.

Further information about the items on this daily list may be obtained from the Clearance Office, Office of Management and Budget, Washington, D.C. 20503 (202-395-4529), or from the reviewer listed.

SECURITIES AND EXCHANGE COMMISSION

[SR-Amex-77-17; Release No. 13952]

AMERICAN STOCK EXCHANGE, INC.

Order Approving Proposed Rule Change

SEPTEMBER 13, 1977.

In the matter of American Stock Exchange, Inc., 86 Trinity Place, New York, N.Y. 10006 (SR-Amex-77-17).

On July 27, 1977, the American Stock Exchange, Inc. ("Amex") filed with the Commission, pursuant to Section 19(b) of the Securities Exchange Act of 1934 (the "Act"), as amended by the Securities Acts Amendments of 1975, and Rule 19b-4 thereunder, copies of a proposed rule change to provide a procedure whereby a listed company may obtain review of Exchange determinations to halt or suspend trading in its securities.

Notice of the proposed rule change together with the terms of substance of the proposed rule change was given by publication of a Commission Release (Securities Exchange Act Release No. 13811 (August 1, 1977)) and by publication in the FEDERAL REGISTER (42 FR 40301 (August 9, 1977)).

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to national securities exchanges, and in particular, the requirements of Section 6 and the rules and regulations thereunder.

It is therefore ordered, pursuant to Section 19(b)(2) of the Act, that the above-mentioned proposed rule change be, and it hereby is approved.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[8010-01]

[SR-Amex-77-10; Release No. 13957]

AMERICAN STOCK EXCHANGE, INC.

Order Approving Proposed Rule Change

SEPTEMBER 14, 1977.

In the matter of American Stock Exchange, Inc., 86 Trinity Place, New York, N.Y. 10006 (SR-Amex-77-10).

On May 13, 1977, the American Stock Exchange, Inc. filed with the Commission, pursuant to Section 19(b)

of the Securities Exchange Act of 1934 (the "Act"), as amended by the Securities Acts Amendments of 1975, and Rule 19b-4 thereunder, copies of a proposed rule change. The rule change would require that options be restricted on that exchange only when such options are required to be restricted on all exchanges which list such options.

Notice of the proposed rule change together with the terms of substance of the proposed rule change was given by publication of a Commission Release (Securities Exchange Act Release No. 13586 (June 1, 1977)), and by publication in the FEDERAL REGISTER (42 FR 29978 (June 10, 1977)).

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to registered national securities exchanges, and in particular, the requirements of Section 6 and the rules and regulations thereunder.

It is therefore ordered, pursuant to Section 19(b)(2) of the Act, that the proposed rule change filed with the Commission on May 13, 1977, be, and it hereby is, approved.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[8010-01]

[812-4084; Release No. 9947]

FIRST INVESTORS FUND, INC. ET AL.

Application for Order Exempting Proposed Transactions From Certain Provisions

SEPTEMBER 26, 1977.

In the matter of First Investors Fund, Inc., First Investors Fund for Growth, Inc., First Investors Discovery Fund, Inc., First Investors Fund for Income, Inc., First Investors Trend Fund, Inc., First Investors Tax Exempt Fund, Inc. and First Investors Management Company, Inc., 120 Wall Street, New York, N.Y. 10005 (812-4084).

Notice is hereby given That First Investors Fund, Inc., First Investors Fund for Growth, Inc., First Investors Discovery Fund, Inc., First Investors Fund for Income, Inc., First Investors Trend Fund, Inc., and First Investors Tax Exempt Fund, Inc. (hereinafter referred to collectively as "Funds"), each of which is an open-end, diversified management investment company registered under the Investment Company Act of 1940 ("Act"), and the Funds' investment adviser, principal underwriter and distributor, First Investors Management Company, Inc. ("Management Company") (hereinafter referred to collectively with the Funds as "Applicants"), have filed an application on January 23, 1977, and amendments thereto on June 27, 1977, and July 15, 1977, pursuant to Section 6(c) of the Act, for an order

of the Commission exempting certain transactions described herein from the provisions of Section 22(d) of the Act. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below.

According to the Application, the Management Company is a member of the National Association of Securities Dealers, Inc. and a registered broker-dealer, all of whose common stock is owned by First Investors Consolidated Corporation. Applicants represent that Fund shares are sold to the public primarily by representatives licensed to the Funds' co-underwriter, First Investors Corporation; these representatives are life insurance salesmen who sell the life insurance products of First Investors Life Insurance Company ("Insurance Company"), which is 81.6 percent owned by First Investors Consolidated Corporation. Applicants also represent that as of December 31, 1976, total life insurance in force issued by the Insurance Company was over \$260 million, of which approximately \$68 million was of the dividend-paying participant type; the dividends arising from such dividend paying policies currently approximate \$220,000 per annum and approximately 5,200 such policies are in force.

Applicants have filed this application pursuant to Section 6(c) of the Act for an order of the Commission exempting from Section 22(d) of the Act a proposed plan which permits the holders of such dividend-paying policies to invest the dividends paid by the Insurance Company in shares of any of the Funds at net asset value. According to Applicants, the proposed plan would be submitted to policyholders of the Insurance Company, in writing, as a separate supplement to their application for insurance and as a sixth option for the distribution of such dividends. Applicants state that the alternative options for the distribution of such dividends are (1) payment in cash; (2) application towards premium payments; (3) accumulation at interest; (4) purchase of paid-up additions of insurance; and (5) purchase of one-year term insurance. According to the application, the proposed sixth option has been approved by the appropriate departments of insurance for the states of New York, New Jersey, Connecticut, Ohio and Virginia.

Applicants submit that the proposed plan would be implemented in the following manner: (1) policyholders of the Insurance Company would be offered their choice of investment in any of the Funds; (2) at the time the policyholder executes his option to invest, he would be furnished a prospectus of the Fund which he indicated as his choice for investment; (3) dividends in the amount of \$50 or more would be applied wholly to the purchase of whole and fractional shares of the Fund; (4) dividends of less than \$50 would not be applied to the purchase of any Fund shares and such dividends would be distributed in some

other manner as designated by the policyholder; (5) the premiums paid by the policyholder will be the same whether or not he chooses to purchase shares of one of the Funds pursuant to this plan; (6) purchases of Fund shares in this manner are limited to the amount of dividends derived from the policyholder's insurance; (7) a policyholder may revoke the authority to apply his dividends to the purchase of Fund shares and notice of such a right of revocation shall be made a part of such authorization; (8) cancellation or other termination of insurance shall terminate such authorization to purchase Fund shares but shall not affect the policyholder's interest in any Fund shares already so purchased; and (9) revocation by the policyholder of the authority to apply dividends to the purchase of Fund shares will not affect any insurance in force or the status of any Fund shares previously purchased by the policyholder. Applicants state that should the order requested herein be granted, dividends which have been designated by policyholders for the purchase of Fund shares shall be held by the Insurance Company; the Insurance Company, on the dividend date, will place an order with the designated Funds for the appropriate amount of shares, which order shall be executed at the net asset value next computed after receipt of the order.

Section 22(d) of the Act provides, in part, that no registered investment company or principal underwriter for any redeemable security issued by such company shall sell any such security to any person except at a current public offering price described in the prospectus.

Applicants submit that their request for exemption from Section 22(d) of the Act to permit policyholders of the Insurance Company to invest their annual dividends from the Insurance Company in shares of each and any of the Funds at net asset value, rather than at their public offering price (which includes a "sales load"), is motivated, in part, by the fact that such policyholders have already paid a sales charge on the purchased insurance. Moreover, Applicants submit that such a procedure would not be unfair to present shareholders of the Funds since the purchase at net asset value would not dilute the per share value of Fund shares. Applicants state that the requested order of exemption is further justified because most agents of the Insurance Company are also representatives of First Investors Corporation and sell both life insurance and the Funds' shares; elimination of the sales charge on shares of the Funds purchased by policyholders would, in Applicants' view, be proper since there would be no additional sale efforts, commissions or expenses incurred in connection with such purchases.

Section 6(c) of the Act provides, in part, that the Commission, upon application, may conditionally or unconditionally exempt any person, security, or transaction, or any class or classes of persons, securities, or transactions, from

any provision or provisions of the Act or of any rule or regulation thereunder, if and to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Notice is further given That any interested person may, not later than October 20, 1977, at 5:30 p.m., submit to the Commission in writing a request for a hearing on the matter accompanied by a statement as to the nature of his interest, the reason for such request, and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail upon Applicants at the address stated above. Proof of such service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed contemporaneously with the request. As provided by Rule 0-5 of the Rules and Regulations promulgated under the Act, an order disposing of the application will be issued as of course following said date unless the Commission thereafter orders a hearing upon request or upon the Commission's own motion. Persons who request a hearing, or advice as to whether a hearing is ordered, will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[812-4184; Rel. No. 9943]

FORD INTERNATIONAL CAPITAL CORP.

Application for Order Amending a Prior Order of the Commission Granting an Exemption

SEPTEMBER 23, 1977.

In the Matter of Ford International Capital Corp., The American Road, Dearborn, Mich. 48121 (812-4184).

Notice is hereby given That Ford International Capital Corp. ("Applicant"), a wholly-owned finance subsidiary of Ford Motor Co. ("Ford"), has filed an application on September 2, 1977 and an amendment thereto on September 16, 1977, pursuant to Section 6(c) of the Investment Company Act of 1940 ("Act") and Rule 6c-1(c)(2) thereunder for an order amending an order of the Commission dated November 14, 1969 and published as Release No. IC-5886 (the "1969 Order") to permit the Applicant to issue certain debt securities to purchasers in foreign countries. All interested persons are referred to the appli-

cation and amendment thereto on file with the Commission for a statement of the representations contained therein, which are summarized below.

Applicant, a Delaware corporation, was formed by Ford in 1968 primarily to raise funds abroad for Ford's foreign operations. The 1969 Order under Section 6(c) of the Act exempted the Applicant from all provisions of the Act subject to the condition that it not issue, subsequent to the offer and sale of certain of its guaranteed debentures, without further order of the Commission, any securities (except to its parent or to a subsidiary of the parent company which is not an investment company) in the event that the United States Interest Equalization Tax ("IET") was not reenacted or was reenacted and expired, was repealed or the rate thereof was reduced to zero and was not replaced by a comparable tax.

It is proposed that the Applicant be permitted to issue for offer and sale to purchasers in foreign countries its unsecured promissory notes in the aggregate principal amount of \$25 million (the "1977 Notes"). Payment of principal of and interest on these notes would be guaranteed by Ford. The notes would not be offered or sold directly or indirectly in the United States or to a United States Person or to any person purchasing any note for resale to, or for the benefit of, or for the account of, any United States Person. The term "United States" means the United States of America and includes its territories, its possessions and all areas subject to its jurisdiction; and the term "United States Person" means any person who is a national, citizen or resident of, or a person normally resident in, the United States, including any corporation or other entity organized under the laws of the United States or any political subdivision thereof.

Applicant states that the 1977 Notes will not be subject to the IET at a rate greater than zero or any other tax providing a comparable deterrent to the purchase of the 1977 Notes by United States Persons. Therefore, the Applicant seeks a Commission order amending the 1969 Order to permit the Applicant to issue the 1977 Notes.

Applicant represents that it should be permitted to proceed with the issuance of the 1977 Notes for, among others, the following reasons:

- (1) A significant effect of the Applicant's operations is to assist in improving the balance of payments position of the United States by obtaining funds for foreign operations in foreign countries.
- (2) It is asserted that it is unlikely that United States Persons would be interested in investing in the 1977 Notes because (a) the coupon rate on the 1977 Notes would probably not be attractive to investors when compared to interest rates available on similar quality and denomination notes in the United States, (b) the restrictions on purchase and sale will make acquisition of the 1977 Notes by United States Persons difficult, and (c) the large minimum denomination

and the lack of a listing on any securities exchange will discourage a secondary market in the 1977 Notes.

(3) The payment of the principal of and interest on the Notes is guaranteed by Ford and does not depend on the operations or investment policy of the Applicant, because the holders of the 1977 Notes are entitled ultimately to look to the business of Ford for assurance of repayment. Accordingly, it is asserted that the public policy that led to the enactment of the Act is not applicable to the Applicant, nor do the security holders of the Applicant require the protections afforded by the Act.

In addition, the Applicant has agreed that an order amending the 1969 Order to provide that the Applicant may issue the 1977 Notes may be issued subject to the conditions (i) that the Applicant comply with all of the requirements of paragraph (b) of Rule 6c-1 and (ii) that the Applicant will not issue, subsequent to the offering and sale of the 1977 Notes, any additional securities (except to Ford or a subsidiary of Ford which is not an investment company) without a further order of the Commission; provided, however, that in the event that (i) the Applicant becomes exempt from each and every provision of the Act pursuant to Rule 6c-1 under the Act or (ii) the Commission adopts, amends, or interprets a Rule under the Act which would exempt the Applicant from each and every provision of the Act, nothing contained in the order requested by the application, or the conditions to which it may be subject, shall preclude the Applicant from being exempt from the Act by virtue solely of the applicability of said Rule or interpretation.

Section 6(c) of the Act authorizes the Commission to exempt any person, security, or transaction, or any class or classes of persons, securities or transactions from any provisions of the Act and the rules and regulations thereunder if and to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Notice is further given. That any interested person may, not later than October 14, 1977 at 5:30 p.m. submit to the Commission in writing a request for a hearing on the matter accompanied by a statement as to the nature of his interest, the reason for such request, and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail upon Applicant at the address set forth above. Proof of such service (by affidavit, or in case of an attorney-at-law, by certificate) shall be filed contemporaneously with the request. As provided by Rule 0-5 of the Rules and Regulations promul-

gated under the Act, an order disposing of the application will be issued as of course following said date unless the Commission thereafter orders a hearing upon request or upon the Commission's own motion. Persons who request a hearing, or advice as to whether a hearing is ordered, will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[812-4091; Release No. 9946]

GROMAN MORTUARIES INC.

Filing of Application for Order Exempting Applicant from all the Provisions of the Act

SEPTEMBER 26, 1977.

In the matter of Groman Mortuaries, Inc., 830 West Washington Boulevard, Los Angeles, Calif. 90015 (812-4091).

Notice is hereby given. That Groman Mortuaries, Inc. ("Applicant"), a California corporation, filed an application on February 14, 1977, and amendments thereto on April 21, 1977, and June 10, 1977, for an order, pursuant to Section 6(c) of the Investment Company Act of 1940 ("Act"), exempting Applicant from all the provisions of the Act and the rules and regulations thereunder in connection with the completion of installment sales of certain debentures issued by Applicant under existing subscription agreements and for so long as Applicant has outstanding certain debentures which were sold on an installment basis. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below.

Applicant, a wholly-owned subsidiary of Hargrom Services Corp., and its predecessors and affiliates have been engaged principally in the mortuary and funeral related business since 1914, and Applicant currently operates two mortuaries in Los Angeles, Calif. Applicant represents that, since July 1, 1960, it has offered to California residents debentures which may be converted into services upon the death of the owner or any persons he may designate, or may be redeemed at maturity for face value. Applicant states that a purchaser of its debentures ordinarily purchases a debenture the principal amount of which covers the price of the services and products that he desires to be provided at his funeral.

According to the application, the debentures most recently offered and sold bear interest at 4½% payable annually, mature in 20 years, and may be purchased pursuant to a subscription agreement by a single lump sum payment or

by a 10% cash down payment with the balance of the purchase price payable in not more than 36 additional payments (the debentures sold on the installment basis are hereinafter referred to as the "Debentures"). It is submitted that each payment received toward the purchase of a Debenture is placed into the Groman Accumulation Trust ("Trust") and a Debenture is purchased and issued only when all of the payments have been received. Applicants assert that a purchaser can revoke the Trust arrangement at any time and receive the full amount of prior payments with interest less a Trust administrative cancellation charge of 10% of the prior payments. If a purchaser is willing to allow the 4½% interest on a fully paid Debenture to accumulate, Applicant will guarantee the price of the funeral package chosen by the purchaser and represented by the face amount of the Debenture at the then-current price, regardless of the date on which the Debenture is surrendered for cancellation. Applicant states that it maintains a sinking fund, the proceeds of which are used to pay off the Debentures at maturity and that the sinking fund requirements historically have been met through conversions of Debentures into services. Applicant asserts that it has never defaulted on any of its Debenture obligations.

On January 5, 1976, the Commission announced its decision in *In the Matter of International Funeral Services of California, Inc.* ("International") (Investment Company Act Release No. 9112), in which it found that installment sales of pre-need funeral service debentures of the type issued by Applicant constitute the issuance of face-amount certificates of the installment type requiring the issuer to be registered under and to comply with the provisions of the Act.

Section 3(a)(2) of the Act defines "investment company" to mean an issuer which is engaged or proposes to engage in the business of issuing face-amount certificates of the installment type, or which has been engaged in such business and has any such certificates outstanding.

Section 2(a)(15) of the Act defines "face-amount certificate" to include "any . . . security which represents an obligation of its issuer to pay a stated or determinable sum at a fixed or determinable date more than twenty-four months after the date of issuance, in consideration of the payment of periodic installments of a stated or determinable amount (which security shall be known as a face-amount certificate of the installment type)."

Applicant believes that, based upon the Commission's opinion in the *International* case, the Commission may assert that Applicant has outstanding face-amount certificates of the installment type and that Applicant, by issuing Debentures pursuant to existing subscription agreements, is engaged in the business of issuing face-amount certificates of the installment type, thus necessitating registration under and compli-

ance with the provisions of the Act unless an exemption from all the provisions of the Act is granted. Section 6(c) provides, in pertinent part, that the Commission, by order upon application, may conditionally or unconditionally exempt any person from any or all provisions of the Act if and to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and purposes fairly intended by the policy and provisions of the Act.

Applicant has, therefore, applied for an exemption from all the provisions of the Act pursuant to Section 6(c) of the Act in connection with the completion of Debenture sales by Applicant under existing subscription agreements and under the circumstance of its having outstanding Debentures which were sold on an installment basis.

Applicant makes six basic representations which it asserts make it appropriate in the public interest and consistent with the protection of investors to grant the application:

1. Applicant represents that it has ceased selling Debentures on an installment basis except under existing subscription agreements and that it will no longer offer and sell Debentures on an installment basis.

2. Applicant represents that all future pre-need funeral arrangements made on an installment basis will be made only by way of trust arrangements established pursuant to the provisions of Section 7735 et seq. of the California Business and Professions Code ("Short Act") which requires, among other things, that all cash or other property received by a funeral director in advance of need be maintained by trustees in segregated accounts and held in specified investments. Applicant states that Debenture sales for which 100 percent of the purchase price is paid in one lump sum payment will continue to be made but only pursuant to permits obtained from the Department of Corporations of the State of California ("Department").

3. Applicant represents that it has established a segregated trust account ("Subscription Trust") for the purpose of holding all monies received and to be received since February 9, 1976 on outstanding subscription agreements for Debentures. These funds, to be deposited with a bank custodian and invested in securities of the kind permitted by the Short Act, may be used only to meet redemption requests on Debentures issued after February 9, 1976, pursuant to existing subscription agreements, or to reimburse Applicant for funeral services performed for holders of such Debentures. Applicant asserts that none of said funds will be used to meet sinking fund requirements on any previously issued or outstanding Debentures. Income on the corpus of the Subscription Trust is to be applied first toward the expenses of administering the Trust, second to the payment of interest due on the Debentures if purchasers have not waived such interest, and third to Applicant. If interest income on the Subscription Trust is in-

sufficient to meet these expenses, Applicant submits that it will pay such excess expenses from other of its funds. Applicant represents that, as of June 7, 1977, a total of approximately \$253,922 was being held in the Subscription Trust.

4. Applicant proposes to offer to the original purchaser, his conservator or other legal representative in the case of his incapacity, or any member of his immediate family to whom he has transferred his Debentures, a right to redeem for cash all outstanding Debentures. The redemption right will be available only during the life of the original purchaser. Debentures purchased since February 9, 1976, will be redeemable at the full face amount of the Debenture plus any accrued and unpaid interest. With respect to Debentures issued or paid for prior to February 9, 1976, Applicant will have the option for three years after the date of the order granting this application to charge an administrative fee for cash redemptions of up to 7 percent of the amount of Debentures redeemed. To the extent Applicant has outstanding Debentures having existing provisions affording more liberal redemption rights Applicant will continue to be bound by such provisions. On the expiration of the 3 year period following the date of the order issued on this application, all outstanding Debentures issued by Applicant will be redeemable upon request at the full face amount of the Debentures plus interest, if any, without the 7 percent administrative charge.

5. Applicant represents that it will notify all holders of outstanding Debentures of their redemption rights, the exemption obtained from the Commission, and the trust arrangements created. Notice will be in the form of a letter sent to each Debenture holder promptly upon the grant of the requested exemption or, at the option of the Applicant, with the next interest payment on the Debentures subsequent to the granting of the application.

6. Applicant represents that it will establish a second trust ("Performance Trust") as a reserve against insolvency of the Applicant. The initial amount of the Performance Trust will be \$40,148. The corpus of the Performance Trust may not be reduced without the concurrence of the Department, and may not be used to pay the expenses of maintaining the Performance Trust. Applicant represents that the interest earned on the amount held in the Performance Trust will be applied to the payment of the expenses of the Performance Trust but that any interest earned in excess of its expenses will be accumulated and added to its corpus. Applicant states that the Performance Trust corpus will be deposited with a bank as custodian and will be administered by three trustees, a majority of whom will be independent of the Applicant. The trustees will maintain the Performance Trust for the benefit of Debenture holders requesting redemption in the event that Applicant becomes insolvent.

Applicant asserts that the granting of its requested exemption would be neces-

sary or appropriate in the public interest and consistent with the protection of investors because its proposal, consisting of the six enumerated representations, provides purchasers of Debentures the protections envisioned by the Act.

Notice is further given. That any interested person may, not later than October 21, 1977, at 5:30 p.m., submit to the Commission in writing a request for a hearing on the matter accompanied by a statement as to the nature of his interest, the reason for such request, and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail upon Applicant at the address stated above. Proof of such service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed contemporaneously with the request. As provided by Rule 0-5 of the Rules and Regulations promulgated under the Act, an order disposing of the application will be issued as of course following said date unless the Commission thereafter orders a hearing upon request or upon the Commission's own motion. Persons who request a hearing, or advice as to whether a hearing is ordered, will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

[File No. SR-MSE-77-23; Release No. 13894]

MIDWEST STOCK EXCHANGE, INC.

Filing of Amended Proposed Rule Change

AUGUST, 26, 1977.

The Midwest Stock Exchange, Inc. ("MSE") has filed an amendment to a proposed rule change under Rule 19b-4 to redesignate as the basis under the Act for the proposed rule change Section 6(b)(5) rather than those provisions of Section 6(d) and 19 relating to the denial of access to exchange services.

Publication of the submission is expected to be made in the FEDERAL REGISTER during the week of August 29, 1977. In order to assist the Commission to determine whether to approve the proposed rule change or institute proceedings to determine whether the proposed rule change should be disapproved, interested persons are invited to submit written data, views and arguments concerning the submission within 21 days from the date of publication in the FEDERAL REGISTER. Persons desiring to make written submissions should file six copies thereof with the Secretary of the Commission, Securities and Exchange

Commission, 500 North Capitol Street, Washington, D.C. 20549. Reference should be made to File No. SR-MSE-77-23.

Copies of the submission and of all written comments will be available for inspection at the Securities and Exchange Commission's Public Reference Room, 1100 L Street NW., Washington, D.C. Copies of the filing will also be available at the principal office of the above-mentioned self-regulatory organization.

For the Commission by the Division of Market Regulation pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[File No. SR-NYSE-76-34; Release No. 13953]

NEW YORK STOCK EXCHANGE INC.

Order Extending Time for Commission Action on Proposed Changes to New York Stock Exchange Rule 405

SEPTEMBER 13, 1977.

In the matter of New York Stock Exchange, Inc., 55 Water Street, New York, N.Y. 10041.

The New York Stock Exchange, Inc. (the "NYSE") has filed pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the "Act"), 15 U.S.C. 78s(b)(1) and Rule 19b-4 thereunder, 17 CFR 240.19b-4, proposed changes to NYSE Rule 405, the "Know Your Customer" rule.

The proposed rule would:

- (1) Require that a member or member organization "make reasonable effort to ascertain . . ." the essential facts relative to certain persons and accounts in place of the present duty imposed by the rule to "use due diligence to learn . . ." the essential facts;
- (2) Eliminate the specification that the member must learn such facts as to "every order";
- (3) Provide that, with respect to accounts introduced on a disclosed basis, only the introducing member or member organization would be required to inquire into the essential facts as to those customers and accounts;
- (4) Delete the specification that a member or member organization "diligently" supervise compliance with the requirements of Rule 405; and
- (5) Permit members and member organizations to effect isolated (i.e., not

Notice of the amended proposal was given by publication of Securities Exchange Act Release No. 13821 (August 2, 1977) and 42 FR 40290 (August 9, 1977); notice of the initial filing was given in Securities Exchange Act Release No. 12674 (July 20, 1976) and 41 FR 34136 (August 22, 1976). No comments were received.

more than five transactions for a customer during a 12 month period) and unsolicited purchases and sales of securities valued at not more than \$2,000 under certain conditions without complying with Rules 405 (a) and (b) and Rule 409.

EXTENSION OF TIME FOR COMMISSION ACTION

Pursuant to Section 19(b)(2) of the Act, the Commission is required to approve a proposed rule change within 35 days of the publication of the notice of the filing of the proposal. However, the Commission may act in a longer period not to exceed ninety days from the date of publication if it finds such period appropriate and publishes its reasons for this finding.

The Commission published notice of the amended filing of proposed changes to Rule 405 on August 9, 1977. Absent an extension of time, Commission action with respect to this proposal would be required by September 13, 1977.

For the reasons summarized below, the Commission finds that a period longer than thirty-five days is appropriate and designates a period of ninety days from the date of publication of the amended filing as the appropriate time for Commission action.

The primary issue raised by these proposals is whether or not the rule as amended would be inconsistent with the purposes of the Act and, in particular, with the public interest and the protection of investors. In its previous consideration of these changes, the Commission expressed the concern that the proposed amendments to the central provisions of the rule diminish the obligation of the member or member organization to know its customer and to supervise customer accounts. In particular, the Commission noted that the rule, on its face, relieves the clearing broker or dealer of any responsibility to make the inquiry required by Rule 405 and to supervise the activity in customer accounts introduced to it on a disclosed basis; it questioned whether this complete, or at least substantial, relief of responsibility would be consistent with the protection of investors.

Although the NYSE had deferred Commission consideration of the proposed rephrasing of the duty of the member under Rule 405, the Commission advised the NYSE of its concern that this rephrasing sanctioned a less thorough inquiry that might be inconsistent with the public interest and the protection of investors.

Further, while specifying that the rule should be amended to include a definition of the term "isolated" with respect to transactions in the common purchase and sale account and a statement that such transactions must be "unsolicited," the Commission adverted to the fact that allowing members to effect any se-

curities purchases without securing certain information relative to the customer posed serious questions as to the impact on investor protection.

Since each exchange which lists equity securities has adopted a "know your customer" rule which is substantially similar to NYSE Rule 405, any change in the duty to customers which may be affected by the approval of the amendments to Rule 405 can be expected to become the industry standard.

As a result of its most recent review, the Commission believes that the proposed amendments continue to pose a number of substantial questions which require extended consideration before any decision is made to approve the rule proposal or to institute proceedings, pursuant to Section 19(b)(2) of the Act, to determine whether it should be disapproved.

Accordingly, in order to evaluate further the potential impact of the amendments and to consider in greater depth whether the proposed amendments are inconsistent with the Act, the Commission, pursuant to Section 19(b)(2) of the Act, hereby extends until November 7, 1977 the time within which the Commission must act on the proposed rule changes.

By the Commission.

GEORGE A. FITZSIMMONS,
Secretary.

SEPTEMBER 13, 1977.

[SR-PHLX-77-7; Release No. 13958]

PHILADELPHIA STOCK EXCHANGE, INC.

Order Approving Proposed Rule Change

SEPTEMBER 14, 1977

In the matter of Philadelphia Stock Exchange, Inc., 17th Street and Stock Exchange Place, Philadelphia, Pa., 19103.

On July 8, 1977, the Philadelphia Stock Exchange, Inc. filed with the Commission, pursuant to Section 19(b) of the Securities Exchange Act of 1934 (the "Act"), as amended by the Securities Acts Amendments of 1975, and Rule 19b-4 thereunder, copies of a proposed rule change. The rule change would require that options be restricted on that exchange only when such options are required to be restricted on all exchanges which list such options.

Notice of the proposed rule change together with the terms of substance of the proposed rule change was given by publication of a Commission Release (Securities Exchange Act Release No. 13775 (July 18, 1977)) and by publication in the FEDERAL REGISTER (42 FR 38035 (July 26, 1977)).

The Commission finds that the proposed rule change is consistent with the

NOTE.—New rates reflect a 20-pct increase over old.

EXCHANGE'S STATEMENT OF BASIS AND PURPOSE

The basis and purpose of the foregoing proposed rule change is as follows:

The proposed rule change creates increases in providing the above-mentioned services which reflect a corresponding increase in the costs of personnel, equipment and technical support needed to perform them. Also, the new leasing transfer fee represents administrative costs involved in the transfer of leased option membership seats.

The proposed rule change represents an equitable allocation of reasonable dues among its members using its facilities in that they apply to all options members without discrimination.

The Midwest Stock Exchange, Inc. has neither solicited nor received any comments.

The Midwest Stock Exchange, Inc. believes that no burdens have been placed on competition.

The foregoing rule change has become effective, pursuant to Section 19(b)(3) of the Securities Exchange Act of 1934. At any time within sixty days of the filing of such proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary

RULE X

CONDUCT OF ACCOUNTS

DOING A PUBLIC BUSINESS IN OPTIONS

Sec. 18. (e)
Commentary:

.02 Member organizations are required to obtain the written authorization of customers prior to the exercise of discretionary power with respect to exchange options transactions in their account. (These written authorizations by customers shall be renewed annually.) Furthermore, a Registered Options Principal who is an officer or general partner of the member organization shall approve discretionary accounts in writing before discretionary power may be exercised with respect to such accounts. It is consistent to handle discretionary accounts for options transactions wherein limited discretionary power has been authorized. For example, discretionary power may be granted for closing existing positions or exercising existing contracts.

EXCHANGE'S STATEMENT OF BASIS AND PURPOSES

The basis and purpose of the foregoing proposed rule change is as follows:

The purpose of the proposed rule change is designed to eliminate the requirement that member organizations qualified to conduct a non-member customer business, on an annual basis, renew written authorization to maintain a discretionary account.

The PSE is currently the only self-regulatory organization with such a requirement (The Chicago Board of Options Exchange "CBOE" has eliminated a similar rule on August 17, 1977). It is the belief of the PSE that, because of the expansion of the options industry, this requirement is causing a significant amount of paperwork for our member organizations.

In addition, as the rule presently stands, member organizations would be required to discontinue exercising discretion in a customer's account unless they could obtain a timely renewal. In

[Release No. 34-13992; File No.
SR-PSE-77-25]

PACIFIC STOCK EXCHANGE INC.**Proposed Rule Change: Self-Regulatory Organizations**

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s (b)(1), as amended by Pub. L. No. 94-29, 16 (June 4, 1975), notice is hereby given that on September 7, 1977, the above-mentioned self-regulatory organization filed with the Securities and Exchange Commission a proposed rule change as follows:

EXCHANGE'S STATEMENT OF THE TERMS OF SUBSTANCE OF THE PROPOSED RULE CHANGE

The Pacific Stock Exchange Incorporated ("PSE") hereby requests to amend Section 11, of Rule VI, of the Rules of its Board of Governors as follows (italics indicates additions):

RULE VI**EXCHANGE OPTION TRADING****RESTRICTION OF OUT-OF-THE-MONEY OPTIONS**

Sec. 11.

(a) to (c) No Change.

Commentary:

.01 No Change.

.02 If the two tests in clauses (i) and (ii) with respect to calls and in clauses (x) and (y) with respect to puts of paragraph (a) are met at the close on a particular day, paragraph (a) applies to orders after the close on such day. However, with regard to an option contract traded on the Exchange which has otherwise met the tests of the previous sentence, the prohibitions of paragraph (a) will not apply to transactions on the Exchange; provided such option is traded on another participating Exchange; And further provided, A transaction has occurred on the last previous day on another such exchange when the closing price of such option does not meet the test clause (ii) with respect to calls or clause (y) with respect to puts.

EXCHANGE'S STATEMENT OF BASIS AND PURPOSE

The purpose of the proposed rule change is to establish uniformity with respect to the application of the restricted option rule to dually listed exchange traded options.

At present, pursuant to PSE Rule VI, Section 11, (a) members and member organizations may not enter an order for their own accounts or for accounts of their customers involving an opening transaction (either purchase or sale) in any call option when two conditions exist at the close of the last previous trading: (1) The exercise price of the option is more than \$5 above the price of the underlying stock in the primary market on which it is traded, and (2) the price of the option on the PSE is less than

\$0.50 per share (\$50 per contract). The restriction is automatic and remains in effect until the day following the close of a trading day when either condition is not met.

With the advent of dual listings in exchange traded options, the two conditions referred to above which would otherwise cause the prohibition to become effective may exist on one exchange but not on another exchange which trades the same option series. For example, as of the close of a given day, the exercise price of a dually listed call option may be more than \$5 above the price of the underlying stock; however, the price of the option may close at \$0.50 per share (1/2) on one exchange but less than that price on another exchange. As a result, opening transactions would be restricted on the former exchange.

Although the restricted option rules as adopted by each of the options exchanges provide that an exchange may make exceptions with respect to one or more options series when it is in the public interest to do so. The PSE believes it is advisable to amend its rule to provide for uniformity among the exchanges in respect to restricted options to eliminate situations as described above.

Accordingly, the PSE proposes to amend its restricted options rule to provide that, in the case of dually listed options only, the Exchange will not impose a restriction on an option series unless the conditions giving rise to such restriction exist on all exchanges that trade such option series.

The amendment to Rule VI, Section 11 is authorized by Section 6(b) of the Securities Exchange Act of 1934 (the "1934 Act") and the PSE believes that such Amendment will serve to promote just and equitable principles of trade and to protect investors in dual traded exchange option contracts.

Comments have neither been solicited nor received from members on the proposed rule change.

The proposed rule change imposes no burden upon competition.

On or before November 8, 1977, or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the above-mentioned self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons desiring to make written submissions should file six copies thereof with the Secretary of the Commission, Securities and Exchange Commission, Washington, D.C. 20549. Copies of the filing with respect to the foregoing and of all written submissions will be available for inspection and

copying in the Public Reference Room, 1104 L Street, N.W., Washington, D.C. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number referenced in the caption above.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

DEPARTMENT OF THE TREASURY**Internal Revenue Service****DEPARTMENT OF LABOR****PENSION AND WELFARE BENEFIT PROGRAMS**

[Prohibited Transaction Exemption 77-11; Application No. D-850]

CENTRAL STATES, SOUTHEAST AND SOUTHWEST AREAS PENSION FUND**Exemptions for Certain Transactions**

AGENCIES: Department of the Treasury/Internal Revenue Service; Department of Labor.

ACTION: Grant of exemptions.

SUMMARY: The Internal Revenue Service (the Service) and the Department of Labor (the Department) hereby grant several exemptions for certain transactions involving the Central States, Southeast and Southwest Area Pension Fund (the Fund). In the absence of the ex-

emptions, these transactions would be prohibited by the Internal Revenue Code of 1954 (the Code) and the Employee Retirement Income Security Act of 1974 (the Act).

FOR FURTHER INFORMATION CONTACT:

Nell Grossman, Internal Revenue Service, 1111 Constitution Avenue NW., Washington, D.C. 20024, Attn: E:EP:PT, Phone 202-566-4260.

Martha McLane, Department of Labor, 200 Constitution Avenue NW., Washington, D.C. 20210, Phone 202-523-9141.

SUPPLEMENTARY INFORMATION: On September 9, 1977, notice was published in the FEDERAL REGISTER (42 FR 45425) that the Service and the Department (hereinafter collectively referred to as the Agencies) had under consideration proposed exemptions from the taxes imposed by section 4975 (a) and (b) of Code by reason of sections 4975(c)(1) (A) through (F) of the Code and from the restrictions of sections 406(a), 406(b), 407(a) of the Act. The exemptions were requested in applications filed pursuant to section 4975(c)(2) of the Code and section 408(a) of the Act by The Equitable Life Assurance Society of the United States (Equitable) and Victor Palmieri & Co. Inc. (VPCO). The proposed exemptions applied to a number of transactions involving Equitable, VPCO, entities related to Equitable and VPCO, the Fund's other investment managers, and the Fund as a result of contractual agreements dated June 30, 1977.

The exemptions were proposed in accordance with the procedures set forth in Rev. Proc. 75-26, 1975-1 C.B. 722, and ERISA Procedure 75-1 (40 FR 18471, April 28, 1975) and all interested persons were invited to submit written comments on the proposed exemptions and to present oral comments at the hearing to be held on the proposed exemptions. A public hearing was held on September 26, 1977, in which interested persons were afforded the opportunity to present their views on the proposed exemptions.

COMMENTS RECEIVED

No comments relating to the substantive provisions of the proposed exemption were received by the Agencies. Equitable submitted a comment in order to clarify any misunderstanding regarding the operation of the Fund's Benefits and Administration Account (the Account). At 42 FR 45427, Part III, second paragraph of the Summary of Representations, the Notice stated:

Generally, money for the Account will be derived from two sources: employer contributions and income earned by the Fund

¹ These are not toll-free numbers.

on its real estate and mortgage investments, which is not needed to offset the Fund's expenses in managing such investments. Although the influx of money from these sources should ordinarily be sufficient to pay pension benefits and the Fund's administrative expenses, it is conceivable that additional money may be needed for the Account at some time in the future. In such a case, the Fund's Executive Director is authorized to request Equitable to transfer additional funds to the Account, and under the agreements, Equitable can comply with the request by directing the investment managers, including itself and VPCO, to liquidate assets and transfer money to the Account. Equitable, acting on its own, has no authority to initiate a transfer of assets to the Account.

Although the above statement is based on the representations contained in Equitable's application for exemption, Equitable believes that it could be interpreted in a manner that could create confusion with respect to the operation of the Account. It is Equitable's understanding that the Account, which is to be used for the payment of pension benefits and Fund administrative expenses, is to derive its funds principally from employer contributions. If at any time the assets in the Account should prove insufficient to pay pension benefits and Fund administrative expenses, the Fund's Executive Director is authorized under the agreements of June 30, 1977, to request Equitable to transfer additional funds to the Account. Equitable can then comply with such requests by directing the transfer of funds from any one or combination of sources available to it for this purpose, including available investment funds generated by the Fund on its real estate and mortgage investments which are not needed to offset the Fund's expenses in managing such investments, and the assets held by the Fund's investment managers, which could be liquidated and transferred to the Account. Equitable does not expect to be required to direct a liquidation of assets held by the investment managers when there are available investment funds from Fund real estate and mortgage investments.

Accordingly, in order to eliminate any confusion in connection with the operation of the Account, Equitable requests and the Agencies hereby amend the second paragraph and first sentence of Part III of the Notice of Pendency to read as follows:

Generally, money for the Account will be derived primarily from employer contributions. Although the influx of money from this source should ordinarily be sufficient to pay pension benefits and the Fund's administrative expenses, it is conceivable that additional money may be needed for the Account at some time in the future. In such a case, the Fund's Executive Director is authorized to request Equitable to transfer additional funds to the Account, and, under the agreements, Equitable can comply with the request by transferring available investment funds generated by the Fund on its real estate and mortgage investments which are

not needed to offset the Fund's expenses in managing such investments, or by directing the investment managers, including itself and VPCO, to liquidate assets and transfer money to the Account. Equitable, acting on its own, has no authority to initiate a transfer of assets to the Account.

Although the likelihood that investment manager will be directed to liquidate assets in connection with such a transfer is remote, if a transfer is requested that requires such a liquidation, Equitable will determine the best source of funds from which to make the transfer.

GENERAL INFORMATION

The attention of interested persons is directed to the following:

(1) The fact that a transaction is the subject of an exemption granted under section 4975(c)(2) of the Code and section 408(a) of the Act does not relieve a fiduciary or other disqualified person or party in interest with respect to a plan to which the exemption is applicable from certain other provisions of the Code and the Act, including any prohibited transaction provisions to which the exemption does not apply and the general fiduciary responsibility provisions of section 404 of the Act which, among other things, require a fiduciary to discharge his duties respecting the plan solely in the interest of the plan's participants and beneficiaries and in a prudent fashion in accordance with section 401(a)(1)(B) of the Act; nor does it affect the requirement of section 401(a) of the Code that a plan must operate for the exclusive benefit of the employees of the employer maintaining the plan and their beneficiaries.

(2) The exemptions set forth herein are supplemental to, and not in derogation of, any other provisions of the Code and the Act, including statutory exemptions and transitional rules. Furthermore, the fact that a transaction is subject to an administrative or statutory exemption or transitional rule is not dispositive of whether the transaction is in fact a prohibited transaction.

(3) In accordance with section 4975(c)(2) of the Code and section 408(a) of the Act and based upon the entire record, the Agencies make the following determinations:

- (i) The exemptions set forth herein are administratively feasible;
- (ii) The exemptions set forth herein are in the interests of the Fund and its participants and beneficiaries; and
- (iii) The exemptions set forth herein are protective of the rights of participants and beneficiaries of the Fund.

EXEMPTIONS

Accordingly, the exemptions proposed in the notice of September 9, 1977, 42 FR 45425, as amended above are hereby granted under the authority of section 4975(c)(2) of the Code and section 408(a) of the Act and in accordance with the procedures set forth in Rev. Proc. 75-26, 1975-1 C.B. 722, and ERISA Procedure 75-1 (40 FR 18471, April 28, 1975).

Signed at Washington, D.C., this 29th day of September 1977.

ALVIN D. LURIE,
Assistant Commissioner (Employee Plans and Exempt Organizations),
Internal Revenue Service.

J. VERNON BALLARD,
Deputy Administrator, Pension and Welfare Benefit Programs, Department of Labor.

[Treasury Department Order No. 250-2 (Revision 1)]

ESTABLISHMENT OF THE OFFICE OF TARIFF AFFAIRS IN THE OFFICE OF THE GENERAL COUNSEL AND THE DELEGATION OF AUTHORITY TO THE DEPUTY ASSISTANT SECRETARY (TARIFF AFFAIRS)

Under authority of Treasury Department Orders Nos. 190 (Revised) and 250-1, the Office of Tariff Affairs is established within the Office of the General Counsel. Pursuant to the authority delegated to me by those orders, I hereby delegate to the Deputy Assistant Secretary (Tariff Affairs) the following authority, subject to the limitations prescribed herein:

1. To supervise the Office of Tariff Affairs and to make recommendations relative to the employment, promotion, and evaluation of personnel therein.
2. To review all antidumping and countervailing duty cases investigated by the U.S. Customs Service and to recommend their disposition to the General Counsel.
3. To represent the General Counsel on Departmental, interdepartmental, and international meetings or committees concerned with tariff matters within the jurisdiction of the General Counsel's office.
4. To handle all other matters falling within the responsibility of the Office of Tariff Affairs, or as further assigned by me.
5. In the absence of both the General Counsel and the Deputy General Counsel, the Deputy Assistant Secretary (Tariff Affairs) will sign antidumping and countervailing duty notices and determinations in his own name and under his own title.
6. In other respects the Office of Tariff Affairs will conform to the orders and directives issued for the administration of the Legal Division.

Dated: September 23, 1977.

ROBERT H. MUNDHEIM,
General Counsel.

[4810-25]

Office of the Secretary ROLLER CHAIN, OTHER THAN BICYCLE, FROM JAPAN

Antidumping; Notice of Tentative Determination To Modify or Revoke Dumping Finding

AGENCY: United States Treasury Department.

ACTION: Tentative modification of finding of dumping.

SUMMARY: This notice is to advise the public that it appears that Daido Kogyo Co., Ltd. of Japan is not selling roller chain, other than bicycle, from Japan at less than fair value within the meaning of the Antidumping Act, 1921, as amended. Sales at less than fair value generally occur when the price of merchandise sold for exportation to the United States is less than the price of such or similar merchandise sold in the home market or to third countries. In addition, Daido Kogyo has given assurances that future sales will not be at less than fair value. If this action is made final, entries of this merchandise from Daido Kogyo, on or after the effective date of this notice, will no longer be liable for special dumping duties under the Antidumping Act, 1921. Interested persons are invited to make comments.

EFFECTIVE DATE: October 4, 1977.

FOR FURTHER INFORMATION CONTACT:

David R. Chapman, Operations Officer, Duty Assessment Division, U.S. Customs Service, 1301 Constitution Avenue NW., Washington, D.C. 20229 (202-566-5492).

SUPPLEMENTARY INFORMATION: A finding of dumping with respect to roller chain, other than bicycle, from Japan was published as Treasury Decision 73-100 in the FEDERAL REGISTER of April 12, 1973 (38 FR 9226). After due investigation, it has been determined that roller chain, other than bicycle, produced and sold by Daido Kogyo Co., Ltd. of Tokyo, Japan, is not being, nor is likely to be, sold in the United States at less than fair value within the meaning of the Antidumping Act, 1927, as amended (19 U.S.C. 160 et seq.).

STATEMENT OF REASONS ON WHICH THIS TENTATIVE DETERMINATION IS BASED

The investigation indicated that sales of roller chain, other than bicycle, by Daido Kogyo Co., Ltd., have not been made at less than fair value for a period of two years since the finding of dumping, and assurances have been given that future sales of such merchandise to the United States will not be made at less than fair value.

Accordingly, notice is hereby given that the Department of the Treasury intends to modify the finding of dumping with respect to roller chain, other than bicycle, from Japan to exclude such merchandise produced and sold by Daido Kogyo Co., Ltd. of Tokyo, Japan.

In accordance with §153.40, Customs Regulations (19 CFR 153.40), interested

persons may present written views or arguments, or requests in writing that the Secretary of the Treasury afford an opportunity to present oral views.

Any requests that the Secretary of the Treasury afford an opportunity to present oral views should be addressed to the Commissioner of Customs, 1301 Constitution Avenue NW., Washington, D.C. 20229 in time to be received by his office no later than October 14, 1977. Such requests must be accompanied by a statement outlining the issues wished to be discussed.

Any written views or arguments should likewise be addressed to the Commissioner of Customs in time to be received by his office not later than November 3, 1977.

This notice is published pursuant to §153.44(c) of the Customs Regulations (19 CFR 153.44(c)).

ROBERT H. MUNDHEIM,
General Counsel of the Treasury.

SEPTEMBER 29, 1977.

INTERSTATE COMMERCE COMMISSION

[Notice No. 489]

ASSIGNMENT OF HEARINGS

SEPTEMBER 29, 1977.

Cases assigned for hearing, postponement, cancellation, or oral argument appear below and will be published only once. This list contains prospective assignments only and does not include cases previously assigned hearing dates. The hearings will be on the issues as presently reflected in the Official Docket of the Commission. An attempt will be made to publish notices of cancellation of hearings as promptly as possible, but interested parties should take appropriate steps to insure that they are notified of cancellation or postponements of hearings in which they are interested.

MC 136168 (Sub-No. 11), Wilson Certified Express, Inc., now assigned October 12, 1977, at Omaha, Neb., will be held in Room 616, Union Pacific Plaza, 110 N. 14th Street, 14th and Dodge.

MC 142899 (Sub-No. 2), Corrugated Carriers, Inc., now assigned October 13, 1977, at Omaha, Neb., will be held in Room 616, Union Pacific Plaza, 110 N. 14th Street, 14th and Dodge.

MC 113678 (Sub-No. 63), Curtis, Inc., now assigned October 17, 1977, at Omaha, Neb., will be held in Room 616, Union Pacific Plaza, 110 N. 14th Street, 14th and Dodge.

MC 111375 (Sub-No. 85), Pirkle Refrigerated Freight Lines, Inc., now assigned November 9, 1977, is postponed to November 14, 1977 (1 week), at Denver, Colo., in a hearing room to be later designated.

No. AB 18 (Sub-No. 6), Chesapeake & Ohio Railway Co. Abandonment Between Coleman and Union, Isabella County, Mich., and FD 27412, Chesapeake & Ohio Railroad Co.—Trackage Rights—A Line of Railroad of The Ann Arbor Railroad Co. Between Mount Pleasant and Clare, in Isabella County, Mich., now assigned October 13, 1977, at Mount Pleasant, Mich., will be held in Room 124, Isabella County Building, 200 North Main Street.

MC 139495 (Sub-No. 181), National Carriers, Inc., now assigned October 17, 1977, at Chicago, Ill., will be held in Room 1319, Everett McKinley Dirksen Building, 219 South Dearborn Street.

MC 140792 (Sub-No. 3), Stanley E. Whitehead, now assigned October 18, 1977, at Chicago, Ill., will be held in Room 1319, Everett McKinley Dirksen Building, 219 South Dearborn Street.

MC 138144 (Sub-No. 19), Fred Olsen Co., Inc., now assigned October 19, 1977, at Chicago, Ill., will be held in Room 1319, Everett McKinley Dirksen Building, 219 South Dearborn St.

MC 139973 (Sub-No. 12), J. H. Ware Trucking, Inc., now assigned October 20, 1977, at Chicago, Ill., will be held in Room 1319, Everett McKinley Dirksen Building, 219 South Dearborn Street.

MC-F 13091, System 99—Control—Nevada Freight Lines, Inc., and MC 97526 (Sub-No. 3), Nevada Freight Lines, Inc., now being assigned November 7, 1977 (1 week) at Reno, Nev., in a hearing room to be later designated. This hearing will be continued to November 14, 1977 (1 week) at Las Vegas, Nev., in a hearing room to be later designated.

MC 129480 (Sub-No. 26), Tri-Line Expressway Ltd., now assigned October 12, 1977, at Denver, Colo., will be held October 12 through 19, 1977, in Room 422, U.S. Customs House, 721 19th Street, Denver, Colo., and October 20 through 21, 1977, in Room 158, U.S. Customs House, 721 19th Street, Denver, Colo.

AB 43 (Sub-No. 30), Illinois Central Gulf Railroad Co. Abandonment Between Waggoner and Glen Carbon in Montgomery, Macoupin, and Madison Counties, Ill., now assigned October 12, 1977, at Litchfield, Ill., will be held at the City Hall, 120 East Ryder.

MC 141779 (Sub-No. 1), Richard Allen Long, d.b.a. Richard's Towing Service, now assigned October 20, 1977, at St. Louis, Mo., will be held in Court Room 3, U.S. Court of Appeals, 1114 Market Street.

MC 135410 (Sub-No. 11), Courtney J. Munson, d.b.a. Munson Trucking, now assigned October 18, 1977, at St. Louis, Mo., will be held in Court Room 3, U.S. Court of Appeals, 1114 Market Street.

MC 130442, Shelmont, Inc., now assigned October 5, 1977, in Atlanta, Ga., is cancelled and application dismissed.

MC 142920, Oliver Trucking Corp., now assigned October 17, 1977, at New York, N.Y., will be held in Room 2206, 26 Federal Plaza.

MC 108937 (Sub-No. 47), Murphy Motor Freight Lines, Inc., now being assigned January 17, 1978 (9 days) for hearing in South Bend, Ind., in a hearing room to be later designated.

MC 115353 (Sub-No. 25), Louis J. Kennedy Trucking Co., now assigned October 20, 1977, at New York, N.Y., will be held in Room 2206, 26 Federal Plaza.

MC 143305, John H. Shuffer & Robert W. Hanna, d.b.a. John & Bob's Auto Service, now assigned October 18, 1977, at New York, N.Y., will be held in Room 2206, 26 Federal Plaza.

MC 121489 (Sub-No. 12), Nebraska-Iowa Express, Inc., now assigned November 28, 1977, at Denver, Colo., will be held in Room 158, U.S. Customs House, 721 19th Street.

MC 140586 (Sub-No. 1), Golden North Van Lines, Inc., now assigned November 15, 1977, at Anchorage, Alaska, will be held in McKay Building, 10th Floor, 338 Denali Street.

MC 142797 (Sub-No. 1), Fulton Oregon Air, Inc., now assigned November 1, 1977, at Salem, Oreg., will be held in Room 346, State Capitol Building.

MC 125551 (Sub-No. 13), K & W Trucking Co., Inc., now assigned October 31, 1977, at Anchorage, Alaska, will be held in McKay Building, 10th Floor, 338 Denali Street.

MC 143013, Roger Chilton, d.b.a. Chilton Trucking Co., now assigned October 3, 1977, at Houston, Tex., is cancelled and application dismissed.

MC 111594 (Sub-No. 75), C. W. Transport, Inc., now being assigned January 17, 1977 (9 days) at Chicago, Ill., in a hearing room to be later designated.

MC 946 (Sub-No. 7), Ferdinand Arrigoul, Inc., now assigned October 18, 1977, at New York, N.Y., and will be held in Room C-2220, Federal Building, 26 Federal Plaza. This hearing also embraces MC 142530 (Sub-No. 2), Pioneer Bus Corp., and MC 67340 (Sub-No. 11), Bosort Bus Lines, Inc.

MC 143187, R. G. Degatano Transportation, Inc., now assigned November 17, 1977, at Boston, Mass., is cancelled and transferred to Modified Procedure.

MC 113655 (Sub-No. 378), International Transport, Inc., now assigned November 4, 1977, at San Francisco, Calif., is cancelled, application dismissed.

ASSIGNMENT OF HEARINGS

SEPTEMBER 29, 1977.

Cases assigned for hearing, postponement, cancellation or oral argument appear below and will be published only once. This list contains prospective assignments only and does not include cases previously assigned hearing dates. The hearings will be on the issues as presently reflected in the Official Docket of the Commission. An attempt will be made to publish notices of cancellation of hearings as promptly as possible, but interested parties should take appropriate steps to insure that they are notified

of cancellation or postponements of hearings in which they are interested.

CORRECTION¹

MC 33641 (Sub-No. 128), IML Freight, Inc., now assigned November 1, 1977, at Spokane, Wash., and will be held November 1 through November 4, 1977, in the Spokane Convention Center, Spokane Falls Boulevard and November 7, 1977, through November 18, 1977, at the Sheraton Hotel, 322 Spokane Falls Courts.

H. G. HOMME, Jr.,
Acting Secretary.

[7035-01]

FOURTH SECTION APPLICATION FOR RELIEF

SEPTEMBER 29, 1977.

An application, as summarized below, has been filed requesting relief from the requirements of Section 4 of the Interstate Commerce Act to permit common carriers named or described in the application to maintain higher rates and charges at intermediate points than those sought to be established at more distant points.

Protests to the granting of an application must be prepared in accordance with Rule 40 of the General Rules of Practice (49 CFR 1100.40) and filed within 15 days from the date of publication of this notice in the FEDERAL REGISTER.

FSA No. 43438—Barley, Corn, Etc., from Illinois Central Gulf Railroad Co. Stations in Illinois. Filed by Illinois Central Gulf Railroad Co. (No. 77-1), for interested rail carriers.

Rates on barley, corn, oats, rye, soybeans, or wheat, in carloads, as described in the application, from Illinois Central Gulf Railroad Co. stations in Illinois, to Chicago, Ill., for export.

Grounds for relief—Market competition.

Tariff—Supplement 4 to Illinois Central Gulf Railroad Co. tariff 605-A, I.C.C. No. 68. Rates are published to become effective on October 24, 1977.

By the Commission.

H. G. HOMME, Jr.,
Acting Secretary.

[Notice No. 125]

MOTOR CARRIER TEMPORARY AUTHORITY APPLICATIONS

SEPTEMBER 27, 1977.

The following are notices of filing of applications for temporary authority under Section 210a(a) of the Interstate

¹ This notice corrects the docket title and the city and state of the hearing.

Commerce Act provided for under the provisions of 49 CFR 1131.3. These rules provide that an original and six (6) copies of protests to an application may be filed with the field official named in the FEDERAL REGISTER publication no later than the 15th calendar day after the date the notice of the filing of the application is published in the FEDERAL REGISTER. One copy of the protest must be served on the applicant, or its authorized representative, if any, and the protestant must certify that such service has been made. The protest must identify the operating authority upon which it is predicated, specifying the "MC" docket and "Sub" number and quoting the particular portion of authority upon which it relies. Also, the protestant shall specify the service it can and will provide and the amount and type of equipment it will make available for use in connection with the service contemplated by the TA application. The weight accorded a protest shall be governed by the completeness and pertinence of the protestant's information.

Except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

A copy of the application is on file, and can be examined at the Office of the Secretary, Interstate Commerce Commission, Washington, D.C., and also in the ICC Field Office to which protests are to be transmitted.

MOTOR CARRIERS OF PROPERTY

No. MC 531 (Sub-No. 350TA), filed September 15, 1977. Applicant: YOUNGER BROTHERS, INC., 4904 Griggs Road, P.O. Box 14048, Houston, Tex. 77021. Applicant's representative: Wray E. Hughes (same address as applicant).

Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting: Liquid plastics (polyester resins), in bulk, in tank vehicles, from Oxnard, Calif., to Grand Junction, Tenn., for 180 days. [Notice No. 126]

MOTOR CARRIER TEMPORARY AUTHORITY APPLICATIONS

SEPTEMBER 26, 1977.

The following are notices of filing of applications for temporary authority under Section 210a(a) of the Interstate Commerce Act provided for under the provisions of 49 CFR 1131.3. These rules provide that an original and six (6) copies of protests to an application may be filed with the field official named in the FEDERAL REGISTER publication no later than the 15th calendar day after the date the notice of the filing of the application is published in the FEDERAL REGISTER. One copy of the protest must be served on the applicant, or its authorized representative, if any, and the protestant must certify that such service has been made. The protest must identify the operating authority upon which it is predicated, specifying the "MC" docket and "Sub" number and quoting the particular portion of authority upon which it relies. Also, the protestant shall specify the service it can and will provide and the amount and type of equipment it will make available for use in connection with the service contemplated by the TA application. The weight accorded a protest shall be governed by the completeness and pertinence of the protestant's information.

Except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

A copy of the application is on file, and can be examined at the Office of the Secretary, Interstate Commerce Commission, Washington, D.C., and also in the ICC Field Office to which protests are to be transmitted.

MOTOR CARRIERS OF PROPERTY

No. MC 107295 (Sub-No. 860TA), filed September 15, 1977. Applicant: PRE-FAB TRANSIT CO., P.O. Box 146, 100 South Main Street, Farmer City, Ill. 61842. Blodgett, Transportation Assistant, Interstate Commerce Commission, 600 Arch Street, room 3238, Philadelphia, Pa. 19106.

No. MC 111170 (Sub-No. 241TA), filed September 12, 1977. Applicant: WHEELING PIPE LINE, INC., P.O. Box 1718, 2811 North West Avenue, El Dorado, Ark. 71730. Applicant's representative: Tom E. Moore, P.O. Box 1718, El Dorado, Ark. 71730. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Liquid chemicals*, in bulk (except bromine, petro-chemicals, brominated vegetable oils, and cryogenic liquids), from Union County, Ark., to points in California, Illinois, Mississippi, Pennsylvania, South Carolina, and Wisconsin, for 180 days. Supporting shipper(s): Velsicol Chemical Corp., 351 East Ohio Street, Chicago, Ill. 60611. Send protests to: William H. Land, Jr., District Supervisor, 3108 Federal Office Building, 700 West Capitol, Little Rock, Ark. 72201.

No. MC 114457 (Sub-No. 328TA), filed September 13, 1977. Applicant: DART TRANSIT CO., 2102 University Avenue, St. Paul, Minn. 55114. Applicant's representative: James C. Hardman, 33 North LaSalle Street, Chicago, Ill. 60602. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Paper and plastic products*, from the warehouse facilities of The Continental Group, Inc., at Louisville, Ky., to points in Illinois, Indiana, Missouri, and Wisconsin, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: The Continental Group, Inc., 800 East Northwest Highway, Palatine, Ill. 60067. Send protests to: Marion L. Cheney, Transportation Assistant, Interstate Commerce Commission, Bureau of Operations, 414 Federal Building and U.S. Courthouse, 110 South 4th St., Minneapolis, Minn. 55401.

No. MC 117200 (Sub-No. 20TA), filed September 15, 1977. Applicant: TISCH & DREWS, INC., 212 Green Bay Avenue, Oconto Falls, Wis. 54154. Applicant's representative: Michael J. Wyngaard, 329 West Wilson Street, Madison, Wis. 53708. Authority sought to operate as a

contract carrier, by motor vehicle, over irregular routes, transporting: *Paper and paper products*, from the plantsites and warehouse facilities of Scott Paper Co., at Oconto Falls and Marinette, Wis., to South Beloit, Ill., under a continuing contract, or contracts, with Scott Paper Co., for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shippers(s): Scott Paper Co., 106 East Central Avenue, Oconto Falls, Wis. (Joseph C. Scott). Send protests to: Gail Daugherty, Transportation Assistant, Interstate Commerce Commission, Bureau of Operations, U.S. Federal Building and Courthouse, 517 East Wisconsin Avenue, room 619, Milwaukee, Wis. 53202.

No. MC 117940 (Sub-No. 231TA), filed September 2, 1977. Applicant: NATION-WIDE CARRIERS, INC., P.O. Box 104, Maple Plain, Minn. 55359. Applicant's representative: Allan L. Timmerman, P.O. Box 104, Maple Plain, Minn. 55359. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Meats, meat products, meat byproducts, and articles distributed by meat packinghouses* as described in Sections A and C of Appendix I to the report in Descriptions in Motor Carrier Certificates, 61 MCC 209 and 766 (except hides and commodities in bulk), from the plantsite and storage facilities of Swift Fresh Meats Co., at or near Grand Island, Nebr., Des Moines and Glenwood, Iowa, to points in Georgia, North Carolina, South Carolina, and Tennessee, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper(s): Swift Fresh Meats Co., a division of Swift & Co., 115 West Jackson Boulevard, Chicago, Ill. 60604. Send protests to: Marion L. Cheney, Transportation Assistant, Interstate Commerce Commission, Bureau of Operations, 414 Federal Building and U.S. Courthouse, 110 South 4th Street, Minneapolis, Minn. 55401.

No. MC 118959 (Sub-No. 152TA), filed September 12, 1977. Applicant: JERRY LIPPS, INC., 130 South Frederick Street, Cape Girardeau, Mo. 63701. Applicant's representative: Robert M. Pearce, P.O. Box 1899, Bowling Green, Ky. 42101. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Clay, clay products, paper trays, corrugated posts*, from the plantsite of Absorbent Clay Products, Inc., at or near Mounds, Ill., to points in Alabama, Arkansas, California, Florida, Georgia, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maine, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Nebraska, New Jersey, New Mexico, New York, North Carolina, Ohio, Oklahoma, Pennsylvania, South Dakota, Tennessee, Texas, Virginia, Washington, and Wisconsin, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper(s): Absorbent Clay Products, Inc., P.O. Box 687, Anna, Ill. 62906. Send protests to: J. P. Werthmann, District

Supervisor, Interstate Commerce Commission, Bureau of Operations, room 1465, 210 North 12th Street, St. Louis, Mo. 63101.

No. MC 124211 (Sub-No. 63TA), filed September 2, 1977. Applicant: HOWARD BAER, P.O. Box 27, Route 98W, Morton, Ill. 61550. Applicant's representative: Robert W. Loser, 1009 Chamber of Commerce Bldg., Indianapolis, Ind. 46204. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Dairy products*, from Cincinnati, Ohio, to points in North Carolina. Restrictions: (1) Restricted to the transportation of traffic originating at and/or destined to a facility of the Kroger Co., (2) restricted to movements in vehicles equipped with mechanical refrigeration, and (3) limited to a transportation service performed under a continuing contract or contracts with the Kroger Co., for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper(s): The Kroger Co., 1014 Vine Street, Cincinnati, Ohio. 43201. Send protests to: Patricia A. Roscoe, Transportation Assistant, Interstate Commerce Commission, Everett McKinley Dirksen Building, 219 South Dearborn Street, room 1386, Chicago, Ill. 60604.

No. MC 125433 (Sub-No. 125TA), filed September 16, 1977. Applicant: F-B TRUCK LINE CO., 1045 South Redwood Road, Salt Lake City, Utah 84104. Applicant's representative: David J. Lister (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Lumber, lumber products, and wood products*, from the facilities of Neiman Sawmill, Inc., located at or near Hulett, Wyo., to points in Illinois, Indiana, and Kentucky, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: Neiman Sawmill, Inc., Box 218, Hulett, Wyo. (Jim D. Neiman). Send protests to: District Supervisor, Lyle D. Helfer, Interstate Commerce Commission, Bureau of Operations, 5301 Federal Building, 125 South State Street, Salt Lake City, Utah 84138.

No. MC 125470 (Sub-No. 26TA), filed September 12, 1977. Applicant: MOORE'S TRANSFER, INC., P.O. Box 1151, Norfolk, Nebr. 68701. Applicant's representative: Gailyn L. Larsen, 521 South 14th Street, P.O. Box 81849, Lincoln, Nebr. 68501. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Salt and salt products and materials and supplies* used in the agricultural, water treatment, food processing, wholesale grocery, and institutional supply industries in mixed loads with salt and salt products, from the facilities of American Salt Co., at or near Lyons, Kans., to points in Utah, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper(s): John

Branham, Traffic Manager, American Salt Co., 3142 Broadway, Kansas City, Mo. 64111. Send protests to: Carroll Russell, District Supervisor, Interstate Commerce Commission, suite 620, 110 North 14th Street, Omaha, Nebr. 68102.

No. MC 128007 (Sub-No. 110TA), filed September 15, 1977. Applicant: HOFER, INC., P.O. Box 583, 4032 Parkview Drive, Pittsburg, Kans. 66762. Applicant's representative: Larry E. Gregg, 641 Harrison, Topeka, Kans. 66603. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Fabricated concrete reinforcing materials, joints, and accessories*, from points in Labette County, Kans., to points in California and Oregon, and from Houston, Tex., to points in Labette County, Kans., and (2) *materials and supplies* used or useful in the manufacture of the commodities listed in part (1) above, from points in Illinois, Indiana, Missouri, and Texas, to points in Labette County, Kans., for 180 days. Supporting shipper(s): Superior Concrete Accessories, Inc., 1900 Wilson, Parsons, Kans. 67357. Send protests to: M. E. Taylor, District Supervisor, Interstate Commerce Commission, 101 Litwin Building, Wichita, Kans. 67202.

No. MC 128375 (Sub-No. 154TA), filed September 9, 1977. Applicant: CRETE CARRIER CORP., P.O. Box 81228, Lincoln, Nebr. 68501. Applicant's representative: Duane W. Ackle (same address as applicant). Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Paper and paper products*, from Erie and Lock Haven, Pa., Indianapolis, Ind., Oswego, N.Y., and their commercial zones and points in Ohio to Kansas, under a continuing contract, or contracts, with Western Paper Co., Division of Hammermill Paper Co., for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper(s): W. R. Hershman, President, Western Paper Co., Division of Hammermill Paper Co., P.O. Box 12210, Overland Park, Kans. Send protests to: Max H. Johnston, District Supervisor, 285 Federal Building and Courthouse, 100 Centennial Mall North, Lincoln, Nebr. 68508.

No. MC 135410 (Sub-No. 13TA), filed September 2, 1977. Applicant: COURTNEY J. MUNSON d.b.a. MUNSON TRUCKING, 700 South Main, Monmouth, Ill. 61462. Applicant's representative: Donald L. Stern, Suite 530, Univac Building, 7100 West Center Road, Omaha, Nebr. 68106. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Fresh meats and packinghouse products*, from the plantsites and storage facilities of Wilson Foods Corp., at Cedar Rapids, and Des Moines, Iowa, to points in Connecticut, Delaware, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, Vermont, and the District of Columbia; and (2) from the plantsite and storage facilities of Wil-

son Foods Corp., at Des Moines, Iowa, to points in Virginia, for 180 days. Supporting shippers(s): Wilson Foods Corp., 4545 Lincoln Blvd., Oklahoma City, Okla. 73105. Send protests to: Patricia A. Roscoe, Transportation Assistant, Interstate Commerce Commission, Everett McKinley Dirksen Building, 219 South Dearborn Street, room 1386, Chicago, Ill. 60604.

No. MC 136689 (Sub-No. 9TA), filed September 15, 1977. Applicant: SLAUGHTER TRANSPORTATION CORP., 10910 Lane Street, Houston, Tex. 77029. Applicant's representative: Jo E. Shaw, 816 Houston First Savings Bldg., Houston, Tex. 77002. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: straight loads of *dry bleach* and dry bleach in mixed loads of liquid bleach, cleaning compounds, animal litter, cooking oils, and food stuffs (not frozen, not in bulk), from New Orleans, La., to the plantsite and facilities of The Clorox Co., at or near Houston, Tex., restricted to traffic having an immediately prior rail movement, under a continuing contract, or contracts, with The Clorox Co., for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper(s): The Clorox Co., 1221 Broadway, Oakland, Calif. 94612. Send protests to: John Mensing, District Supervisor, Interstate Commerce Commission, 515 Rusk, room 8610, Houston, Tex. 77002.

No. MC 140612 (Sub-No. 32TA), filed September 14, 1977. Applicant: ROBERT F. KAZIMOUR, P.O. Box 2207, Cedar Rapids, Iowa 52406. Applicant's representative: J. L. Kazimour (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Household, commercial, and institutional kitchen and laundry equipment, fixtures, appliances and parts, electrical appliances, equipment and parts, and tools and hardware* (except commodities in bulk and commodities which, because of size or weight, require the use of special equipment), from the facilities of the McGraw-Edison Co., located at or near Chattanooga, Tenn., Ripon, Wis., Searcy, Ark., and Columbia and St. Louis, Mo., to points in the United States in and west of Louisiana, Arkansas, Missouri, Illinois, and Wisconsin (except Alaska and Hawaii), for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper(s): McGraw-Edison Co., P.O. Box U, Columbia, Mo. 65201. Send protests to: Herbert W. Allen, District Supervisor, Bureau of Operations, Interstate Commerce Commission, 518 Federal Building, Des Moines, Iowa 50309.

[Ex Parte No. 343]

NATIONWIDE INCREASED FREIGHT RATES AND CHARGES—1977

Authority To File Master Tariff

By petition and verified statements filed September 26, 1977, the railroads listed in Appendix I of the petition, and certain water and motor carriers having joint rates with the Appendix I railroads, request the Commission to institute an investigation into the adequacy of freight rates and charges of all railroad common carriers within the United States. Petitioners request that all such railroad common carriers be made respondents in such investigation. Petitioners ask that the Commission authorize and permit increases in freight rates and charges from, to, and within all territories of 5 percent, effective November 30, 1977, to offset labor cost increases and increases in the cost of materials, supplies, and certain other items, subject to exceptions and holddowns set forth in Appendix II of the petition.

Petitioners seek permission to make the proposed increases effective November 30, 1977, subject to the condition that refunds shall be made in the event that, after any investigation that the Commission deems necessary, no increase or a lesser increase than that requested is authorized. Petitioners also seek entry of an order modifying all outstanding Commission orders to the extent necessary to enable the railroads to file and make effective the proposed increased rates and charges. Such order is also requested to allow the entry of appropriate orders under Sections 4 and 6 of the Interstate Commerce Act.

The petitioners have filed and served 30 verified statements constituting their evidential case pursuant to the requirements set forth in Procedures Governing Rail Carriers General Increase Proceedings, 49 CFR 1102, including certain financial data suggested in Appendix B of the report and order in *Ex Parte No. 281*, Increased Freight Rates and Charges, 1972, 341 I.C.C. 288. Petitioners have also submitted data of the type called for in *Ex Parte No. 290* (Sub-No. 1), Procedures—Rail Car General Increase Proceedings, 349 I.C.C. 22, namely detailed information on estimated revenues which would have been obtained had the last authorized increase been fully applied, and the actual total increase in revenues realized by application of the last authorized general increase.

The petitioners have given notice of the petition and have furnished data to the public in compliance with *Ex Parte No. 286*, Notice of Increases in Frt. Rates and Pass. Fares, 349 I.C.C. 741, and with section 5b of the Interstate Commerce Act.

The petitioners have also submitted information of the type called for in *Ex parte No. 55* (Sub-No. 4), revised Guidelines for the Implementation of the National Environmental Policy Act of 1969, 352 I.C.C. 451 and 49 CFR 1108, namely a supplemental evaluation of environmen-

tal considerations with regard to the petitioners' increased rate proposal. The petitioners contend that the requested increases will have no significant adverse effects upon the movement of the traffic or transportation of recyclable commodities by rail. Any person or persons believing that the requested increases, if authorized, would have a significant impact upon the quality of the human environment are invited to comment upon this matter in verified statements authorized to be filed pursuant to this order. Environmental matters and the requirements of the National Environmental Policy Act of 1969 will be fully considered by this Commission in any subsequent action on the merits of the requested general increases.

By Special Permission Order No. 77-5350, served in conjunction with this order, the Commission is authorizing the filing of tariff schedules increasing rates and charges sought in the petition. These tariff schedules are to become effective upon not less than 30 days' notice to the Commission and the general public, subject to protest and possibly suspension as provided by the Interstate Commerce Act. By this Special Permission Order, the Commission is also authorizing the modifying of outstanding orders to the extent necessary to permit this filing.

It is ordered, That all common carriers by railroad be, and they are hereby, made respondents to this proceeding.

It is further ordered, That pursuant to the special permission authority granted in conjunction with this order, the tariff schedules shall be published and filed upon not less than 30 days' notice effective not earlier than November 30, 1977, nor later than December 30, 1977, subject to protest and possible suspension. These schedules are to contain an appropriate refund provision. Verified statements shall be filed on or before October 28, 1977, in accordance with the procedures as outlined in the following paragraph.

It is further ordered, That any person opposing or wishing to comment on the proposed 5-percent increase in rates and charges shall file and serve verified statements, as provided below.

(a) The verified statements shall contain all evidence relevant and material to the issues in this proceeding which the parties desire to have considered by the Commission, as a basis for a decision on the merits. Any submission on asserted environmental impact shall be set forth under an appropriate subheading in order to identify properly such subject matter.

¹ In the event the tariff is not filed prior to October 10, 1977, the due date specified for the filing of protests and verified statements will be extended to a date 20 days prior to the effective date, and the reply date will be correspondingly extended.

² Section 15(8)(d) of the Interstate Commerce Act specifically requires the filing of verified complaints seeking suspension of proposed rate changes.

(b) Verified statements may include arguments in support of an affiant's position but such argument shall be set forth in a separate section of the document containing the verified statement. If desired, such argument may be contained in a separate document simultaneously filed and served.

(c) Each verified statement shall be signed in ink by affiant and verified (notarized) in the manner provided by Rule 48 and Form No. 6 of the Commission's General Rules of Practice (see 49 CFR 1100.48 and Appendix B, Form No. 6, to 49 CFR 1100). The post office address of affiant or his counsel shall be shown.

(d) Verified statements and arguments shall be filed and served as follows:

The original and 20 copies of each such document for the use of the Commission shall be addressed to the Secretary, and sent to the Office of Proceedings, Room 5342, Interstate Commerce Commission, Washington, D.C. 20423, except that a lesser number of copies may be filed upon showing of good cause. All documents filed with the Commission in this matter shall contain the following notation on the envelope: *Ex parte No. 343*.

One copy shall be served upon the representative of the petitioning railroads, James L. Howe III, Esq., 527 American Railroads Building, 1920 L Street NW., Washington, D.C. 20036, which service shall constitute service upon all respondents. However, all parties able to do so shall serve 20 copies upon the railroads' representative. In all cases, where service is made by mail, the document shall be mailed in time to be received by the respective due dates.

(e) Each verified statement shall contain a certificate of service stating that it has been timely served on opposing parties, as herein provided.

(f) Verified statements and arguments by persons opposed to the proposed increases in rates and charges shall include all matters which they desire the Commission to consider with respect to statutory suspension of the rates pending completion of the investigation, as well as evidence relevant to the ultimate decision.

It is further ordered, That on or before November 4, 1977, the respondents shall file with the Commission and serve upon opposing parties such replies to protests or other pleadings seeking suspension, and rebuttal evidence on the merits of the proceeding as they desire to present. Such evidence shall be in the form and served in the same manner as the opening statements filed in accordance with the regulation published in 49 CFR 1102, except that replies and rebuttal evidence need be served only upon the party (and his counsel if known) to whose evidence the reply or rebuttal is directed. However, replies or rebuttal statements proposing changes in the tariff shall be served on all parties. All such statements shall be furnished to interested parties upon request.

It is further ordered, That the request for fourth-section relief will be considered following the filing of verified statements and replies.

And it is further ordered, That in all other respects the petition be, and it is hereby, denied.

SPECIAL PERMISSION No. 77-5350

It is ordered, for good cause shown:

1. All railroads, and water and motor carriers to the extent they have joint rates with the railroads, and their tariff-publishing agents, be, and they are hereby, except as otherwise provided herein, authorized to depart from the Commission's tariff publishing rules in Tariff Circular No. 20 (49 CFR 1300), when publishing and filing tariffs, and tariff amendments, to become effective upon not less than 30 days' notice to the Commission and the public but not earlier than November 30, 1977, nor later than December 30, 1977, providing for increased rates and charges as set forth in the petition:

(a) By publishing and filing a master tariff of increased rates and charges, and supplements to the master tariff, providing increases by means of conversion tables of rates and charges, which shall include, and maintain in effect, a refund provision reading as follows:

In the event any increases resulting from the application of this tariff exceed the increases subsequently approved or prescribed by the Interstate Commerce Commission, the carriers will refund the difference between the increase resulting from the application thereof and any increases which may subsequently be approved or prescribed by the Interstate Commerce Commission with . . . percent interest.

In the event any increase resulting from the application of this tariff is disapproved by the Commission and no increase is authorized, the carriers will refund the full amount of the increase collected with . . . percent interest.

The master tariff shall be indicated to expire on interstate and foreign commerce with a date not beyond one year after the effective date, which may not be extended or cancelled except upon specific authorization of this Commission, and all relief granted in this order expires with that date. The master tariff must initially contain all provisions for application of the increases (including provisions for no increase, part of the overall proposal) following which (unless suspended) any provisions other than those of a general character may be cancelled and transferred to the particular tariff affected upon a common effective date with appropriate notation to that effect in the master tariff amendment.

³ The interest rate to be inserted in the refund provision shall be equal to the average yield (on the date such schedule is filed) of marketable securities of the United States which have a duration of 90 days. See Section 15(8)(e) of the Interstate Commerce Act.

⁴ See, footnote 3.

(b) By publication and filing of a connecting link supplement to each tariff to be made subject to the master tariff, connecting such tariffs with the master. Such supplements may be blanket supplements (a common supplement issued to two or more tariffs).

(c) The master tariff and connecting link supplements issued and filed under this order shall not provide for nonapplication on interstate traffic competitive with intrastate traffic between the same points unless the interstate rates and routes are specifically identified in the connecting link supplements.

(d) By publication and filing of tariffs or amendments to tariffs effective concurrently with the master tariffs and upon the same notice which provide specifically increased rates and charges but which do not result in an increase in charges for transportation and other services greater than those specified in the petition, provided all such publication is identified in the tariffs and made subject to a refund clause worded substantially as in paragraph 1(a) above.

(e) By publication of provisions in tariffs or amendments thereto subjecting rates and charges therein to the provisions of the master tariff, subject to the restriction in (c) above.

2. (a) The master tariff, as amended, and all other tariffs and amendments to

tariffs, that employ the short-form methods authorized herein shall bear the notation:

Form of publication authorized, I.C.C. permission No. 77-5350.

(b) Tariffs or amendments to tariffs publishing specifically increased rates or charges hereunder shall bear a notation reading:

Publication made in accordance with I.C.C. permission No. 77-5350.

3. Connecting-link supplements authorized herein shall be exempted from the Commission's tariff-publishing rules governing the number of supplements and the volume of supplemental matter permissible.

4. The master tariff filed under this order shall not be amended except to correct errors and to comply with findings and orders of the Commission, except when specifically authorized to do so. The terms of rule 9(e) (40 CFR 1300.9 (e)) are not waived as to supplements to the master tariff.

5. Outstanding orders of the Commission are hereby modified only to the extent necessary to permit the filing of tariff publications containing the proposed increases, and all tariffs publications filed shall be subject to protest and possible suspension and rejection. In that regard, we direct petitioners' attention to our admonitions in prior general increase

proceedings concerning maintenance and preservation of existing port relationships. See, for example, Increased Freight Rates and Charges, 1972, 341 I.C.C. 288, 336, and Increased Freight Rates, 1970 and 1971, 339 I.C.C. 125, 188. The rate increase table on grain shall progress in one-half cent increments.

It is further ordered, That future orders and notices of the Commission in this proceeding will be sent only to those participating as herein provided, and those interested persons who specifically request to be included on the service list.

And it is further ordered, That notice of this order be given by serving a copy thereof on each party to the proceedings in *Ex parte* No. 336, to the Governor and public utility regulatory body of each State, the Environmental Protection Agency, the Special Assistant to the President for Consumer Affairs, and by depositing a copy in the Office of the Secretary of the Commission at Washington, D.C., and by filing a copy with the Director, Office of the Federal Register for publication in the FEDERAL REGISTER.

Decided September 29, 1977.

By the Commission.

H. G. HOMME, Jr.,
Acting Secretary.

CIVIL AERONAUTICS BOARD.

[MA-56 amending M-61]

SEPTEMBER 27, 1977.

Notice of addition of item to the September 29, 1977 meeting agenda.

TIME AND DATE: 2 p.m., September 29, 1977.

PLACE: Room 1027, 1825 Connecticut Avenue NW., Washington D.C. 20428.

SUBJECT: Dockets 31232, 31234, 31235, 31246, 31247, 31285, and 31305, Complaints of National Air Carrier Association, Brendan Tours, Inc., Charter Travel Corp., The Educational Cooperative, and Laker Airways Ltd. against Tariffs of Pan American World Airways, Inc., Trans World Airlines, Inc., British Airways, and Air India Proposing Standby, Budget, and Super-Apex Fares over the North Atlantic.

STATUS: Open.

PERSON TO CONTACT:

Phyllis T. Kaylor, The Secretary, 202-673-5068.

SUPPLEMENTARY INFORMATION: In order to discuss the President's disapproval on September 26, 1977, of the Board's action suspending passenger fares in this matter, the following Members have voted that agency business requires the addition of this item to the agenda of its September 29, 1977, meeting and that no earlier announcement of this addition was possible.

Chairman Alfred E. Kahn, Vice-Chairman Richard J. O'Melia, Member G. Joseph Minetti, Member Elizabeth E. Bailey.

[MA-55 amending M-61]

CIVIL AERONAUTICS BOARD.

Notice of addition of items to the September 29, 1977 meeting agenda.

TIME AND DATE: 2 p.m., September 29, 1977.

PLACE: Room 1027, 1825 Connecticut Avenue NW., Washington, D.C. 20428.

SUBJECT: 2a. Dockets 31302 and 31303, Ozark's proposal to reduce fares for multistop service (Memo No. 7262-E, BFR).

2b. Proposed Fare Increase of Aloha and Hawaiian Airlines (Memo No. 7371-A, BFR).

12a. Docket 28807, Petition for extension of time in *Trans International Airlines, Inc., Enforcement Proceeding* (Memo No. 7339-A, OGC).

12b. Docket 30746, Discretionary review on Board's initiative of the decision of the Director, BOE, declining to institute an enforcement proceeding in the complaint of *LACO Travel Service v. Air Travel Conference of America* (Memo No. 7456, OGC).

STATUS: Open.

PERSON TO CONTACT:

Phyllis T. Kaylor, The Secretary, 202-673-5068.

SUPPLEMENTARY INFORMATION: At the meeting of September 27, 1977, the Board instructed the staff to write an order in the matter of Ozark's proposal to reduce fares for multistop service, Dockets 31302 and 31303. If the Board desires to suspend the tariff pending investigation, it must act before October 1, 1977, or lose the authority to do so under section 1002(g) of the Federal Aviation Act. Accordingly, the following members voted that agency business requires the addition of this item to the agenda of September 29, 1977, and that no earlier announcement was possible:

Chairman Alfred E. Kahn, Vice Chairman Richard J. O'Melia, Member G. Joseph Minetti, Member Elizabeth E. Bailey.

Because of other business the staff was unable to forward to the Board the recommendation concerning Aloha and Hawaiian Airlines' fare increase. If the Board desires to suspend the tariff pending investigation, then it must act be-

fore October 1, 1977, or lose the authority to do so under section 1002(g) of the Federal Aviation Act. The Board must make a determination concerning a petition in the *Trans International Airlines, Inc., Enforcement Proceeding*, Docket 28807, by September 29, 1977, whether or not to extend the time for certain notice requirements. Also in Docket 30746, *LACO Travel Service v. Air Travel Conference of America*, the Board must make a determination before October 5, 1977, whether or not to review the decision of the Bureau of Enforcement not to institute an enforcement proceeding or, under Rule 205 of the Board's Procedural Regulations, the BOE decision will become that of the Board on October 5, 1977. Therefore, the following Board Members have voted that agency business requires the addition of these items to the September 29, 1977, agenda and that no earlier announcement of these additions was possible:

Chairman Alfred E. Kahn, Vice Chairman Richard J. O'Melia, Member G. Joseph Minetti, Member Elizabeth E. Bailey.

5
EQUAL EMPLOYMENT OPPORTUNITY COMMISSION.

TIME AND DATE: 9:30 a.m. (Eastern Time), Tuesday, October 4, 1977.

PLACE: Chairman's Conference Room, No. 5240, on the fifth floor of the Columbia Plaza Office Building, 2401 E Street N.W., Washington, D.C. 20506.

STATUS: Part of the meeting will be open to the public, and part will be closed to the public.

MATTERS TO BE CONSIDERED:

PART OPEN TO THE PUBLIC

A proposed Notice for publication in the FEDERAL REGISTER, concerning the impact of the Commission's new investigative and reasonable cause standards on private Title VII litigation.

PART CLOSED TO THE PUBLIC

Litigation Authorization: General Counsel Recommendations: Matters closed to the public under Sec. 1612.13(a) of the Commission's regulations (42 FR 13830, March 14, 1977).

A majority of the entire membership of the Commission determined by recorded vote that Commission business required that this meeting be called for this date, and that no earlier announcement was possible.

In favor of motion: Eleanor Holmes Norton, Chair; Ethel Bent Walsh, Commissioner; Daniel E. Leach, Commissioner.

Opposed: None.

NOTE.—Any matter not discussed or concluded may be carried over to a later meeting.

CONTACT PERSON FOR MORE INFORMATION:

Marie D. Wilson, Executive Officer, Executive Secretariat, at 202-634-6748.

Federal Insurance Administration

[24 CFR Part 1917]

[Docket No. FI-3456]

FRANKLINVILLE, CATTARAUGUS COUNTY,
N.Y.

Proposed Flood Elevation Determinations

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base flood elevations (100-year flood) listed below for selected locations in the Village of Franklinville, Cattaraugus County, N.Y. These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review at the Village Clerk's Office, Franklinville, N.Y.

Any person having knowledge, information, or wishing to make a comment on these proposed elevations should immediately notify Mayor William Hunter, 28 Chestnut Street, Franklinville, N.Y.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or Toll Free Line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base flood elevations (100-year flood) for the Village of Franklinville, Cattaraugus County, N.Y., in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.

These elevations together with the flood plain management measures required by § 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing

ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, state or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

The proposed 100-year flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Gates Creek	Upstream corporate limits	1,618
	4th Ave.	1,586
	Route 16	1,578
Ischen Creek	Wakefield Rd.	1,583
	Downstream corporate limits	1,581

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001-4128; and Secretary's delegation of authority to Federal Insurance Administrator 34, FR 2680, February 27, 1969, as amended (39 FR 2787, January 24, 1974).)

Issued: August 26, 1977.

PATRICIA ROBERTS HARRIS,
Secretary.

[FR Doc. 77-28479 Filed 10-3-77; 8:45 am]

[4210-01]

[24 CFR Part 1917]

[Docket No. FI-3457]

GREAT VALLEY, CATTARAUGUS COUNTY,
N.Y.

Proposed Flood Elevation Determinations

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base flood elevations (100-year flood) listed below for selected locations in the Town of Great Valley, Cattaraugus County, N.Y. These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review

at the Post Office, Great Valley, Cattaraugus County, New York.

Any person having knowledge, information, or wishing to make a comment on these proposed elevations should immediately notify Mr. Joseph F. Ward, Great Valley, N.Y.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or Toll Free Line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base flood elevations (100-year flood) for the Town of Great Valley, Cattaraugus County, N.Y., in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 P.L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.

These elevations together with the flood plain management measures required by § 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, state or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

The proposed 100-year flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Wrights Creek	Humphrey Rd.	1,495
	Route 219	1,418
Great Valley Creek	Upstream corporate limits	1,570
	Brewer Rd.	1,566
	Confluence with Forks Creek	1,498
	Route 219	1,462
	Confluence with Wrights Creek	1,445
	Route 219	1,438
	Baltimore & Ohio R.R.	1,426
	Route 219	1,422
	Highland Ave.	1,406
	Route 219	1,406
	Baltimore & Ohio R.R.	1,401
	Route 17, Allegheny Indian Reservation	1,391

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001-4128; and Secretary's delegation

of authority to Federal Insurance Administrator 34 FR 2680, February 27, 1969, as amended (39 FR 2787, January 24, 1974).)

Issued: August 26, 1977.

PATRICIA ROBERTS HARRIS,
Secretary.

Proposed Flood Elevation Determinations

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base flood elevations (100-year flood) listed below for selected locations in the City of Niagara Falls, Niagara County, New York.

These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review at the City Hall, Niagara Falls, N.Y. Any person having knowledge, information, or wishing to make a comment on these proposed elevations should immediately notify Honorable Michael C. O'Laughlin, Mayor of Niagara Falls, N.Y.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or Toll Free Line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base flood elevations (100-year flood) for the City of Niagara Falls, Niagara County, N.Y., in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.

These elevations together with the flood plain management measures required by § 1910.3 of the program regulations are the minimum that are required.

They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, state or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

The proposed 100-year flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Gill Creek	Confluence with Niagara River	563
	Upstream of the first railroad crossing	565
	Upstream of the second railroad crossing	569
	Downstream of Buffalo Ave. (Route 381)	570
	Niagara St.	571
	Upstream of Walnut Ave.	573
	Pine Ave.	573
	Upstream of Hyde Park Dam	575
	Robbins Dr.	578
	Upstream of the foot bridge above Porter Rd.	579
	Downstream of the foot bridge above the railroad bridge	583
	Lockport Rd.	585
Cayuga Creek	Confluence with the Little Niagara River	585
	Battle Ave.	586
	South Military Rd.	588
	Upstream of Lombardi Ave.	592
	Upstream of Bear Ave.	593
	Cayuga Dr.	594
	Corporate limits	594
Bore Creek	Confluence with Cayuga Creek	594
	99th St.	594
	Corporate limits	594

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001-4128; and Secretary's delegation of authority to Federal Insurance Administrator 34, FR 2680, February 27, 1969, as amended (39 FR 2787, January 24, 1974).)

Issued: August 26, 1977.

PATRICIA ROBERTS HARRIS,
Secretary.

OGDEN, MONROE COUNTY, N.Y.

Proposed Flood Elevation Determinations

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base flood elevations (100-year flood) listed below for selected locations in the Town of Ogden, Monroe County, N.Y. These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review at the Bulletin Board in the Town Clerk's Office, 409 South Union Street, Spencerport, N.Y. 14559.

Any person having knowledge, information, or wishing to make a comment on these proposed elevations should immediately notify Mr. Bertil A. Stomquist, Supervisor, 409 South Union Street, Spencerport, N.Y. 14559.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base flood elevations (100-year flood) for the Town of Ogden, Monroe County, N.Y., in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.

These elevations together with the flood plain management measures required by § 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, state or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

The proposed 100-year flood elevations for selected locations are:

OYSTER BAY, NASSAU COUNTY, N.Y.

Proposed Flood Elevation Determinations

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base flood elevations (100-year flood) listed below for selected locations in the Town of Oyster Bay, Nassau County, N.Y. These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review at the Lobby of the Town Hall, Audrey Avenue, Oyster Bay, N.Y. 11771.

Any person having knowledge, information, or wishing to make a comment on these proposed elevations should immediately notify Mr. Joseph Colby, Town Supervisor, Town Hall, Audrey Avenue, Oyster Bay, N.Y. 11771.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or Toll Free Line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base flood elevations (100-year flood) for the Town of Oyster Bay, Nassau County, N.Y., in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.

These elevations together with the flood plain management measures required by § 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, state or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

The proposed 100-year flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Massapequa Creek	Massapequa Lake	8
	Summit Highway	12
	Long Island R.R.	12
	Clark St.	18

ROCHESTER, MONROE COUNTY, N.Y.

Proposed Flood Elevation Determinations

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base flood elevations (100-year flood) listed below for selected locations in the city of Rochester, Monroe County, N.Y. These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review at the lobby in Rochester City Hall, 30 West Broad Street, Rochester, N.Y. 14614.

Any person having knowledge, information, or wishing to make a comment on these proposed elevations should immediately notify the Honorable Thomas P. Ryan, Jr., mayor of Rochester, Rochester City Hall, Room 34, 30 West Broad Street, Rochester, N.Y. 14614.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base flood elevations (100-year flood) for the city of Rochester, Monroe County, N.Y., in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.

These elevations together with the flood plain management measures required by § 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other

Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

The proposed 100-year flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet above mean sea level
Genesee River	Mouth	249
	Statton St.	249
	State Route 104 (Ridge Rd.)	251
	Park Ave.	258

WELLSVILLE, ALLEGANY COUNTY, N.Y.

Proposed Flood Elevation Determinations

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base flood elevations (100-year flood) listed below for selected locations in the village of Wellsville, Allegany County, N.Y. These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review at the Village Clerk's Office, Wellsville, N.Y. Any person having knowledge, information, or wishing to make a comment on these proposed elevations should immediately notify Mayor Robert G. Gardner, 156 North Main Street, Wellsville, N.Y. 14895.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base flood elevations (100-year flood) for the Village of Wellsville, Allegany County, N.Y., in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.

These elevations together with the flood plain management measures required by § 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

The proposed 100-year flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Genesee River	Northern corporate limits	1,486
	Upstream of Madison St.	1,494
	Southern corporate limits	1,499
Dyke Creek	Miller St. (extended)	1,500
	Northern corporate limits	1,505

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42

U.S.C. 4001-4128; and Secretary's delegation of authority to Federal Insurance Administrator, 34 FR 2680, February 27, 1969, as amended (39 FR 2787, January 24, 1974).)

CHILI, MONROE COUNTY, N.Y.

Proposed Flood Elevation Determinations
AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base flood elevations (100-year flood) listed below for selected locations in the town of Chili, Monroe County, N.Y. These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review at the Town Hall in the meeting room, 3235 Chili Avenue, Rochester, N.Y.

Any person having knowledge, information, or wishing to make a comment on these proposed elevations should immediately notify Mr. James Powers, supervisor of Chili, 3235 Chili Avenue, Rochester, N.Y. 14624.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base flood elevations (100-year flood) for the town of Chili, Monroe County, N.Y., in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.

These elevations together with the flood plain management measures required by § 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricted requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

The proposed 100-year flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Genesee River.....	Downstream corporate limits	520
	Confluence with Little Black Creek	521
	Con. Rd. (Ballantine Rd.)	522
	Route 522 (Ballantine Rd.)	523
	New York State Thruway (I-190)	529
	Upstream corporate limits	529
Black Creek.....	Confluence with Black Creek	523
	Abandoned railroad	525
	B & O. RR.	525
	Route 252 (Archer Rd.)	525
	Humphrey Rd.	528
	Route 251 (Chili-Scottsville Rd.)	530
	Scottsville Rd.	531
	Union St.	540
	Smart Rd.	543
	Route 33A (Buckbee Corners Rd.)	543
	Upstream corporate limits	544

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001-4128; and Secretary's delegation of authority to Federal Insurance Administrator, 34 FR 2680, February 27, 1969, as amended (39 FR 2787, January 24, 1974)).

Issued: August 16, 1977.

These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review at the Town Hall, 1300 Hilton-Parma, Hilton, N.Y. 14468.

Any person having knowledge, information, or wishing to make a comment on these proposed elevations should immediately notify Mr. John F. JenneJahn, supervisor of the town of Parma, 1300 Hilton-Parma, Hilton, N.Y. 14468.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base flood elevations (100-year flood) for the town of Parma, Monroe County, N.Y., in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.

These elevations together with the flood plain management measures required by § 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

The proposed 100-year flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Northrup Creek.....	Manitou Rd.	339
	Peck Rd.	345
	Dean Rd.	346

YOUNGSTOWN, NIAGARA COUNTY, N.Y.

Proposed Flood Elevation Determinations

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base flood elevations (100-year flood) listed below for selected locations in the village of Youngstown, Niagara County, N.Y. These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review at the Village Office, 240 Lockport Street, Youngstown, N.Y. 14174.

Any person having knowledge, information, or wishing to make a comment on these proposed elevations should immediately notify Hon. Watson C. McCalister, mayor of Youngstown, 240 Lockport Street, Youngstown, N.Y. 14174.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street, SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base flood elevations (100-year flood) for the village of Youngstown, Niagara County, N.Y., in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968, Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.

These elevations together with the flood plain management measures required by § 1910.3 of the program regulations are the minimum that are required. They should not be construed

to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

The proposed 100-year flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet above mean sea level
Niagara River.....	Northwest corporate limits	250
	Human St. (extended)	250
	Campbell St. (extended)	253
	Mary's St. (extended)	254
	Southwest corporate limits	254

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001-4128; and Secretary's delegation of authority to Federal Insurance Administrator, 34 FR 2680, February 27, 1969, as amended (39 FR 2787, January 24, 1974)).

BREVARD, N.C.

Proposed Flood Elevation Determinations

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base flood elevations (100-year flood) listed below for selected locations in the City of Brevard, N.C. These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review at City Hall, 151 West Main, Brevard, N.C.

PROPOSED RULES

Any person having knowledge, information, or wishing to make a comment on these proposed elevations should immediately notify Mayor Charles H. Campbell, City Hall, 151 Main, Brevard, N.C. 28712.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base flood elevations (100-year flood) for the City of Brevard, N.C., in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.

These elevations together with the flood plain management measures required by § 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, state or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

The proposed 100-year flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
French Broad River	Lamho Creek confluence	2,100
	Nicholson Creek confluence	2,100
Davidson River	Upstream of Southern Ry.	2,107
	Upstream of U.S. Highways 64 and 276	2,123
Unnamed tributary to Davidson River	Upstream of Ecusta Rd.	2,123
Lamb Creek	Upstream of Southern Ry.	2,112
	Upstream of U.S. Highways 64 and 276	2,140
	Extraterritorial limit (upstream limit)	2,254
Allison Creek	Upstream of U.S. Highways 64 and 276	2,132
Lamho Creek	Upstream of Neely Rd.	2,108
	Upstream of Southern Ry.	2,138
Gilbreath Branch	Upstream of Old Hendersonville Highway	2,113
King Creek	Upstream of Neely Rd.	2,108
	Upstream of Tinsley Rd.	2,178

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Long Branch	Southern Ry. Tinsley Rd.	2,152
Singing Branch	Field Rd.	2,221
Jumping Branch	Confluence with French Broad River	2,119
Nicholson Creek	Country Club Rd.	2,120
	Upstream of Nicholson Creek Rd.	2,120
Norton Creek	Upstream of U.S. Highway 64	2,135
	Southern Ry.	2,158

HUBBARD, TRUMBULL COUNTY, OHIO

Proposed Flood Elevation Determinations

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base flood elevations (100-year flood) listed below for selected locations in the City of Hubbard, Trumbull County, Ohio. These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review at the Building Inspector's office, Hubbard City Building, 33 West Liberty Street, Hubbard, Ohio 44425.

Any person having knowledge, information, or wishing to make a com-

ment on these proposed elevations should immediately notify the Honorable Arthur U. Magee, Mayor of Hubbard, City Building, 33 West Liberty Street, Hubbard, Ohio 44425.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base flood elevations (100-year flood) for the City of Hubbard, Trumbull County, Ohio, in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.

These elevations together with the flood plain management measures required by § 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, state or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

The proposed 100-year flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Mud Run	Confluence with Little Yankee Run	928
	Con Rail	930
	Myron St.	936
	North Main St.	938

REYNOLDSBURG, FRANKLIN COUNTY, OHIO

Proposed Flood Elevation Determinations

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base flood elevations (100-year flood) listed below for selected locations in the City of Reynoldsburg, Franklin County, Ohio. These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review at the lobby of City Hall, 7232 Main Street, Reynoldsburg, Ohio.

Any person having knowledge, information, or wishing to make a comment on these proposed elevations should immediately notify the Honorable Richard J. Daugherty, Mayor of Reynoldsburg, City Hall, 7232 Main Street, Reynoldsburg, Ohio 43068.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base flood elevations (100-year flood) for the City of Reynoldsburg, Franklin County, Ohio in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.

These elevations together with the flood plain management measures required by § 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, state or regional entities.

PROPOSED RULES

These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

The proposed 100-year flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Blacklick Creek	Downstream corporate limits	832
	Confluence of lateral D	834
	Livingston Ave. (downstream)	848
	Livingston Ave. (upstream)	850
	Main St. (U.S. Route 40), downstream	858

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base flood elevations (100-year flood) listed below for selected locations in the city of Cleveland, Cuyahoga County, Ohio. These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review in Auditorium "B" of the Department of Public Utilities, 201 Lakeside Avenue, Cleveland.

Any person having knowledge, information, or wishing to make a comment on these proposed elevations should immediately notify Mayor Ralph J. Perk, 601 Lakeside Avenue, Cleveland.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base flood elevations (100-year flood) for the City of Cleveland, Cuyahoga County, Ohio, in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.

These elevations together with the flood plain management measures required by § 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its

own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

The proposed 100-year flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Big Creek	Confluence with Cuyahoga River	591
	Upstream of Jennings Rd.	594
	Upstream of private drive	605

PROPOSED RULES

[4210-01]

[24 CFR Part 1917]

[Docket No. FI-3473]

SALLISAW, SEQUOYAH COUNTY, OKLA.

Proposed Flood Elevation Determinations

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base flood elevations (100-year flood) listed below for selected locations in the city of Sallisaw, Sequoyah County, Okla. These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review at City Hall, Sallisaw, Okla. Any person having knowledge, information, or wishing to make a comment on these proposed elevations should immediately notify Mayor George Glenn, 111 North Elm, Sallisaw, Okla. 74955.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street, SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base flood elevations (100-year flood) for the city of Sallisaw, Sequoyah County, Okla., in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.

These elevations together with the flood plain management measures required by § 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional en-

tities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

The proposed 100-year flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Hog Creek	Upstream of Redwood St.	419
Shiloh Creek	Adams St. (extended)	530
Tributary No. 1	Upstream of Interstate 40 West	511
	Upstream of U.S. Highway 64 Bridge	527
	Redwood Avenue Bridge	535
Tributary No. 3	Upstream of Cedar Street Bridge	516
West branch, Tributary No. 3	Upstream of Cedar St.	507
Tributary No. 4	Upstream of U.S. Highway 64 (western crossing)	505
	Upstream of U.S. Highway 64 (eastern crossing)	517
	Approximately 100 ft downstream of Redwood Ave.	520
Tributary No. 5	Approximately 100 ft east of Dogwood Street Bridge	525
Tributary No. 7	Approximately 100 ft downstream of U.S. Highway 59	545

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001-4128; and Secretary's delegation of authority to Federal Insurance Administrator, 34 FR 2680, February 27, 1969, as amended (39 FR 2787, January 24, 1974).)

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations

of base flood elevations (100-year flood) for the city of Villa Grove, Ill., in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968, Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.

These elevations together with the flood plain management measures required by § 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

The proposed 100-year flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Embarras River ..	Sycamore Street Bridge.	652
	Harrison Street Bridge.	652
	C & E.I. RR Bridge.	651
Jordan Slough ..	Intersection of Ash and Maple Sts.	652
West Ditch ..	Harrison St.	651
	Walnut St.	651
	Adams St.	651

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001-4128; and Secretary's delegation of authority to Federal Insurance Administrator, 34 FR 2680, February 27, 1969, as amended (39 FR 2787, January 24, 1974).)

Issued: August 16, 1977.

PATRICIA ROBERTS HARRIS,
Secretary.

[Docket No. FI-3499]

BLOOMINGTON, MONROE COUNTY, IND.

Proposed Flood Elevation Determinations

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base flood elevations (100-year flood) listed below for selected locations in the city of Bloomington, Monroe County, Ind. These base flood elevations are the basis for the flood plain management

measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review at the Bulletin Board, Municipal Building, 22 East 3d Street, Bloomington, Ind.

Any person having knowledge, information, or wishing to make a comment on these proposed elevations should immediately notify Mayor Frances X. McCloskey, Box 100, Municipal Building, Bloomington, Ind.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base flood elevations (100-year flood) for the city of Bloomington, Monroe County, Ind., in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.

These elevations together with the flood plain management measures required by § 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

NOBLE COUNTY, IND.

Proposed Flood Elevation Determinations

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base flood elevations (100-year flood)

listed below for selected locations in Noble County, Ind. These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review at the Bulletin Board in the Hall of the County Courthouse, Albion, Ind.

Any person having knowledge, information, or wishing to make a comment on these proposed elevations should immediately notify Mr. Omar Stangland, President of the Board of Commissioners, County Courthouse, Albion, Ind. 46701.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base flood elevations (100-year flood) for Noble County, Ind., in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.

These elevations together with the flood plain management measures required by § 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, state, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

SHIVELY, JEFFERSON COUNTY, KY.

Proposed Flood Elevation Determinations

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base flood elevations (100-year flood) listed below for selected locations in the City of Shively, Jefferson County, Ky.

These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review in the Entrance Way of City Hall, 3920 Dixie Highway, Shively.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION:

The Federal Insurance Administrator gives notice of the proposed determinations of base flood elevations (100-year flood) for the Town of Panorama Park, Scott County, Iowa in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.

These elevations together with the flood plain management measures required by § 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, state or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

The proposed 100-year flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet above mean sea level	Area flooded
Crow Creek	24 St.	391	South of 24 St. to corporate limit.

SUMMARY: Technical information or comments are solicited on the proposed base flood elevations (100-year flood) listed below for selected locations in the City of Shively, Jefferson County, Ky.

These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

[Docket No. FI-3441]

ORONO, PENOBSCOT COUNTY, MAINE

Proposed Flood Elevation Determinations

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base flood elevations (100-year flood) listed below for selected locations in the Town of Orono, Penobscot County, Maine.

These base flood elevations are the basis for flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review on the Bulletin Board at the Town Hall.

Any person having knowledge, information, or wishing to make a comment on these proposed elevations should im-

mediately notify Mr. Mark Schnur, Town Manager of Orono, P.O. Box 150, Orono, Maine 04473.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base flood elevations (100-year flood) for the Town of Orono, Penobscot County, Maine in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.

These elevations together with the flood plain management measures required by § 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, state or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

The proposed 100-year flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Unnamed stream...	Downstream corporate limits.	115

EDDINGTON, PENOBSCOT COUNTY, MAINE

Proposed Flood Elevation Determinations

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base flood elevations (100-year flood) listed below for selected locations in the Town of Eddington, Penobscot County, Maine.

These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review at the bulletin board in the Town Office, Route 9, Eddington.

Any person having knowledge, information, or wishing to make a comment on these proposed elevations should immediately notify Mr. Earl Brown, Jr., Town Manager of Eddington, R.D. 1, Box 380, East Holden, Maine 04429.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base flood elevations (100-year flood) for the Town of Eddington, Penobscot County, Maine in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.

These elevations together with the flood plain management measures required by § 1910.3 of the program regu-

lations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, state or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

The proposed 100-year flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Penobscot River...	Corporate limits (downstream).....	32
	Veazie Dam.....	34
	Downstream.....	44
	Upstream.....	46
	Veazie-Orono Town line.....	50
	Confluence with Meadow Brook.....	50
	Corporate limits (upstream).....	129
Chemo Pond.....	(1).....	129
Davis Pond.....	(1).....	129

¹ It should be noted that the flood zones along Chemo Pond and Davis Pond are limited to a narrow band extending upward from the lake shore to elevations 128.6 and 128.6, respectively.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 4001-4128); and Secretary's delegation of authority to Federal Insurance Administrator, 34 FR 2680, February 27, 1969, as amended (39 FR 2787, January 24, 1974).)

Issued: August 16, 1977.

MENOMINEE, MICH.

Proposed Flood Elevation Determinations

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base flood elevations (100-year flood) listed below for selected locations in the City of Menominee, Mich. These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety days following the second publica-

tion of this notice in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review at City Hall, 2511 10th Street, Menominee, Mich.

Any person having knowledge, information, or wishing to make a comment on these proposed elevations should immediately notify Mayor Harry F. Johnson, City Hall, 2511 10th Street, Menominee, Mich. 49858.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base flood elevations (100-year flood) for the City of Menominee, Mich., in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.

These elevations together with the flood plain management measures required by § 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, state or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

The proposed 100-year flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Green Bay	47th Ave.	584
	34 St.	584
	Hence Park Rd.	584

ST. CLAIR, MICH.

Proposed Flood Elevation Determinations

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base flood elevations (100-year flood) listed below for selected locations in the city of St. Clair, Mich. These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review at City Hall, 411 Trumbull Street, St. Clair, Mich. Any person having knowledge, information, or wishing to make a comment on these proposed elevations should immediately notify Mayor Raymond Gellein, City Hall, 411 Trumbull Street, St. Clair, Mich. 48079.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base flood elevations (100-year flood) for the city of St. Clair, Mich., in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.

These elevations together with the flood plain management measures required by § 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

The proposed 100-year flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
St. Clair River	Brown St.	581
Pine River	Port Huron-Detroit R.R.	588
	New Fred W. Moore Highway.	595
Jordan Creek	Railroad spur	591
	Standard Oil private drive.	595
	Fred W. Moore Highway.	597
	Adams St.	603
	Vine St.	605
	Brown St.	608

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001-4128; and Secretary's delegation of authority to Federal Insurance Administrator, 34 FR 2680, February 27, 1969, as amended (39 FR 2787, January 24, 1974).)

ACTION: Correction of proposed rule.

SUMMARY: The notice published on July 28, 1977, at 42 FR 38541 in the Federal Register, and in The Sunflower County News on July 14, 1977, and July 21, 1977, showing the name of the chief executive officer for Ruleville,

should be corrected to read: Any person having knowledge, information or wishing to make a comment on these proposed elevations should immediately notify Mayor Carrol Land, Town Hall, 200 Floyce Street, Ruleville, Miss. 38771.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001-4128; and Secretary's delegation of authority to Federal Insurance Administrator, 34 FR 2680, February 27, 1969, as amended by 39 FR 2787, January 24, 1974.)

Issued: August 26, 1977.

PATRICIA ROBERTS HARRIS,
Secretary.

[24 CFR Part 1917]

[Docket No. FI-3448]

ST. CHARLES COUNTY, MO.

Proposed Flood Elevation Determinations

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base flood elevations (100-year flood) listed below for selected locations in St. Charles County, Mo. These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review at the County Administration Building, 118 North Second Street, St. Charles, Mo. Any person having knowledge, information, or wishing to make a comment on these proposed elevations should immediately notify Judge Charles L. Schwendemann, County Administration Building, 118 North Second Street, St. Charles, Mo. 63301.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base flood elevations (100-year flood) for St. Charles County, Mo., in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.

These elevations together with the flood plain management measures required by § 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

The proposed 100-year flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Mississippi River.....	Burlington Northern R.R.	437
Missouri River.....	U.S. Highways 40 and 67.	467
	Burlington Northern R.R.	437
Bellevue Creek.....	Plackmeier Dr.....	532
	U.S. Highway 40.....	470
	Missouri Highway 79 (new).	448
Dardene Creek.....	Hennings Rd.....	490
	State Route N.....	474
	Cottleville Rd.....	465
	State Route C.....	447

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001-4128; and Secretary's delegation of authority to Federal Insurance Administrator, 34 FR 2680, February 27, 1969, as amended (39 FR 2787, January 24, 1974).)

Issued: August 16, 1977.

PATRICIA ROBERTS HARRIS,
Secretary.

ST. LOUIS COUNTY, MO.

Proposed Flood Elevation Determinations

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base flood elevations (100-year flood) listed below for selected locations in St. Louis County, Mo. These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review at County Government Center, 41 South Central Clayton, Mo. Any person having knowledge, information, or wishing to make a comment on these proposed elevations should immediately notify Mr. Gene McNary, County Supervisor, St. Louis County, County Government Center, 41 South Central, Clayton, Mo. 63105.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base flood elevations (100-year flood) for St. Louis County, Mo., in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.

These elevations together with the flood plain management measures required by § 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

The proposed 100-year flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Meramec River.....	Missouri Pacific R.R.	55

PROPOSED RULES

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base flood elevations (100-year flood) listed below for selected locations in the City of Kearney, Clay County, Mo. These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review at City Hall, Kearney, Mo. 64060. Any person having knowledge, information, or wishing to make a comment on these proposed elevations should immediately notify The Honorable Dennis Watson, Mayor, City of Kearney, City Hall, Kearney, Mo. 64060.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or Toll Free Line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base flood elevations (100-year flood) for the City of Kearney, Clay County, Mo., in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.

These elevations together with the flood plain management measures required by § 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, state or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

The proposed 100-year flood elevations for selected location are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Clear Creek	At eastern corporate limits.	759
	200 ft downstream of Grove St.	791
	200 ft upstream of Grove St.	793
	200 ft downstream of Interstate 35.	797
	200 ft upstream of Interstate 35.	800
	At State Highway 31.	803
	At western corporate limits.	804

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001-4128; and Secretary's delegation of authority to Federal Insurance Administrator, 34 FR 2680, February 27, 1969, as amended (39 FR 2787, January 24, 1974).)

Issued: August 16, 1977.

Proposed Flood Elevation Determinations

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base flood elevations (100-year flood) listed below for selected locations in the City of Olivette, St. Louis County, Mo. These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review at City Hall, Olivette, Mo. Any person having knowledge, information, or wishing to make a comment on these proposed elevations should immediately notify Mayor Robert I. Bean, 9473 Olivette Boulevard, Olivette, Mo. 63132.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or Toll Free Line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base flood elevations (100-year flood) for the City of Olivette, St. Louis County, Mo., in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.

These elevations together with the flood plain management measures required by § 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, state or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

The proposed 100-year flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
River Des Peres	Arrowhead Dr. (extended).	538
	Upstream of Diehlman Road Bridge.	587

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001-4128; and Secretary's delegation of authority to Federal Insurance Administrator 34 FR 2680, February 27, 1969, as amended (39 FR 2787, January 24, 1974).)

Proposed Flood Elevation Determinations

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base flood elevations (100-year flood) listed below for selected locations in the City of Olean, Cattaraugus County, N.Y. These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review at the display table, City Clerk's Office, Municipal Building, Olean.

Any person having knowledge, information, or wishing to make a comment on these proposed elevations should immediately notify Mayor William Smith, Olean Municipal Building, Olean, N.Y. 14760.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or Toll Free Line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base flood elevations (100-year flood) for the City of Olean, Cattaraugus County, New York in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.

These elevations together with the flood plain management measures required by § 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

The proposed 100-year flood elevations for selected locations are:

UNIVERSITY CITY, ST. LOUIS COUNTY, MO.

Revision of Proposed Flood Elevation Determinations

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base flood elevations (100-year flood) listed below for selected locations in the City of University City, St. Louis County, Mo. Due to recent engineering analysis, this notice revises the proposed determinations of base flood elevations published in 42 FR 38542 on July 28, 1977, and in the *Clayton Citizen* published on July 20, 1977 and July 27, 1977, and hence supersedes those notices.

DATES: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed flood elevations are available for review at the Planning and Development Department, City Hall, 4th Floor, 6801 Delmar, University City, Mo. 63130.

Any person having knowledge, information, or wishing to make a comment on these determinations should immediately notify the Honorable Nathan B. Kaufman, Mayor, City of University City, City Hall, 6801 Delmar, University City, Mo. 63130.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard W. Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or Toll Free Line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: Proposed flood elevations (100-year flood) are listed below for selected locations in the City of University City, in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917 (§ 1917.4 (a)).

These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

These modified elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

The proposed 100-year Flood Elevations are:

Source of Flooding	Location	Elevation in feet, national geodetic vertical datum
River Des Peres	Downstream face of Pennsylvania Ave.	502
	Downstream face of Vernon Ave.	507
	Downstream face of footbridge.	508
	Downstream face of Purdue Ave.	511
	Downstream face of Midland Blvd.	515
	Downstream face of Shattlesbury Bridge.	520
	Downstream face of Hanley Rd.	521
	Downstream face of North and South Blvd.	524
	Downstream face of Olive Blvd.	534
	At the confluence with Southwest branch.	538
	At the downstream face of 82d Blvd.	540
	At the downstream face of Appellon Dr.	543
	At the downstream face of Kempland Pl.	543

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Northeast branch of River Des Peres.	At the downstream face of Kingsland Ave.	502
	At the downstream face of Julian Ave.	507
	At the downstream face of Raymond Ave.	512
Northwest branch of River Des Peres.	Downstream face of Canton Ave.	534
	At the downstream face of fault bridge at Wayne Ave.	537
	At the downstream face of culvert outlet.	551
Southwest branch of River Des Peres.	At the culvert inlet (50 ft upstream from the culvert inlet).	539
	At the downstream face of Spoon Dr.	540
	At the downstream face of McKnight Rd.	553
Southwest branch of River Des Peres.	At the upstream face of McKnight Rd.	559
	At the downstream face of Spoon Dr.	563
	At the upstream face of Spoon Dr.	573

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001-4128; and Secretary's delegation of authority to Federal Insurance Administrator, 34 FR 2680, February 27, 1969, as amended (39 FR 2787, January 24, 1974).)

Issued: August 26, 1977.

[Docket No. FT-3453]

AUBURN, CAYUGA COUNTY, N.Y.

Proposed Flood Elevation Determinations

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base flood elevations (100-year flood) listed below for selected locations in the City of Auburn, Cayuga County, N.Y. These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review on the Bulletin Board, in the City Hall, 24 South Street, Auburn.

Any person having knowledge, information, or wishing to make a comment on these proposed elevations should immediately notify Mayor Paul Lattimore, City Hall, 24 South Street, Auburn, N.Y. 13021.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base flood elevations (100-year flood) for the City of Auburn, Cayuga County, N.Y., in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.

These elevations together with the flood plain management measures required by § 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, state or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

The proposed 100-year flood elevations for selected locations are:

[24 CFR Part 1917]
[Docket No. FT-3454]

BUFFALO, ERIE COUNTY, N.Y.

Proposed Flood Elevation Determinations

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base flood elevations (100-year flood) listed below for selected locations in the City of Buffalo, Erie County, N.Y. These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review at the lobby of City Hall, 11 Niagara Square, Buffalo, N.Y. 14202.

Any person having knowledge, information, or wishing to make a comment on these proposed elevations should immediately notify the Honorable Stanley Makowski, Mayor of Buffalo, Room 201, City Hall, 11 Niagara Square, Buffalo, N.Y. 14202.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base flood elevations (100-year flood) for the City of Buffalo, Erie County, N.Y., in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Public Law 93-234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968, Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.

These elevations together with the flood plain management measures required by § 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, state or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

The proposed 100-year flood elevations for selected location are:

DUNKIRK, CHAUTAUQUA COUNTY, N.Y.

Proposed Flood Elevation Determinations

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base flood elevations (100-year flood) listed below for selected locations in the City of Dunkirk, Chautauqua County, N.Y. These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review at City Hall on the bulletin board, 342 Central Avenue, Dunkirk, N.Y.

Any person having knowledge, information, or wishing to make a comment on these proposed elevations should immediately notify the Honorable William Smyder, City Hall, 342 Central Avenue, Dunkirk, N.Y.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base flood elevations (100-year flood) for the City of Dunkirk, Chautauqua County, N.Y., in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.

These elevations together with the flood plain management measures required by § 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, state or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

Title 10—Energy

CHAPTER II—FEDERAL ENERGY ADMINISTRATION

PART 430—ENERGY CONSERVATION PROGRAM FOR APPLIANCES

Test Procedures for Water Heaters

AGENCY: Federal Energy Administration.

ACTION: Final rule.

SUMMARY: This rule prescribes final test procedures for water heaters. Appliance test procedures are one element of the appliance energy efficiency program required by the Energy Policy and Conservation Act.

EFFECTIVE DATE: November 8, 1977.
FOR FURTHER INFORMATION CONTACT:

James A. Smith (Office of Conservation), Room 307 Old Post Office Building, 12th and Pennsylvania Avenue NW., Washington, D.C. 20461 (202-566-4635).

Jim Merna (Media Relations), Room 3104 Federal Building, 12th and Pennsylvania Avenue NW., Washington, D.C. 20461 (202-566-9833).

Robert D. R. de Sugny (Office of the General Counsel), Room 5116 Federal Building, 12th and Pennsylvania Avenue NW., Washington, D.C. 20461 (202-566-9750 or 202-566-9380).

SUPPLEMENTARY INFORMATION:

A. BACKGROUND

The Federal Energy Administration (FEA) hereby amends Part 430, Chapter II of Title 10, Code of Federal Regulations, in order to prescribe test procedures for water heaters pursuant to section 323 (42 U.S.C. 6293) of the Energy Policy and Conservation Act (Pub. L. 94-163). Water heater test procedures were proposed by notice issued April 21, 1977 (42 FR 21576, April 27, 1977), and a public hearing on the proposed test procedures was held on June 13, 1977.

By notice issued May 24, 1977 (42 FR 27896, June 1, 1977), FEA established Subparts A and B of Part 430, Chapter II of Title 10, Code of Federal Regulations. Certain definitions and general provisions applicable to the energy conservation program for appliances have been promulgated in Subpart A. Final test procedures for room air conditioners, dishwashers, television sets, clothes dryers, electric refrigerators, freezers, and electric refrigerator-freezers, have been prescribed in Subpart B and the final test procedure for clothes washers has been issued today by separate notice. Several other test procedures have been proposed for inclusion in Subpart B and FEA has also proposed a Subpart C for appliance energy efficiency improvement targets. An outline of the provisions of Part 430 which have so far been established, including provisions in today's notice, is as follows:

RULES AND REGULATIONS

SUBPART A—GENERAL PROVISIONS

Sec. 430.1	Purpose and scope.
430.2	Definitions.
SUBPART E—TEST PROCEDURES	
430.21	Purpose of scope.
430.22	Test procedures for measures of energy consumption.
	(a) Refrigerators and refrigerator-freezers.
	(b) Freezers.
	(c) Dishwashers.
	(d) Clothes dryers.
	(e) Water heaters.
	(f) Room air conditioners.
	(h) Television sets.
	(j) Clothes washers.
430.23	Units to be tested [reserved].
430.24	Representations regarding measures of energy consumption.
	(a) Refrigerators and refrigerator-freezers.
	(b) Freezers.
	(c) Dishwashers.
	(d) Clothes dryers.
	(e) Water heaters.
	(f) Room air conditioners.
	(h) Television sets.
	(j) Clothes washers.

APPENDICES TO SUBPART B

Appendix A1—Uniform Test Method for Measuring the Energy Consumption of Electric Refrigerators and Electric Refrigerator-Freezers.
Appendix B—Uniform Test Method for Measuring the Energy Consumption of Freezers.
Appendix C—Uniform Test Method for Measuring the Energy Consumption of Dishwashers.
Appendix D—Uniform Test Method for Measuring the Energy Consumption of Clothes Dryers.
Appendix E—Uniform Test Method for Measuring the Energy Consumption of Water Heaters.
Appendix F—Uniform Test Method for Measuring the Energy Consumption of Room Air Conditioners.
Appendix H—Uniform Test Method for Measuring the Energy Consumption of Television Sets.
Appendix J—Uniform Test Method for Measuring the Energy Consumption of Clothes Washers.

B. DISCUSSION OF COMMENTS

Comments were received from industry, consumers, and both Federal and State agencies. Those comments which were directly concerned with the labeling program under section 324 of the Act were forwarded to the Federal Trade Commission for consideration in developing labeling rules applicable to water heaters and they are not addressed here.

The following is a discussion of the issues raised by those comments which pertained to the technical aspects of the proposed water heater test procedures. The comments have been analyzed by topic, rather than source, since in many cases the same or similar comments were received from more than one person.

1. THE BURDEN OF TESTING

Both the electric water heater manufacturing industry and the oil water heater manufacturing industry commented that the proposed test procedure was unduly burdensome, however, their objections were based on different grounds.

The basis of the electric water heater industry's objection was that testing costs would be prohibitive due to the extremely large number of basic models they would be considered to manufacture under the test procedure's proposed definition of basic model. That definition categorized units as different basic models not only if they differed in factors such as tank capacity and insulation, but also if they differed in heater element wattage or voltage ratings. As a consequence, one manufacturer commented that he theoretically offered 20,000 basic models. Another manufacturing firm stated that 144 different electrical input configurations are available for each of its electric water heater tank sizes.

FEA finds that the test procedure, as proposed, would prove unduly burdensome for manufacturers of electric water heaters with immersed heating elements in view of the large number of basic models that would have to be tested and the attendant high cost of testing. As a result, FEA has made changes to the proposed test procedure which are designed to reduce the burden of testing for manufacturers of electric water heaters with immersed heating elements. The changes are based on the fact noted at the hearing and in the comments that the electrical characteristics of an electric water heater with immersed heating elements have a minimal effect on efficiency for many purposes of the test procedure. It was therefore feasible to eliminate the distinction between units made on the basis of electrical characteristics. This reduces the number of basic models that most manufacturers would be considered to produce to twenty according to testimony received at the hearing.

As a consequence, several important changes in the test procedure have been made. First, the definition of a water heater basic model was revised to exclude immersed heating elements from consideration. Second, the standby loss test for electric water heaters with immersed heating elements was revised to require the installation of "standardized" heating elements in the water heaters to be tested. Third, the hot water supply rating test and the recovery rate calculation were deleted from the test procedure. Finally, the method for determining the power input for electric water heaters with immersed heating elements was changed. Each of these changes is discussed in detail in other sections of the preamble.

The oil water heater manufacturing industry also commented that the test procedure was burdensome as applied to them and they requested to be exempted from testing. They based their request on the fact that they represent only one percent of water heater sales and the

claim that their costs of testing would be higher than for manufacturers of other types of water heaters. The oil water heater manufacturing industry presented a cost analysis to demonstrate how the costs of testing would result in a much higher per unit cost increase for water heaters produced by a small manufacturer of oil water heaters with small production runs than for a large manufacturer of electric water heaters with large production runs. Thus, it was claimed, the much greater increase in price due to testing costs of oil water heaters over gas and electric water heaters would price the oil water heaters outside of the water heater market and lead to the demise of the oil water heater manufacturing industry.

FEA finds that insufficient evidence has been produced by the oil water heater manufacturing industry to establish grounds for excluding oil water heaters from the water heater test procedure. The cost analysis presented is a comparison of hypothetical cases. No evidence was presented to indicate that these hypothetical cases are representative of industry-wide conditions or that the costs would be any different for a small electric water heater manufacturer. The sampling plan used in the cost analysis was not the sampling plan which appeared in the proposed test procedure and the assumption was made that each manufacturer would test his own units even though independent testing laboratories could be utilized. FEA rejects the recommendation that oil water heaters be excluded from the water heater test procedure at this time but may reconsider its position upon the submission of sufficient evidence that the test procedure is unduly burdensome or significantly more burdensome to oil water heater manufacturers as compared to similar sized manufacturers of other types of water heaters.

2. FLUE REQUIREMENTS

A comment made was that a specification is needed for the attachment of a flue pipe extension to gas or oil water heaters having horizontal vent outlets. FEA concurs. The flue requirement specification in the proposed test procedure inadvertently addressed only water heaters with vertical vent outlets. Section 2.2 of Appendix E has been revised to incorporate a specification for attaching a flue pipe to a water heater with a horizontal vent outlet.

Another comment made was that the test procedure should require that a direct vent water heater be set up as specified in the manufacturer's instructions that accompany the water heater. FEA concurs with this comment with the proviso that the length of vertical flue pipe attached to the water heater must not be greater than the specified five foot length. Section 2.2 of Appendix E has been revised to incorporate this specification.

A third comment suggested the use of a longer flue pipe extension in the test procedure to better represent actual conditions of gas and oil water heater installation in the home. While it would be more representative of field conditions to use a longer length of flue pipe for testing water heaters, e.g., 15 feet instead of the specified 5 feet, the physical limitations of the manufacturer's test laboratories might make such a requirement unduly burdensome. FEA has therefore not adopted this suggestion.

RULES AND REGULATIONS

3. FUEL HEATING VALUE

Many comments were directed toward Section 2.4 of Appendix E, "Energy Supply." Most of these comments concerned the heating values assigned to gas and oil fuels. One such comment was a recommendation that a manufacturer of oil water heaters be permitted to conduct testing either by using fuel oil with a presumably certified heating value of 138,000 Btu per gallon or by determining the actual heating value of the fuel oil used in the test. FEA has assumed that the figure 138,000 cited in the comment above was a typographical error in the comment and was supposed to be 138,500, the heating value of fuel oil in Btu per gallon cited in the proposed test procedure. Another comment was a recommendation that the heating value of natural gas and propane should be designated as approximate net values. A comment was also made that specifying a heating value for natural gas of 1025 Btu per standard cubic foot is unrealistic since the heating value of the natural gas supplied by local utilities varies with geographic location. A manufacturing firm implied that the requirement that the actual heating value of the natural gas used in the test be determined with an error no greater than one percent is unduly burdensome. This firm stated that it does not have the instrumentation available at its water heater manufacturing plants to measure the heating value of the natural gas supplied by the local utilities. It has been this firm's practice to rely on the local utility to furnish on an "as needed" basis the heating value of the natural gas supplied. The firm recommended allowing the use of the gas supplied by the local utility for testing on the condition that is identified by the utility as "natural gas." The firm also stated that its comments concerning the determination of the heating value of natural gas apply to propane gas as well. A comment was made that an ERDA report indicated that the heating value of fuel oil supplied by utilities may be as low as 120,000 Btu per gallon. It was also pointed out that FEA did not state what type of test was to be used for determining the heating value of fuel oil. This can have a dramatic impact on the results it was claimed. Finally, a comment recommended that the requirement that natural gas with a heating value of 1025 Btu per standard cubic foot be used in the test be deleted, the reason being that the manufacturers performing the tests would have no control over the gas supplied by the utilities.

The concerns expressed in the comments above fall into two categories: (1) the proposed test procedures speci-

cation of exact heating values for gas and oil fuels, and (2) the burden of having to determine the heating value of the fuel used in testing with an error of no greater than one percent.

In the proposed test procedure heating values for gas and oil fuels were inadvertently specified as exact values. The actual heating value of the fuel used in testing need only approximate the value specified for that fuel in the proposed test procedure. Therefore, section 2.4 of Appendix E has been revised to specify approximate heating values for gas and oil fuels.

FEA rejects the recommendations that a standard heating value be assumed for each fuel or that local utilities be relied upon to provide the heating value of the fuel they supply. Fluctuations in the heating value of fuels supplied by utilities do occur as studies have shown. FEA does not have sufficient information on the capability of local utilities to provide accurate and meaningful heating value information on the fuel or fuels they supply to warrant acceptance of this means of determining fuel heating value. On the other hand, FEA accepts the recommendation made at the public hearing that water heater manufacturers be permitted the option of purchasing "bottled" fuel which has had its actual higher heating value determined with an error of no greater than one percent as certified by the supplier. Thus, a manufacturer would have the choice of either purchasing a calorimeter, if one is not already available, to determine the actual heating value of the fuel or fuels supplied by the local utility or purchasing the necessary quantity of "bottled" fuel of a certified heating value. Section 2.4 of Appendix E has been revised to allow for the use of "bottled" gas or a tested oil of a certified heating value in the test procedure.

4. WATER TEMPERATURE RISE AND THERMOSTAT SETTING

Several comments were made which questioned the specification of 90° F. in the test procedure for the temperature rise through which a water heater under test must heat the inlet water. One comment recommended that values of temperature rise be selected on the basis of geographical regions to better reflect actual conditions where water heaters are marketed. In other words, the water heater test procedure should be regionalized to account for different water inlet temperatures which result in different temperature rises in various parts of the country. FEA rejects this recommendation on the basis that it would require water heater manufacturers to conduct many more tests than currently required and it would therefore be unduly burdensome.

Comments were made that the 90° F. temperature rise figure was too high and should be lowered to reflect conditions of operation advocated by FEA, i.e., that consumers should lower the thermostat settings on their water heaters to reduce energy consumption. FEA rejects this recommendation. Water heater thermo-

stats are normally factory-set for gas heaters at 140° F. and at 150° F. for electric water heaters. The fact that these settings may be adjusted both up or down by the installer or the homeowner is irrelevant to the determination of the cost of operation unless field surveys indicate that water heaters in representative use are normally adjusted to a different thermostat setting than at the time of purchase. No such field survey data was presented at the public hearing. Therefore, the test procedure uses the average value of the two common factory settings of water heater thermostats, 145° F., as the best approximation of the typical field water heater thermostat setting. Since, as stated in the proposed test procedure, NBS has determined that the national average inlet water temperature is 55° F., the difference between these two temperatures, 90° F., is used as the water temperature rise in the test procedure.

Further comments questioned FEA's selection of the inlet water temperature and the water heater thermostat setting for the purposes of the test procedure. It is true that these values, 70° F. and 160° F., respectively, do not represent field conditions as described by FEA. However, for some testing facilities, climatic conditions and/or other factors may be such that for all or part of the year tap water temperatures will exceed 55° F. Therefore, if a 55° F. inlet water temperature were to be specified in the test procedure, these facilities would have to purchase additional equipment to cool the available tap water prior to conducting a test. FEA believes that appropriate and comparable results can be obtained and the test procedure can be made less burdensome if water heaters are tested with an inlet water temperature of 70° F. This inlet water temperature can normally be achieved in laboratories throughout the country at any time of year without the need for cooling of the tap water. When the inlet water temperature of 70° F. is coupled with the requirement of a 90° F. water temperature rise, it results in a thermostat setting of 160° F. FEA finds that specifying an inlet water temperature of 70° F. and a water heater thermostat setting of 160° F. makes for a less burdensome test procedure which justifies their use.

5. OIL WATER HEATER DEFINITION

Comments were made that the definition of an oil water heater in the proposed test procedure included oil water heaters predominantly used in commercial and industrial facilities. To exclude commercial and industrial type units and thereby make the types of oil water heaters covered by the test procedures comparable to the types of gas and electric water heaters covered, it was recommended that the value of the maximum energy input rate, 172,500 Btu per hour in the proposed test procedure, be reduced to 103,875 Btu per hour which equates to an oil consumption rate of 0.75 gallons per hour. It was further recommended that the value of the maximum energy input rate, 172,500 Btu per

the proposed definition of an oil water heater be reduced from 50 gallons to 40 gallons for the same reason.

FEA finds that the proposed definition of an oil water heater does cover units which are not normally purchased by individuals for household use. FEA has revised the proposed definition of an oil water heater to specify a maximum energy input rating of 103,875 Btu per hour (which equates to an oil consumption rate of 0.75 gallons per hour) but has not revised the specified maximum tank capacity value, 50 gallons. With the reduction of the maximum specified energy input rate, FEA finds that oil water heaters with 50 gallons tank capacities are purchased by individuals for household use and therefore will be covered by the test procedure.

6. HOT WATER USE RATE

Many comments questioned the daily hot water usage rate of 64.3 gallons per day specified in the test procedure to compute annual costs of operation. Most of these comments stated that this rate is too high to represent national average conditions. The reason for the apparent discrepancy between the hot water usage rate specified by FEA and the studies cited in the comments is that FEA's usage rate is based upon representative conditions of use of the types of water heaters covered by the proposed test procedure. The comments cited national average use rates based on household surveys which includes water usage data from households not serviced by the type of water heaters covered by the proposed test procedures such as apartment dwellings serviced by large commercial water heaters. Including these types of households also lowers the number of persons per household from four, which is used by FEA to determine the daily hot water usage rate, to three, further contributing to a lower usage rate than that used by FEA.

The hot water usage rate of 64.3 gallons per day was arrived at from a survey of 50 gas and 50 electric utility companies for hot water and energy usage data for water heaters. Eighteen of these companies supplied metered data. Data obtained were normalized to a family of four and to a 90° F. temperature rise. The family size of four was taken from Census Bureau data as the average family size. The types of water heaters covered by the proposed test procedure are usually found in the service of single families. The use of a 90° F. temperature rise is explained in the previous section, Water Temperature Rise and Thermostat Setting. When the hot water usage rate of 64.3 gallons per day and the temperature rise of 90° F. are inserted into the water heater test procedure equations along with typical water heater performance parameters of recovery efficiency and standby loss as determined by laboratory tests, the result correlates well with typical home energy usage as determined by the field survey.

Therefore no changes to the proposed test procedure are considered necessary with respect to the national average

value of hot water usage rate as used in the calculation of average daily energy consumption.

7. WATER HEATERS NOT COVERED BY THE TEST PROCEDURES

Comments were made that the proposed test procedures do not address solar water heaters, water heater/boiler combinations, or recirculating water heaters. Although the Energy Policy and Conservation Act empowers the Administrator to include other energy sources, at this time only those appliances powered by electricity or fossil fuels are subject to testing. Therefore solar water heater manufacturers are not subject to the Act, however, they may use the present test procedure to provide the consumer with information concerning solar water heater performance if they so choose.

Boiler/water heater combinations are not considered in this test procedure because it is more appropriate to consider such combinations as systems rather than to attempt to consider the water heater and boiler components separately. Since the water heater portion of a boiler/water heater combination is a secondary system of the boiler, FEA finds that it is more appropriate to include boiler/water heater combinations with furnaces. Therefore the boiler/water heater type of appliance will be considered in, and subject to, the test procedure which is currently under development for furnaces.

The recirculating water heater is generally used in large apartment buildings or for other commercial applications such as office buildings where long runs of piping from the water heater to the point of use would result in a long delay period before hot water becomes available at the fixture if a recirculating system were not used. Very few of these systems are sold to the typical consumer and many are custom designed and custom built. Therefore, the inclusion of recirculating systems in the test procedure is not recommended at this time.

8. TEMPERATURE DIFFERENCE BETWEEN STORED WATER AND ROOM TEMPERATURE AS USED IN THE CALCULATIONS

A comment stated that the mean temperature difference between the stored water and room temperature is more likely in the range of 70-80° F. since most water heaters are located indoors. The proposed test procedure specifies that a temperature difference of 90° F. is to be used as the temperature difference between the stored water and the room temperature. Unlike all of the other values specified in this test procedure, this value for temperature difference is a derived value rather than a value determined by empirical data. FEA has no data on typical ambient temperatures where water heaters are installed, however, the assumed value of 90° F., when coupled with a hot water usage rate of 64.3 gallons per day heated through a 90° F. temperature rise, will yield values of calculated energy consumption that agree with actual energy consumption

data for water heaters. A change in this value would necessitate a change in one of the other parameters such as hot water usage rate, water temperature rise, etc., in order to maintain agreement between the energy consumption calculated by use of the test procedure and actual energy consumed in representative use. Therefore, no change to the specified temperature difference between stored water and room temperature is recommended.

9. MEASUREMENT AND CALCULATION OF STANDBY LOSS

Concerning the standby loss test, FEA concurs with the comments that standby loss for electric water heaters with immersed heating elements is virtually independent of energy input ratings. Standby loss is a measure of the hot water storage performance of a water heater. This measure is primarily a function of the type and configuration of the tank insulation since most of the heat loss during standby is through the water heater jacket to the air surrounding the water heater. This is particularly true for electric water heaters which do not have flue losses and therefore their only other heat loss is through the inlet and outlet pipes when no heat traps are present. Because of this and because virtually all input energy to the heating elements goes towards heating water by the very nature of their design of having the heating elements in direct contact with the water in the water heater tank, standby loss will be the same for all electric water heaters with immersed heating elements of a given basic model. Therefore, FEA has adopted the recommendation that standby loss tests for electric water heaters with immersed heating elements be performed with the water heaters to be tested equipped with "standardized" heating elements. The procedure for determining standby loss for electric water heaters with immersed heating elements is presented in section 3.4.2 of Appendix E.

A suggestion was made that determining standby loss in terms of the fraction of the heat content of the stored water lost per hour instead of in units of energy lost per hour hides the actual value of standby loss. FEA finds that the determination of standby loss in terms of units of energy lost per hour can be accomplished by additional calculations which utilize the results obtained by the present test procedure. The determination of standby loss in terms of the fraction of the heat content of the stored water above room temperature lost per hour, however, allows the test for standby loss to be run without maintaining an exact 90° F. temperature difference between the stored water and the ambient laboratory room temperature since the test procedure compensates for ambient temperature and will yield the same value of standby loss as long as the ambient room temperature is within the range specified, 65° F. to 85° F. In order to directly determine standby loss in absolute terms of Btu per hour, the test would need to be run under condi-

tions of a constant room temperature of 70° F. with stored water at 160° F. in order to obtain an exact 90° F. temperature difference. Alternatively, the stored water temperature would have to be adjusted depending on the laboratory room temperature at the time of tests.

Thus, the determination of standby loss in terms of the fraction of the heat content of the stored water lost per hour makes for a less burdensome test procedure than the one which would have to be developed if the suggestion that standby loss be determined in terms of units of energy lost per hour were to be adopted. In addition, it allows FTC to label the standby loss in the manner suggested if the FTC deems it appropriate. Therefore, the suggestion has not been adopted.

A comment was made that a calculation be included in the test procedure to determine a cost of operation for a water heater on standby in terms of dollars per month. FEA finds such a cost can be determined from the test results of the current test procedure. Therefore, FTC can adopt this proposal to determine a cost of operation of a water heater on standby as part of their water heater labeling program, if they so choose.

Another comment suggested that a single test be conducted to determine both standby loss and recovery efficiency. The test recommended consists of a 12-hour standby period followed by a draw period repeated enough times to provide acceptable accuracy. It was stated that the standby test proposed may not credit the savings to be expected from an electric ignition system and that recovery during dynamic conditions such as a water draw schedule may be different than recovery from 70° F. to 165° F., as proposed in the static test. Although no testing with intermittent ignition has been conducted by NBS to date, preliminary testing with a reduced pilot input rate has shown energy savings for a 72-hour standby test. The question of accurately predicting an energy savings for electric ignition alone seems to be a moot point since that design option is not considered economically practical unless it is accompanied by the use of a flue damper. In any event, NBS considers the test procedure as proposed to be sufficient to detect energy savings for intermittent ignition systems. FEA concurs with the NBS position. Therefore, this suggestion has not been adopted.

10. MEASUREMENT AND CALCULATION OF RECOVERY EFFICIENCY

A comment noted that a recovery efficiency of 100 percent is assumed for electric water heaters with immersed heating elements in the calculation of standby loss yet a value for the recovery efficiency of an electric water heater with immersed heating elements is calculated in a previous section. This apparent inconsistency results from the different methods used to calculate recovery efficiency and standby loss between the electric and gas or oil fueled heaters.

The recovery efficiency of an electric water heater with immersed heating ele-

ments is very near to 100 percent since, as explained in the section on standby loss, an immersed heating element delivers practically 100 percent of the energy input at the point of use to the water. To make a direct measurement of the recovery efficiency of such a water heater would be very difficult. The procedure would require that the temperature of the water in the water heater tank be determined very accurately. The six thermocouple array that is required to be installed in the tank according to section 2.5 for the purpose of measuring water temperature is not sufficient for the purpose of such a test. In fact, attempts made to measure the recovery efficiency of an electric water heater with this thermocouple array could result in values of recovery efficiency greater than 100 percent due to the error introduced by variations in water temperature which exist in the spherical portion at the bottom of the tank. An analysis would have to be made of the geometry of the tank and additional thermocouples would have to be used in order to achieve the accuracy requisite to directly measure recovery efficiency. The requirements of making such a direct measurement would result in a test procedure which would be unduly burdensome for a manufacturer to conduct.

Instead of requiring that the recovery efficiency of an electric water heater with immersed heating elements be determined directly, the test procedure provides for calculating the recovery efficiency as one minus the standby losses during recovery since standby loss is the only energy loss for such water heaters. This indirect method for determining recovery efficiency is more accurate than any direct method of determination which would not be unduly burdensome.

The standby loss measurement procedure is the same for each type of heater. However, the calculation differs in that an assignment of 0.98 for the recovery efficiency, E_r , is made for the electric water heater with immersed heating elements. Since one does not know the exact recovery efficiency for electric water heaters until the standby loss is measured and the standby loss contains a correction based on recovery efficiency, there exists two equations with three unknowns. It therefore becomes necessary to assign a recovery efficiency in the standby loss equation. In the proposed test procedure, an assignment of 1.00 was made. The actual value of the recovery efficiency is more likely in the range of 0.97 to 0.99. Therefore, in order to reduce the error introduced into the standby loss equation for electric water heaters with immersed heating elements, FEA has changed the assigned value for recovery efficiency from 1.00 to 0.98.

One comment proposed that the water heater tank should be preheated for the purposes of performing the recovery efficiency test since oil fueled heaters are affected more by a cold start test than either gas or electric heaters. Elimination of the tank preheating test reduced the test time and the cost of testing. NBS testing has revealed that the cold start

procedure gives test results 2 percent to 3 percent lower than if the tank were preheated for oil fueled water heaters. The preheated tank procedure would credit the recovery test with heat retained in the tank from the preheating of the tank. This does not represent actual field conditions since heat input is not obtained free in actual use. However, the cold start test as proposed also does not represent actual use in the field. In the interest of reducing the time and the costs required to include a tank preheating test in the test procedure, the use of a tank preheating test has not been adopted.

A comment stated that the static tests, without drawing water for measuring recovery efficiency, are not sufficiently accurate for determining the recovery efficiency of gas or oil fueled water heaters. Tests at NBS using a typical withdrawal schedule have shown a good correlation between the static test measurements and calculations compared to actual metered energy consumption for a 16-hour withdrawal schedule. Therefore, no change to the static test procedure has been made.

A comment was made that a calculation be included in the test procedure to determine a cost of operation for a water heater during the recovery stage in terms of dollars per 1000 gallons of hot water delivered per month. Such a cost can be determined from the test results of the current test procedure. Therefore, FTC can adopt this proposal to determine a cost of operation of a water heater on recovery as part of their water heater labeling program, if they so choose.

11. POWER INPUT DETERMINATION

As a result of the change made to the definition of a basic model of a water heater, a method for determining the power input for an electric water heater with immersed heating elements had to be developed. Section 3.2.2 of Appendix E of this subpart presents the method for making this determination. The method does not require that power input measurements be made. The manufacturer's assigned design energy ratings for the immersed heating elements that are installed in a water heater are used to calculate the power input term. Although this means of determining the power input for an electric water heater with immersed heating elements is an approximation of the actual value, the error that may be present will have little bearing on the two measures, recovery efficiency and average daily energy consumption, that use the power input term in their equations, by the nature of the equations themselves. The values determined from these equations are sufficiently insensitive to error in the power input term to justify using an approximation for power input and not requiring that it be directly measured.

12. HOT WATER SUPPLY RATING AND RECOVERY RATE

The hot water supply rating test and the recovery rate determination that

were part of the proposed test procedure have been deleted from the test procedure on the basis that, in their present form, they would make the test procedure unduly burdensome for manufacturers of electric water heaters with immersed heater elements to conduct. Unlike standby loss, hot water supply rating and recovery rate determinations are very dependent on the actual wattage and location of the immersed heating elements installed in the water heater, the number of such elements installed, and the configuration of the auxiliary electrical system of the water heater which controls the operation of the heating elements. Testing for hot water supply rating and recovery rate would have to be done for all possible combinations of these factors which goes back to the problems associated with the proposed definition of a basic model of a water heater.

Comments were made that the hot water supply rating of an electric water heater with immersed heating elements could be predicted for all basic models of electric water heaters in much the same way that standby loss could be predicted. No hot water supply rating prediction scheme was presented. Neither was any data submitted from which a hot water supply rating prediction scheme might be developed. Without a hot water supply rating prediction scheme and without test data to verify that a particular prediction scheme is sufficiently accurate, FEA cannot consider making such a modification to the hot water supply rating test at the present time.

In the case of recovery rate, the power input to the water heater must be determined. The current procedure for determining power input for electric water heaters with immersed heating elements is to accept the design value assigned by the manufacturer. Unlike recovery efficiency and average daily energy consumption, recovery rate is sensitive to error in the power input term and the approximations of power input determined in section 3.2.2 would introduce a potentially significant error into the determination of recovery rate which would be unacceptable.

FEA finds that in the absence of a hot water supply rating prediction scheme and a recovery rate prediction scheme, the hot water supply rating test and the recovery rate determination must be deleted from the water heater test procedure at the present time. FEA recognizes that this deletion will eliminate an important measure of water heater performance from the test procedure. FEA also recognizes that without a hot water supply rating, or some other measure of hot water delivery performance, the test procedure leaves a consumer with less than the best information to select a water heater which will satisfy his needs. Therefore, FEA plans to investigate prediction schemes for the determination of hot water supply rating or for the determination of some other measure of hot water delivery performance for water heaters. The goal of this investigation will be to provide consumers with a use-

ful measure of hot water delivery performance for water heaters while not imposing unduly burdensome test requirements on any segment of the water heater industry.

FEA hereby invites the water heater industry and any other interested parties to provide input to FEA concerning this proposed investigation. This investigation will be completed by December 1, 1977. In its present form, nothing in this final test procedure prohibits a manufacturer from making representations concerning the hot water supply rating of any of his water heater products.

13. SYMBOLS USED IN THE TEST PROCEDURE EQUATIONS

Comments were made that the symbols used in the equations of the proposed test procedure exhibited inconsistencies which made interpretation of the equations difficult. Further comments recommended that the symbols used be revised in accordance with standard practices. FEA concurs. The equations of section 4 of Appendix E of this subpart reflect the recommended changes.

14. TESTING CONDITIONS

Comments on section 2.5 of the proposed test procedure pointed out that the requirement that thermocouples be installed along the centerline of the water heater tank may lead to confusion since for many gas and oil water heaters the flue is located at the centerline of the tank. Section 2.5 has been revised to eliminate this potential source of confusion.

In response to a comment concerning the hook-up of the water heater inlet and outlet pipe connections to water supply and delivery pipes, the test procedure has been revised to require a heat trap type of configuration for water heaters with vertical inlet and/or outlet pipe connections.

15. CALCULATIONS OF THE ENERGY FACTOR

The proposed test procedure did not clearly state the appropriate section of Appendix E to be used in the calculation of the energy factor in section 430.22(e). This resulted in misinterpretation of the use of the average daily energy consumption. Section 430.22(e) has been corrected to properly reference the appropriate section of Appendix E.

16. INDIRECT ENERGY CONSUMPTION

A comment was made that the test procedure should account for the increased operating time and energy consumption of a furnace or air conditioner which is caused by gas and oil water heaters. The increased energy consumption arises from the fact that most gas and oil water heaters utilize interior air for combustion and draft maintenance which is then vented out of the house and replaced by the infiltration of exterior air which must then be heated by the furnace or cooled by the air conditioner depending on the season. The loss of interior conditioned air continues even when the water heater is not in the combustion state due to the natural draft of the flue unless the water heater is

equipped with a flue damper which is usually not the case.

FEA is sensitive to such hidden costs of operation and will incorporate them whenever they are of sufficient magnitude to warrant the burden of additional testing designed to measure and quantify such costs.

Secondary costs have been included in the final test procedures for dishwashers and clothes washers, and in the proposed test procedures for dehumidifiers and furnaces, however, FEA has decided not to incorporate these costs in the water heater test procedure at this time. FEA bases its decision on data forwarded by NBS which indicates that the secondary costs represent only 2 percent of the cost of operation of a water heater and that the testing burden to account for such costs would be large. Furthermore, NBS has reported to FEA that the potential dollar savings achieved by the use of a direct vent system, which utilizes exterior air rather than interior air and thereby avoids imposing additional costs on furnaces or air conditioners, is not sufficient to pay for the cost of such devices. Only when direct vent systems are combined with preheating devices do they become economically viable and the test procedure, as currently written, will measure most of the increased efficiency of water heaters so equipped. Therefore there is little justification for modifying the test procedures at this time.

Anyone with information indicating that direct vent systems alone are currently economically justified for water heaters or that the cost associated with the loss of interior conditioned air is greater than 2 percent of the cost of operation of a gas or oil water heater is hereby requested by FEA to submit such information. Should the assumptions on which FEA has based its decision be shown to be incorrect, FEA will consider modifying the water heater test procedure to incorporate the secondary costs of operation.

17. PRIMARY ENERGY LABELING

While a comment suggested primary energy labeling, i.e., taking into consideration the energy consumed by a power plant to produce the amount of electrical energy consumed by an appliance, the Energy Policy and Conservation Act specifically requires that the estimated annual operation cost of an appliance be calculated in terms of the retail cost of energy likely to be consumed in representative use. Therefore, this suggestion has not been adopted.

18. NUMBER OF UNITS TO BE TESTED

Some comments expressed objections to the sampling provision for water heaters. Proposed section 430.23(e) provided for sampling of each basic model to be tested when testing of water heaters is required by the Act or by program regulations of agencies responsible for administering the Act. This provision was intended both to provide an acceptable level of assurance that the test results are applicable to all units of a basic model for which testing is required and

to minimize the testing burden on manufacturers.

Test procedures prescribed under section 323 of the Act are intended ultimately to be used, for example, for labeling under section 324, for monitoring the progress of manufacturers toward accomplishing the energy efficiency improvement targets under section 325, and for enforcement testing under section 326. These aspects of the appliance program have not, however, been implemented. It is quite possible that the objectives of appliance testing under each of these parts of the program, as well as the instructions as to how a test procedure should be applied, e.g., sampling of production units, may differ. FEA, NBS, and FTC are continuing to evaluate the appropriate method or methods for sampling the units to be tested in order to comply with the statute and satisfy all of the different elements of the appliance program.

While the various parts of the appliance program identified above are not in effect at this time, section 323(c) of the Act provides:

Effective 90 days after a test procedure rule applicable to a covered product is prescribed under this section, no manufacturer, distributor, retailer or private labeler may make any representation—

- (1) In writing (including a representation on a label), or
- (2) In any broadcast advertisement,

respecting the energy consumption of such product or cost of energy consumed by such product, unless such product has been tested in accordance with such test procedure and such representation fairly discloses the results of such testing.

In order to eliminate the problem discussed above associated with a general sampling provision, § 430.23 has been reserved in the final test procedure, and sampling requirements which apply only for purposes of advertising have been reorganized into § 430.24(e) of the final test procedures. Section 430.24(e) is similar to proposed § 430.23(e), but contains several revisions. Most notably, the units tested may now be either representative of production units, or actual production units. This change is intended to reduce the burden which might be caused by requiring post-production rating of basic models in every instance of testing pursuant to section 323(c) of the Act.

In addition, certain technical changes have been made in sampling language. Specifically, there is to be 90 percent confidence that the true mean of any measure of the basic model lies within ± 10 percent of the mean of such measure of the sample. Comments pertaining to several proposed test procedures criticized the language of the proposed sampling provision. These comments suggested that a sampling provision should refer to the estimate of the mean rather than to the true mean. FEA has considered this suggestion and has determined that the language prescribed today is more technically correct because the statistical measure "estimate of the mean" and "mean of the sample" are generally considered to be identical. The final test procedures for room air conditioners

and dishwashers used both these terms in a manner that could be confusing, and the language prescribed today is intended to eliminate this possibility.

Until a labeling rule has been implemented pursuant to section 324, manufacturers are not required to test unless they choose to make representations regarding a measure of energy consumption. It should be emphasized that the test procedures prescribed today apply only to the initial rating of a basic model.

19. MISCELLANEOUS

After careful consideration of all of the comments and further consultation with NBS and FTC, FEA has incorporated some minor changes in the proposed test procedures in the final rule that are not discussed above.

C. REGULATIONS PRESCRIBED

1. TEST PROCEDURES

The test procedures for water heaters prescribed today are included in Subpart B and are substantially the same as those proposed with the exception of the elimination of the hot water supply rating test and the recovery rate determination. As with the proposed procedures, test methods and conditions incorporate the approach contained in American National Standards Institute standard Z21.10.1-1971 and C72.1-1972. The test procedure also uses the definition of the term "oil" contained in the American Society for Testing and Materials (ASTM) D396-71. Subsequent amendments of either the standard or the supplement made by the standard setting organization will have no effect on the test procedure which can only be amended by FEA.

Under the requirements of section 32(c) of the Federal Energy Administration Act of 1974 (15 U.S.C. 761 et seq.) as amended by section 9 of the Federal Energy Administration Authorization Act of 1977 (Pub. L. 95-70), the Administrator is to consult with the Attorney General and the Chairman of the Federal Trade Commission concerning the impact on competition of any rules prescribed by FEA which utilize or incorporate any commercial standards.

The Administrator has transmitted copies of the final test procedures for water heaters, which incorporate the above mentioned commercial standards, to the Attorney General and the Chairman of the Federal Trade Commission for their comments concerning the impact of such standards on competition in accordance with section 32(c). Neither individual has any comments nor do they recommend against the incorporation or use of these commercial standards in the final test procedures for water heaters.

2. GENERAL PROVISIONS

Prescribed today are certain definitions applicable to water heaters which were previously proposed in Subpart A (41 FR 19977, May 14, 1976; 42 FR 15423, March 22, 1977). Comments were received regarding these definitions and the issues and changes have been discussed earlier in this notice. All definitions appearing in section 321 of the Act were incorporated by reference into Sub-

part A of Part 430 in the final test procedures for room air conditioners issued May 24, 1977 (42 FR 27896, June 1, 1977). Definitions of the terms "Administrator", "Btu" and "FEA" were also incorporated into Subpart A by the final room air conditioner test procedures. The definition of the term "basic model" for water heaters has been changed, as discussed above. Definitions of the terms "cutout" and "design power rating" have been added.

It should be noted that some of the definitions prescribed today may be applicable to test procedures for other appliances. While these definitions are final, comments to the effect that any of these definitions are inapplicable to a particular appliance will be evaluated to determine whether amendment or modification is appropriate.

3. APPLICATION OF TEST PROCEDURES

As discussed previously, the final water heater test procedures prescribed today must be applied before representations regarding a measure of energy consumption can be made. Because the purposes and needs of the different elements of the appliance program, such as labeling or targets, vary, application of the standard test methodology prescribed today may differ in some respects for each program element. Instructions on how to apply the standard test methodology will be proposed for comment as these other elements of the appliance program are developed.

The requirements of § 430.24(e) of the final regulations apply until such time as final labeling requirements for a particular measure of energy consumption and the associated test procedure application provision are prescribed. After that time, all representations regarding a measure of energy consumption covered by a labeling rule must be the same as represented on the label.

D. UNIT COSTS OF ENERGY

Under section 323(b)(2) of the Act, FEA is to provide manufacturers information as to the representative average unit costs of energy. This information was provided by notice issued July 11, 1977 (42 FR 36549, July 15, 1977).

E. PREEMPTION

Today's rulemaking prescribing final test procedures for water heaters supersedes any State regulation to the extent required by section 327 of the Act. Pursuant to section 327, all State regulations which provide for the disclosure of information with respect to any measure of energy consumption of water heaters or which provide for any energy efficiency standard or similar requirement with respect to energy efficiency or energy use of water heaters must now employ test procedures identical to those specified in today's final rule.

In consideration of the foregoing, Chapter II of Title 10, Code of Federal Regulations is amended as set forth below, effective November 8, 1977.

(Energy Policy and Conservation Act, Pub. L. 94-163, as amended by Pub. L. 94-385; Federal Energy Administration Act of 1974, Pub. L. 93-275, as amended by Pub. L. 94-385; E.O. 11790, 39 FR 23185.)

Issued in Washington, D.C., September 27, 1977.

Eric J. Fygi,
Acting General Counsel,
Federal Energy Administration.

1. Section 430.2 is amended by adding paragraph (5) as part of the definition of "basic model" and by adding in appropriate alphabetical order the definition of "immersed heating element" and "water heater" to read as follows:

§ 430.2 Definitions.

"Basic model" means all units of a given type of covered product, or class thereof, manufactured by one manufacturer and:

(5) with respect to water heaters, which have the same primary energy source and which, with the exception of immersed heating elements, do not have any differing electrical, physical, or functional characteristics that affect energy consumption.

"Immersed heating element" means an electrically powered heating device which is designed to operate while totally immersed in water in such a manner that the heat generated by the device is imparted directly to the water.

"Water heater" means an automatically controlled thermally insulated vessel designed for heating water and storing heated water, which utilizes either oil, gas, or electricity as the fuel or energy source for heating the water, which is designed to produce hot water at a temperature of less than 180°F., and which includes the following products:

(a) "Electric water heater" means a water heater which utilizes electricity as the energy source for heating the water, which has a manufacturer's specified energy input rating of 12 kilowatts or less at a voltage no greater than 250 volts, and which has a manufacturer's specified storage capacity of not less than 20 gallons nor more than 120 gallons.

(b) "Gas water heater" means a water heater which utilizes gas as the energy source for heating the water, which has a manufacturer's specified energy input rating of 75,000 Btu per hour or less, and which has a manufacturer's specified storage capacity of not less than 20 gallons nor more than 100 gallons.

(c) "Oil water heater" means a water heater which utilizes oil as the energy source for heating the water, which has a manufacturer's specified energy input rating of 103,875 Btu per hour or less, and which has a manufacturer's specified storage capacity of 50 gallons or less.

2. Section 430.22 is amended by adding a paragraph (e), to read as follows:

§ 430.22 Test procedures for measures of energy consumption.

(e) *Water Heaters.* (1) The estimated annual operating cost for water heaters shall be—

(i) For a gas or oil water heater, the product of the representative average use cycle of 365 days per year times the sum of (A) The product of the average daily auxiliary electrical energy consumption in kilowatt-hours per day, determined according to section 4.5.1 of Appendix E of this subpart, times the representative average unit cost of electricity in dollars per kilowatt-hour as provided by the Administrator plus (B) The product of the average daily gas or oil energy consumption in Btu per day, determined according to section 4.5.2 of Appendix E of this subpart, times the representative average unit cost of gas or oil, as appropriate, in dollars per Btu as provided by the Administrator, the resulting product then being rounded off to the nearest dollar per year.

(ii) For an electric water heater, the product of the following three factors: (A) The representative average use cycle of 365 days per year, (B) The average daily energy consumption in kilowatt-hours per day, determined according to section 4.5.4 of Appendix E of this subpart, and (C) The representative average unit cost of electricity in dollars per kilowatt-hour as provided by the Administrator, the resulting product then being rounded off to the nearest dollar per year.

(2) The energy factor for water heaters shall be—

(i) For a gas or oil water heater, the quotient of the daily water heating energy consumption determined according to section 4.3 of Appendix E of this subpart divided by the product of the average daily energy consumption as determined according to section 4.5.4 of Appendix E of this subpart times 3.412 Btu per kilowatt-hours, the resulting quotient then being rounded off to the nearest 0.01.

(ii) For an electric water heater, the quotient of the daily water heating energy consumption determined according to section 4.3 of Appendix E of this subpart divided by the product of the average daily energy consumption as determined according to section 4.5.4 of Appendix E of this subpart times 3.412 Btu per kilowatt-hours, the resulting quotient then being rounded off to the nearest 0.01.

(3) Other useful measures of energy consumption for water heaters shall be those measures of energy consumption for water heaters which the Administrator determines are likely to assist consumers in making purchasing decisions and which are derived from the application of Appendix E of this subpart.

3. Section 430.24 is amended by adding a paragraph (e), to read as follows:

§ 430.24 Representations regarding measures of energy consumption.

(e) *Water heaters.* (1) Except as provided in paragraph (e)(3) of this section, no manufacturer, distributor, retailer, or private labeler of water heaters may make any representation with respect to or based upon a measure or measures of energy consumption described in § 430.22(e) unless a sample of sufficient size of each basic model for which such representation is made has been tested in accordance with applicable provisions of this subpart such that, for each such measure of energy consumption, there is at least 90 percent confidence that the true mean of such measures of the basic model is within ± 10 percent of the mean of such measures of the sample.

(2) The sample selection for paragraph (e)(1) of this section shall be comprised of units which are production units, or which are representative of production units, of the basic model being tested.

(3) Whenever a rule applicable to water heaters has been prescribed under section 324 of the Act, this paragraph shall not apply to any label covered by such rule, and all representations of any measure of energy consumption covered by such rule shall be identical to the measure of energy consumption on the label.

4. Subpart B of Part 430 is amended to add an Appendix E, to read as follows:

APPENDIX E—UNIFORM TEST METHOD FOR MEASURING THE ENERGY CONSUMPTION OF WATER HEATERS

1. Definitions.

1.1 "Cutout" means the moment in time when a water heater thermostat has acted to reduce the energy or fuel input to the heating elements or burners to a minimum.

1.2 "Design Power Rating" means the nominal power rating that a water heater manufacturer assigns to a particular design of water heater heating element, expressed in kilowatts.

1.3 "Heat Trap" means a device which can be integrally connected, or independently attached, to the hot or cold water pipe connections of a water heater such that the device will develop a thermal or mechanical seal to minimize the recirculation of water due to natural thermal convection between the water heater tank and its water supply pipes and thereby reduce the heat loss to the environment from the hot water stored in the water heater.

1.4 "Recovery Efficiency" means the ratio of the heat imparted to the water to—

(a) in the case of an electric water heater, the energy input to the heating elements during the period that the water temperature is raised from the inlet temperature to the final temperature with the tank filled to capacity.

(b) in the case of a gas or oil water heater, the heat content of the fuel consumed by the burners during the period that the water temperature is raised from the inlet temperature to the final temperature with the tank filled to capacity.

1.5 "Standby loss" means the ratio of the heat loss per hour to the heat content of the stored water above room temperature.

a. Test conditions.

2.1 *Installation.* Install the water heater according to the manufacturer's directions on a $\frac{3}{4}$ -inch-thick plywood platform supported by three 2 x 4-inch runners. For water heaters without integral heat traps and with vertical inlet and outlet pipe connections, install the inlet and outlet piping with heat traps at the inlet and outlet ports. Such heat traps may be made using pipe fittings such as elbows connected in such a fashion that the inlet and outlet piping make vertically upward runs just before turning downward to connect to the inlet and outlet ports. For water heaters with integral heat traps or with horizontal inlet and outlet pipe connections, install the inlet and outlet piping in any convenient fashion.

Sufficient clearance shall be allowed between the water heater surface and the piping (including heat traps, if any) so that when the piping is insulated as specified below, the insulation does not contact any water heater surface except at the location where the pipe connections penetrate the water heater jacket. Insulate the water heater inlet and outlet piping (including heat traps, if any) for a length of four feet from the connection at the water heater with a material having a thermal resistance (R) value of not less than

$$\frac{R}{\text{Btu}^{\circ}\text{F}^{\circ}\text{hr}}$$

2.2 *Flue requirements for gas and oil water heaters.*

2.2.1 *Flue requirements for gas water heaters.* For a gas water heater having a vertically discharging draft hood outlet, a 5 foot vertical flue pipe extension having a diameter equal to the largest flue collar size of the draft hood shall be connected to the draft hood outlet. For a gas water heater having a horizontally discharging draft hood outlet, a 90 degree elbow having a diameter equal to the largest flue collar size of the draft hood shall be connected to the draft hood outlet. A 5 foot length of flue pipe shall be connected to the elbow and oriented to discharge vertically upward. Perform all tests with the natural draft established by this length of flue pipe. Direct vent gas water heaters should be installed with venting equipment as specified in the manufacturer's instructions; however, the vertical length of the flue pipe shall be no greater than 5 feet.

2.2.2 *Flue requirements for oil water heaters.* For an oil fueled water heater, establish a draft at the flue collar equivalent to at least 0.02 inch of water column during periods of burner firing. For an oil water heater having a vertically discharging draft hood outlet, establish the draft by using a sufficient length of flue pipe connected to the water heater flue outlet and directed vertically upward. For an oil water heater having a horizontally discharging draft hood outlet, a 90 degree elbow having a diameter equal to the largest flue collar size of the draft hood shall be connected to the draft hood outlet. A length of flue pipe sufficient to establish the draft shall be connected to the elbow fitting and oriented to discharge vertically upward. Direct vent oil water heaters should be installed with venting equipment as specified in the manufacturer's instructions. When ceiling height limits the use of a sufficient length of vertical flue pipe for an oil water heater, a mechanical draft inducer may be used during periods of burner firing to establish the specified draft at the flue collar.

2.3 *Water supply.* During the entire test maintain the water supply to the water heater inlet at a temperature of between

68 and 72° F., and at a gauge pressure of between 40 pounds per square inch and the maximum pressure specified by the manufacturer for the water heater under test. If the water supply pressure varies outside of these limits during testing, the heater shall be isolated by use of a shut-off valve in the supply line with an expansion tank installed in the supply line downstream of the shut-off valve. There shall be no shut-off means between the expansion tank and the water heater inlet.

2.4 *Energy Supply.*

2.4.1 *Electrical supply.* For an electric water heater and for the auxiliary electrical system, if any, of an oil or gas water heater, maintain the electrical supply voltage to within ± 1 percent of the center of the voltage range specified by the water heater manufacturer on the water heater nameplate throughout the entire operating portion of each test.

2.4.2 *Gas supply.*

2.4.2.2 *Natural gas.* For a gas water heater utilizing natural gas, maintain the gas supply at a normal inlet test pressure immediately ahead of all controls at 7 to 10 inches of water column. If the water heater is equipped with a gas appliance pressure regulator, the regulator outlet pressure at the normal test pressure shall be approximately that recommended by the manufacturer. All burners shall be adjusted to achieve an hourly Btu rating that is within ± 2 percent of the hourly Btu rating specified by the manufacturer. Use natural gas with a higher heating value of approximately 1,025 Btu per standard cubic foot. Determine the actual higher heating value, H_u , in Btu per standard cubic foot, for the natural gas to be used in the test, with an error no greater than ± 1 percent, and use that value for all calculations included herein. Alternatively, the test can be conducted using "bottled" natural gas of a higher heating value of approximately 1,025 Btu per standard cubic foot as long as the actual higher heating value of the bottled natural gas has been determined with an error no greater than ± 1 percent as certified by the supplier.

2.4.2.2 *Propane gas.* For a gas water heater utilizing propane, maintain the gas supply at a normal inlet test pressure immediately ahead of all controls at 11 to 13 inches of water column. If the water heater is equipped with a gas appliance pressure regulator, the regulator outlet pressure at normal test pressure shall be approximately that recommended by the manufacturer. All burners shall be adjusted to achieve an hourly Btu rating that is within ± 2 percent of the hourly Btu rating specified by the manufacturer. Use propane with a higher heating value of approximately 2,500 Btu per standard cubic foot. Determine the actual higher heating value, H_u , in Btu per standard cubic foot, for the propane to be used in the test, with an error no greater than ± 1 percent, and use that value for all calculations included herein. Alternatively, the test can be conducted using "bottled" propane of a higher heating value of approximately 2,500 Btu per standard cubic foot as long as the actual higher heating value of the bottled propane has been determined with an error no greater than ± 1 percent as certified by the supplier.

2.4.3 *Oil supply.* For an oil water heater utilizing fuel oil, maintain an uninterrupted supply of fuel oil to the water heater during the entire operating portion of the test cycle. Use fuel oil with a heating value of approximately 138,500 Btu per gallon. Determine the actual heating value, H_u , in Btu per gallon for the fuel oil to be used in the test, with an error no greater than ± 1 percent, and use that value for all calculations

included herein. Alternatively, the tests can be conducted using a tested fuel oil with a certified higher heating value of approximately 138,500 Btu per gallon as long as the actual higher heating value of the test fuel oil has been determined with an error of no greater than ± 1 percent as certified by the supplier.

2.5 Thermocouple installation. Install six thermocouples inside the water heater tank. Position each thermocouple measuring junction along a vertical line at the level of the center horizontal plane of each of six non-overlapping sections of approximately equal volume from the top to the bottom of the tank such that each thermocouple is surrounded by water and as far as possible from any heating element, anodic protective device, or a water tank or flue wall. The anodic protective device may be removed in order to install the thermocouples and all testing may be carried out with the device removed. Install thermocouples in both the cold-water inlet pipe and the hot-water outlet pipe not more than six inches from the connections to the water heater, or, where those connections are inaccessible, at the closest accessible point to those connections. Install in the test room a thermocouple with junction shielded against direct radiation from the water heater and positioned at the vertical mid-point of the heater at a perpendicular distance of approximately 24 inches from the surface of the water heater jacket. Provide an associated temperature measurement and indicator system to assure that the temperature indicated for the thermocouple location is within $\pm 1^\circ\text{F}$ of the actual temperature at that location.

2.6 Setting the tank thermostat. Starting with a tank of unheated water, initiate normal operation of the water heater. After cutout, determine whether the maximum value of the mean tank temperature is within the range of $160^\circ\text{F} \pm 5^\circ\text{F}$. If not, turn off the water heater, adjust the thermostat, empty the tank and refill with unheated water, then initiate normal operation of the water heater, and once again determine the maximum mean tank temperature after cutout. Repeat this sequence until the maximum mean tank temperature after cutout is within the range of $160^\circ\text{F} \pm 5^\circ\text{F}$, at which time the thermostat is properly set. If a water heater has two thermostats, the thermostat which controls the upper heating element shall be set first to yield a maximum water temperature of $160^\circ\text{F} \pm 5^\circ\text{F}$, as measured by the topmost tank thermocouple after cutout. The thermostat which controls the lower heating element shall then be set to yield a maximum mean tank temperature of $160^\circ\text{F} \pm 5^\circ\text{F}$, after cutout.

2.7 Fuel or energy consumption measurement. Install one or more instruments which measure, as appropriate, and with an error no greater than ± 1 percent, the quantity of electrical energy, natural gas, propane or fuel oil consumed by a water heater. Electrical energy consumption is to be expressed in units of kilowatt-hours. Natural gas and propane consumption shall be expressed in units of standard cubic feet, i.e., measured cubic feet corrected to standard conditions of 60°F temperature and 30 inches of mercury column pressure. Fuel oil consumption is to be expressed in units of gallons. Also install one or more instruments which measure, as appropriate, and with an error no greater than ± 1 percent, the rate of electrical energy, natural gas, propane or fuel oil consumption by a water heater. The rate of electrical energy consumption shall be expressed in units of kilowatts. The rate of natural gas and propane consumption shall

be expressed in units of standard cubic feet per hour. The rate of fuel oil consumption shall be expressed in units of gallons per hour.

2.8 Room ambient temperature. Maintain the ambient air temperature of the test room between 65°F and 85°F at all times during the test, as measured according to section 3.5. The ambient air temperature during these tests shall not vary more than $\pm 7^\circ\text{F}$ from the average ambient air temperature determined as the arithmetic average of the air temperatures measured periodically at intervals no greater than 15 minutes throughout the duration of the test.

3. Test procedures and measurements.
3.1 Tank storage capacity. Determine the storage capacity, V , of the water heater under test, in gallons, according to the method specified in section 2.26 of the American National Standard for Gas Water Heaters, Volume 1, designated ANS Z21.10.1-1975.

3.2 Power input determination.
3.2.1 Power input determination for gas and oil water heaters and electric water heaters with other than immersed heating elements. Initiate normal operation of the water heater, and by using the appropriate instrumentation specified in section 2.7 and the appropriate fuel heating values of section 2.4, determine the power input, P , to the main burners (including pilot light power, if any) or heating elements of the water heater under test, in Btu per hour or kilowatts, as appropriate. In addition, determine the power input, p , to any auxiliary electrical system of a gas or oil water heater when the main burners are in operation, in kilowatts; and the power input, p , to any auxiliary electrical system of a gas or oil water heater when the main burners are not in operation, in kilowatts.

3.2.2 Power input determination for electric water heaters with immersed heating elements. The power input, P , to the heating element of an electric water heater with one immersed heating element shall be taken to be the design power rating of the heating element. For an electric water heater with dual immersed heating elements, the power input, P , to the heating elements shall be taken to be the arithmetic mean of the design power ratings of the heating elements, if, in characteristic operation of the water heater, only one heating element will be energized at any time; otherwise, P shall be taken to be the sum of the design power ratings of the heating elements.

3.3 Recovery efficiency.
3.3.1 Recovery efficiency for gas and oil water heaters and electric water heaters with other than immersed heating elements. With the water heater turned off, fill the tank with water and eliminate any residual air remaining in the tank. If the mean tank temperature is constant and within $70^\circ\text{F} \pm 2^\circ\text{F}$, record the mean tank temperature, initiate normal operation of the water heater, and begin measuring the fuel or energy flow to the burners (including pilot light fuel if any) or heating elements of the water heater using the appropriate instrumentation specified in section 2.7. After cutout determine the maximum mean tank temperature and record the total fuel flow, Q , for a gas or oil water heater, or the total electrical energy flow, Z , to the heating elements of an electric water heater, from initiation to cutout. Record the temperature difference, ΔT , obtained by subtracting the initial from the final maximum mean tank temperature.

3.3.2 Recovery efficiency for electric water heaters with immersed heating elements. The recovery efficiency for electric water heaters with immersed heating elements is derived from the results of the standby loss tests of section 3.4.2.

3.4 Standby loss.
3.4.1 Standby loss for gas and oil water heaters and electric water heaters with other than immersed heating elements. Establish normal water heater operation within the maximum mean tank temperature within the range specified in section 2.6 and with all air eliminated from the tank. Begin the standby loss test immediately after cutout. At the beginning of the standby loss test record the time, the mean tank temperature, the ambient air temperature, and begin measuring the fuel or energy flow to the burners (including pilot light fuel if any) or heating elements of the water heater using the appropriate instrumentation specified in section 2.7.

At the end of the first 15 minute interval and at the end of each subsequent 15 minute interval following the beginning of the test, record the mean tank temperature and the ambient air temperature. Continue these measurements until the end of a 48 hour period unless a main heating element or burner is on at that time, in which case, continue these measurements until the first subsequent cutout. When the test is terminated, record the total fuel flow, Q , for a gas or oil water heater, or the total electrical energy flow, Z , to the heating elements of an electric water heater, from the beginning to the end of the test period, the final mean tank temperature, the final ambient air temperature, and the time duration, t , of the standby loss test, in hours rounded off to the nearest tenth of an hour, which elapsed from the beginning to the end of the test period. Calculate the average of the recorded values of the mean tank temperatures and of the ambient air temperatures taken at the end of each time interval, including in each case the initial and final values. Determine the difference, ΔT , between these two averages by subtracting the latter from the former, and the difference, ΔT , between the final and initial mean tank temperatures by subtracting the latter from the former.

3.4.2 Standby loss for electric water heaters with immersed heating elements. All water heaters to be tested must be equipped with immersed heating elements that have a design power rating of 4,500 watts unless such a design power rating exceeds the maximum design power rating specified by the manufacturer for the water heater to be tested, in which case the standby loss test will be conducted with the water heater equipped with immersed heating elements of a design power rating equal to the manufacturer's specified maximum design power rating. All water heaters capable of operating with dual immersed heating elements will be equipped and tested with dual immersed heating elements of equal design power rating in accordance with the provisions specified above. Tests shall be conducted in accordance with the same procedures as those specified in section 3.4.1.

3.5 Room temperature measurement. Room temperature wherever specified shall be the temperature determined by using the test room thermocouple described in section 2.5.

3.6 Mean tank temperature measurement. Mean tank temperature, the average temperature of the water in a water heater tank, wherever specified shall be the mean of the temperatures determined by using the six water heater tank thermocouples described in section 2.5.

4. Calculation of derived results from test measurements.
4.1 Recovery efficiency.

from the results of the standby loss tests of section 3.4.2.

3.4 Standby loss.

3.4.1 Standby loss for gas and oil water heaters and electric water heaters with other than immersed heating elements. Establish normal water heater operation within the maximum mean tank temperature within the range specified in section 2.6 and with all air eliminated from the tank. Begin the standby loss test immediately after cutout. At the beginning of the standby loss test record the time, the mean tank temperature, the ambient air temperature, and begin measuring the fuel or energy flow to the burners (including pilot light fuel if any) or heating elements of the water heater using the appropriate instrumentation specified in section 2.7.

At the end of the first 15 minute interval and at the end of each subsequent 15 minute interval following the beginning of the test, record the mean tank temperature and the ambient air temperature. Continue these measurements until the end of a 48 hour period unless a main heating element or burner is on at that time, in which case, continue these measurements until the first subsequent cutout. When the test is terminated, record the total fuel flow, Q , for a gas or oil water heater, or the total electrical energy flow, Z , to the heating elements of an electric water heater, from the beginning to the end of the test period, the final mean tank temperature, the final ambient air temperature, and the time duration, t , of the standby loss test, in hours rounded off to the nearest tenth of an hour, which elapsed from the beginning to the end of the test period. Calculate the average of the recorded values of the mean tank temperatures and of the ambient air temperatures taken at the end of each time interval, including in each case the initial and final values. Determine the difference, ΔT , between these two averages by subtracting the latter from the former, and the difference, ΔT , between the final and initial mean tank temperatures by subtracting the latter from the former.

3.4.2 Standby loss for electric water heaters with immersed heating elements. All water heaters to be tested must be equipped with immersed heating elements that have a design power rating of 4,500 watts unless such a design power rating exceeds the maximum design power rating specified by the manufacturer for the water heater to be tested, in which case the standby loss test will be conducted with the water heater equipped with immersed heating elements of a design power rating equal to the manufacturer's specified maximum design power rating. All water heaters capable of operating with dual immersed heating elements will be equipped and tested with dual immersed heating elements of equal design power rating in accordance with the provisions specified above. Tests shall be conducted in accordance with the same procedures as those specified in section 3.4.1.

3.5 Room temperature measurement. Room temperature wherever specified shall be the temperature determined by using the test room thermocouple described in section 2.5.

3.6 Mean tank temperature measurement. Mean tank temperature, the average temperature of the water in a water heater tank, wherever specified shall be the mean of the temperatures determined by using the six water heater tank thermocouples described in section 2.5.

4. Calculation of derived results from test measurements.

4.1 Recovery efficiency.

4.1.1 Recovery efficiency for gas and oil water heaters. For a gas or oil water heater, calculate the recovery efficiency, E_r , expressed as a dimensionless quantity and defined as:

$$E_r = \frac{k \times V \times \Delta T_1}{Q_r \times H}$$

where

k = 8.25 Btu per gallon $^\circ\text{F}$, the nominal specific heat of water.

V = tank capacity, determined in accordance with section 3.1, expressed in gallons.

ΔT_1 = difference between the initial and final mean tank temperatures, determined in accordance with section 3.3.1, expressed in $^\circ\text{F}$.

Q_r = total fuel flow in the recovery test, determined in accordance with section 3.3.1, expressed in appropriate units.

H = higher heating value for the appropriate fuel type, H_g , H_o , or H_e , as determined in accordance with section 2.4, expressed in appropriate units.

4.1.2 Recovery efficiency for electric water heaters with other than immersed heating elements. For an electric water heater with other than immersed heating elements, calculate the recovery efficiency, E_r , expressed as a dimensionless quantity and defined as:

$$E_r = \frac{k \times V \times \Delta T_1}{Z_r \times 3,412 \text{ Btu/kWh}}$$

where k , V , and ΔT_1 are as defined in section 4.1.1. Z_r = total electrical energy flow to the heating elements in the recovery test, determined in accordance with section 3.3.1, expressed in kilowatt-hours.

4.1.3 Recovery efficiency for electric water heaters with immersed heating elements. For an electric water heater with immersed heating elements, calculate the recovery efficiency, E_r , expressed as a dimensionless quantity and defined as:

$$E_r = 1 - \frac{S \times k \times V \times \Delta T_2}{P \times 3,412 \text{ Btu/kWh}}$$

where k and V are as defined in section 4.1.1.

S = standby loss, as calculated in section 4.4.2.

ΔT_2 = 45°F , the nominal average difference between the mean tank temperature and the ambient air temperature during recovery.

P = water heater input power, determined in accordance with section 3.2.2, expressed in kilowatts.

4.2 Standby loss.

4.2.1 Standby loss for gas and oil water heaters. For a gas or oil water heater, calculate the standby loss, expressed in hour $^{-1}$ and defined as:

$$S = \frac{Q_r \times H}{k \times V \times \Delta T_2 \times t} - \frac{\Delta T_1}{\Delta T_2 \times t \times E_r}$$

where k , V , and H are as defined in section 4.1.1.

Q_r = total fuel flow in the standby loss test, determined in accordance with section 3.4.1, expressed in appropriate units.

ΔT_1 = difference between the average value of the mean tank temperature and the average value of the ambient air temperature during the standby loss test, determined in accordance with section 3.4.1, expressed in $^\circ\text{F}$.

ΔT_2 = difference between the initial and final mean tank temperatures, determined in accordance with section 3.4.1, expressed in $^\circ\text{F}$.

t = duration of the standby loss test, determined in accordance with section 3.4.1, expressed in hours.

E_r = recovery efficiency, as calculated in section 4.1.1.

H = higher heating value for the appropriate fuel type, H_g , H_o , or H_e , as determined in accordance with section 2.4, expressed in appropriate units.

k = 8.25 Btu per gallon $^\circ\text{F}$, the nominal specific heat of water.

V = tank capacity, determined in accordance with section 3.1, expressed in gallons.

ΔT_1 = difference between the average value of the mean tank temperature and the average value of the ambient air temperature during the standby loss test, determined in accordance with section 3.4.1, expressed in $^\circ\text{F}$.

ΔT_2 = difference between the initial and final mean tank temperatures, determined in accordance with section 3.4.1, expressed in $^\circ\text{F}$.

t = duration of the standby loss test, determined in accordance with section 3.4.1, expressed in hours.

E_r = recovery efficiency, as calculated in section 4.1.1.

H = higher heating value for the appropriate fuel type, H_g , H_o , or H_e , as determined in accordance with section 2.4, expressed in appropriate units.

k = 8.25 Btu per gallon $^\circ\text{F}$, the nominal specific heat of water.

V = tank capacity, determined in accordance with section 3.1, expressed in gallons.

ΔT_1 = difference between the average value of the mean tank temperature and the average value of the ambient air temperature during the standby loss test, determined in accordance with section 3.4.1, expressed in $^\circ\text{F}$.

ΔT_2 = difference between the initial and final mean tank temperatures, determined in accordance with section 3.4.1, expressed in $^\circ\text{F}$.

t = duration of the standby loss test, determined in accordance with section 3.4.1, expressed in hours.

E_r = recovery efficiency, as calculated in section 4.1.1.

4.2.2 Standby loss for electric water heaters. For an electric water heater, calculate the standby loss, S , expressed in hour $^{-1}$ and defined as:

$$S = \frac{Z_r \times 3,412 \text{ Btu/kWh}}{k \times V \times \Delta T_2 \times t} - \frac{\Delta T_1}{\Delta T_2 \times t \times E_r}$$

where k and V are as defined in section 4.1.1.

Z_r = total electrical energy flow to the heating elements in the standby loss test, determined in accordance with section 3.4.1 for electric water heaters with other than immersed heating elements, or section 3.4.2 for electric water heaters with immersed heating elements, expressed in kilowatt-hours.

ΔT_1 = difference between the average value of the mean tank temperature and the average value of the ambient air temperature during the standby loss test, determined in accordance with section 3.4.1 for electric water heaters with other than immersed heating elements, or section 3.4.2 for electric water heaters with immersed heating elements, expressed in kilowatt-hours.

ΔT_2 = difference between the initial and final mean tank temperatures, determined in accordance with section 3.4.1 for electric water heaters with other than immersed heating elements, or section 3.4.2 for electric water heaters with immersed heating elements, expressed in kilowatt-hours.

t = duration of the standby loss test, determined in accordance with section 3.4.1 for electric water heaters with other than immersed heating elements, or section 3.4.2 for electric water heaters with immersed heating elements, expressed in hours.

E_r = E_r as calculated in section 4.1.2 for electric water heaters with other than immersed heating elements, or 0.8 for electric water heaters with immersed heating elements.

4.3 Daily water heating energy consumption. Calculate the daily water heating energy consumption, C_{wh} , the energy required to heat the nominal amount of hot water used daily, expressed in Btu per day and defined as:

$$C_{wh} = \frac{k \times V \times \Delta T_3}{E_r}$$

where k is as defined in section 4.1.1.

V is as calculated in section 4.1.1 for gas and oil water heaters, section 4.1.2 for electric water heaters with other than immersed heating elements, or section 4.1.3 for electric water heaters with immersed heating elements.

ΔT_3 = 90°F , the nominal difference between the water heater inlet and outlet water temperatures.

E_r = 0.8 for electric water heaters with immersed heating elements.

4.4 Average hourly hot water storage energy consumption. Calculate the average hourly hot water storage energy consumption, C_{sh} , the average energy required per hour to maintain stored water temperature, expressed in Btu per hour and defined as:

$$C_{sh} = S \times k \times V \times \Delta T_3$$

where k and V are as defined in section 4.1.1.

S is as calculated in section 4.2.1 for gas and oil water heaters, or section 4.2.2 for electric water heaters.

ΔT_3 = 90°F , the nominal difference between the water heater inlet and outlet water temperatures.

E_r = 0.8 for electric water heaters with immersed heating elements.

4.5 Average daily energy consumption. Calculate the average daily energy consumption, C_d , the average energy required per day to maintain stored water temperature, expressed in Btu per day and defined as:

$$C_d = S \times k \times V \times \Delta T_3$$

where k and V are as defined in section 4.1.1.

S is as calculated in section 4.2.1 for gas and oil water heaters, or section 4.2.2 for electric water heaters.

ΔT_3 = 90°F , the nominal difference between the water heater inlet and outlet water temperatures.

E_r = 0.8 for electric water heaters with immersed heating elements.

4.6 Average daily energy consumption for electric water heaters. For an electric water heater, calculate the average daily energy consumption, C_d , expressed in kilowatt-hours per day and defined as:

$$C_d = \frac{1}{3,412 \text{ Btu/kWh}} \times \left[C_{wh} + C_{sh} \times \left(\frac{24 \text{ hours}}{\text{day}} - \frac{C_{wh}}{P \times 3,412 \text{ Btu/kWh}} \right) - J_A - J_e \right]$$

where C_{wh} is as calculated in section 4.3.

C_{sh} is as calculated in section 4.4.

J_A and J_e are as defined in section 4.5.2.

P = input power, determined in accordance with section 3.2.1 for electric water heaters with other than immersed heating elements or section 3.2.2 for electric water heaters with immersed heating elements, expressed in kilowatts.

J_A = daily energy credit for a heat trap installed in the outlet water connection of a water heater=1,311 Btu per day for water heaters that have such a heat trap as an integral part of the water heater, or zero for water heaters that do not.

J_e = daily energy credit for a heat trap installed in the inlet water connection of a water heater=983 Btu per day for water heaters that have such a heat trap as an integral part of the water heater, or zero for water heaters that do not.

4.5.3 Average daily energy consumption for gas and oil water heaters. For a gas or oil water heater, calculate the average daily energy consumption, C_d , expressed in Btu per day and defined as:

$$C_d = C_{wh} + C_{sh} \times 24 \text{ Btu/kWh}$$

where C_{wh} is as calculated in section 4.3.

C_{sh} is as calculated in section 4.4.

J_A and J_e are as defined in section 4.5.2.

P = input power, determined in accordance with section 3.2.1 for electric water heaters with other than immersed heating elements or section 3.2.2 for electric water heaters with immersed heating elements, expressed in kilowatts.

J_A = daily energy credit for a heat trap installed in the outlet water connection of a water heater=1,311 Btu per day for water heaters that have such a heat trap as an integral part of the water heater, or zero for water heaters that do not.

J_e = daily energy credit for a heat trap installed in the inlet water connection of a water heater=983 Btu per day for water heaters that have such a heat trap as an integral part of the water heater, or zero for water heaters that do not.

4.5.4 Average daily energy consumption for electric water heaters. For an electric water heater, calculate the average daily energy consumption, C_d , expressed in kilowatt-hours per day and defined as:

$$C_d = \frac{1}{3,412 \text{ Btu/kWh}} \times \left[C_{wh} + C_{sh} \times \left(\frac{24 \text{ hours}}{\text{day}} - \frac{C_{wh}}{P \times 3,412 \text{ Btu/kWh}} \right) - J_A - J_e \right]$$

where C_{wh} is as calculated in section 4.3.

C_{sh} is as calculated in section 4.4.

J_A and J_e are as defined in section 4.5.2.

P = input power, determined in accordance with section 3.2.1 for electric water heaters with other than immersed heating elements or section 3.2.2 for electric water heaters with immersed heating elements, expressed in kilowatts.

J_A = daily energy credit for a heat trap installed in the outlet water connection of a water heater=1,311 Btu per day for water heaters that have such a heat trap as an integral part of the water heater, or zero for water heaters that do not.

J_e = daily energy credit for a heat trap installed in the inlet water connection of a water heater=983 Btu per day for water heaters that have such a heat trap as an integral part of the water heater, or zero for water heaters that do not.

4.5.5 Average daily energy consumption for gas and oil water heaters. For a gas or oil water heater, calculate the average daily energy consumption, C_d , expressed in Btu per day and defined as:

$$C_d = C_{wh} + C_{sh} \times 24 \text{ Btu/kWh}$$

where C_{wh} is as calculated in section 4.3.

C_{sh} is as calculated in section 4.4.

J_A and J_e are as defined in section 4.5.2.

P = input power, determined in accordance with section 3.2.1 for electric water heaters with other than immersed heating elements or section 3.2.2 for electric water heaters with immersed heating elements, expressed in kilowatts.

J_A = daily energy credit for a heat trap installed in the outlet water connection of a water heater=1,311 Btu per day for water heaters that have such a heat trap as an integral part of the water heater, or zero for water heaters that do not.

J_e = daily energy credit for a heat trap installed in the inlet water connection of a water heater=983 Btu per day for water heaters that have such a heat trap as an integral part of the water heater, or zero for water heaters that do not.

4.5.6 Average daily energy consumption for electric water heaters. For an electric water heater, calculate the average daily energy consumption, C_d , expressed in kilowatt-hours per day and defined as:

$$C_d = \frac{1}{3,412 \text{ Btu/kWh}} \times \left[C_{wh} + C_{sh} \times \left(\frac{24 \text{ hours}}{\text{day}} - \frac{C_{wh}}{P \times 3,412 \text{ Btu/kWh}} \right) - J_A - J_e \right]$$

where C_{wh} is as calculated in section 4.3.

C_{sh} is as calculated in section 4.4.

J_A and J_e are as defined in section 4.5.2.

P = input power, determined in accordance with section 3.2.1 for electric water heaters with other than immersed heating elements or section 3.2.2 for electric water heaters with immersed heating elements, expressed in kilowatts.

J_A = daily energy credit for a heat trap installed in the outlet water connection of a water heater=1,311 Btu per day for water heaters that have such a heat trap as an integral part of the water heater, or zero for water heaters that do not.

Title 29—Labor

CHAPTER XXV—PENSION AND WELFARE
BENEFIT PROGRAMS, DEPARTMENT OF
LABORSUBCHAPTER F—FIDUCIARY RESPONSIBILITY
UNDER THE EMPLOYEE RETIREMENT INCOME
SECURITY ACT OF 1974PART 2550—RULES AND REGULATIONS
FOR FIDUCIARY RESPONSIBILITYMaintenance of Indicia of Ownership of
Plan Assets Outside Jurisdiction of Dis-
trict Courts of the United States

AGENCY: Department of Labor.

ACTION: Final regulation.

SUMMARY: This regulation prescribes conditions which permit a fiduciary of an employee benefit plan to maintain the indicia of ownership of plan assets outside the jurisdiction of the district courts of the United States, a practice which is prohibited under section 404 (b) of the Employee Retirement Income Security Act of 1974 (ERISA) (29 U.S.C. 1104) except as authorized by the Secretary of Labor. Under the regulation, if certain protective conditions are met, a plan may invest in foreign securities without incurring the costs which would be associated with the physical transfer of securities to and from the United States in order to satisfy the requirements of section 404(b) of ERISA. The regulation affects participants and beneficiaries of employee benefit plans, their employers and fiduciaries of such plans.

EFFECTIVE DATE: January 1, 1975.

FOR FURTHER INFORMATION CON-
TACT:

Forrest Foss, Room C-4508, Plan Benefits Security Division, Office of the Solicitor, Department of Labor, 200 Constitution Avenue, NW., Washington, D.C. 20201 (202-523-6856—not a toll free number).

SUPPLEMENTARY INFORMATION: Section 404(b) of ERISA prohibits an employee benefit plan from maintaining the indicia of ownership of plan assets outside the jurisdiction of United States district courts. On December 17, 1976, the Department of Labor (Department), pursuant to specific statutory authority in section 404(b), published a proposed regulation (41 FR 55206) to permit the maintenance abroad of the indicia of ownership of plan assets if certain conditions are met. Public comments were received in response to the Department's proposed regulations which generally supported the proposal, although several suggestions for specific revisions were offered. The regulation, as adopted, states that the indicia of ownership of specified assets may be held abroad if such assets are under the management and control of certain banks, insurance companies or investment adviser fiduciaries, or if the indicia of the specified assets are in the physical possession of certain banks or brokers or dealers or if such banks or brokers or dealers main-

tain, under certain conditions, the indicia in the custody of entities which are designated by the Securities and Exchange Commission as "satisfactory control locations" pursuant to Rule 15c3-3 under the Securities Exchange Act of 1934 (15 U.S.C. 78a et seq.). Additionally, the regulation provides broader relief from the statutory prohibition of section 404(b) to permit the maintenance in Canada of the indicia of ownership of plan assets, attributable to contributions on behalf of Canadian participants, if such maintenance is required by Canadian law as a condition to tax exempt status for the plan.

DISCUSSION OF MAJOR COMMENTS

Types Of Assets. The proposed regulation provided that only the indicia of ownership of securities issued by (1) a person not organized under the laws of the United States or a state and not having its principal place of business within the United States or (2) a government other than the government of the United States or a state or any political subdivision, agency or instrumentality of such a government could be maintained outside the jurisdiction of the district courts of the United States.

Several comments were received suggesting amendments that would expand the types of assets whose indicia of ownership a plan could maintain abroad. The Department was urged to delete the requirements which limited the securities whose indicia of ownership could be held abroad to those issued by a person not organized under the laws of the United States. As the comments noted, securities whose principal market is outside the jurisdiction of the district courts of the United States might be issued by a person who is organized under the laws of the United States. Because it generally would not be in the interest of plans to require that indicia of ownership be held in the United States in situations where the primary trading market for the securities in question is abroad, the Department has revised the regulation to permit a plan to maintain abroad the indicia of ownership of securities whose principal market is outside the United States, regardless of whether the issuer of the securities is organized under the laws of the United States.

A number of commentators questioned the effect of the proposed regulation on the investment by plans in American Depositary Receipts (ADR). An ADR is a certificate which enables the owner to demand delivery of foreign securities which are deposited with a foreign depository and is considered to be a security issued in the United States which, generally, is subject to registration under the Securities Act of 1933 (15 U.S.C. 77a et seq.). For purposes of section 404(b) and the regulation adopted thereunder, the ADR will be deemed to be the indicium of ownership of the interest held by the plan.

Another comment stated that the proposal failed to address the question of a plan maintaining foreign currency abroad. Such currency might be trans-

ferred abroad in order to purchase foreign securities, or might be generated from the proceeds of a sale of foreign traded securities (or the payment of interest or dividends attributable to foreign securities) where the proceeds are held for reinvestment. Because the inability to maintain foreign currency abroad could seriously hamper a plan's ability to trade in foreign securities, the regulation, as adopted, permits plans, under specified circumstances, to maintain foreign currency outside the jurisdiction of the district courts of the United States.

One comment suggested that an insurance company (meeting the standard of section (a) (2) (i) (B) of the proposal) be permitted to maintain abroad the indicia of ownership of foreign real estate. Because real estate is generally not the subject of frequent trading, the Department has determined not to incorporate this comment. Accordingly, when the indicia of ownership of real estate are portable, they must be held within the jurisdiction of the district courts of the United States, and when they are not portable, such as in foreign jurisdictions where the only recognized evidence of ownership is recordation, then plans may not hold such assets.

Qualifying Fiduciaries. Paragraph (a) (2) (i) of the proposal provided that certain fiduciaries could maintain abroad the indicia of ownership of certain plan assets without being subject to the requirements of paragraph (a) (2) (ii) of the proposal. Several comments urged the Department to revise section (a) (2) (i) (C) of the proposal which pertained to investment advisers registered under the Investment Advisers Act of 1940 (15 U.S.C. 80b-1 et seq.) to eliminate either the net worth requirement or the assets under management test contained therein. These standards were included to ensure that only financially responsible investment advisers could act as fiduciaries of plans choosing to maintain the indicia of ownership of plan assets abroad. The comments noted that the investment advisory business is not capital intensive, and, as a result, many financially sound investment advisers would be unable to meet the requirements of the regulation.

In order that plan investments in foreign securities not be unnecessarily restricted where adequate safeguards are present, the Department has determined to provide an alternative standard to that set forth in proposed section (a) (2) (i) (C) by which an investment adviser may qualify under the regulation. Section (a) (2) (i) (C) of the regulation, as adopted, requires that the investment adviser have \$50,000,000 of client assets under its management and control and either shareholders' or partners' equity of more than \$750,000, or all of its obligations and liabilities assumed or guaranteed by an insurance company, bank, investment adviser or broker or dealer that satisfies the requirements of paragraphs (a) (2) (i) (A), (B) or (C) (1) or (a) (2) (ii) (A) (2) of the regulation.

Comments were received urging the Department to clarify the effect of the regulation on so called "directed trustees"—person having physical possession of the indicia of ownership but subject to the directions of another fiduciary. The Department notes that if the fiduciary possessing management and control of the indicia of ownership satisfies the requirements of section (a) (2) (i) of the regulation, then such fiduciary may maintain the indicia of ownership of the plan assets in the physical possession of any person, including a "directed trustee," regardless of whether such other person satisfies any requirements of the regulation. Similarly, a fiduciary which does not meet the requirements of section (a) (2) (i) may maintain the indicia of ownership of plan assets abroad in the physical possession of a person, including a "directed trustee," if such person satisfies the requirements of section (a) (2) (ii) (A) of the regulation. Finally, a "directed trustee" which is a bank or broker or dealer meeting the requirements of paragraph (a) (2) (ii) (A) of the regulation may maintain, under certain circumstances, the indicia of ownership of certain plan assets in the custody of various entities designated by the Securities and Exchange Commission as "satisfactory control locations" pursuant to Rule 15c3-3 under the Securities Exchange Act of 1934. Accordingly, the Department does not believe that it is necessary to provide additional relief for "directed trustees."

Custodians. If fiduciaries did not meet the tests set forth in section (a) (2) (i), the proposed regulation required that the indicia of ownership be maintained in the physical possession of certain persons specified in paragraph (a) (2) (ii). One comment suggested that the Department permit a plan to maintain the indicia of ownership of plan assets in the custody of various foreign depositories, foreign clearing agencies, foreign custodian banks or other entities which the Securities and Exchange Commission had designated as "satisfactory control locations" pursuant to Rule 15c3-3 under the Securities Exchange Act of 1934. In order not to disrupt established procedures, particularly where a United States bank or broker or dealer will remain liable to the plan to the same extent it would be if it retained physical possession of the indicia of ownership, the Department has determined to modify the proposed regulation in response to this comment. Accordingly, paragraph (a) (2) (ii) (B) of the regulation, as adopted, now permits a bank or broker or dealer satisfying the conditions of paragraph (a) (2) (ii) (A) to maintain the indicia of ownership in the custody of an entity designated by the Securities Exchange Commission as a "satisfactory control location" pursuant to Rule 15c3-3 under the Securities Exchange Act of 1934, if such entity holds the indicia as agent for the bank or broker or dealer and the bank or broker or dealer is liable to the plan to the same extent it would be if it retained physical possession of the indicia of ownership pursuant to paragraph (a) (2) (ii) (A).

Other comments also urged the Department to expand the persons qualifying under the alternative standard of proposed paragraph (a) (2) (ii). However, these comments did not adequately describe the regulatory provisions to which these various persons would be subject with respect to their operations abroad nor demonstrate the existence of alternate safeguards that would ensure adequate protections to plant utilizing the services of such persons. Accordingly, these comments were not adopted.

One comment suggested that the Department permit the indicia of ownership of plan assets to be held abroad by a person other than a qualifying custodian, if such assets do not exceed one percent of the total assets of the plan. Because the Department does not believe it is appropriate that any portion of a plan's assets not be subject to protections deemed necessary under section 404(b) for the other assets of the plan, it has determined not to incorporate this suggestion.

The Department was also urged to amend section (a) (2) (ii) (B) of the proposal so that a broker or dealer would qualify as a custodian if its net worth was less than \$750,000 but its liabilities and obligations were assumed or guaranteed by a person with a net worth in excess of \$750,000. As in the case of investment advisers, the Department believes that an alternative standard for brokers or dealers can provide adequate protections to plans maintaining the indicia of ownership of plan assets abroad. Accordingly, the Department has created a new section (a) (2) (ii) (A) (3) which permits a broker or dealer registered under the Securities Exchange Act of 1934 to qualify as a custodian if a person meeting the requirements of the regulation under paragraphs (a) (2) (i) (A), (B) or (C) (1) or (a) (2) (ii) (A) (2) assumes or guarantees all the obligations and liabilities of the broker or dealer.

Canadian Plans. Paragraph (b) of the proposal provided that a fiduciary of a plan could maintain the indicia of ownership of plan assets in Canada, notwithstanding the requirements of paragraph (a), if certain conditions were met. One of these conditions was that the plan receive contributions on behalf of its participants from one or more employers which are organized under the laws of Canada or a Province of Canada or have their principal place of business in Canada. Several comments urged the Department to revise this provision to permit a plan fiduciary to maintain the indicia of ownership of plan assets in Canada if the plan receives contributions on behalf of one or more employers which maintain a place of business in Canada but which are neither organized under the laws of Canada nor have their principal place of business in Canada. The comments noted that the proposal would not permit an employer, whose principal place of business is in the United States and which is not organized under the laws of Canada but which has a branch operation in Canada and maintains one plan

to cover all of its employees, to retain the assets of its plan derived from contribution on behalf of its Canadian employees in Canada as required by Canadian law. Because the Department does not intend this regulation to require a company to set up separate plans for United States and Canadian employees in order to comply with Canadian law, it has determined to delete from paragraph (b) of the regulation, as adopted, any requirement respecting the place of business of the contributing employer. Accordingly, the regulation now permits a plan fiduciary to maintain in Canada the indicia of ownership of plan assets attributable to a contribution on behalf of a Canadian participant if such indicia must remain in Canada in order for the plan to qualify for and maintain tax exempt status under the laws of Canada and to comply with other applicable laws of Canada or its provinces.

Other Foreign Jurisdictions. Pursuant to its request for comments respecting the interrelationship between the proposed regulation and the requirements of the laws of foreign jurisdictions other than Canada, the Department received one comment indicating that certain countries may tax or otherwise impede the removal of plan assets held in those countries. The comment further indicated that the laws of such countries may make it difficult or impossible for a United States bank to establish a branch office there that would be qualified under section (a) (2) (ii) of the regulation to retain in such country the physical possession of the indicia of ownership of plan assets. Although the regulation provides no specific relief for plans under these circumstances, the Department notes that pursuant to the provisions of section (a) (2) (i) of the regulation, the indicia of ownership of certain plan assets may be held in such a country provided that such indicia are under the management and control of an entity satisfying the requirements of section (a) (2) (i). Moreover, pursuant to section (a) (2) (ii) (B) of the regulation, a bank or broker or dealer satisfying the requirements of section (a) (2) (ii) (A) of the regulation may maintain, under certain conditions, the indicia of ownership of certain plan assets in the custody of entities designated by the Securities and Exchange Commission as "satisfactory control locations" pursuant to Rule 15c3-3 under the Securities Exchange Act of 1934.

Other Matters. In addition to the changes noted above which have been made in the regulation as adopted pursuant to suggestions made in the written comment letters, other minor changes intended to clarify the provisions of the regulation have been made.

The Department received one request for a public hearing. The Department believes that the subject of this regulation is susceptible to full and complete written comments and that all interested persons have had an opportunity to furnish such comments. Accordingly, the Department has determined not to hold

a public hearing with respect to this regulation.

The regulations set forth below are adopted pursuant to the authority contained in sections 404(b) and 505 (29 U.S.C. 1135) of ERISA.

Part 2550 of Chapter XXV of Title 29 of the Code of Federal Regulations is amended as follows:

PARAGRAPH 1. Section 2550.404b-1 is inserted in the appropriate place to read as set forth below:

§ 2550.404b-1 Maintenance of the indicia of ownership of plan assets outside the jurisdiction of the district courts of the United States.

(a) Effective January 1, 1975, no fiduciary may maintain the indicia of ownership of any assets of a plan outside the jurisdiction of the district courts of the United States, unless:

(1) Such assets are (i) Securities issued by a person, as defined in section 3(9) of the Employee Retirement Income Security Act of 1974 (Act) (other than an individual), which is not organized under the laws of the United States or a State and does not have its principal place of business within the United States, (ii) securities issued by a government other than the government of the United States or of a State, or any political subdivision, agency or instrumentality of such a government, (iii) securities issued by a person, as defined in section 3(9) of the Act (other than an individual), the principal trading market for which securities is outside the jurisdiction of the district courts of the United States, or (iv) currency issued by a government other than the government of the United States if such currency is maintained outside the jurisdiction of the district courts of the United States solely as an incident to the purchase, sale or maintenance of securities described in paragraph (a) (1) of this section; and

(2) (i) Such assets are under the management and control of a fiduciary which

is a corporation or partnership organized under the laws of the United States or a State, which fiduciary has its principal place of business within the United States and which is—

(A) A bank as defined in section 202 (a) (2) of the Investment Advisers Act of 1940 that has, as of the last day of its most recent fiscal year, equity capital in excess of \$1,000,000;

(B) An insurance company which is qualified under the laws of more than one State to manage, acquire, or dispose of any asset of a plan, which company has, as of the last day of its most recent fiscal year, net worth in excess of \$1,000,000 and which is subject to supervision and examination by the State authority having supervision over insurance companies; or

(C) An investment adviser registered under the Investment Advisers Act of 1940 that has, as of the last day of its most recent fiscal year, total client assets under its management and control in excess of \$50,000,000 and either (1) Shareholders' or partners' equity in excess of \$750,000 or (2) all of its obligations and liabilities assumed or guaranteed by a person described in paragraph (a) (2) (i) (A), (B), or (C) (1) or (a) (2) (ii) (A) (2) of this section; or

(ii) Such indicia of ownership are either

(A) In the physical possession of, or, as a result of normal business operations, are in transit to the physical possession of, a person which is organized under the laws of the United States or a State, which person has its principal place of business in the United States and which is—

(1) A bank as defined in section 202 (a) (2) of the Investment Advisers Act of 1940 that has, as of the last day of its most recent fiscal year, equity capital in excess of \$1,000,000;

(2) A broker or dealer registered under the Securities Exchange Act of 1934 that has, as of the last day of its most recent fiscal year, net worth in excess of \$750,000; or

(3) A broker or dealer registered under the Securities Exchange Act of 1934 that has all of its obligations and liabilities assumed or guaranteed by a person described in paragraph (a) (2) (i) (A), (B), or (C) (1) or (a) (2) (ii) (A) (2) of this section; or

(B) Maintained by a bank or broker or dealer, described in paragraph (a) (2) (ii) (A) (1), (2) or (3), in the custody of an entity designated by the Securities and Exchange Commission as a "satisfactory control location" pursuant to Rule 15c3-3 under the Securities Exchange Act of 1934, provided that:

(1) Such entity holds the indicia of ownership as agent for the bank or broker or dealer, and

(2) Such bank or broker or dealer is liable to the plan to the same extent it would be if it retained the physical possession of the indicia of ownership pursuant to paragraph (a) (2) (ii) (A).

(b) Notwithstanding any requirement of paragraph (a) of this section, a fiduciary with respect to a plan may maintain in Canada the indicia of ownership of plan assets which are attributable to a contribution made on behalf of a plan participant who is a citizen or resident of Canada, if such indicia of ownership must remain in Canada in order for the plan to qualify for and maintain tax exempt status under the laws of Canada or to comply with other applicable laws of Canada or any Province of Canada.

(c) For purposes of this regulation the term "management and control" means the power to direct the acquisition or disposition through purchase, sale, pledging, or other means.

Signed at Washington, D.C. this 30th day of September 1977.

IAN D. LANOFF,
Administrator of Pension and
Welfare Benefit Programs,
Labor-Management Services
Administration, Department
of Labor.

DEPARTMENT OF
TRANSPORTATIONUrban Mass Transportation Administration
FORMULA APPORTIONMENT OF CAPITAL
AND OPERATING ASSISTANCE FUNDS
FY 1978 Formula Apportionment

A program of Federal assistance to urban mass transportation systems through grants on a formula basis for capital or operating assistance was enacted on November 26, 1974. The program was established pursuant to Section 5 of the Urban Mass Transportation Act of 1964 (49 U.S.C. 1604), as amended by Section 103(a) of Pub. L. 93-503 (88 Stat. 1565; November 26, 1974), the National Mass Transportation Assistance Act of 1974. An aggregate amount of \$3.975 billion is authorized for this program for fiscal years 1975 through 1980.

The purpose of this Notice is to provide a formal list of amounts apportioned to urbanized areas in fiscal years 1976, Transition Quarter (TQ), 1977 and 1978. In fiscal year 1975, \$300 million was made available; in fiscal year 1976, an additional \$500 million was made available. The Transition Quarter and fiscal year 1977 apportionments were \$125 million and \$650 million respectively. The fiscal year 1978 apportionment will be \$775 million. These amounts are available for programming in the annual elements of Transportation Improvement Programs (TIP's) developed in accordance with 23 CFR Part 450 Subpart C and for subsequent filing of individual Section 5 project applications.

These apportioned funds remain available for obligation for two fiscal years following the year in which they are apportioned. Fiscal year 1975 funds will remain available only through September 30, 1977; therefore, those amounts have been removed from the following apportionment schedule.

For urbanized areas with a population of 200,000 persons or more, this Notice provides the formula factor weight and individual amounts for each apportionment. For urbanized areas with a population of under 200,000 persons, this Notice provides the formula factor

weight but aggregates the amounts for each State.

The factor weight is computed in accordance with the Section 5 formula described in an attachment to this Notice. The attachment also describes the rounding procedures used to assure that all funds are apportioned; such procedures are consistent with those printed in the July 1, 1976 FEDERAL REGISTER. If changes to the basic formula data are reported to UMTA by the United States Bureau of the Census, appropriate changes are made to the factor weights with respect to all apportionments subsequent to the reporting of the changes.

Amounts to be made available in subsequent fiscal years will be made known through notification in the FEDERAL REGISTER.

RICHARD S. PAGE,
Urban Mass Transportation
Administrator.

TECHNICAL APPENDIX: EXPLANATION OF APPORTIONMENT FORMULA AND DATA SOURCES

Section 5(b)(1) of the Urban Mass Transportation Act of 1964, as amended, directs the Secretary to apportion authorized funds on the basis of a formula under which urbanized areas would be entitled to receive an amount equal to the sum of:

"(A) One-half of the total amount so apportioned multiplied by the ratio which the population of such urbanized area or part thereof, . . . bears to the total population of all urbanized areas . . . ; and

"(B) One-half of the total amount so apportioned multiplied by a ratio for that urbanized area determined on the basis of population weighted by a factor of density, as determined by the Secretary."

The mathematical expression of the apportionment formula utilized to devise the attached allocation projects is as follows:

Factor Weight

$$= \left[\left(\frac{p_i}{\sum_{i=279}^N p_i} \right) + \left(\frac{p_i d_i}{\sum_{i=279}^N p_i d_i} \right) \right] \div 2$$

Where:

p = population of urbanized area.

d = population density of urbanized area.

i = i-th urbanized area case.

p = sum of the populations for 279 urbanized areas

calculated to equal 121,808,823.

pd = sum of the population times density products for 279 urbanized areas is calculated to equal 498,683,712,680.

In cases wherein the urbanized area is divided by two or more State boundaries, an apportionment factor weight is calculated for

the whole area. State allocation is made on the basis of the ratios of each State urbanized area component to the sum of all component population and population density values, and applying those ratios to the apportionment factors of the whole urbanized area.

The primary source of data was the Bureau of the Census Report of the County and City Data Book of 1972. Additional Bureau of the Census reports, PC(1) and HC(3) series, were consulted to verify data items and multi-state components.

Population densities are calculated by the Bureau of the Census on a land area to the nearest tenth of a square mile; land area is reported to the nearest whole square mile.

Due to significant number limitations in computation and printout, the various factor weight columns may not add to the printed totals. This also applies to the illustrational splits of the funds apportioned to multi-state urbanized areas over 200,000; the area total is the correct apportionment amount.

FY 1978 ROUNDING PROCEDURE

Though the factor weights have not been adjusted, the dollar apportionment of fiscal year 1978 funds has been adjusted so that the sum of fiscal year 1978 allocations to urbanized areas will add to \$500 million exactly. In addition, the assignment of amounts to portions of multi-state urbanized areas of over 200,000 population has been adjusted so that the sum of the parts is equal to the urbanized area total.

It should be noted that the unadjusted apportionment of fiscal year 1976 funds falls \$98 short of \$500 million. Therefore, the following rounding procedure was used for FY 1976. One dollar was added to each of the 98 largest urbanized areas (by population). For multi-state urbanized areas over 200,000 population the required adjustment to the multi-state split (never more than \$4) was spread equally among the state components except that all adjustments were in whole dollar increments with the first dollar of adjustment made to the first state cited.

TQ AND FY 1977 ROUNDING PROCEDURES

In the same manner the dollar apportionment of TQ and FY 1977 funds have been adjusted so that the sum of the allocations add exactly to \$125 million and \$650 million respectively. A similar rounding procedure to that described for FY 1976 rectified shortfalls in the unadjusted apportionments of \$131 in the TQ and \$159 in FY 1977.

FY 1978 ROUNDING PROCEDURES

In the same manner the dollar apportionment of FY 1978 funds has been adjusted so that the sum of the allocations add exactly to \$775 million. A similar rounding procedure to that described for FY 1976 rectified shortfalls in the unadjusted apportionment of \$42 in FY 1978.

[29 CFR Part 1990]

IDENTIFICATION, CLASSIFICATION AND
REGULATION OF TOXIC SUBSTANCES
POSING A POTENTIAL OCCUPATIONAL
CARCINOGENIC RISKAGENCY: The Occupational Safety and
Health Administration, Department of
Labor.ACTION: Proposed rule and notice of
hearing.

SUMMARY: The Occupational Safety and Health Administration (OSHA) proposes a new general regulation concerning the identification, classification and regulation of toxic substances in American workplaces that may pose a carcinogenic risk to workers.¹ This proposal is necessary to allow OSHA to deal in a comprehensive way with the important problem of worker exposure to many toxic substances which may be potential or confirmed occupational carcinogens. This broad rulemaking proceeding is intended to establish: new procedures and a regulatory framework for regulating exposures to potential occupational carcinogens; OSHA's scientifically based policies concerning the identification and classification of potential occupational carcinogens; and three model standards for use in specific rulemakings involving such substances. The three proposed model standards incorporate OSHA's views concerning which protective provisions are generally the most appropriate to protect employees permanently against exposure to categories of toxic substances, as defined, and, in the model emergency temporary standard, which protective provisions are necessary to protect employees from the danger of cancer and which can be instituted immediately. Once promulgated in this rulemaking therefore, these proposed procedures, identification and classification criteria, and, as qualified above, the provisions of the model standards will be consistently applied and, as discussed in this proposal, foreclosed from reconsideration in future regulatory activity pursuant to these proposed regulations.

OSHA invites written comment on these proposed regulations and all of the issues raised or implicit therein. In that regard, OSHA has scheduled an informal public hearing for the receipt of oral testimony as well, as pointed out below.

DATES: Written comments concerning the proposed set of regulations and notices of intention to appear at the hearing must be postmarked on or before December 8, 1977; all materials and direct written testimony of witnesses

¹ Later additional subparts to this Part may be added to include other generic approaches to other toxic substances, such as, for example, those posing a potential occupational teratogenic or mutagenic risk.

PROPOSED RULES

which will be introduced into the hearing record by any party must be filed by no later than January 9, 1978; an informal hearing is scheduled to begin March 14, 1978.

FOR FURTHER INFORMATION CON-
TACT:

Mr. James Foster, Office of Public Affairs, OSHA, Third Street and Constitution Avenue NW., Room N3641, Washington, D.C. 20210 (202-523-8151).

SUPPLEMENTARY INFORMATION: Pursuant to sections 6(b), 8(c), and 8 (g) of the Occupational Safety and Health Act of 1970 (the Act) (84 Stat. 1593, 1599, 29 U.S.C. 655, 657), the Secretary of Labor's Order 8-76 (41 FR 25059) and Title 29 of the Code of Federal Regulations (CFR), Part 1911, it is proposed to amend Title 29 of the CFR by adding at this time a new Part 1990, a subpart A to Part 1990 to deal with the identification, classification and regulation of toxic substances, in general, and a subpart B to Part 1990 to deal with the identification, classification and regulation of toxic substances, as defined, for which there is reported to be evidence of carcinogenic potential to humans. These regulations would apply to all employments in all industries covered by the Act, including general industry, construction, maritime and agriculture. OSHA requests the submission of written comments, data and arguments from interested persons on the variety of scientific, technical and procedural issues addressed or implicit in this proposal. In addition, an informal hearing has been scheduled to provide an opportunity for presentation of evidence concerning the issues and to facilitate the conduct of this rulemaking.

This proposed set of regulations attempts to deal with one of the most important issues OSHA faces, namely the exposure of workers to toxic substances which may be potential or confirmed occupational carcinogens. At the outset, OSHA recognizes that some 1,500 to 2,000 agents have been identified by the National Institute for Occupational Safety and Health (NIOSH) as being "suspect carcinogens" (*Suspected Carcinogens*, HEW Publication No. (NIOSH) 77-149, December, 1976). By definition, this means that NIOSH has found some scientific evidence, of varying degrees of quality and quantity, identifying those substances as having potential carcinogenic activity, based on observations in human populations or on results from experimentation with laboratory test animals. Yet, OSHA has completed regulatory activity for only 17 of those substances since its creation on April 29, 1971. OSHA recognizes that in regulating occupational exposure to potential carcinogens, many gaps remain in our knowledge of cancer, its causes, prevention and cure. However, to wait for years to resolve these issues scientifically without some consistent and workable system for the regulation of toxic substances, for which there is evidence of a carcinogenic potential to humans, would be, we believe, inconsistent with OSHA's statutory obligations and unacceptable to all.

Thus, OSHA proposes an orderly and comprehensive set of regulations to identify, classify and regulate potential carcinogens in American workplaces. This action is based upon three basic propositions, namely:

1. That the term "carcinogen," although perhaps difficult to define as a matter of science, must be defined for purposes of overall regulatory activity.

2. That a toxic substance, determined as a carcinogen in a mammalian test animal system, as defined, is to be treated as a policy matter as posing a carcinogenic risk to humans.

3. That when OSHA is dealing with a toxic substance, identified as a carcinogen, as defined herein, the permissible exposure limits will be set as low as feasible. In cases where there are suitable substitutes that are found to be less hazardous to the worker, no occupational exposure to the toxic substance will be permitted. In other words, unless there is evidence submitted in this rulemaking sufficient to convince the Secretary of Labor that this general policy is incorrect namely, that there is presently no means to determine a safe exposure level to a carcinogen, the permissible exposure limits will be set as low as feasible or occupational exposure will not be permitted in certain cases, both determinations to be made in the individual rulemakings conducted pursuant to this subpart.

In short, utilizing best available and generally accepted scientific knowledge to establish the carcinogenicity of a substance, OSHA proposes, in general, to rely on evidence from human epidemiological studies, adequately designed and conducted animal studies, or both. The degree of conclusiveness of such data may permit regulation of the toxic substance as a Category I toxic substance or a Category II toxic substance. This set of regulations also provides for the classification of toxic substances for which further development of data may be needed before any regulatory activity as to carcinogenicity is concerned (Category III Toxic Substances) or for toxic substances which OSHA believes are not found in American workplaces although the evidence shows that if they were, they would be classified pursuant to this subpart (Category IV Toxic Substances). The classifications of Category I and II toxic substances will require OSHA to initiate appropriate regulatory action, through the means of one or more of the three model standards, to control or eliminate exposure to the toxic substance, by way of engineering controls, work practices, respirators or simple housekeeping procedures. The content and format of these model standards, as pointed out below, are to be followed in subsequent rulemakings pursuant to this subpart, except where OSHA determines that unique properties of the toxic substance require deviations, additions or changes from the general requirements found in the model standards.

PROPOSED RULES

OSHA recognizes that some of the scientific concepts underlying this rulemaking may still be subject to controversy. Most, however, are not new but have, in fact, been the basis for policy decisions made, after scientific debate, by OSHA and other governmental agencies in the past. For example, see the preambles to OSHA's carcinogen standard, applicable to 14 selected substances, 29 CFR 1910.1003-1910.1016 (39 FR 3758), *aff'd*, *Synthetic Organic Chemical Manufacturers Assn. v. Brennan* 503 F. 2d 1155 (3rd Cir., 1974); the vinyl chloride standard, 29 CFR 1910.1017 (39 FR 35892) *aff'd*, *The Society of the Plastic Industry v. OSHA*, 509 F. 2d 1301 (2nd Cir.) *cert. den.*, 421 U.S. 992 (1975); the inorganic arsenic proposal (40 FR 3392, 1975); the coke oven emissions proposal (40 FR 32268, 1975) and final, 29 CFR 1910.1029 (41 FR 46742, 1976); the asbestos proposal (40 FR 47652, 1975); the beryllium proposal (40 FR 48814, 1975) and the benzene emergency temporary standard, 29 CFR 1910.1028 (42 FR 22516, 1977).

In addition to previous OSHA regulatory decisions, the United States Environmental Protection Agency (EPA), the Food and Drug Administration (FDA) of the Department of Health, Education, and Welfare, the United States Consumer Product Safety Commission (CPSC) and other governmental agencies and bodies have made, or recommended, regulatory decisions concluding that substances pose carcinogenic risks to man, based primarily or solely upon evidence derived from studies conducted in laboratory animal populations. In particular, decisions made by EPA regarding the cancellation or suspension of certain chlorinated hydrocarbon pesticides involved extensive consideration of carcinogenicity based on laboratory animal data. See, for example: *In Re Stevens Industries, et al.*, (37 FR 13369, June 30, 1972), *aff'd*, *Environmental Defense Fund (EDF) v. EPA*, 489 F. 2d 1247 (D.C. Cir. 1973); *In Re Shell et al.*, (39 FR 37265, Oct. 18, 1974), *aff'd*, *EDF v. EPA*, 510 F. 2d 1292 (D.C. Cir. 1975); and *In Re Velsicol et al.*, (41 FR 7552, 1976) *aff'd*, *EDF v. EPA*, 548 F. 2d 998 (D.C. Cir. 1976). And FDA, in its decision to order the elimination of chloroform from human drug and cosmetic products, relied explicitly on data supplied by National Cancer Institute (NCI) experiments showing chloroform to be carcinogenic in test animals (41 FR 15026-29, April 9, 1976 and 41 FR 26842-46, June 29, 1976).

OSHA expects that some may question the policy decisions inherent in this proposal as going too far, while others may contend that they do not go far enough. OSHA believes, however, that all concerned should approach these issues in a spirit of co-operation and candor—and with the recognition that policy determinations in a legal framework cannot be based solely upon scientific fact where often factual data are incomplete. But, insofar as the central issue of whether exposure to carcinogens should be regulated, we believe that the time has come

to say that at least this issue has been resolved. In that regard, we agree with the scientific blue ribbon Ad Hoc Committee on the Evaluation of Low Levels of Environmental Chemical Carcinogens of NCI, when it reported over seven (7) years ago in 1970 to the Surgeon General of the United States that:

An effective program to protect man from the mass of environmental cancer hazards is within reach. No more time should be allowed to pass before the recommendations set forth in this report are applied to reality. (p. 8)

Thus, we propose today a system for regulatory action which will assure, we believe, an internal consistency in regulating carcinogens and a speedy approach which will limit the size and scope of OSHA's rulemakings which have grown far beyond the ability of OSHA's staff to handle by the present case-by-case approach.

In proposing these regulations, OSHA is relying upon leading scientific evidence and opinions believed to reflect the research conclusions of individual cancer specialists and expert national and international cancer committees and agencies, as well as "experience gained under . . . other health and safety laws" (section 6(b)(5) of the Act). In such a task we recognize that we are operating "on the frontiers of scientific knowledge" *Industrial Union Department v. Hodgson*, 499 F. 2d 467, 474 (D.C. Cir. 1974) but with a "command to act" *Ethyl Corp. v. EPA*, 541 F. 2d 1, 28 (D.C. Cir. 1976). In this proposal, OSHA relies therefore, upon what it believes to be the best available and prudent evidence, interpretations and theories. Once these regulations are promulgated, OSHA is prepared to modify the views therein if new evidence or future scientific advances show we are in error.² But if we are, we hope that the error was in being too careful and overly protective of the worker, for the alternative would appear to be unacceptable to all concerned.

THE REGULATORY DILEMMA

Any decision to regulate carcinogens is obviously complex. As the cancer rate increases, the causes elude us. Chemical or physical agents known or suspected to pose a risk of carcinogenicity in humans pose certain problems unique to the regulation of toxic materials in the workplace which are discussed below. And with the increasing number of environmental chemicals, the number of carcinogens also increases, together with the size and complexity of OSHA's rulemakings. However, in its six year history,

² OSHA will not, however, modify its policies in actions taken subsequent to the promulgation of, and pursuant to, these regulations. Efforts in that regard should be addressed to the amendment of these regulations, as is warranted from time to time, as advances in science are made. OSHA, at no time, intends or believes that these regulations are scientifically inflexible or fail to recognize future scientific advances that may occur. OSHA will encourage petitions for amendments to these regulations, including the model standards, as conditions so warrant.

OSHA has concluded only 4 rulemaking proceedings in the health area, namely the asbestos standard in 1972, the carcinogen standard in January 1974 (regulating 14 substances), the vinyl chloride standard in October 1974 and the coke oven emissions standard in October 1976.

A. NATURE OF THE DISEASE

Cancer is a particularly dreaded and costly disease. As pointed out below, the natural course of its development is generally irreversible and autonomous. It is a disease generally characterized in its advanced stages by the aggressive growth of abnormal (immature) populations of cells. The early cellular events of the disease and the causative factors leading to initiation of the disease are poorly understood, although much progress has been made as a result of intensive research for several decades. There also is evidence—though not definitive—that at least some cancers may originate from a single transformed cell.

In any case, once the initial carcinogenic events have been triggered, the resulting aberrant cells are capable of progressing to stages where normal tissue is invaded, and cancerous cells are capable of spreading throughout the body, even though the agent or agents responsible for inducing the disease may be no longer present. Most body structures are composed of many different kinds of tissues made up of many different types of cells, any of which may give rise to cancer. A specific type of cancer draws its name generally from the type of cell affected. For example:

Cancer of connective tissue, including bones, are generally called sarcomas.

Cancer of epithelial cells that line the body's internal surfaces and cover the external surfaces (lung, breast, skin) are generally called carcinomas.

Cancer of cells that compose the blood-forming system are generally called leukemias or lymphomas.

In most cases of cancer, unrestrained cell growth leads to the buildup of tumors which compress, invade, and/or destroy normal tissues; if untreated, these tumors usually lead to death. Like cells, there are different types of tumors, each of which may be distinct in its behavior. However, induced malignant tumors generally share some common characteristics such as a long latent period between initial exposure and manifestation of the disease, as pointed out below. Some other characteristics may also include a higher rate of cell growth than in the normal, surrounding tissues, failure to maintain the boundaries of normal tissue and organs, a microscopic appearance which suggests immature rather than mature tissues, and a tendency in the human to spread to parts of the body distant from the original site of the cancer. Not all these features however accompany every malignant tumor.

It also appears that the effects of continuous or occasional exposure to different carcinogenic agents may be cumulative or synergistic, as pointed out below. The development of cancer can take as long as five to forty years before the

disease progresses to the point where detection is possible. Thus, cancer seen today may be due to exposure occurring as little as five or as many as forty or more years ago as pointed out below.

B. THE INCREASE IN CANCER AND ITS MASSIVE ECONOMIC, SOCIAL AND EMOTIONAL IMPACT

Only a few generations ago, human life expectancy was less than 40 years. Today, however, human life expectancy and general health conditions prevailing in developed countries such as the United States reflect a striking—and comparatively recent—improvement over those that characterized most of man's long history.

Throughout the 19th century, the prime life limiting factor in this country was infectious disease. Since 1900 however, public health measures and medicine have made remarkable contributions to human longevity in the United States. A man born in Massachusetts in 1850 had a life expectancy of 38.3 years; a woman, of 40.5 years. As the decades passed, life expectancy at birth inched upward—by 1900 a man could expect to live to 46 years and a woman to nearly 50. (U.S. Bureau of the Census, *Historical Statistics of the United States, Colonial Times to 1957* (Washington, D.C.: Government Printing Office, (1960), Series B76-100.) Today, such expectancy is much greater with rates approaching 80 years of age.

A comparison of leading causes of death in 1900 with those in 1960 reveals a noteworthy shift in disease patterns. At the turn of the century, infectious diseases—pneumonia, influenza, tuberculosis, gastroenteritis and poliomyelitis—were the leading killers, accounting for over 31 percent of all deaths. Owing to such medical advances as the development of immunization techniques and antibiotics, tuberculosis and gastroenteritis are no longer significant causes of death in the United States; diphtheria, typhoid fever and poliomyelitis have been nearly eliminated, and even influenza and pneumonia have declined in significance to one-seventh of their previous level.

On the other hand, heart disease and cancer—the fourth and eighth leading causes of death, respectively, in 1900 now lead the nation's list of killers. In 1900, these two diseases were responsible for only 12 percent of deaths; today, they account for more than one-half of U.S. mortality. Annual crude death rates from heart disease rose from 137.4 per 100,000 population in 1900 to 362 in 1970, while deaths from cancer rose in that same period of time from 64 per 100,000 population to 162.8 and to 171.5 in 1975. (President's Science Advisory Committee Panel on Chemicals, *Chemicals and Health* (Washington, D.C.: Government Printing Office, 1973), p. 152; U.S. Department of Health, Education, and Welfare, Public Health Service, *Facts of Life and Death*, DHEW Pub. No. (HRA) 74-1222 (Washington, D.C.: Government Printing Office, 1974), p. 31.)

Some increase in the number of cancer deaths may have been predicted on the

basis of demographic factors, such as general aging of the population, and hence on the success of medicine in reducing the significance of infectious diseases. Another unquantifiable portion is undoubtedly traceable to improved reporting methods, i.e., some deaths from cancer in earlier times were mistakenly ascribed to other causes. Even after these factors have been taken into account, however, the death rate for cancer sharply exceeds predictions.

Cancer killed a reported 358,400 U.S. citizens in 1974—over 1,000 persons per day. Over one million are under treatment for the disease, and each year over 900,000 new cases are diagnosed. Of these, about one-third are skin cancers: Troublesome, sometimes painful, usually treatable, with an impact on life expectancy for about 2,000 humans per year; the other 600,000, however, are more serious and more of them are potentially fatal. The American Cancer Society now estimates that 25 percent of the United States' population will ultimately develop some form of cancer. (U.S. Department of Health, Education and Welfare, *Monthly Vital Statistics Report: Annual Summary for the United States*, Vol. 21, No. 13 (1975); U.S. Department of Health, Education and Welfare, National Institutes of Health, *National Cancer Program: The Strategic Plan*, DHEW Pub. No. (NIH) 74-569 (Washington, D.C.: Government Printing Office, 1973); American Cancer Society, *Cancer Facts and Figures* (New York, 1974).)

The economic and social impacts of cancer in the United States are massive and yet hard to estimate. Certainly the human anguish is. Those impacts, however, are very real. An estimated \$1.8 billion per year is spent solely for hospital care of cancer patients. Additional costs, doctor bills, outpatient therapy, and other treatment-related fees, raise the direct annual expenditures for cancer well into the tens of billions of dollars. To these direct expenditures must be added indirect costs, such as the estimated 1.8 million work years lost annually to the national economy and to family income by unemployed or underemployed cancer victims. (U.S. Public Health Service, *Cancer Rates and Risks*, Pub. No. (NIH) 75-619 (Washington, D.C.: Government Printing Office, 1975, p. 3). One estimate cited by the General Accounting Office of the United States Congress (GAO) is that the annual cost of cancer is \$15 billion, of which \$3-5 billion is attributable to direct care and treatment and the remainder attributed to the loss of earning power and productivity (GAO, "Federal Efforts to Protect the Public From Cancer Causing Chemicals Are Not Very Effective", June 16, 1976, p. 1). This estimate is supported by a study prepared by NCI with information on the economic costs of cancer to the United States, and to individual patients' families in particular. See "The National Cancer Program, the Strategic Plan," January 1973 ed.

Cancer rates vary significantly through the United States. In general, however,

States with high rates are the more industrialized States. It has long been known that densely populated and industrialized areas have higher death rates from many causes than nearby rural areas. Although urbanization and industrialization have been associated with heart disease, cancer of the respiratory and digestive systems, and many other diseases, the reasons for this association are not fully understood. This excess disease risk may be related to lifestyle (urban dwellers use more tobacco, for example), to occupation (working with toxic substances), to the environment of cities (air pollution and water pollution), or to other factors as yet unidentified, as well as combinations thereof.

C. THE RECOGNITION THAT THE DEVELOPMENT OF CANCER IS INFLUENCED BY ENVIRONMENTAL AND OCCUPATIONAL FACTORS

Most of the details of how and why cancers develop still elude scientists and physicians, so that the exact causative mechanisms of observed malignancies cannot be well defined. But a number of factors appear to be implicated, both separately and in combination, for many observed cancers.

Among the causes of cancer, those most prominent are believed to be traceable to environmental factors acting singularly or in conjunction with genetic or other susceptibilities. It should be remembered that the extensive exposure to cancer-causing environmental factors is relatively new in the history of man. Today, there is growing acceptance that 60 to 90 percent of all cancer may be related to environmental factors. (See, for example: World Health Organization, *Prevention of Cancer*, Technical Report Series 276 (Geneva, 1974); E. Boyland, "The Correlation of Experimental Carcinogenesis and Cancer in Man," *Progress in Experimental Tumor Research*, Vol. 11 (1969), pp. 222-34; S. S. Epstein, "Environmental Determinants of Human Cancer," *Cancer Research* Vol. 34 (1974), pp. 2425-35). The basis for the estimates largely derives from large community studies over extended periods of time, which have revealed wide geographical variations in the incidence of cancer of various organs. Specific examples include, among others, diet, the large component of cancer attributable to cigarette smoking, those resulting from exposures to chemicals in the workplace, and cancers from physical agents such as solar and ionizing radiation and asbestos and those caused by aflatoxins (a class of naturally occurring chemicals secreted by some molds on certain foodstuffs, such as peanuts).

The extent to which the observed incidence and rise in incidence of cancers are attributable to manmade chemicals cannot be estimated with any precision. The tragic effects, however, are evident. Recognition by cancer specialists that many, if not most, human cancers are influenced by environmental factors is of extraordinary significance to OSHA—it means that occupational cancers may be preventable if the causative agents

can be identified and human exposure to them eliminated or minimized.

Only some of these manmade agents have been identified. Unfortunately, our nation's capacity in the past to develop new chemical substances far exceeded its ability to determine their carcinogenic potential and, as pointed out, OSHA's ability to promulgate standards in any speedy fashion solely by way of the case-by-case approach. In the past 10 years, the production of synthetic organic chemicals has expanded by 255 percent; relatively few of the new compounds have been studied for their cancer-causing potential. Because of the typical latency period of 5-40 years for cancer in humans, we must assume that any increase in cancer which may have been initiated by recent industrial development is not yet observable. (Wilhelm C. Hueper, "Medicolegal Considerations of Occupational and Nonoccupational Environmental Cancers," Chapter 7 in *Lawyers Medical Cyclopedia*, Irving J. Sellikoff and E. Cuyler Hammond, "Environmental Cancer in the Year 2000," presented at the Seventh National Cancer Conference, Los Angeles, Sept. 29, 1972).

D. MOST TOXIC MATERIALS APPEAR NOT TO BE CARCINOGENS EVEN AT HIGH DOSES

As additional studies are reported of the carcinogenicity of substances representing a wide range of chemical structures and used for a variety of purposes, there has been tendency for some to suspect that all chemicals are capable of causing cancer if administered to experimental animals at sufficiently high doses. This claim appears to be based on the belief that carcinogenesis is a non-specific kind of biological process associated with any substance under the right conditions, namely that test animals, bred for their sensitivity to carcinogens, when fed maximum tolerated doses of a substance for their lifetime become very ill and may be more susceptible to carcinogenic effects. However, there is evidence that renders this suspicion very unlikely to be true.

A publication of the U.S. Department of Health, Education, and Welfare compiles and abstracts all substances tested for carcinogenic effects. ("Survey of Compounds Which Have Been Tested For Carcinogenic Activity," Volumes I-VII (1947-1976)). Although these volumes are not intended to provide a critical evaluation of the data on each of the substances, only about 17 percent of over 6,000 were reported as showing tumorigenic effects and this in spite of the fact that most of the compounds were selected because of their suspicious nature.

In a study sponsored by NCI from 1965 to 1968 and performed by the Biometrics Research Laboratories under contracts PH 43-64-57 and PH 43-67-735, approximately 130 pesticide and industrial chemicals were tested for carcinogenic activity. Pesticide chemicals, of course, are known to possess high biological activity as demonstrated by their use as pesticides. In addition, the substances tested in the Biometrics study were selected on the basis of a number of cri-

teria, among which were: (1) Published evidence of toxicity that suggested potential hazards to man and (2) the similarity between possible test substances and substances of known carcinogenic activity. Each substance was fed to both sexes of two strains of mice at a maximum tolerated dose determined at a young age* by continuous oral administration with both positive and negative controls for 18 months. Despite weighting in the choice of test substances, less than 10 percent of the substances tested definitely produced tumorigenic effects and most of the others gave no evidence of carcinogenicity. (J.R.M. Innes et al., "Bioassay of Pesticides and Industrial Chemicals for Tumorigenicity in Mice: A Preliminary Note," *J. Natl. Cancer Inst.* 42, 1101-14, 1969.)

Furthermore, it has been recognized for many years that the negative findings of carcinogenic bioassays are often not published and are even rejected for publication (Report of the Panel on Carcinogenicity, Int. Union Against Cancer, "Carcinogenicity Testing," edited by I. Berenblum, IUAC Geneva, 1969). Thus, the percentage of substances tested for carcinogenic activity and found positive may be even lower than present data indicate.

During the hearings to consider the intent of the Administrator of the U.S. Environmental Protection Agency to cancel the registration of pesticides aldrin and dieldrin, testimony was presented concerning this proposition. The then Associate Director for Carcinogenesis of the Division of Cancer Cause and Prevention at NCI, Dr. Umberto Saffottil, testified:

Not all chemicals can cause cancers, contrary to some ill-informed belief; in fact, only a relatively small proportion of the chemical species that have been studied are capable of such activity. The activity is dependent on a number of specific chemical and physical properties of the molecules, which are gradually brought to light. It can be expected that, when thousands of new environmental chemicals will be tested, only a few hundred, or maybe just a few dozen, will be found to be carcinogenic, and it will be possible to concentrate our preventive measures on those. (Exhibit 40 of the EPA Public Hearings concerning the cancellation of the pesticide registrations of Aldrin and Dieldrin, 1973, pp. 7-8).

Thus, the available evidence provides strong indication indeed that not all chemicals are capable of causing cancer and that only a small number of the total is so capable. This apparent fact has also been recognized by two Administrators of EPA. In the DDT cancellation pro-

*It should be noted that use of this maximum tolerated dosage was the basis for criticism by one member of the Mark Commission's Technical Panel on Carcinogenicity as being less than the maximum tolerated dose once the animals reached maturity and therefore might mean that at higher dose levels, carcinogenic effects could have been observed for more substances. (Report of the Secretary's Commission on Pesticides and the Relationship to Environmental Health, U.S. Department of Health, Education, and Welfare, Nov. 1969, p. 483).

ceeding. *In Re Stevens Industries, et al.*, EPA IFR Docket No. 63 et al., 37 FR 13369 (1972), *aff'd*, *EDF v. EPA*, 489 F. 2d 1247 (D.C. Cir. 1973). Administrator William D. Ruckelshaus stated:

The 'everything is cancerous' argument fails because it ignores the fact that not all chemicals fed to animals in equally concentrated doses have produced the same tumorigenic results. (37 FR 13371)

Likewise, in the Aldrin and Dieldrin suspension proceeding, *In Re Shell Chemical Co. et al.*, EPA FIFRA Docket No. 145, 39 FR 37265 (1974) *aff'd*, *EDF v. EPA*, 510 F. 2d 1292 (D.C. Cir. 1975), Administrator Russell E. Train stated:

Carcinogenicity is a relatively rare phenomenon exhibited by only a few of the many hundreds of thousands of chemicals. (39 FR 37268)

And in ordering the suspension of the pesticides Heptachlor and Chlordane in *In Re Velsicol Chemical Co. et al.*, EPA FIFRA Docket No. 384, 41 FR 7572 (1976), *aff'd*, *EDF v. EPA*, 548 F. 2d 998 (D.C. Cir. 1976), Administrator Train stated:

Finally, I have noted some tendency, not entirely absent from the record, to assert that any chemical, if fed in sufficiently large amounts, will cause cancer in test animals. This is not true. A study sponsored by the National Cancer Institute tested 140 pesticides and industrial chemicals in two strains of mice, and less than ten percent of these were found to be carcinogenic. (41 FR 7575)

E. LATENCY AND IRREVERSIBILITY OF EFFECT

Another very troubling problem to the regulation of chemical carcinogens is posed by two biological characteristics of cancer that are well established and that distinguish it from other processes of chronic toxicity. These are the general irreversibility of effect and the generally long latent period between exposure to the carcinogen and manifestation of the effect, namely the tumor.

1. *Irreversibility.* The reasons underlying the irreversibility of effect are fundamental to the understanding of the mechanisms of chemical carcinogenesis. The effect under consideration is the induction of a critical change in the target cells which determines their subsequent growth as tumor cells. The specific molecular target of a carcinogen within a cell is not yet fully identified, although it is known that carcinogens can interact directly with the genetic material of the cells (DNA), as well as with other molecules that control cellular functions (RNA and proteins).

Once a cell has been switched ("transformed") from its normal status to a neoplastic one, this cell can replicate and produce neoplastic daughter cells. Only a few initially transformed neoplastic cells may be sufficient to give rise to a growing tumor. There is experimental evidence that even a single cell can be transformed by chemicals to produce

*For instance, see I. B. Weinstein, N. Yamaguchi, R. Gebert, and M. E. Kaighn, "Use of Epithelial Cell Cultures for Studies on the Mechanism of Transformation by Chemical Carcinogens," *In Vitro*, 11, 130-141 (1975).

a malignant tumor.³ It is consistent with our knowledge of carcinogenesis that a relatively small number of molecules may be sufficient to initiate a neoplastic change in a target cell. Following such an initial event, exposure to the carcinogen is no longer required to maintain the initial alteration that leads ultimately to a cancer cell, which is then capable of autonomous growth. Thus a single biological event produced by a very small number of molecules of the carcinogen may be sufficient to initiate the irreversible development of a tumor. As the Ad Hoc NCI Committee's report to the Surgeon General stated in 1970:

The effects of carcinogens on tissues appear irreversible. Exposure to small doses of a carcinogen over a period of time results in a summation or potentiation of effect. The fundamental characteristic which distinguishes the carcinogenic effect from other toxic effects is that the tissues affected do not seem to return to their normal condition. This summation of effects in time and the long interval (latent period) which passes after tumor induction before the tumor becomes clinically manifest demonstrate that cancer can develop in man and in animals long after the causative agent has been in contact and disappeared. (p. 2)

2. *Long latent period.* The other important characteristic of the carcinogenic effect is that it is a *delayed effect*, one where the manifestation (the appearance of a tumor) follows the causative exposure by a long period of time, called the latent period, during which the action of the carcinogen on the host, although already effected, cannot currently be detected. In man, as well as in experimental animals, the latent period of chemical carcinogens is often as long as a major portion of a lifetime. It has been found to be as long as 15, 20, 30 or more years in man, while it is usually from 1 to 2 years or even more in rodents, which live up to two or three years. In most cases the latent period for human carcinogenesis is 5 to 40 years. In case histories of human exposure to chemical carcinogens with such long latent periods, such as cigarette smoke or asbestos, conclusive epidemiological findings were not available until 20 or more years after the start of exposure, by which time large numbers of persons had been exposed and a substantial cancer epidemic had been caused. Thus, as pointed out below, the significance of the long latent period for chemical carcinogenesis is that it is *impractical and imprudent to wait for results of epidemiological studies in man*; prevention of chemical carcinogenesis in man requires identification of the carcinogens by experimentation in laboratory animals with a short lifetime and a correspondingly short latent period for tumor induction. As the Ad Hoc NCI Committee's report to the Surgeon General stated:

³ P. J. Flakow, "The Origin and Development of Human Tumors Studied with Cell Markers," *New England Journal of Medicine* 291, 26-35 (1974); S. M. Gartler, "Utilization of Mosaic Systems in the Study of the Origin and Progression of Tumors," in: J. German (ed.), *Chromosomes and Cancer*, pp. 317-352. (1973).

It is, therefore, important to realize that incidences of cancer in man today reflect exposure of 15 or more years ago; similarly, any increase of carcinogenic contaminants in man's environment today will reveal its carcinogenic effect some 15 or more years from now. For this reason, it is urgent that every effort be made to detect and control sources of carcinogenic contamination of the environment well before damaging effects become evident in man. . . . Environmental cancer remains one of the major disease problems of modern man. (p. 2)

And, as Administrator Russell Train of EPA pointed out in *In Re Velsicol*, *supra*:

. . . the latency periods for cancer-inducing chemicals tend to be long (in the tens of years), so that what results there are from the study of human exposure are difficult to gather and may well appear too late to save people from an already widespread chemical to which they are unavoidably exposed. (41 FR 7575)

F. KNOWN HUMAN CARCINOGENS ARE ALSO CARCINOGENS IN ANIMALS

At least 28 chemical substances or mixtures are known to cause cancer in man; in most cases this knowledge is derived from epidemiological studies. With one or possibly two exceptions, all of these are known to cause cancer in experimental animals. In the text of a review published by Dr. U. Saffioti:

"Over one thousand chemical substances have been shown to be carcinogenic by tests in animals (although some of the 'positive' tests reported in the literature—particularly the older ones—are not quite satisfactory by present standards). Several individual chemicals or mixtures of chemicals have also been shown conclusively to be carcinogenic by direct observation in man (Table 1). With the exception of arsenic, still under experimental study, all the main products that were found to be carcinogenic by direct evidence in man have also been proven carcinogenic in animals. On the other hand, proof that a substance, which had been recognized as carcinogenic in animals, actually causes cancer in man would require in most cases extremely complex and lengthy epidemiologic studies. In many cases, it may be impossible to obtain such proof because of the complexity of controls that would be needed for a satisfactory demonstration. Therefore, the only prudent course of action at the present state of our knowledge is to assume that chemicals which are carcinogenic in animals could also be so in man, although the direct demonstration in man is lacking. (U. Saffioti, "The laboratory approach to the identification of environmental carcinogens," in Scholefield, P.G. (Ed.), *Proceedings of the Ninth Canadian Cancer Research Conference 1971*, pp. 23-26; University of Toronto Press 1972.)

In a report by a Committee of the National Research Council (Contemporary Pest Control Practices and Prospects, Vol. 1, 1975: "NRC Pest Control"), published data on 13 compounds known to also cause cancer in man are tabulated: 12 of them are known to also cause cancer in mice, rats, and/or hamsters (NRC Pest Control, pp. 67-73).

Notwithstanding the difficulty of identifying specific carcinogens affecting man, about a dozen agents are now recognized as human carcinogens. All of these but one are definitely carcinogenic in tests on laboratory animals, as indicated in Table 4. The only exception is arsenic, which is still under test on animals. It may be noted that the organs af-

fected in man are not always the same as those that are found to develop tumors in laboratory animals, nor is the organ specifically the same in different species of rodents. Nevertheless, the evidence, based on a limited number of carcinogens, suggests that most agents that pose a carcinogenic threat to man will be carcinogenic in laboratory tests on animals. (NRC Pest Control, p. 68)

The NRC Committee also tabulated numerical data on the doses of these chemicals associated with increased cancer incidence (*ibid.*, pp. 75-81, Table 5). They found an approximate correspondence between the sensitivities of humans and rodents when they were compared on the basis of cumulative lifetime exposure:

Thus, as a working hypothesis, in the absence of countervailing evidence for the specific agent in question, it appears reasonable to assume that the lifetime cancer incidence induced by chronic exposure in man can be approximated by the lifetime incidence induced by similar exposure in laboratory animals at the same total doses per body weight. (*ibid.*, p. 82)

The reliance of EPA on animal test data, and other similar principles set forth herein, as indicating human carcinogenic potential has been judicially approved. For example, in referring, albeit, to an adjudicatory proceeding concerning the suspension of a pesticide, the United States Court of Appeals stated in *EDF v. EPA* (Velsicol) 548 F. 2d 998, 1006-07 (D.C. Cir. 1976):

We start by rejecting Velsicol's argument that the 'cancer principles' EPA relied on in structuring its analysis of the mice and rat studies improperly biased the agency's open-minded consideration of the evidence. In brief form, the principles accept the use of animal test data to evaluate human cancer risks; consider a positive oncogenic effect in test animals as sufficient to characterize a pesticide as posing a cancer risk to man; recognize that negative results may be explained by the limited number and sensitivity of the test animals as compared to the general human population; note that there is no scientific basis for establishing a no-effect level for carcinogens; and view the finding of benign and malignant tumors as hazard to man given the increasing evidence that many 'benign' tumors can develop into cancer. The Agency's reliance on these principles did not come as a surprise to Velsicol; they were included in the Administrator's Notice of Intent to Suspend; and as recognized in *EDF v. EPA*, 167 U.S. App. D.C. at 77-78, 510 F. 2d at 1298-99, form part of the Agency's 'scientific expertise.' Velsicol was properly given an opportunity to put in evidence contesting those principles, but failed to demonstrate anything more than some scientific disagreement with respect to them. Velsicol's principal complaint—that mice are inappropriate test animals—was specifically rejected by the Administrator, citing statements by the National Academy of Sciences' Food Protection Committee, the World Health Organization, HEW's Commission on Pesticides and their Relationship Environmental Health, FDA Advisory Panel on Carcinogenesis, International Agency for Research on Cancer, and Director of the National Cancer Institute's Carcinogenesis Program. Unlike the failure to adduce critical methodology that we criticized in *International Harvester*, EPA's specific enunciation of its underlying analytic principles, derived from its experience in the area, yields meaningful notice and dialogue, enhances

the administrative process and furthers reasoned agency decisionmaking" (omitting footnotes).

G. THE LEGAL MANDATE AND THE REGULATORY APPROACH

The primary purpose of the Act is to assure, so far as possible, safe and healthful working conditions for every American employee over the period of his or her working lifetime. One means prescribed by Congress to achieve this goal is the mandate given to, and the concomitant authority vested in, the Secretary of Labor to set mandatory safety and health standards. The Act provides specifically that:

The Secretary, in promulgating standards dealing with toxic materials or harmful physical agents under this subsection, shall set the standard which most adequately assures to the extent feasible, on the basis of the best available evidence, that no employee will suffer material impairment of health or functional capacity even if such employee has regular exposure to the hazard dealt with by such standard for the period of his working life. Development of standards under this subsection shall be based upon research, demonstrations, experiments, and such other information as may be appropriate. In addition to the attainment of the highest degree of health and safety protection for the employee, other considerations shall be the latest available scientific data in the field, the feasibility of standards, and experience gained under this and other health and safety laws. (Section 6(b)(5)).
